This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

My Lord,

NOW at length present to your
Lordship those Papers I had drawn
up concerning a Real Character,
and a Philosophicall Language;
which by severall Orders of the So-
ciety have been required of Me. I
have been the longer about it, partly
because it required some considerable time to reduce the
Collections I had by me to this purpose, into a tolerable or-
der; and partly because when this work was done in
Writing, and the Impression of it well nigh finished, it
hapned (amongst many other better things) to be burnt
in the late dreadfull Fire; by which, all that was Print-
ed (excepting only two Copies) and a great part of the
unprinted Original was destroyed: The repairing of
which, hath taken up the greatest part of my time ever
since. I mention this by way of Apology for that slack-
ness and delay, I may seem to be guilty of in my obedience
to your Orders.

I am

The EPISTLE

I am not so vain as to think that I have here completely finished this great undertaking, with all the advantages of which such a design is capable. Nor on the other hand, am I so diffident of this Essay, as not to believe it sufficient for the business to which it pretends, namely the distinct expression of all things and notions that fall under discourse.

I am sensible of sundry defects in the severall parts of this Book: And therefore would make it my humble motion to your Lordship and this Society, that you would by your Order appoint some of our number, thoroughly to examin & consider the whole, and to offer their thoughts concerning what they judge fit to be amended in it. Particularly in those Tables that concern the species of Natural bodies; which, if they were (so far as they are yet known and discovered) distinctly reduced and described, This would very much promote and facilitate the knowledg of Nature, which is one great end of your Institution. And besides, the ranging of these things into such an order as the Society shall approve, would afford a very good method for your Repository, both for the disposal of what you have already, and the supplying of what you want, towards the compleating of that Collection, so generously begun of late, by the bounty of Mr. Daniel Collwal, a worthy Member of this Society. And by this means, I should not doubt, but that in a very short space, you would have the most usefull Repository in the World.

It is no easie undertaking to Enumerate all such matters as are to be provided for in such a design; But the business of Defining, being amongst all others the most nice and difficult, must needs render it a very hard task for any one to attempt the doing of this, for all kinde of
Things,

Things, Notions, and Words, which yet is necessary to the design here proposed.

Upon which account I may be excused for being so solicitous about the assistance of others in these matters, because of their great difficulty and importance. The compleating of such a design, being rather the work of a College and an Age, then of any single Person: I mean, the combined Studies of many Students, amongst whom, the severall shares of such a Work should be distributed; And that for so long a course of time, wherein sufficient experiments might be made of it by practice.

It has been sayd concerning that famous Italian Academy styled de la Crusca, consisting of many choice Men of great Learning, that they bestowed forty years in finishing their Vocabulary. And 'tis well enough known, that those great Wits of the French Academy, did begin their Dictionary in the year 1639. And for the hastning of the Work, did distribute the parts of it amongst severall Committees; and yet that undertaking is (for ought I can understand) far enough from being finished.

Now if those famous Assemblies consisting of the great Wits of their Age and Nations, did judge this Work of Dictionary-making, for the polishing of their Language, worthy of their united labour and studies; Certainly then, the Design here proposed, ought not to be thought unworthy of such assistance; it being as much to be preferred before that, as things are better then words, as real knowledge is beyond elegancy of speech, as the general good of mankind, is beyond that of any particular Countrey or Nation.

I am very sensible that the most usefull inventions do at their first appearance, make but a very slow progress in the World, unless helped forward by some particular advantage

The E P I S T L E

vantage. Logarithms were an Invention of excellent Art and usefulness; And yet it was a considerable time, before the Learned Men in other parts, did so farr take notice of them, as to bring them into use. The Art of Shorthand, is in its kind an Ingenious device, and of considerable usefulness, applicable to any Language, much wondered at by Travailers, that have seen the experience of it in England: And yet though it be above Threescore years, since it was first Invented, 'tis not to this day (for ought I can learn) brought into common practice in any other Nation. And there is reason enough to expect the like Fate for the design here proposed.

The only expedient I can think of against it, is, That it be sent abroad into the World, with the reputation of having bin considered and approved of, by such a Society as this; which may provoke, at least, the Learned part of the World, to take notice of it, and to give it such encouragement, as it shall appear to deserve.

And if upon such an amendment and recommendation by this Society, the design here proposed, should happen to come into common use, It would requite the Honour you bestow upon it, with abundant Interest. The being Instrumental in any such discovery as does tend to the Universal good of Mankind, being sufficient not only to make the Authors of it famous, but also the Times and Places wherein they live.

He that knows how to estimate, that judgment inflicted on Mankind in the Curse of the Confusion, with all the unhappy consequences of it, may thereby judge, what great advantage and benefit there will be, in a remedy against it. Men are content to bestow much time and pains in the Study of Languages, in order to their more easy conversing with those of other Nations. 'Tis said

said of Mithridates King of Pontus, that he was skilled in Two and twenty several Tongues, which were spoken in the several Provinces under his Dominion: Which, tho it were a very extraordinary attainment, yet how short a remedy was it against the Curse of the Confusion, considering the vast multitude of Languages that are in the World.

Besides that most obvious advantage which would ensue, of facilitating mutual Commerce, amongst the several Nations of the World, and the improving of all Natural knowledge; It would likewise very much conduce to the spreading of the knowledge of Religion. Next to the Gift of Miracles, and particularly that of Tongues, powred out upon the Apostles in the first planting of Christianity, There is nothing that can more effectually conduce to the further accomplishment of those Promises, which concern the diffusion of it, through all Nations, then the design which is here proposed.

To which it will be proper for me to add, That this design will likewise contribute much to the clearing of some of our Modern differences in Religion, by unmasking many wild errors, that shelter themselves under the disguise of affected phrases; which being Philosophically unfolded, and rendered according to the genuine and natural importance of Words, will appear to be inconsistencies and contradictions. And several of those pretended, mysterious, profound notions, expressed in great swelling words, whereby some men set up for reputation, being this way examined, will appear to be, either nonsense, or very flat and jejune.

And tho it should be of no other use but this, yet were it in these days well worth a mans pains and study, considering the Common mischief that is done, and the many
b
impostures

impostures and cheats that are put upon men, under the disguise of affected insignificant Phrases.

But what ever may be the issue of this attempt, as to the establishing of a real Character, and the bringing of it into Common use, amongst several Nations of the World (of which I have but very slender expectations;) yet this I shall assert with greater confidence, That the reducing of all things and notions, to such kind of Tables, as are here proposed (were it as compleatly done as it might be) would prove the shortest and plainest way for the attainment of real Knowledge, that hath been yet offered to the World. And I shall add further, that these very Tables (as now they are) do seem to me a much better and readier course, for the entering and training up of men in the knowledge of things, then any other way of Institution that I know of; which I should not presume to assert, before such able Judges as those of this Society, were it not a thing I had well considered and were convinced of.

I have nothing further to add, but only the declaring myself to be most Zealously devoted to the Honour and Welfare of the Royal Society,

And particularly (My Lord,)

Your Lordships most

Humble Servant,

J O. V V I L K I N S.

T O T H E R E A D E R.

IT may perhaps be expected by some, that I should give an account of my engaging in a Work of this nature so unsuitable to my Calling and Business.

For the satisfaction of such, they may please to take notice, that this Work was first undertaken, during that vacancy and leisure which I formerly enjoyed in an Academical Station, to which the endeavours of promoting all kind of usefull knowledge, whereby Learning may be improved, is a very suitable employment. In the time of that daily and intimate converse which I then enjoyed, with that most Learned and excellent Person Dr. Seth Ward, the present Bishop of Salisbury. I had frequent occasion of conferring with him, concerning the various Desiderata, proposed by Learned men, or such things as were conceived yet wanting to the advancement of several parts of Learning; amongst which, this of the Universal Character, was one of the principal, most of which he had more deeply considered, than any other Person that I knew. And in reference to this particular, he would say, That as it was one of the most usefull, so he judged it to be one of the most feasible, amongst all the rest, if prosecuted in a regular way. But for all such attempts to this purpose, which he had either seen or heard of, the Authors of them did generally mistake in their first foundations; whilst they did propose to themselves the framing of such a Character, from a Dictionary of Words, according to some particular Language, without reference to the nature of things, and that common Notion of them, wherein Mankind does agree, which must chiefly be respected, before any attempt of this nature cou'd signifie any thing, as to the main end of it.

It was from this suggestion of his, that I first had any distinct apprehension of the proper course to be observed, in such an undertaking; having in a Treatise I had published some years before, proposed the Hebrew Tongue as consisting of fewest Radicals, to be the fittest ground work for such a design.

Besides

The EPISTLE

Besides the many Private conferences to this purpose, I must not forget to mention, that Publique account which he hath given to the World, of his thoughts upon this Subject, in that Learned and Ingenious discourse styled *Vindiciæ Academicarum*; wherein he endeavours to Vindicate those Ancient and famous Schools of Learning, from such reproaches, whereby some Ignorant and ill-natured men (taking the advantage of those bad Times) would have exposed them to contempt and ruine. In which Treatise there is mention made of some considerable preparations, towards the Design here proposed, which if his other necessary imployments would have permitted him to have prosecuted, would without doubt, long ere this, have been advanced to as great a Perfection, as the first Essay in so difficult a matter could have attained.

It was some considerable time after this, before I had any thought of attempting any thing in this kind: The first occasion of it was, from a desire I had, to give some assistance to another person, who was willing to ingage in this design of framing a real Character, from the Natural notion of things; for the helping of whom in so worthy an undertaking, I did offer to draw up for him, the Tables of Substance, or the species of Natural Bodies, reduced under their severall Heads; which I did accordingly perform, much after the same Method, as they are hereafter set down: Though in the doing of it, I found much more labour and difficulty, then I expected, when I undertook it. But he for whom I had done this, not liking this method, as being of too great a Compass, conceiving that he could sufficiently provide for all the chief Radicals, in a much briefer and more easy way, did not think fit to make use of these Tables. Upon which, being my self convinced, That this which I had begun, was the only course for the effecting of such a work, and being withal unwilling to loose so much pains as I had already taken towards it, I resolved (as my leisure would permit) to go on with the other Tables of Accidents. And when after many reviews and changes I had reduced (as well as I could) into these Tables, all simple things and notions, by a Consideration of them *à Priori*, I then judged it necessary to attempt the reduction of all other Words in the Dictionary to these Tables; either as they were Synonymous to them, or to be defined by them, which would be a means to try the fulness of these Tables, and consequently to supply their defects; And besides a great help to Learners, who without such a direction, might not perhaps at first be able to find out the true place and notion of many Words.

For the farther compleating of this Work, I found it necessary to take into consideration, the framing of such a Natural Grammar, as might be suited to the Philosophy of Speech, abstracting from those many unnecessary rules belonging to instituted Language; which proved a matter of no small difficulty, considering the little help to be had for it, from those few Authors who had before undertaken to do any thing in this kind.

In the doing of these things, I have not neglected any help that I could procure from others, and must acknowledge my self much ingaged to sundry Learned Men of my acquaintance, for their directions, and furtherance in such matters, as were most suitable to their severall Studies and Professions.

Amongst the rest, I must not forget to make particular mention of the special assistance I have received, in drawing up the Tables of Animals
from

To the R E A D E R.

from that most Learned and Inquisitive Gentleman, a worthy Member of the Royal Society, Mr. Francis Willoughby, who hath made it his particular business, in his late Travails through the most considerable parts of Europe, to inquire after and understand the several species of Animals, and by his own Observations is able to advance that part of Learning, and to add many things, to what hath been formerly done, by the most Learned Authors in this kind.

And as for those most difficult Tables of Plants, I have received the like assistance, from one of his Companions in Travail, Mr. John Wray, Late Fellow of Trinity Colledge in Cambridge, who besides his other general Knowledge, hath with great success applied himself to the Cultivating of that part of Learning.

And as for the principal difficulties, which I met with in any other part of this Work, I must acknowledge myself obliged to the continual assistance I have had, from my most Learned and worthy Friend, Dr. William Lloyd, then whom (so far as I am able to judge,) this Nation could not have afforded a fitter Person, either for that great Industry, or Accurate judgment, both in Philological, and Philosophical matters, required to such a Work. And particularly I must wholly ascribe to him that tedious and difficult task, of setting the Tables to the Dictionary, and the drawing up of the Dictionary itself, which upon tryal, I doubt not, will be found to be the most perfect, that was ever yet made for the English Tongue.

And here I think it prpoer to give notice that there are several Words mentioned in the Dictionary, and frequently used amongst some Authors, which are yet very questionable as to their fitness and propriety: Each of these were in the Original Coppy marked with an Asterisk, for the better distinction of them; but by some oversight, these marks have been omitted in the Impression.

If any shall suggest, that some of the Enquiries here insisted upon (as particularly those about the Letters of the Alphabet) do seem too minute and trivial; for any prudent Man to bestow his serious thoughts and time about. Such Persons may know, that the discovery of the true nature and Cause of any the most minute thing, doth promote real Knowledge, and therefore cannot be unfit for any Mans endeavours, who is willing to contribute to the advancement of Learning. Upon which Account some of the most eminent Persons, in several Ages, who were Men of business, have not disdained to bestow their pains about the First Elements of Speech.

Julius Cæsar, is said to have written a Book de Analogia. And the Emperour Charles the Great, to have made a Grammar of his vulgar Tongue. So did St. Basil for the Greek; and St. Austin for the Latin, both extant in their Works.

Besides divers of great reputation both Ancient and Modern, who have Written whole Books on purpose, concerning the just Number of the Letters in the Alphabet; Others have applied their disquisitions to some particular Letters: Messala Corvinus, a Great Man, and a famous Orator amongst the Romans, Writ a Book concerning the Letter S. Adamantius Martyr, was the Author of another Book, concerning the Letters V. and B. Our Learned Gataker has Published a Book concerning Diphthongs. And Jovianus Pontanus esteemed a Learned Man, hath Two Books de Adspiratione, or the Letter H.

Mr.

The EPISTLE, &c.

*Mr. Franklyn hath published a particular Discourse concerning Accents,
And Erycius Puteanus hath Written a Book purposely, De Interpunctione,
of the true way of Pointing Clauses and Sentences. And these Generally
well esteemed for their great usefulness in the Promoting of Learning: Which
may be a sufficient Vindication against any Prejudices of this Nature.*

C H A P. I.

- I. *The Introduction.* II. *The Original of Languages.* III. *The first Mother-tongues.* IV. *Their several Off-springs.*

IN the handling of that subject, I have here p. I. proposed to treat of, I shall digest the things which to me seem most proper and material to be said upon this occasion, into four parts; according to this following Method.

In the first Part I shall premise some things as *Præcognita*, concerning such Tongues and Letters as are already in being, particularly concerning those various *defects* and *imperfections* in them, which ought to be *supplied* and *provided against*, in any such Language or

Character, as is to be invented according to the rules of Art.

The second Part shall contain that which is the great foundation of the thing here designed, namely a regular *enumeration* and *description* of all those things and notions, to which marks or names ought to be assigned according to their respective natures, which may be styled the *Scientifical Part*, comprehending *Universal Philosophy*. It being the proper end and design of the several branches of Philosophy to reduce all things and notions unto such a frame, as may express their natural order, dependence, and relations.

The third Part shall treat concerning such helps and Instruments, as are requisite for the framing of these more simple notions into continued Speech or Discourse, which may therefore be styled the *Organical* or *Instrumental Part*, and doth comprehend the Art of Natural or *Philosophical Grammar*.

In the fourth Part I shall shew how these more generall Rules may be applyed to particular kinds of Characters, and Languages, giving an instance of each. To which shall be adjoyned by way of *Appendix*, a Discourse shewing the advantage of such a kind of Philosophical Character and Language, above any of those which are now known, more particularly above that which is of most general use in these parts of the World; namely, the *Latine*.

Lastly, There shall be added a *Dictionary* of the English tongue, in which shall be shewn how all the words of this Language, according to

B

the

the various equivocal senses of them, may be sufficiently expressed by the Philosophical Tables here proposed.

I begin with the first of these.

§. II. The design of this Treatise being an attempt towards a *new* kind of *Character* and *Language*, it cannot therefore be improper to premise somewhat concerning those already *in being*; the first *Original* of them, their several *kinds*, the various *changes* and *corruptions* to which they are liable, together with the manifold *defects* belonging to them. This I shall endeavour to do in the former part of this Discourse.

There is scarce any subject that hath been more thoroughly scanned and debated amongst Learned men, than the *Original* of *Languages* and *Letters*. 'Tis evident enough that no one Language is *natural* to mankind, because the knowledge which is natural would generally remain amongst men, notwithstanding the superinduction of any other particular Tongue, wherein they might be by *Art*. Nor is it much to be wondred at, that the ancient Heathen, who knew nothing of Scripture-revelation, should be inclined to believe, that either *Men* and *Languages* were *eternal*; or, that if there were any particular time when men did spring out of the Earth, and after inhabit alone and dispersedly in Woods and Caves, they had at first no Articulate voice, but only such rude sounds as Beasts have; till afterwards particular Families increasing, or several Families joyning together for mutual safety and defence, under Government and Societies, they began by degrees and long practice to consent in certain Articulate sounds, whereby to communicate their thoughts, which in several Countries made several Languages, according to that in the Poet,

Horat. lib. 1.
Sat. 3.

*Cum prorepserunt primis animalia terris,
Mutum & turpe pecus, glandem atque cubilia propter
Unguibus & pugnīs, dein sustibus, atque ita porro
Pugnabant armis, quæ post fabricaverat usus,
Donec verba quibus voces sensusque notarent
Nominaque invenire; dehinc absistere bello,
Oppida ceperunt munire, & ponere leges,
Ne quis fur esset, neu latro, neu quis adulter, &c.*

But to us, who have the revelation of Scripture, these kind of scruples and conjectures are sufficiently stated. And 'tis evident enough that the first Language was *con-created* with our first Parents, they immediately understanding the voice of God speaking to them in the Garden. And how Languages came to be *multiplied*, is likewise manifested in the Story of the *Confusion of Babel*. How many Languages, and which they were that sprang up at that Confusion, is altogether uncertain; whether many of them that were then in being, be not now wholly lost; and many others, which had not the same original, have not since arisen in the world, is not (I think) to be doubted.

Gen. 11. 1, 6.

The most received Conjecture is, that the Languages of the Confusion were according to the several Families from *Noah*, which were 70 or 72. though there be very strong probabilities to prove that they were not so many, and that the first Dispersion did not divide mankind into so many

many Colonies. But now the several Languages that are used in the world do farre exceed this number. *Pliny* and *Strabo* do both make mention of a great Mart-Town in *Colchos* named *Dioscuria*, to which men of three hundred Nations, and of so many several Languages, were wont to resort for Trading. Which, considering the narrow compass of Traffick before the invention of the magnetic Needle, must needs be but a small proportion, in comparison to those many of the remoter and unknown parts of the world.

Nat. Hist. lib. 6. cap. 5. *Strabo*, lib. 11.

Some of the *American* Histories relate, that in every fourscore miles of that vast Country, and almost in every particular valley of *Pernu*, the Inhabitants have a distinct Language. And one who for several years travelled the Northern parts of *America* about *Florida*, and could speak six several Languages of those people, doth affirm, that he found, upon his enquiry and converse with them, more than a thousand different Languages amongst them.

Mr. *Cambden's* Remains.

Parchas Pilg. lib. 8. sect. 4. chap. 1.

As for those Languages which seem to have no derivation from, or dependance upon, or affinity with one another, they are styled *Lingue matricæ*, or *Mother-tongues*. Of these *Joseph Scaliger* affirms there are eleven, and not more, used in *Europe*; whereof four are of more general and large extent, and the other seven of a narrower compass and use. Of the more general Tongues:

§. III.

Diatrise de *Europæorum* linguæ.

1. The *Greek* was anciently of very great extent, not onely in *Europe*, but in *Asia* too, and *Africa*, where several Colonies of that Nation were planted; by which dispersion and mixture with other people it did degenerate into several *Dialects*. Besides those four that are commonly noted, the *Doric*, *Ionic*, *Æolic*, *Attic*, *Herodotus* doth mention four several *Dialects* of the *Ionic*. The inhabitants of *Rhodes*, *Cyprus*, *Crete*, had each of them some peculiarity in their Language. And the present *Coptic* or *Egyptian* seems, both from the words and the character, to be a branch of this family, and was probably spread amongst that people in the days of *Alexander* the Great, upon his conquering of them: Though some conceive that there were at least 30000 families of *Greeks* planted in that Country long before his time.

Brerewood's Enquiries, chap. 1.

2. The *Latin*, though this be much of it a derivation from the *Greek*, (of which the now *French*, *Spanish*, and *Italian* are several off-springs and derivations) had anciently four several *Dialects*, as *Petrus Crinitus* shews out of *Varro*.

De honesta disciplina, lib. 3. cap. 3.

3. The *Tentonic* or *German* is now distinguished into *Upper* and *Lower*. The *Upper* hath two notable *Dialects*. 1. The *Danish*, *Scandian*, or perhaps the *Gothic*, to which belongs the Language used in *Denmark*, *Norway*, *Swedeland*, and *Island*. 2. The *Saxon*, to which appertain the several Languages of the *English*, the *Scots*, the *Frisians*, and those on the North of *Elve*.

Verlegens chap. 7.

4. The *Slavonic* is extended, though with some variation, through many large Territories, *Muscovia*, *Russia*, *Poland*, *Bobemia*, *Vandalia*, *Croatia*, *Lithuania*, *Dalmatia*; and is said to be the vulgar Language used amongst 60 several Nations.

Gesner. *Mithridates*, cap. 21.

The Languages of lesser extent are, 1. The *Albanese*, or old *Epirotic*, now used in the mountainous parts of *Epirus*.

2. The *European Tartar*, or *Scythian*, from which some conceive our

Irish to have had its original. As for the *Turkish* Tongue, that is originally no other but the *Asiatic Tartar*, mixed with *Armenian* and *Persian*, some *Greek*, and much *Arabic*.

3. The *Hungarian*, used in the greatest part of that Kingdom.

4. The *Finnic*, used in *Finland* and *Lapland*.

5. The *Cantabrian*, used amongst the *Biscainers*, who live near the Ocean on the *Pyrene* hills, bordering both upon *France* and *Spain*.

6. The *Irish*, in *Ireland*, and from thence brought over into some parts of *Scotland*. Though Mr. *Camden* would have this to be a derivation from the *Welsh*.

7. The old *Gaulish* or *British*, which is yet preserved in *Wales*, *Cornwall*, and *Britain* in *France*.

Enquiries,
chap. 4.

To this number Mr. *Brerewood* doth add four others, *viz.*

1. The *Arabic*, now used in the steep mountains of *Granata*; which yet is a *Dialect* from the *Hebrew*, and not a *Mother-tongue*.

2. The *Cauchian*, in *East-Friseland*.

3. The *Illyrian*, in the Isle of *Veggia*.

4. The *Fazygian*, on the North side of *Hungary*.

§. IV.

Besides this difference of Languages in their first derivation, every particular Tongue hath its several *Dialects*. Though *Judea* were a region of a very narrow compass, yet was it not without its varieties of this kind: witness the story concerning *Shibboleth* and *Sibboleth*; and that of the *Levite*, who was discovered by his manner of speech; and *S. Peter's* being known for a *Galilean*. 'Tis so generally in other Countries, and particularly with us in *England*, where the Northern and Western inhabitants do observe a different *dialect* from other parts of the Nation, as may appear from that particular instance mentioned by *Verstegan*. Whereas the inhabitants about *London* would say, *I would eat more cheefe if I had it*. A Northern man would speak it thus, *Ay sud eat mare cheefe gyn ay had et*. And a Western man thus, *Chud eat more cheefe an chad it*.

Judges 12.
Judges 18.3.
Matth. 26.73.

Every one of these reputed Mother-tongues, except the *Arabic*, (and perhaps the *Hungarian*) was used in *Europe* during the time of the *Roman* Empire. But whether they were all of them so ancient as the Confusion of *Babel*, doth not appear; there wants not good probability to the contrary for some of them.

Georg. Hornii
Epist. in Box-
hornii Origines
Gallic.

It hath been the opinion of some, particularly *Boxhornius*, that the *Scythian* Tongue was the common mother from which both the *Greek*, *Latin*, *German* and *Persian* were derived, as so many *Dialects*; and 'tis said that *Salmasius* did incline to the same judgment. And *Philip Cluverius* conjectures, that both *Germans*, *Gauls*, *Spaniards*, *Britans*, *Swedes* and *Norwegians*, did anciently use one and the same Language. One principal argument used for this is, the agreement of those remote Nations in some radical words. *Joseph Scaliger* observes that the words, *Father*, *Mother*, *Brother*, *Bond*, &c. are used in the *Persian* tongue, with some little variety, in the same sense and signification as they are used with us. And *Busbequius* relates, that the inhabitants of *Taurica Chersonesus* have divers words in the same sense common with us, as *Wine*, *Silver*, *Corn*, *Salt*, *Fish*, *Apple*, &c. But this might be merely casual, or else occasioned by a mixture of Colonies, and will not argue a derivation of one from another.

In Epist.

another. - So there are several words common to the *Turks, Germans, Greeks, French*, sometimes of the same, and sometimes of several significations; which is not sufficient to argue that all these were of the same Original.

Bosborn. Origin. Gallic. cap. 6. & 8.

Besides these *European*, there is likewise great variety of Languages in other parts of the world. As for the *Hebrew Tongue*, which is by many learned men supposed to be the same that *Abraham* learnt when he came into *Canaan*, to which that expression *Isai. 19. 18. The language of Canaan*, is thought to allude; this is supposed to be the first *Mother tongue* amongst all those that are now known in the world, from which there are sundry *derivations*, as the *Chaldee, Syriac, Punic, Arabic, Persian, Ethiopic*.

When the *Jews* were in Captivity at *Babylon*, mixed with the *Chaldeans* for 70 years, in that tract of time they made up a Language distinct from both, which is sometimes called *Syriac*, and sometimes *Chaldee*, and sometimes *Hebrew*. Those passages in the Gospel, which are said to be in the *Hebrew* tongue, as *Talitha Kumi; Elobi, Elobi, Lamma Sabachthani*, are properly *Syriac*; onely they are called *Hebrew*, because that was the Language which the *Hebrews* then used. A great part of this *Syriac* tongue is for the *substance* of the words *Chaldee*, and *Hebrew* for the *fashion*, so degenerating much from both. After the Captivity the pure *Hebrew* ceased to be *vulgar*, remaining onely amongst learned men, as appears by that place in *Nehem. 8. 7, 8.* where we find the Priests, upon reading of the Law to the people after their coming out of *Babylon*, were fain to expound it distinctly to them, and to make them understand the meaning of it; the common people, by long disuse, being grown strangers to the Language wherein 'twas written. So in our Saviour's time, the unlearned *Jews*, whose vulgar Tongue the *Syriac* was, could not understand those parts of *Moses* and the *Prophets* read to them in *Hebrew* every Sabbath-day. Which was the reason of those public speeches and declarations of any learned men, who occasionally came into the Synagogues, after the reading of the Law: though neither Priests, nor Levites, nor Scribes, yet was it ordinary for them to expound unto the people the meaning of those portions of Scripture that were appointed to be read out of the *Hebrew*, which the people did not understand; and to render their meaning in *Syriac*, which was their *vulgar* Tongue.

Ererwood's Enquiries, chap. 9.

John 5. 2. & 19. 13, 17. Acts 2. 1. 40. Bochart. Geog. 1. 1. cap. 15.

Luke 4. 15, 16. Acts 13. 15.

As for so much of the pure *Hebrew* as is now in being, which is onely that in the old Testament, though it be sufficient to express what is there intended, yet it is so exceedingly defective in many other words requisite to humane discourse, that the Rabbins are fain to borrow words from many other Languages, *Greek, Latin, Spanish, &c.* as may appear at large in *Buxtorf's Lexicon Rabbinicum*, and a particular Discourse written to this very purpose by *David Cohen de Lara*. And, from the several defects and imperfections which seem to be in this Language, it may be guessed not to be the same which was con-created with our first Parents, and spoken by *Adam* in *Paradise*.

What other varieties of Tongues there have been, or are, in *Asia, Afric, or America*, I shall not now enquire.

CHAP.

CHAP. II.

- I. Concerning the various changes and corruptions to which all vulgar Languages are obnoxious. II. Particularly concerning the changes of the English tongue. III. Whether any Language, formerly in use, be now wholly lost. IV. Concerning the first rise and occasion of new Languages.

Q. I.

There are three Queres which may deserve some farther disquisition. 1. Whether the purest of those *Mother-tongues*, which yet remain, be not now much changed from what they were at the first Confusion. 2. Whether and how any of the *Mother-tongues* have been quite lost since the Confusion. 3. Whether and how other new Languages have since arisen in the world.

1. To the first, Besides the common fate and corruption to which Languages as well as all other humane things are subject, there are many other particular causes which may occasion such a change: The mixture with other Nations in Commerce; Marriages in Regal Families, which doth usually bring some common words into a Court fashion; that affectation incident to some eminent men in all ages, of coining new words, and altering the common forms of speech, for greater elegance; the necessity of making other words, according as new things and inventions are discovered. Besides, the Laws of forein Conquests usually extend to Letters and Speech as well as Territories; the Victor commonly endeavouring to propagate his own Language as farre as his Dominions; which is the reason why the *Greek* and *Latin* are so universally known. And when a Nation is overspread with several Colonies of foreiners, though this do not a lwaies prevail to *abolish* the former Language, yet if they make any long abode, this must needs make such a considerable *change* and *mixture* of speech as will very much alter it from its original Purity.

Those *learned* Languages which have now ceased to be *vulgar*, and remain onely in Books, by which the purity of them is regulated, may, whilst those Books are extant and studied, continue the same without change. But all Languages that are vulgar, as those learned ones formerly were, are upon the fore-mentioned occasions, subject to so many alterations, that in tract of time they will appear to be quite another thing then what they were at first.

Brewer's
Enquiries,
chap. 2. & 6.

The Liturgies of *S. Basil* and *S. Chrysofom*, which are yet used in the *Greek* Churches in their publick worship, the one for *solemn*, the other for *common* days, have been a long time unintelligible to that people; so much is the *vulgar* *Greek* degenerated from its former purity.

Histor. lib. 3.

And *Polibius* testifies, that the Articles of truce betwixt the *Romans* and *Carthaginians* could scarce be understood by the most learned *Roman* Antiquaries 350 years after the time of their making.

Q. II.

Alex. Gill Lo-
gonom. An-
glican. Pre-
face.

If any *English* man should now write or speak as our forefathers did about six or seven hundred years past, we should as little understand him as if he were a foreiner; of which it were easie to give several proofs by

by instance, if it were not inconsistent with my present design of brevity. What the *Saxons* Language was at their first arrival into *England* about the year 440, doth not appear; but 'tis most probable that the *changes* and *differences* of it, have been somewhat proportionable in several Ages.

About the year of Christ 700 the Lord's Prayer in *English* was thus rendred:

Uren fader thic arth in heofnas, sic gehalgud thin noma: to cymeth thin ric: sic thin willa sue is in heofnas and in eortho. Uren hlaf ofer wirtlic sel us to daeg; and forgef us scylda urna, sue we forgefes scyldgum urum; and no inlead usith in custnung. Ah gefrig urich from ifle. Amen.

Camden's Remains, pag. 23.

About 200 years after, it was changed thus:

Thu ure fader the eart on heofenum. Si thin nama gehalgot. Cum thin ric. Si thip willa on eorthen swa, swa on heofenum. Syle us to dæg urn dægthanlican hlaf. And forgif us ure gyltas swa, swa we forgifath tham the with us agyltath. And ne led the us on costnung. Ac alys us from yfle. Si it swa.

Liste's Saxon Monuments.

About the same time it was rendred in the Saxon Gospels, said to be Translated by King *Alfred*, after this manner.

Fæder ute thu the earth on heofenum, si thin nama Gehalgot to be cume thin Rice, Gewurthe thin willa on eorthan swa swa on heofnum, urne ge dægthanlican hlaf syle us to dæg. And forgyf us ure gyltas, swa swa we forgivath urum gyltendum. And ne gelædde thu us on costnung. Ac Alyse us of yfle.

About 260 years after, in the time of King *Henry* the 2^d, it was rendred thus, and sent over by Pope *Adrian*, an *English*-man, turned into traeter, that the people might more easily learn and remember it.

Ure fadyr in headen rich,
Thy name be hallyed ever lich,
Thou bring us thy michell blisse:
Als hit in heaven y-doe,
Euar in yearth beene it also.
That holy bread that lasteth ay,
Thou lend it ous this like day,
Forgiwe ous all that we have don,
As we forgiwet uch other mon:
Ne let ous fall into no founding,
Ac shield ous fro the fowle thing. Amen.

And about a hundred years after, in the time of *Henry* the third, it was rendred thus:

Fader that art in heavin blisse,
Thii helge nam it wurth the blisse,
Cumen and mot thy kingdom,
Thin holy will it be all don,
In heaven and in erdh also,
So it shall bin full well Ic tro:
Gif us all bread on this day,
And forgif us ure sinnes,
As we do ure wolder winnes:
Let us not in founding fall,
Dac fro'evil thu slyd us all. Amen.

Abote

About two hundred years after this in the time of *Henry* the VI. (as appears by a large manuscript Volume Bible in the *Oxford-Library*, said to have been this Kings, and by him to have been given to the *Carthusians* in *London*;) It was rendered thus.

Oure fadir that art in hevenes, halewid be thi name, thi kingdom come to thee, be thi wil don in eerthe, as in hevене, give to us this day oure breed over othre substanc, and forgive to us oure dettis, as we forgiven oure dettouris, and lede us not into temptation, but deliver us from ivel. Amen.

In another M. S. of *Wickliffes* Translation, who lived in *Richard* the 2^{ds} time, it is rendered with very small difference from this.

About a hundred years after this, In a Bible set forth with the Kings licens, translated by *Thomas Mathew*, and printed in the year 1537, it was rendered thus:

O oure father which arte in hevén halowed be thy name. Let thy kingdome come. Thy will be fulfilled, as well in erth, as it is in heaven, Geve us this daye oure dayly bred. And forgeve us our trespases, even as we forgeve oure trespassers. And lead us not into temptacion, but deliver us from evyll. Amen.

After the same manner it is rendered in the Translation of *William Tyndall*, with some little differences in the spelling.

This one instance may sufficiently manifest by what degrees this Language did receive its several Changes, and how much altered it is now from what it *hath been*, and consequently what is to be expected in *future times*. Since Learning began to flourish in our Nation, there have been more then ordinary Changes introduced in our Language: partly by new artificial *Compositions*; partly by *enfranchising* strange forein words, for their elegance and significancy, which now make one third part of our Language; and partly by *refining* and *mollifying* old words, for the more easie and graceful sound: by which means this last Century may be conjectured to have made a greater change in our Tongue, then any of the former, as to the addition of new words.

And thus, in all probability, must it have been with all other *vulgar* Languages. So that 'tis not likely that any of these *Mother-tongues* now in being, are the same that they were at the first Confusion. So true is that of the Poet:

Horat. de arte
poëtica.

*Ut sylvæ foliis pronos mutantur in annos,
Prima cadunt; ita verborum vetus interit ætas,
Et, juvenum ritu, florent modo nata vigentque.
Debemur marti nos nostræque---*

And a little after,

*Multa renascentur quæ jam cecidere, cadentque
Quæ nunc sunt in honore vocabula, si volet usus;
Quem penes arbitrium est, & vis, & norma loquendi.*

§. III.

2. As to the second Quere, Whether any of the Ancient Languages be now quite lost; it may be answered, That if in some few hundreds of years a Language may be so *changed* as to be scarce intelligible; then, in a much longer tract of time it may be quite *abolished*, none of the most radical and substantial parts remaining: For every *change* is a *gradual corruption*.

Before

Before the flourishing of the *Roman Empire*, there were several native Languages used in *Italy, France, Spain*. In *Italy* we read of the *Messapian*, the *Hebruscan*, the *Sabine*, the *Oscan*, the *Hebrurian* or *Tuscan* Languages; which are now thought by Learned men to be utterly lost, and nowhere to be found in the World.

Lindov. Voss
Annot. in *Augusti. Civ. Dei.*
lib. 19. cap.
17.

'Tis probable that there was not onely one Language in so vast a Territory as *Franco*, but that several Provinces spake several Languages: But what those Languages were, or whether yet extant, is uncertain. As for the *Celts*, who, inhabiting the inner part of the Country, were less subject to forein mixtures, 'tis most probable that their Language might be the *British* or *Welsh*, which is yet spoken in some parts of *France*. *Cæsar* reports that the *Gauls* were wont often to pass over into *Britain*, to be instructed by the *Druids*, amongst whom there was then no use of Books or Writing, and therefore they must communicate by Discourse. And *Tacitus* affirms that the Speech of the *British* and *Gauls*, differed but little.

De Bello Gal-
lico, lib. 6.

It is conceived that one of the ancient Tongues of *Spain* was the *Cantabrian*, which doth now there remain in the more barren mountainous, inaccessible parts, where Conquerors are less willing to pursue, or desirous to plant; as our *British* doth in *Wales*. But 'tis probable that there might be several other Languages besides this in so great a Continent, as well as in *Italy*, which are now wholly lost and unknown.

3. As to the third Quere, concerning the first Rise and occasion of new Languages, that may be sufficiently answered by what was before suggested, concerning those many particular emergencies which may contribute to the introducing a change in Languages. § IV.

Some think that the *Italians, Spaniards* and *French*, after they were totally subdued by the *Romans*, and planted with their Colonies, did, after a certain space of time, receive the *Latin* Tongue as their most vulgar Speech, and retained it; till afterwards, being several times overrun by the Northern barbarous Nations, the *Goths* and *Vandals*, and other Tribes of the *Germans*, who mixed with them, and after several Conquests resided amongst them, sometimes 20, 60, 200 years together; this afforded time enough for such a thorough coalition betwixt them and the Natives, as could not but introduce a great change in the common Language, whilst the Nations were forced to attemper their Speech for the mutual understanding of one another.

Others conceive that those Countries did not at first perfectly receive the *Latin* from the *Romans*, but did onely make use of the most principal radical words; neglecting the Grammatical rules of composition and inflection, and withall varying the way of pronunciation, according to the unusualness and difficulty of several sounds to several Countries: And that this was the first and chief occasion of those various *Medleys* or several *Dialects* now in use; which were afterwards somewhat farther changed from their Originals, by those several Inundations of the *Barbarians*.

'Tis not much material to dispute, which of these causes had the principal influence in the extraction of these modern Tongues, so long as 'tis granted that both of them might contribute and suffice for this effect. As for our present *English*, this seems to be a mixture of the *British, Roman,*

man, Saxon, Danish, Norman, according to the several vicissitudes of Plantations and Conquests, that this Nation hath undergone. And according as such Conquests have been more or less compleat and absolute, so have the *Languages* been more or less generally altered: which is the reason why the *Saxon* Tongue was by our progenitors more fully introduced in *England*, then either that of the *Franks* amongst the *Gauls*, or that of the *Goths* or *Lumbards* in *Italy*, or that of the *Goths*, *Vandals* or *Moors* in *Spain*.

That which seems to be the *newest* Language in the World, is the *Malayan*, which is now as general and common amongst the Natives of the *East-Indies*, as *Latin* or *French* is in these parts of the World. 'Tis said to be but of late invention, occasioned by the concurrence of Fishermen from *Pegu*, *Siam*, *Bengala*, and several other Nations, who meeting together at a place convenient for Fishing, and finding that it was by situation exceeding commodious for Traffick from several parts, did agree to settle there a Plantation; and accordingly built the Town of *Malacca*, which hath since, for many years, been governed by the *Portuguez*, and is now under the power of the *Hollander*. And, for the more facil converse with one another, they agreed upon a distinct Language, which probably was made up by selecting the most soft and easy words belonging to each several Nation. And this is the onely Language (for ought I know) that hath ever been at once *invented*; if it may properly be styled a distinct Language, and not rather a *Medley* of many. But this being invented by rude Fishermen, it cannot be expected that it should have all those advantages, with which it might have been furnished by the rules of Philosophy.

I know that the Learned *Golius* doth affirm the *China* Language to be invented by *Art*; but, upon the best discovery to be made of it at this distance, from those who have lived many years in that Country, and pretend to understand the Language, it appears to be so exceedingly *equivocal*, and in many respects so very *imperfect*, that there is little reason to believe it had any such Original.

§. I.

Tuscul. Qu.
lib. 1.

HAVING laid down this brief and general View of *Languages*, 'tis requisite that something should be also premised concerning *Letters*, the *Invention* of which was a thing of so great Art and exquisiteness, that *Tully* doth from hence infer the divinity and spirituality of the humane *soul*, and that it must needs be of a farr more excellent and abstracted Essence than mere Matter or Body, in that it was able to reduce all articulate sounds to 24 *Letters*.

Though

Though the Scripture doth not mention any thing concerning the invention of these; yet 'tis most generally agreed, that *Adam*, (though not immediately after his Creation, yet) in process of time, upon his experience of their great necessity and usefulness, did first invent the ancient *Hebrew* Character: whether that which we now call the *Hebrew*, or else the *Samaritan*, is a question much debated by several Learned men, which I shall not now inquire into, or offer to determine.

As for those particular *Alphabets* which are by some ascribed to *Adam*, *Enoch* and *Noah*, mentioned by several Authors, and in a late Discourse by *Thomas Bangius*, they have so little foundation in any probable reason or story, that I shall not so much as make any farther mention of them.

It hath been abundantly cleared up by many Learned men, that the ancient *Hebrew* Character hath the *priority* before any other now known; which is confirmed by the concurrent testimony of the best and most ancient Heathen Writers. And 'tis amongst rational arguments none of the least, for the Truth and Divine Authority of Scripture, to consider the general concurrence of all manner of evidence for the Antiquity of the *Hebrew*, and the derivation of all other Letters from it.

Pliny affirms in one place, that the first invention of Letters ought to be ascribed unto the *Affrians*; and in another place he saith, that under the name of *Syria* he understands the Regions which were styled *Palestine*, *Judaea* and *Phœnicia*; and in the same Chapter he ascribes the invention of Letters to the *Phœnicians*. So doth *Lucan* likewise;

*Phœnices primi (fame si credimus) ausi
Mansuram rudibus vocem signare figuris.*

With these agree ^a *Herodotus*, ^b *Strabo*, ^c *Plutarch*, ^d *Curtius*, *Mela*, &c. who all consent, that the *Grecians* did first receive their Letters from the *Phœnicians* by *Cadmus*, who lived about the time of *Joshua*. And that the *Punic* or *Phœnician* Tongue was the *Canaanitish* or the *Hebrew*, though somewhat altered from its original pronunciation, (as is wont in tract of time to befall Colonies planted far from home, amongst strangers,) is sufficiently manifested from the remainders of it that are extant in *Plautus* and other prophane Authors, as they are cited by the learned *Bochart*. And that the *Phœnicians* were *Canaanites* hath proof also in Scripture, because the same woman who in *Mark* 7. 26. is styled a *Syrophœnician*, is said *Matth.* 15. 22. to be a *Canaanite*.

That the ancient *Greek* Character was of very near affinity to the *Samaritan*, and that the *Latin* Letters were of such an affinity to the *Greek*, and derived from them, being in a manner the same with the ancient *Ionic* Letters, is made very plain by *Scaliger*, and owned by *Pliny* and *Diomysius Halicarnassensis*. And *Tacitus* doth acknowledge that the ancient *Latin* Characters were in their shape and figure almost the same with the *Greek*. And as for the other Letters that are known, namely, the *Syriac*, *Arabic*, *Æthiopic*, *Armenian*, *Coptic*, *Illyric*, *Georgian*, *Gothic*, there is this cogent Argument to prove them to be of the same Original, because their *Alphabets* do generally observe the same order of Letters, which, being in it self exceedingly irrational, cannot probably have any other reason but *imitation*. Except onely that of the *Arabs*, saith *Hermannus Hugo*, who, that they might not seem to have borrowed Letters

from others, did purposely disturb the order of the *Alphabet*; to which he might have added the *Æthiopic* and *Armenian*.

§. III. There are two general things to be observed concerning these derived Letters. 1. That they are not of so great *Antiquity*. 2. That they are not so *numerous* as Languages are.

Enquiries,
chap. 5.

1. They are not so *ancient*, many Nations remaining a long while before they grew so far civilized as to understand the use of Letters, which to this day are not known amongst many of the *American* Nations, nor the Inhabitants of *Lapland*: and after they have been known, and of some public use, it hath been yet a considerable space, before persons have written any Discourse in their own Language. 'Tis observed by *Tschudas* of the *German*, and by *Genebrard* of the *French* Tongue, (saith Mr. *Brerewood*) that 'tis not much above 400 years, since Books began to be written in those Languages.

2. And because the use of *Letters* in particular Countries is not so ancient as *Language*, therefore are they not of so *numerous* kinds; several Nations taking up the use of *Letters* from their neighbours, and adapting them to their own Tongue. Thus the *Spanish*, *French*, *Italian*, *German*, *British*, *English*, *Irish*, &c. do all of them use the same *Latine* Character, it being probable that they had none of their own, before they learnt this of the *Romans*. The *Coptic* or *Egyptian* Character, ever since *Egypt* came under the Dominion of *Macedon*, hath been the *Greek*, excepting only seven *Letters* proper to their Tongue, which the *Greek* Alphabet did not sufficiently express; The *Muscovites* likewise and the *Russians*, the *Georgians* and *Jacobins*, do use the *Greek* Character; the *Persians* and *Turks* use the *Arabick*: though the *Letters* of any Tongue do not always remain the same, but are subject to the like fate and mutability, to which Languages are exposed.

§. IV. Besides this common way of Writing by the ordinary *Letters*, the Ancients have sometimes used to communicate by other *Notes*, which were either for *Secrecy*, or *Brevity*.

Vid. Purchas
book 5. chap.
7. sect. 1.

1. For *Secrecy*: such were the *Egyptian Hieroglyphicks*, (as they are commonly esteemed) being the representation of certain living Creatures, and other Bodies, whereby they were wont to conceal from the vulgar the Mysteries of their Religion. But there is reason to doubt whether there be any thing in these worth the enquiry, the discoveries that have been hitherto made out of them being but very few and insignificant. They seem to be but a slight, imperfect invention, suitable to those first and ruder Ages; much of the same nature with that *Mexican* way of writing by Picture, which was a mere shift they were put to for want of the knowledge of *Letters*. And it seems to me questionable, whether the *Egyptians* did not at first use their *Hieroglyphicks* upon the same account, namely, for the want of *Letters*.

Those waies of writing treated of by the Abbot *Tyrbemius*, were likewise for *occult* or *secret* communication: And though some Learned men have suspected and accused him to have thereby delivered the Art of *Magic*, or *Conjuring*; yet he is sufficiently cleared and vindicated from any such prejudice in that very learned and ingenious Discourse *de Cryptographia*, under the feigned name of *Gistavus Selenus*,
by

by which the noble Author, the Duke of *Lunenbourg*, did disguise his true name of *Augustus Lunenburgicus*.

2. For *Brevity*: There were single *Letters* or *marks*, whereby the *Romans* were wont to exprefs whole words. *Ennius* is said to have invented 1100 of these; to which number *Tullius Tyro*, *Cicero's Libertus*, (Others say *Cicero* himself,) added divers others, to signifie the *particles* of speech; after whom *Philargyrus* the *Samian* and *Mecenas*, added yet more. After these *Annaeus Seneca* is said to have laboured in the regulating and digesting of those former notes; to which adding many of his own, he augmented the whole number to 5000, published by *Janus Gruterus*; though amongst his there are divers of a later invention, relating to Christian institutions, which have been added since (as 'tis said) by *S. Cyprian* the Martyr. The way of writing by these did require a vast memory and labour; yet it was far short of expressing all things and Notions, and besides, had no provision for Grammatical variations.

Trithemius de Polygraphia.

Of this nature is that *Short-hand-writing* by Characters so frequent with us in *England*, and much wondered at by Foreigners; which hath a great advantage for speed and swiftness in writing; those who are expert in it being able this way to take any ordinary discourse *verbatim*.

Besides these, there have been some other proposals and attempts about a *Real universal Character*, that should not signifie *words*, but *things* and *notions*, and consequently might be legible by any Nation in their own Tongue; which is the principal design of this Treatise. That such a Real Character is possible, and hath been reckoned by Learned men amongst the *Desiderata*, were easie to make out by abundance of Testimonies. To this purpose is that which *Piso* mentions to be somewhere the wish of *Galen*, That some way might be found out to represent things by such peculiar *signs* and *names* as should exprefs their *natures*; *ut Sophistis eriperetur decertandi & calumniandi occasio*. There are several other passages to this purpose in the Learned *Verulam*, in *Vossius*, in *Hermannus Hugo*, &c. besides what is commonly reported of the men of *China*, who do now, and have for many Ages used such a general Character, by which the Inhabitants of that large Kingdom, many of them of different Tongues, do communicate with one another, every one understanding this common Character, and reading it in his own Language.

De Augment. lib. 6. cap. 1. Orig. scribendi, cap. 4.

It cannot be denied, but that the *variety* of *Letters* is an appendix to the Curse of *Babel*, namely, the multitude and variety of *Languages*. And therefore, for any man to go about to add to their number, will be but like the inventing of a Disease, for which he can expect but little thanks from the world. But this Consideration ought to be no discouragement: For supposing such a thing as is here proposed, could be well established, it would be the surest remedy that could be against the Curse of the Confusion, by rendring all other *Languages* and *Characters* useles.

It doth not appear that any *Alphabet* now in being, was invented at once or by the *rules of Art*; but rather that all, except the *Hebrew*, were taken

ϕ. VI.

taken

taken up by Imitation, and pass by degrees through several Changes; which is the reason that they are less complete, and liable to several exceptions. The *Hebrew* Character, as to the shape of it, though it appear solemn and grave, yet hath it not its *Letters* sufficiently distinguished from one another, and withall it appears somewhat harsh and rugged. The *Arabic* Character, though it shew beautiful, yet is it too elaborate, and takes up too much room, and cannot well be written small. The *Greek* and the *Latin* are both of them graceful and indifferent easie, though not without their several imperfections.

As for the *Æthiopic*, it hath no less than 202 *Letters* in its Alphabet; namely, 7 *Vowels*, which they apply to every one of their 26 *Consonants*, to which they add 20 other aspirated *Syllables*. All their Characters are exceedingly complicated and perplexed, and much more difficult than those proposed in this following Discourse for the expressing of things and notions.

Martinii Atlas Simonis.

This is said likewise of the *Tartarian*, that every Character with them is a *Syllable*, having each of the *Vowels* joyned to its *Consonant*, as *La*, *Le*, *Li*, &c. which must needs make a long and troublesome *Alphabet*.

But it is not my purpose to animadvert upon these *Tongues* that are less known, so much as those with which these parts of the world are better acquainted.

CHAP. IV.

I. *The Defects in the common Alphabets, as to their true Order.* II. *Just Number.* III. *Determinate Powers.* IV. *Fitting Names.* V. *Proper Figures of the Letters.* VI. *The Imperfections belonging to the Words of Language, as to their Equivocalness, variety of Synonymous words, uncertain Phraseologies, improper way of Writing.*

¶ I.

ONE special Circumstance which adds to the Curse of *Babel* is that *difficulty* which there is in all *Languages*, arising from the various *Imperfections* belonging to them, both in respect of 1. their first *Elements* or *Alphabets*, 2. their *Words*.

I. For *Alphabets*, they are all of them, in many respects, liable to just exception.

I. As to the *Order* of them, they are inartificial and *confused*, without any such methodical distribution as were requisite for their particular natures and differences; the *Vowels* and *Consonants* being promiscuously huddled together, without any distinction: Whereas in a regular *Alphabet*, the *Vowels* and *Consonants* should be reduced into *Classes*, according to their several kinds, with such an order of precedence and subsequence as their natures will bear; this being the proper end and design of that which we call *Method*, to separate the *Heterogeneous*, and put the *Homogeneous* together, according to some rule of precedency.

The *Hebrew* Alphabet, (the order of which is observed in several *Scriptures*, *Psal.* 119. and in the *Book of Lamentations*) from whence the others are derived, is not free from this Imperfection.

2. For

2. For their *Number*, they are in several respects both *Redundant*, and *Deficient*. ø. II.

1. *Redundant* and superfluous; either 1. By allotting *several Letters* to the *same power* and sound. So in the Hebrew (ד & ו) and so perhaps (ג & ו) (ח & ט) (ז & ח) (ז & ט.) So in the ordinary *Latin*, (C & K) (F & Ph.) Or 2. by reckoning *double Letters* amongst the most simple elements of Speech: as in the *Hebrew* ז; in the *Greek* ξ and †; in the *Latin* (Qu) (X. cs.) and † Consonant or Jod which is made up of (dzb) by assigning several Letters to represent one simple power, as *th, sh, &c.* So that none of these can regularly be reckoned amongst the simple elements of Speech.

2. *Deficient* in other respects, especially *in regard of Vowels*, of which there are 7 or 8 several kinds commonly used, (as I shall shew afterwards) though the *Latin Alphabet* take notice but of *five*, whereof two, namely (*i* and *u*.) according to our *English* pronunciation of them, are not properly Vowels, but *Diphthongs*. And besides, that gradual difference amongst Vowels of *long* and *short* is not sufficiently provided for. The Ancients were wont to express a *long Vowel* by *doubling* the Character of it; as *Amaabam, Naata, Ree, Seedes, Sanctissimis, Mariinas*: Vossius. though oftentimes the Vowel *I*, instead of being doubled, was only *prolonged* in the figure of it; as *ÆDILIS, PISO, VIVUS*. For the ways used by us *English* for lengthning and abbreviating Vowels, *viz.* by adding *E* quiescent to the end of a word for *prolonging* a Syllable, and *doubling* the following Consonant for the *shortning* of a Vowel, as *Wane, Wann; Ware, Warr, &c.* or else by *inserting* some other Vowel, for the *lengthning* of it, as *Meat, Met; Read, Red, &c.* both these are upon this account *improper*, because the sign ought to be where the sound is. Nor would it be so fit to express this by a distinct *Character*, because it denotes only an *accidental* or *gradual difference*, as by an *Accent*; the chief use of *Accents*, for which they are necessary in ordinary speech, being to signify *Quantities* and Elevations of voice.

3. For their *Powers*, they are very *uncertain*, not alwaies fixed and determined to the same signification: which as to our *English* pronunciation may be made to appear by abundance of Instances both in the Vowels and Consonants. ø. III.

1. As to the *Vowels*: It is generally acknowledged that each of them have several sounds. *Vocales omnes plurisonæ*, saith *Lipsius*. And the learned *Vossius* doth assure us, that the Ancients did use their Vowels in very different ways, *aliquando tenuius exiliusque, nunc crassius, nunc inter-medio sono*.

De Pronunc.
cap. 5.
Grammat.
lib. 1. cap. 12.
Jof. Scal. Diat.
De varia pron-
nunciat. one.

The power of the Vowel (*i*) treated of afterwards, is expressed in writing no less then six several waies; by

- e. He, me, she, ye.
- ee. Thee, free, wee.
- ie. Field, yield, shield, chief.
- ea. Near, dear, hear.
- eo. People.
- i. Privilege.

So is the *Power* of the Vowel (*a*;) as in *All, aul, aw, fault, caught, brought.*

brought. These are all various waies of writing the same long Vowel ; besides which there are other distinct waies of expressing the same Vowel when it is used short, as in the words *of, for, &c.*

And for the Power of the Vowel (v) that is likewise written five several waies.

- o.* To, who, move.
- oe.* Doe.
- oo.* Shoo, moon, noon.
- ou.* Could, would.
- wo.* Two.

And as for the Power of the Vowel (a) this also is written five several waies ; namely, by the Letters

- i.* Sir, stir, firmament, &c.
- o.* Honey, money, come, some, love, &c.
- oo.* Blood, flood.
- u.* Turn, burn, burthen.
- ou.* Country, couple.

2. Asto the Consonants, these likewise are of very uncertain Powers : witness the different pronunciation of the letter (C) in the word *Circo*, and (G) in the word *Negligence*. I know 'tis said that the letter (C) before the Vowels *a, o, u*, must be pronounced like (K,) as in the words *cado, coram, cudo* ; and before the Vowels *e, i*, as *S*, as in the words *cedo, cilium*. But there is no reason why it should be so. Upon which account our learned Country man, Sir *Tho. Smith*, doth justly censure it as *non-strum litera, non litera ; ignorantia specimen, non artis ; modo serpens, modo cornix*.

De Lingua
Anglicana
pronunciati-
one.

Cessio, Sessio,
Gratia.

The letters *C, S, T*, are often used alike, to denote the same Power, and that both in *English* and *French* ; and the letter (*S*) is most frequently used for (*Z*) which must needs be very improper. And, which is yet more irrational, some Letters of the same name and shape are used sometimes for *Vowels*, and sometimes for *Consonants* ; as *J, V, W, T* ; which yet differ from one another *sicut corpus & anima*, and ought by no means to be confounded.

Briscian.

To which may be added, that from this equivocal power of Letters, it so falls out, that

1. Some words are distinguished in writing, and not in pronunciation : as *Sessio, Cessio* ; *Sera, Cera* ; *Servus, Cervus* ; *Syrus, Cyrus* ; *Boar, Bore* ; *Come, Lat. Cum* ; *Done, Dun* ; *Dear, Deer* ; *Hear, Here* ; *Heart, Hart* ; *Meat, Mete* ; *Son, Sun* ; *Some, Lat. Sum* ; *Toes, Toxe* ; *Toc, Towe* ; *To, Too, Two*.

2. Some words are distinguished in pronunciation, but not in writing ; as the words *Give, i. Dare, Give, i. Vinculum* ; *Get, i. Acquirere, Get, i. Gages* ; *is* and *his* in *English*, and *is* and *his* in *Latin*. So the *Latin* word *Malè, i. evilly*, is a dissyllable ; whereas the *English* word *Male*, which signifies the masculine Sex, is but a monosyllable. All which are very great incongruities, and such as ought to be avoided in any regular establishment of Letters.

§. IV.

4. Their Names in most Alphabets, are very improperly expressed by words of several syllables ; as *Aleph, Beth, Gimel, &c. Alpha, Beta, Gamma, &c.* And thus it is in 15 several Alphabets mentioned by *Her-*

mannus

mannus Hugo. In which respect the *Roman Alphabet*, and our *English*, De Origine Scribendi c. 7. which follows it very near, are much more convenient than the rest, where each Letter is named simply by its Power. Though herein likewise there be some defects: for the letter *C* should not be named *See*, but *Kee*; and *G*, not, as usually we do, *Jee*, but *Tn*: and so *R*, to conform it with the rest, should be called *er*, not *ar*; and *Z* should be styled *ez*, not *zad*.

5. Their *Figures* have not that *correspondency* to their Natures and Powers which were desirable in an artificially-invented Alphabet, wherein the *Vowels* ought to have something answerable in their *Character* unto the several kinds of *Apertion* which they have in their *sound*. And so for the *Consonants*, they should have some such affinity in their *Figures* as they have in their *Powers*. 'Tis so in some of them, whether purposely or casually, I know not; as *B P. b p. C G. S Z.* and perhaps *T D, t d*: but not in others. ϕ. V.

To this may be added, the *manner of writing* as to the *Oriental Tongues*, from the right hand to the left, which is as *unnatural* and inconvenient, as to write with the light on the wrong side. The *Jews* themselves write their particular strokes of Letters from the left to the right hand; and therefore it would be much more rational, that their words should be written so too. Scaliger de Caussis L. I. cap. 46.

Besides these Defects in the usual *Alphabets* or *Letters*, there are several others likewise in the *Words* of Language, and their *Accidents* and *Constructions*. ϕ. VI.

1. In regard of *Equivocals*, which are of several significations, and therefore must needs render speech doubtful and obscure; and that argues a *deficiency*, or want of a sufficient number of *words*. These are either *absolutely* so, or in their *figurative* construction, or by reason of *Phraseologies*.

Of the first kind there are great variety in *Latin*. So the word

| | | | | | | |
|-------------|---|----------------------------------------------------------------------------|---|------------|---|---------------------------------------------------------------------------------------------|
| LIBER. apud | } | <i>Literatos</i> <i>Politicos</i> <i>Oratores</i> <i>Rusticos</i> | } | significat | } | <i>Codicem.</i> <i>Libertate fruentem.</i> <i>Filium.</i> <i>Arboris corticem.</i> |
|-------------|---|----------------------------------------------------------------------------|---|------------|---|---------------------------------------------------------------------------------------------|

So the word *Malus* signifies both an *Apple-tree*, and *Evil*, and *the Mast of a ship*; and *Populus* signifies both a *Poplar-tree*, and the *People*, &c. Besides such *Equivocals* as are made by the *inflexion* of words: as *Lex, legis, legi*; *Lego, legis, legi*; *Sus, suis*; *Suo, suis*; *Suus, suis*: *Amare* the Adverb; *Amo, amas, amavi, amare*; and *Amor, amaris vel amare*: with abundance of the like of each kind.

Nor is it better with the *English* Tongue in this respect, in which there is great variety of *Equivocals*. So the word *Bill* signifies both a *Weapon*, a *Bird's Beak*, and a written *Scroll*: The word *Grave* signifies both *sober*, and *Sepulcher*, and to *Carve*, &c.

As for the ambiguity of words by reason of *Metaphor* and *Phraseology*, this is in all instituted Languages so obvious and so various, that it is needless to give any instances of it; every Language having some peculiar phrases belonging to it, which, if they were to be translated *verbatim* into another Tongue, would seem wild and insignificant. In which our

D

English

English doth too much abound, witnesses those words of *Break, Bring, Cast, Cleare, Come, Cut, Draw, Fall, Hand, Keep, Lay, make, Pass, Put, Run, Set, Stand, Take*, none of which have less than thirty or forty, and some of them about a hundred several senses, according to their use in Phrases, as may be seen in the Dictionary. And though the varieties of Phrases in Language may seem to contribute to the elegance and ornament of Speech; yet, like other affected ornaments, they prejudice the native simplicity of it, and contribute to the disguising of it with false appearances. Besides that, like other things of fashion, they are very changeable, every generation producing new ones; witnesses the present Age, especially the late times, wherein this grand imposture of Phrases hath almost categr out solid Knowledge in all professions; such men generally being of most esteem who are skilled in these Canting forms of speech, though in nothing else.

2. In respect of *Synonymous* words, which make Language tedious, and are generally *superfluities*, since the end and use of Speech is for humane utility and mutual converse; *magis igitur refert ut brevis, & rectus, & simplex sit, quam longus & varius*. And yet there is no particular Language but what is very obnoxious in this kind. 'Tis said that the *Arabic* hath above a thousand several names for a *Sword*, and 500 for a *Lion*, and 200 for a *Serpent*, and fourscore for *Hony*. And though perhaps no other Language do exceed at this rate, as to any particular; yet do they all of them abound more then enough in the general. The examples of this kind, for our *English*, may be seen in the following Tables. To this may be added, that there are in most Languages several words that are mere *Expletives*, not adding any thing to the Sense.

3. For the *Anomalisms* and Irregularities in Grammatical construction, which abound in every Language, and in some of them are so numerous, that Learned men have scrupled whether there be any such thing as *Analogy*.

4. For that *Difference* which there is in very many words betwixt the *writing* and *pronouncing* of them, mentioned before. *Scriptio est vocum pictura*: And it should seem very reasonable, that men should either speak as they write, or write as they speak. And yet Custom hath so rivetted this incongruity and imperfection in all Languages, that it were an hopeless attempt for any man to go about to repair and amend it. 'Tis needless to give instances of this, there being in divers Languages as many words whose sounds do disagree with their way of writing, as those are that agree. What is said of our *English* Tongue is proportionably true of most other Languages, That if ten Scribes (not acquainted with the particular Speech) should set themselves to write according to pronunciation, not any two of them would agree in the same way of spelling.

'Tis an observation of a Learned man concerning the *French* Tongue, that it is *ineptissime confusa, aliàs ad fastidium otiosis suffarcta literis; aliàs ad mendicitatem inops & jejuna; nunquam sibi constans, & raro rationi consona*. 'Tis said that *Peter Ramus* did labour much in reducing it to a new *Orthography*, but met with much discouragement in this attempt from Learned men; besides the invincibleness of general Custom, against which (for the most part) men strive in vain. What better success those Learned ingenious persons of the *French Academy* may have, who

who have been for several years engaged in this Work, I cannot conjecture. This relates of *Chilperich King of France*, that he did, for the compendiousness of writing, add to the *French Alphabet* these five Letters, *H, X, Y, Z*, joining by a strict and solemn Edict the reception and use of them through his Dominions; and that in all Schools Youths should be instructed in the use of them. And yet, notwithstanding his Authority in imposing of them, they were presently after his death laid aside and disused.

Gregorius In-
rogatus.

As to our own Language, several persons have taken much pains about the Orthography of it. That learned Knight *Sir Thomas Smith*, Secretary to *Queen Elizabeth*; and sometime her Ambassador into *France*, hath published an elegant Discourse in *Latin*, *De rebus Grammaticis Linguae Anglicanae scripturae*. After him, this Subject was in another Discourse professed by one of the *Horaks*, who calls himself *Cheston*, who was followed by one *Wade*, that writ to the same purpose. After these, *Bubaker* endeavoured to add to, and alter divers things in those others that preceded him; who was succeeded in the same attempt by *Alexander Gill*, in his *English Grammar*. And yet so invincible is Custom, that still we retain the same errors and incongruities in writing which our Forefathers taught us.

CHAP. V.

- I. That neither Letters nor Languages have been regularly established by the rules of Art.
- II. The natural Ground or Principle of the several ways of Communication amongst men.
- III. The first thing to be provided for in the establishing of a Philosophical Character or Language, is a just enumeration of all such things and notions to which names are to be assigned.

FROM what hath been already said it may appear, that there are no Letters or Languages that have been at once invented and established according to the Rules of Art; but that all, except the first, (of which we know nothing so certain as, that it was not made by human Art upon Experience) have been either taken up from that first, and derived by way of *Imitation*; or else, in a long tract of time, have, upon several emergencies, admitted various and casual alterations; by which means they must needs be liable to manifold defects and imperfections, that in a Language at once invented and according to the rules of Art might be easily avoided. Nor could this otherwise be, because that very Art by which Language should be regulated, viz. *Grammar*, is of much later invention than Languages themselves, being adapted to what was already in being, rather than the Rule of making it so.

Though the *Hebrew Tongue* be the most ancient, yet *Rabbi Judah Ching* of *Fez* in *Afric*, who lived *A. D.* 1040. was the first that reduced it to the Art of *Grammar*. And though there were both *Greek* and *Latin* Grammarians much more ancient; yet were there none in either, till a long time after those Languages flourished: which is the true reason of

Vossius de Ar-
te Grammat.
lib. 1. cap. 4.

Vossius *ibid.*
cap. 3.

lib. 1. cap. 7.

all those *Anomalists* in Grammar; because the *Art* was suted to *Language*, and not *Language* to the *Art*. *Plato* is said to be the first that considered *Grammar*: *Aristotle* the first that by *writing* did reduce it into an *Art*: and *Epicurus* the first that publicly taught it amongst the *Grecians*.

And for the *Latin*, *Crates Mallotes*, Embassador to the *Roman* Senate from King *Attalus*, betwixt the second and third *Punic* War, presently after the death of *Ennius*, U. C. 583. was the first that brought in the *Art* of Grammar amongst the *Romans*, saith *Suetonius*.

These being some of the Defects or Imperfections in those Letters or Languages, which are already known, may afford direction, what is to be avoided by those who propose to themselves the Invention of a new *Character* or *Language*, which being the principal end of this Discourse, I shall in the next place proceed to lay down the first Foundations of it.

§. II. As men do generally agree in the same Principle of Reason, so do they likewise agree in the same *Internal Notion* or *Apprehension* of things.

The *External Expression* of these Mental notions, whereby men communicate their thoughts to one another, is either to the *Ear*, or to the *Eye*.

To the *Ear* by *Sounds*, and more particularly by *Articulate Voice* and *Words*.

To the *Eye* by any thing that is *visible*, Motion, Light, Colour, Figure; and more particularly by *Writing*.

That *conceit* which men have in their minds concerning a Horse or Tree, is the *Notion* or *mental Image* of that Beast, or natural thing, of such a nature, shape and use. The *Names* given to these in several Languages, are such arbitrary *sounds* or *words*, as Nations of men have agreed upon, either casually or designedly, to express their Mental notions of them. The *Written word* is the figure or picture of that Sound.

So that if men should generally consent upon the same way or manner of *Expression*, as they do agree in the same *Notion*, we should then be freed from that Curse in the Confusion of Tongues, with all the unhappy consequences of it.

Now this can onely be done, either by *enjoyning* some one Language and Character to be universally learnt and practised, (which is not to be expected, till some person attain to the *Universal Monarchy*; and perhaps would not be done then:) or else by *proposing* some such way as, by its facility and usefulness, (without the imposition of Authority) might *invite* and ingage men to the learning of it; which is the thing here attempted.

§. III. In order to this, The first thing to be considered and enquired into is, Concerning a just *Enumeration* and description of such things or notions as are to have *Marks* or *Names* assigned to them.

The chief Difficulty and Labour will be so to contrive the Enumeration of things and notions, as that they may be full and *adequate*, without any *Redundancy* or *Deficiency* as to the Number of them, and *regular* as to their Place and Order.

If

If to every thing and notion there were assigned a distinct *Mark*, together with some *provision* to exprefs Grammatical *Derivations* and *Inflexions*; this might suffice as to one great end of a *Real Character*, namely, the expreffion of our Conceptions by *Marks* which should fignifie *things*, and not *words*. And fo likewise if feveral diftinct *words* were assigned for the *names* of fuch things, with certain invariable *Rules* for all fuch Grammatical *Derivations* and *Inflexions*, and fuch onely, as are natural and neceffary; this would make a much more eafie and convenient Language then is yet in being.

But now if thefe *Marks* or *Notes* could be fo contrived, as to have fuch a *dependance* upon, and relation to, one another, as might be futable to the nature of the things and notions which they represented; and fo likewise, if the *Names* of things could be fo ordered, as to contain fuch a kind of *affinity* or *opponion* in their letters and founds, as might be fome way answerable to the nature of the things which they fignified; This would yet be a farther advantage fuperadded: by which, befides the beft way of helping the *Memory* by natural Method, the *Understanding* likewise would be highly improved; and we should, by learning the *Character* and the *Names* of things, be instructed likewise in their *Natures*, the knowledg of both which ought to be conjoyned.

For the accurate effecting of this, it would be neceffary, that the *Theory* it felf, upon which fuch a defign were to be founded, fould be exactly *futed to the nature of things*. But, upon fupposal that this *Theory* is *defective*, either as to the *Fulnefs* or the *Order* of it, this muft needs add much *perplexity* to any fuch Attempt, and render it *imperfect*. And that this is the cafe with that common *Theory* already received, need not much be doubted; which may afford fome excufe as to feveral of thofe things which may feem to be lefs conveniently difpofed of in the following Tables, or Schemes propofed in the next part.

The End of the First Part.

CHAP. I

I. *The Scheme of Genus's.* II. *Concerning the more general notions of things, the difficulty of establishing these aright.* III. *Of Transcendentals general.* IV. *Of Transcendental relations mixed.* V. *Of Transcendental relations of Action.* VI. *Of the several notions belonging to Grammar or Logic.*

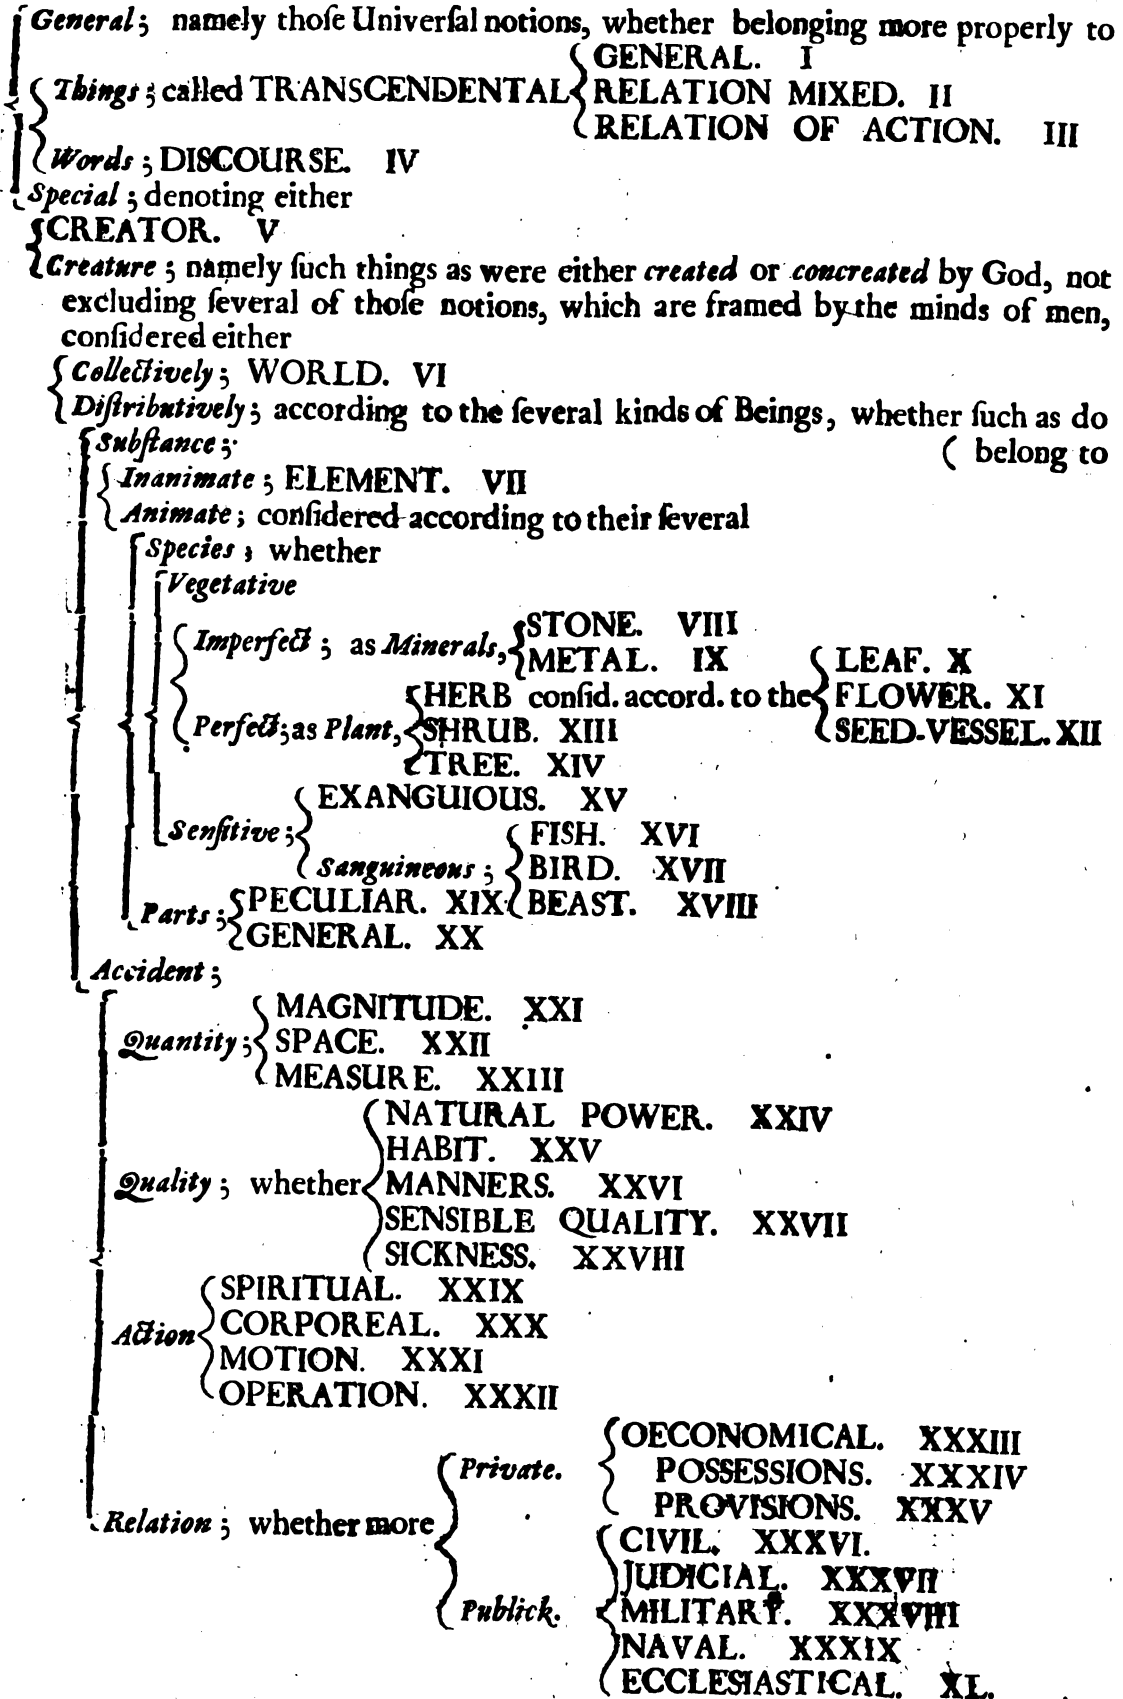

HAVING dispatched the *Prolegomena* in the former part, I proceed (according to the method proposed) to that more difficult attempt of enumerating and describing all such things and notions as fall under discourse.

In treating concerning this, I shall first lay down a Scheme or *Analysis* of all the *Genus's* or more common heads of things belonging to this design; And then shew how each of these may be subdivided by its peculiar *Differences*; which for the better convenience of this institution, I take leave to determine (for the most part) to the number of six. Unless it be in those numerous tribes, of *Herbs, Trees, Exanguious Animals, Fishes* and *Birds*; which are of too great variety to be comprehended in so narrow a compass. After which I shall proceed to enumerate the several *Species* belonging to each of these *Differences*, according to such an order and dependance amongst them, as may contribute to the *defining* of them, and determining their primary significations. These *Species* are commonly joyned together by *pairs*, for the better helping of the Memory, (and so likewise are some of the *Genus's* and *Differences*.) Those things which naturally have *Opposites*, are joyned with them, according to such Opposition, whether *Single* or *Double*. Those things that have no *Opposites*, are paired together with respect to some *Affinity* which they have one to another. Tho' it must be acknowledged that these *Affinities* are sometimes less proper and more remote, there being several things shifted into these places, because I knew not how to provide for them better.

All

All kinds of things and notions, to which names are to be assigned, may be distributed into such as are either more

In

In this precedent Scheme, all the several things or notions, to which names are to be assigned, are reduced to forty *Genus's*. The first six of which do comprehend such matters, as by reason of their Generalness, or in some other respect, are above all those common heads of things called *Predicaments*; The rest belonging to the several *Predicaments*, of which I reckon only five. Amongst these, *Substance* doth take in fourteen *Genus's*, *Quantity* three, *Quality* five, *Action* four, and *Relation* eight.

This being supposed to be a sufficient general Scheme of things, that which is next to be enquired after, is how each of those *Genus's* may be subdivided into its proper differences and species. In order to which I shall offer that which follows.

In the enumeration of all such things and notions as fall under discourse, those are first to be considered which are more general or comprehensive, belonging either to *Metaphysic*, or to *Grammar* and *Logic*.

The *particulars* are first in the order of *Being*, yet *Generals* are first in the order of *Knowing*, because by these, such things and notions as are less general, are to be distinguished and defined.

Now the proper end and design of *Metaphysic* should be to enumerate and explain those more general terms, which by reason of their *Universality* and *Comprehensiveness*, are either *above* all those Heads of things stiled *Predicaments*, or else *common to several of them*. And if this Science had been so ordered, as to have contained a plain regular enumeration and description of these general terms, without the mixture of nice and subtle disputes about them; It might have been proper enough for learners to have begun with. But men having purposely strained their Wits to frame and discuss so many intricate questions, as are commonly treated of in it: 'Tis no wonder that it should hereby be rendred, not onely less fit for young beginners, but liable also to the prejudice and neglect of those of riper judgments. That which I aim at in treating concerning these things, is to offer some brief and plain description of them, as being conscious that such matters as are *primò nota*, and most obvious, are most hard to be defined. And the multiplying of words, about things that are plain enough of themselves, doth but contribute to the making of them more obscure.

The right ordering of these *Transcendentals* is a business of no small difficulty; because there is so little assistance or help to be had for it in the *Common Systems*, according to which this part of Philosophy (as it seems to me) is rendred the most rude and imperfect in the whole body of *Sciences*; as if the compilers of it had taken no other care for those *General notions*, which did not fall within the ordinary series of things, and were not explicable in other particular *Sciences*, but only to tumble them together in several confused heaps, which they stiled the *Science of Metaphysic*. And this is one reason why the usual enumeration of such Terms is very short and deficient in respect of what it ought to be, many of those things being left out, which do properly belong to this number; which defects are here intended to be in some measure supplied. Tho it must be granted, that by reason of the exceeding *comprehensiveness* of some notions, and the extreme *subtilty* of others, as likewise because of the streightness of that method which I am bound up to
by

by these Tables it will so fall out, that several things cannot be disposed of so accurately as they ought to be.

The several things belonging to Metaphysical or Transcendental notions may be comprehended under these three Heads, namely such as are either more

I. That

I. KIND. I. That common Essence *wherein things of different natures do agree*, is called GENUS, *general, common Kind.*

That common nature which is communicable to several *Individuals*; is called SPECIES, *Sort or special kind, specific, specifical. Breed.*

These common kinds may be distinguished into such as are either more properly *Transcendental*; namely, those most universal and comprehensive Terms which fall under Discourse; relating to

The first and most general Conception, of which the Understanding takes notice, as most known.

1. { BEING, *Entity, Essence, Existence, subsist, am, is, extant.*

{ NOTHING, *Nought, null, none, annul, disannul, annihilate, abrogate, abolish, void, undoe, cancel, evacuate, Cypre.*

Those Beings which || are truly such, or those which our Senses mistake for Beings.

2. { THING, *Affair, Matter, Business, Case, real-ly, indeed.*

{ APPARENCE, *Apparition, Phantasm, Shew, Vision, Elusion and vanish.*

Similitudes of Beings; formed in our Minds either || by apprehension of things that are, or imagination of things that are not.

3. { NOTION, *Conception.*

{ FICTION, *Figment, make, feign, frame, devise, counterfet, forge, coin, mint, Fable, Apologue, Romance, Tale, Legend, Mythology, Fairy, Nymph, Centaur, Griffin, Bugbear, Goblin, Chymera, Atlantis, Utopia.*

The words assigned for the signifying of several Things and Notions: to which that common name for the signifying of particular rational Beings may be annexed, though less properly.

4. { NAME, *Style, Title, Titular, Compellation, Appellation, nominate, denominate, Surname, Inscription, Nomenclator, anonymous, call, Noun, Term.*

{ PERSON, *Age, Party, No-body, Wight.*

Predicamental; those chief Heads, under which other Terms may be reduced; denoting either

Such things as || subsist by themselves, or which (according to the old Logical definition) require a subject of inhesion: Though they are indeed nothing but the modes of Substance.

5. { SUBSTANCE, *subsist.*

{ ACCIDENT-*all.*

That habitude of things whereby they may be said to have parts distinct and capable of division, or the general disposition of things either to Action or Passion.

6. { QUANTITY, *Much, Deale, Mathematick.*

{ QUALITY, *Disposition, Endowment, indue, parts, qualification, manner, condition, estate.*

The application of the Agent to the Patient, or the reception of the force of the Agent.

7. { ACTION, *doe, perform, commit, practise, proceeding, function, exercise, atchieve, dealing, Act, Fact, Deed, Feat, Exploit, Passage, Prank, Trick, play the Part.*

{ PASSION, *abide, ail, bear, endure, suffer, undergo, sustain, feel, capable.*

Such things as || cannot be, or cannot be known, without a respect to something else; or which may be, or may be understood of themselves, without any such reference.

8. { RELATION, *refer, Regard, Respect, Habitude, correlative.*

{ ABSOLUTENESS, *irrespective, peremptory, flat, positive.*

II. That

II. That which any way contributes to the producing of an effect, is styled CAUSE, Reason, Ground, Principle, proceed from, procure, produce, make, constitute, Influence, raise, put, set, bring to pass.

That which proceeds from, or depends upon the Cause, is styled EFFECT, Event, Issue, Fruit, accrue, Success, spring from, become, grow, come of it, impression, Product.

OF DISCOURSE;

Or the several notions belonging to
Grammar or *Logick*.

§. VI.

THE most general name for those external expressions, whereby men do make known their thoughts to one another, is **DISCOURSE**, *Commune, Communication, Parly, Talk, Colloquie, Treat, Treatise, handle, Stile.*

To which may be annexed that particular way of discourse, most in use, namely by articulate voice and words, called **LANGUAGE**, *Tongue, Speech, Linguist, dialect.*

The several things and notions belonging to discourse, may be distributed into such as do concern either the

Parts of it; or those primary ingredients of which it consists, whether

- { *More Simple*; stiled **ELEMENTS. I**
- { *Less Simple*; **WORDS. II**

Kinds of it; or those secondary parts belonging to it, whether such as are

- { *Proper, to* **GRAMMAR. III.**
- { **LOGIC. IV.**
- { **COMMON TO BOTH. V**
- MODES of it. VI**

I. The

I. The first and more simple ingredients required to the framing of I. ELE-
 Discourse or Language, are stiled ELEMENTS. *Abcdarian.* MENTS.

These may be distinguished into such as do concern either the
sounds made by the Organs of speech, according to the

General name; denoting either || that which is *spoken*, or the *picture*
of it in writing.

1. } LETTER, *literal.*

1. } CHARACTER, *Figure, Note, Letter, Cyphre, Orthography.*

Particular kinds; relating to such as are

More primary and *simple*; whether || such *apert sounds* as are fra-
 med by a *free emission of the breath* through the organs of
 speech, or such *closed sounds* in the pronouncing of which the
breath is intercepted by some collision or closure amongst the in-
 struments of speech.

2. } VOWEL.

2. } CONSONANT.

Less primary and *mixed*; either that which (for the most part)
 doth consist of *several letters pronounced in one continued motion*,
 or of more *Vowels coalescing in one sound*.

I. The

I. The *hottest and lightest* kind of those that are counted *Elements*, is called **FIRE**: *Burn, Scald, Singe, Kindle, Tind, Light.* I. FIRE.

The several Notions referring to the Parts or Kinds of it, are distinguishable by their Magnitude, Place, Duration, Shape, &c.

The *General* parts or *kinds of Fire*, are || either *greater*, which seem to be *enkindled Air*; or *less*, being a *small separated portion of Fire*.

- I. { FLAME, *Blaze, Coruscation, Flash, Leam, Light fire.*
 { SPARK, *Strike fire.*

The *Special* sorts of *Fiery Bodies*, to which custom hath given particular names, are such as are either

More considerable; in respect of their

{ *Lastingness*, continuing for *some time in the same place*; and then || *vanishing*, or *falling*.

2. { COMET, *Standing, Blazing starr.*
 { FALLING STARR.

{ *Lesser Magnitudes*; || either *more*, or *less* minute.

- 8. { SAND, *Grit*.
- { GRAVEL.

II. MID.

II. MIDDLE-PRIZED STONES.

II. MIDDLE-PRIZED STONES are either of a *Shining Politure*, or capable of it; whether of a *Simple white colour*, and more *soft consistence*.

1. ALABASTER.

Sometime white, sometime black or green, and sometime variegated with veins; growing in || greater, or lesser Masses.

2. { MARBLE, *Porphyrie*.
AGAT.

Spotted; || with Red upon a Greenish colour, or with spots of Gold-colour upon Blue.

3. { JASPIS, *Heliotrope*.LAZUL, *Azure-stone*.

Transparency: either

Brittle; || whether natural, or factitious.

GLASS, *Vitrific*.

Fissil, into Flakes, || either greater, or lesser.

5. { SELENITE, *Muscovia glass, Isingglass, Sparr*.

TALC.

Relation to Metals; || attracting of Iron, or making of Brass.

6. { LOAD-STONE, *Magnet-ical, Compass*.CADMIA, *Calaminaris*.

Incombustible nature.

7. AMIANTUS, *Asbestus*.

Strange Original; not being properly Minerals, though usually reckoned amongst them; but either a sub-marine Plant; or supposed to proceed from a liquid Bitumen.

8. { SCORAL -ine.

AMBER.

There are several other kinds of Stony Consistences mentioned in the Authors who write *de Lapidibus*. Some that are found in the Bodies of Animals, their Stomachs, Guts, Bladders, Kidneys, &c. several of which are *denominated* from the *Animals* in which they are found; as *Alectorius*, *Chelidonium*, *Bezoar*, &c. Others have peculiar names from their *shapes*; as *Astroides*, *Glossopetra*, &c. Others made of *Animals* or parts of *Animals* petrified, which may be sufficiently expressed, without being particularly provided for in the Tables.

III. IMPER-

III. IMPERFECT kinds of METAL, are either

Fluid.

1. MERCURY, *Quick-silver.*

Solid and consistent; used for

Purging, and chiefly for Vomiting.

2. ANTIMONY -al.

Making of Pewter, being of shining brittle substance.

3. BISMUTE, *Tin-glass.*

Making of Soder, being like Tinn, but more hard and brittle.

4. SPELTER, *Zink, Spalt.*

Painting; || considered according to its natural state, being the Oar of Quick-silver, and of a Dark red: or else as it is prepared by grinding, which renders it of a Bright red.

5. SCINNABAR, *Ruddle.*

5. VERMILION.

Writing; not known to the Ancients, and therefore without any Latin or Greek name.

6. BLACK-LEAD.

IV. RECREMENTITIOUS PARTS OF METAL, are such as are

cast off; either in the

Preparation of them, by

Melting; being of parts

More large and united; a kind of scum arising from the separation of impurer mixtures in the fusion of Metals, chiefly in the purging of Silver from Lead.

1. LITHARGE.

More minute and separate; being a concretion of the lesser parts of Copper, which fly out when that Metal is in fusion; || either the heavier parts, which by their gravity descend to the floor: or the more light and volatile parts, which adhere to the roof or walls.

2. SPODIUM.

2. POMPHOLYX.

Beating or hammering.

3. SCORIA, *Scales.*

Corruption of them; according to the

General name.

4. RUST, *Canker.*

Particular kinds; proceeding either of Copper and Brass, or of Lead.

5. VERDIGREECE, *Ærugo.*

5. CERUSE, *White lead.*

- I. Of Plants, *The difficulty of enumerating and describing these.* II. *The more general distribution of them.* III. *Of Herbs considered according to their Leaves.* IV. *Of Herbs considered according to their Flowers.* V. *Of Herbs considered according to their Seed-vessels.* VI. *Of Shrubs.* VII. *Of Trees.*

THe more perfect kind of *Vegetables* are called by the name of *Plants*, the several kinds of which are so exceeding numerous, as must needs render it a very difficult task for any man who is most versed in the study of them, either to *enumerate* them so fully or to *order* them so accurately, as will not be liable to many exceptions; especially considering the streining and force that must sometimes be used, to make things comply with the institution of these tables into which they are to be reduced.

ϕ. I.

Gaspar Bauhinus doth in his *Pinax* reckon up about six thousand several plants, the particular names of which do amount to almost twice the number of words here intended for the whole body of language. And there is reason enough to believe, that there are many more besides those he mentions, since we find by daily experience, in sowing the seeds of Flowers and of Trees, and the different ways of culture used about them, that new kinds of Flowers and of Fruits are continually produced, such as were not before described by any Author, and such as do afterwards propagate their kinds; insomuch that it may well be doubted whether there be any determinate number of these subordinate Species:

I design in these following tables to take notice only of the *chief families* of Plants, to which the others are to be reduced. In the descriptions of which, there will be no small difficulty, by reason of their great number, and the want of proper words to express the more minute differences betwixt them, in respect of shape, colour, taste, smell, &c. to which instituted languages have not assigned particular names. I mention this by way of Apology for the several defects, which I am sensible of in the following tables.

In the description of those Plants which are heads of *numerous families*, I take notice only of that *Communis ratio*, which belongs to all the subordinate varieties of them, unless it be when there is no such common agreement belonging to them all: or where several things are reduced under the same head, some for their agreement in one Accident, and others for their agreement in some other Accident; in which cases the descriptions here mentioned, are to be understood of the chief and most common Plants of that name.

As for the various *particulars contained under each family*, as suppose Tulips, Roses, Apples, Pears, Plums, &c. These need not be particularly provided for, both because the just number of them is not yet stated; every year producing new ones: And because they may as well be expressed Periphrastically here as in all other Languages; either by their

Seasons ; whether Early or Late, Vernal, Autumnal, Hyemal.

Lastingness ; being either Annual or Perennial.

Bigness or Littleness, *Talness or Lowness*.

Manner of growth ; whether Erect, Trailing, Creeping, Climbing, Twisting.

Place of growth ; either *Terrestrial*, Hilly, Sandy, Stony, Clay, &c. *Aquatic*, belonging either to Sea or Rivers, Marish, Moorish, Fenny grounds.

Several parts ; whether in respect of the

Root ; being either *Fibrous*, of bigger or lesser strings, more or less numerous, spreading sidewise or tending more directly downwards : Or *Bulbous*, of one single bulb or several, whether Obround, Compressed, Oblong, Coated or Scaly : Or *Tuberous*, having its thicker parts contiguous, or hanging more at a distance by small strings.

Stem or stalk ; whether Solid or Hollow, Smooth or Rugged, Round or Angular, Knotted or Jointed more or less frequently, being free from leaves, or having leaves.

Leaves ; whether as to their

Superficies ; being Smooth, Unctuous, Shining, Rough, Prickly, Hairy, Woolly, &c.

Shape and figure ; Round Angular, Broad Narrow, Long Short, of smooth or of indented, jagged, waved, curled edges, being either sharp or round pointed.

Substance or Bulk ; Thick Succulent, or Thin Dry, being interspersed with nerves either direct or transverse.

Colour ; whether the same on both sides or different, clear or spotted, of a brighter or darker green.

Number ; One, Two, Three, &c.

Manner of growth ; whether singly, or in pairs opposite to each other : or having more than two encompassing the stalk, Winged, Fingered, &c.

Flowers ; as to their

Shapes ; consisting of one single undivided leaf, either divided at the edge or not : or having several leaves, three, four, five or more.

Colour ; whether simple, as Red, Yellow, Purple, &c. or Mixed, Striped, Speckled, Edged.

Number ; Bearing either One or Many, and these either single or double.

Manner of growth ; whether of single flowers, being Erect, Hanging, Reversed, &c. or of several flowers, Verticillate, Spicate, Umbelliferous.

Seed-vessels ; whether *Oblong*, Closed or Open, *Round*, Hollow, Solid, Smooth, Rugged, Prickly, Scaly, containing few or many seeds.

Seeds themselves ; Round, square, flat, oblong, downy, &c. smooth, Echinate, black, white, shining, &c.

Fruits ; Apples, Berries, &c.

Juice ; Waterish, Gummy, Milky, Yellow.

To

To all which may be added their different smells and tastes, and the several uses they are commonly applyed unto; by some of which Accidents all other Plants may be sufficiently described.

I had formerly distributed the kinds of Herbs, according to those several ends and purposes for which they are commonly used, into these three heads; 1. Such as are for *pleasure*, being usually cherished in Gardens, for their flowers, or beauty, or sweet sent. 2. Such as are *Alimentary*, being used by men for food, either in respect of their Roots, their Leaves or Stalks, their Fruit or their Seed. 3. Such as are *Medicinal*, being either Hot and biting, or Cold and Stupefying, Purgative, Alterative, Vulnerary. But upon further consideration I am satisfied, that though these heads may seem more facil and vulgar; yet are they not so truly Philosophical, but depend too much upon the Opinions and customs of several times and Countries.

As for the usual distinction betwixt *Shrubbs* and *Trees*, it doth not seem (at least so farr as these things have been hitherto described) to have any such distinct limits in nature, as were to be desired, and as is to be found betwixt other things, there being several under each head, which seem to be of a doubtful condition. Some that are reckoned for *Shrubbs*, which have a fair pretence to be placed amongst *Trees*: and others accounted *Trees*, which without any injury might be reduced to the Genus of *Shrubbs*. I do in the following tables comply with that opinion, which seems most common and probable.

The reason why the two last differences of *Trees*, is not from their *fruit* (as the others are) but from their *Woods* and *Rines*, or from their *Rosins* and *Gumms*, is because these are the only things that we yet know of them, their natures in other respects being not yet (for ought I know) described by any Authors.

As for any *new species* of Plants that shall hereafter be discovered, 'tis probable they may by analogie be reduced either to some of the *families*, here mentioned, or at least to some of the *Tribes*.

I have added to the several species of *Plants* and *Animals*, their Latin names in the Margin, because many of them are as well, if not better, known by such compellations; and because they are most frequently treated of by the Authors who write in that Language.

Plants may be distinguished into such as are more

Herbs

§. III,

HERBS CONSIDERED ACCORDING TO THEIR LEAVES, may be distinguished into such as are

{ Imperfect ; which either do want, or seem to want some of the more essential parts of Plants, viz. either Root, Stalk or Seed. I.

{ Perfect ; having all the essential parts belonging to a Plant, to be distinguished by the

Fashion of the leaf ; whether Long ; as all Gramineous herbs, having a long narrow leaf without any foot-stalk.

{ Not flowering ; (i.) not having any foliaceous flower. FRUMENTACEOUS ; Such whose seed is used by men for food, either Bread, Pudding, Broth, or Drink. II.

{ NOT FRUMENTACEOUS ; III.

{ Flowering ; Being of BULBOUS ROOTS ; Having no fibers from the side, but only from the Bottom or the Top ; whose leaves are more thick, undivided, smooth-edged, and generally deciduous. IV.

{ AFFINITY TO BULBOUS ROOTS ; V. ROUND ; VI.

Texture of the Leaf ; being either NERVOUS ; having several prominent Fibers. VII.

{ SUCCULENT ; having thick juicie leaves, covered with a close membrane, through which the moisture cannot easily transpire, which makes them continue in dry places. VIII.

{ SUPERFICIES of the Leaf, or MANNER of Growing. IX.

I. IMPERFECT HERBS may be distinguished into

I. IMPERFECT HERBS.

Terrestrial ; whether Most imperfect ; which seem to be of a spontaneous generation.

Having no leaf, With a Stem and Head ; the Greater or the Less. The later of which hath by Mr. Hook been first discovered to consist of small stems with little balls at the top, which flit out when

Fungus. Mucor.

1. MUSHROOM, Toadstool, Fungus, Touchwood, Spunke. (ripe.) MOULD, Horiness, Vinnewd.

Tuber. Fungus pulverulentus.

Without a Stem, of a roundish figure || growing either in the ground, being esculent, & counted a great delicate: or on the ground, being STRUBS, Truffle. (when dry) full of an unfavory hurtful dust. 2. FUZZBALL, Puckst.

Mosses. Lichen.

Having a leaf ; being generally deeper then other plants and curled, growing in such barren places where no other plants will thrive, || either that which grows, both on the ground, and on walls and trees, of which there are great varieties : or that which grows SMOSS. (only in moist grounds and shady places.)

3. LIVERWORT.

Less Imperfect ; being counted Infœcund, whose seed and flower (if there be any) is scarce discernable, commonly called Capillary

Filix. Dryopteris.

Have several leaves ; Divided ;

{ Doubly ; or subdivided, Greater ; of a brighter or a darker green, the later being less and (more finely cut. SFEARN, Brake.

{ + OAK-FEARN. Lesser ; either that which grows commonly on walls and dry places,

- ces, somewhat resembling Rue both in the colour and figure of the leaf: or that which grows in moist shady places, having small slender black stalks.
5. } WHITE MAIDENHAIR, *Wall-rue, Tentwort* *Adiantum album.*
 } BLACK MAIDENHAIR. *Capillus Veneris.*
Singly; or not subdivided,
 { Greater; of a broader leaf, and purgative root: or of a narrower and longer leaf.
6. } POLYPODI.
 } ROUGH SPLEENWORT. *Polypodium.*
Lesser; either that which hath a black stalk and winged leaves like those of a Vetch: or that which hath a thicker shorter leaf, not divided to the middle ribb. *Lonchitis.*
7. } ENGLISH BLACK MAIDENHAIR. *Trichomanes.*
 } SPLEENWORT, *Miltmast.* *Asplenium.*
Undivided; either that whose leaves are somewhat broader towards the bottom, where they encompass the stalk like a half moon: Or
8. } SMILE FEARN. *Hemionitis.*
 } HARTSTONGUE. *Phyllitis.*
Have but one leaf; either that whose leaf is like the others of this tribe, with a tuft of very small flowers: or that which hath an undivided succulent leaf, with a small spike standing off from it.
9. } MOON WORT. *Lunaris.*
 } ADDERS TONGUE. *Ophioglossum.*
- Aquatic; belonging to*
Fresh water; either that which consists of small round leaves, floating on the top or immersed in the water, having little strings shooting down from them: Or that which consists of long small slimy filaments, resembling green raw silk.
10. } DUCKWEED. *Lens palustris.*
 } HAIRY RIVERWEED. *Conserva.*
- Salt water; being either of a*
softer consistence; having some resemblance to
Mushrooms; either the Greater, being more round and thick, with pores every way: or the Less, having long slender stalks with round leaves growing at the top of them.
11. } SPUNGE. *Spongia.*
 } SEA NAVELWORT. *Androsace.*
Moss, or ground Liverwort, having green curled leaves spreading
12. SEA-LETTICE. *LaBunca marina.*
(on the ground.
Mushrooms and Moss; either that which is flat and roundish, hard and tough, with several lines parallel to the circumference: or that whose leaves grow out of one another without any stemm.
13. } SEA-EAR. *Auris marina.*
 } ROUND LEAVED OYSTERWEED. *Opuntia marina.*
Capillary Plants; having a soft membranaceous tough leaf, growing commonly upon Stones and Rocks in the Sea.
14. WRACK. *Alga.*
Harder consistence; being tough, with many fibres or ribbs elegantly distributed somewhat like the Mashs of a Net, growing to a great bredth. *Corallina marina Reticulata.*
15. SEA FANN. H. GRA-

II. GRAMINEOUS FRUMENTACEOUS HERBS.

II. GRAMINEOUS FRUMENTACEOUS HERBS, may be distinguished into such, whose seeds are

Greater; being covered either with a

Thin membrane; without any husk adhering, of a figure.

Oblong; either that of a more *turgid* grain and *brighter* colour, every seed in the ear being covered with three loose husks: Or that which bears a more *black, lank, oblong seed*, having always a beard adhering to the husk of each grain in the growth.

Triticum.
Secale.

1. } WHEAT.

1. } RY.

Roundish and somewhat *compressed*; being the biggest of this tribe, the ears growing out of the sides of the stalk, the top of it having a chaffy panicle without any seed.

Frumentum
Indicum.

2. MAIZE, *Indian-wheat.*

Husk; growing in a

Spike; either that whose grains in the growth of them are *bearded*, their husks adhering close to them, being the *lowest*: Or that whose grains are more *turgid and round*, growing at a greater distance in a kind of compounded ear, which seems to consist of several lesser spikes.

Hordeum.
Oriza.

3. } BARLY, *Malt.*

3. } RICE.

Panicle; or dispersed tuft, at a distance from each other, upon long weak stems, not above two together, hanging down.

Avena.

4. OAT.

Lesser; growing either in a

Spike; or ear, having *short beards*, the grain being of a *yellowish colour*.

Panicum.

5. PANIC.

Panicle or tuft; having a *roundish shining seed*, || either that which is a more *tall large Plant*, whose panicle stands upright: or that which is a *less Plant*, whose panicle hangs down.

Sorghum.
Milium.

6. } INDIAN MILLET.

III. GRAMINEOUS PLANTS NOT used by men FOR FOOD, may be distributed into such as are

More properly called Grasses; (i.) such as have a hollow jointed, and not branched stalk, and a staminate flower, whether such as are

Spicate; considerable for the

Largeness of the seed; being nearest to those of the frumentaceous kind; either that of a short spike, squamous and shining seed: or that resembling Panic.

- 1. { CANARY-GRASS.
- { PANIC-GRASS.

Figure of the spike; whether

Full, compact and round; either that whose spike is more soft and downy, resembling a fox-tail: or that which is like this but more rough.

- 2. { FOX-TAIL.
- { CATS-TAIL.

Not full, but lank; resembling either

Wheat;

- 3. WHEAT-GRASS.

Ry; either the greater used for the making of frails: or the lesser.

- 4. { MATWEED.
- { WILD BARLY.

Not compact, but loose, in which the parts are not close set together; either that whose spike is more flat and long, the seeds growing only on two sides alternately, having an inebriating quality: or that whose spike hath some resemblance to wheat, the plant being apt to spread it self by the root.

- 5. { DARNELL, Tares.
- { DOGS-GRASS, Quitch, Couch.

Not round; but having the husks inclining one way, being divided into many parts, each whereof resembles the comb of a Cock.

- 6. CRESTED-GRASS.

Paniculate; considerable for the

Largeness of the Leaves; having jointed stalks; either that whose stalks is commonly bigger and taller than other Grasses: or that which bears a large perforate shining seed of an ash colour.

- 7. { REED.
- { JOB'S-TEARS.

Figure of the Panicle; comprehending such kind of plants as are

Less common; whether such as have

Some resemblance to the panicle of Oats, or to the claws of a bird.

- 8. { OAT-GRASS.
- { FINGER-GRASS.

Many squamous shining hollow heads hanging upon slender stalks: or having hairy leaves, with long woolly strings on the sides of them, the seed being contained in a close seed-vessel.

- 9. { PEARL-GRASS, Quaking-grass.
- { HAIRY-GRASS.

Most common; both in Pastures and Meadows, yielding the best food for Cattel, both when growing, and when made into hay.

- 10. MEADOW-GRASS,

Less properly called Grasses; considerable either for the

Scent of the plant being sweet; either that which grows in watery places, having a leaf like a flag, bearing a Julius hard and close: or that whose stalks have a spongy pith, bearing flowers like those of Reeds.

- 11. { SWEET SMELLING REED:
- { CAMELS HAY.

Stalk; being

Lesser; either that which is triangular: or that which is round, being full of a spongy pith

- 12. { GALINGALE.
- { RUSH.

Greater; of a woody substance, porous, used for walking staves.

- 13. CANE.

Head or spike; whether more

Loose; having a soft downy substance; either on each side of the spike, making it to resemble a feather: or intermixed with the panicle.

- 14. { FEATHER GRASS.
- { COTTON GRASS.

Close; whether

Greater; either that which hath a round cylindrical head, being a tall plant, whose spike is blackish and soft like velvet; or that which bears several spherical burrs.

- 15. { RIFED MACE.
- { BURR REED.

Lesser; having a naked stalk, bearing a small spike resembling the tail of a Mouse.

- 16. MOUSE-TAIL.

IV. GRAMINEOUS HERBS OF BULBOUS ROOTS.

IV. GRAMINEOUS HERBS of BULBOUS ROOTS, may be distinguished into such as are considerable for their

Flowers; which are generally made up of six leaves, or divided into six *laminae*: either these whose fibres grow from the

Bottom of the bulb; having the Roots

Scaly; divided into many squamous *laminae*.

The Greater; whose root hath a *strong sent* like that of a Fox, the flowers hanging down round the top of the stalk, with a tuft of green leaves above them.

1. CROWN IMPERIAL.

The Lesser; having the stalk set with leaves, || either that whose flower is more large and hollow: or that whose flowers are smaller, having the leaves reversed backwards.

2. LILLY.

MARTAGON, *Turky-cap*.

Coated; made up of several coats encompassing one another.

Bearing the flower upon a stem; to be further distinguished by the

Shape of the flower; whether

Large and Hollow; resembling a cup, | either that which doth generally bear but one flower upon a stalk, standing upright, having an *esculent* root: or that which doth sometimes bear two flowers upon a stalk, with checkered streaks, hanging down their heads, the root consisting of two lobes.

TULIP.

3. FRITILLARY.

Having a cap in the middle of the flower, which comes out of a *skinny husk*: or that which hath many small flowers together upon the same stalk.

DAFFODILL.

4. HYACINTH.

Colour of the flower; being generally white and marked with green, || either that with a *stair-like* flower, marked with a streak of green on the back of the leaf: or that which hath a hanging *pendulous* flower, whose leaves are tips with green.

STARR OF BETHLEHEM.

5. BULBOUS VIOLET, *Snow-drop*.

Figure of the leaf; resembling the blade of a sword, || either that which bears a *Fleur de luce*, having nine leaves, three of which stand up: or that whose flowers grow in a row under one another.

BULBOUS IRIS, *Flower de luce*.

6. CORNFLAGG.

Having naked flowers, without any stem; whether that of a larger flower and broader leaf: or that of a lesser flower and narrower leaf.

7. MEDOW SAFFRON, *Naked Lady*.

CROCUS, *Saffron*.

Top of the Bulb; whose root doth usually consist of two bulbs, the flowers growing in a kind of spike, of great variety of colours and shapes.

8. ORCHIS, *Satyron*.

Strong sent; whether such whose leaves are more.

Long; their sent being

Less strong; the

Greater; whose roots grow single, || either that with hollow tubulous leaves, the stalk swelling out in the middle: or that of a broader leaf, rising higher in the stalk and continuing green all winter.

9. ONYON.

LEEK.

Lesser; whose roots grow commonly in clusters, || either that which bears no seed: or that which doth bear seed, having very small tubulous leaves.

10. SHALOT, *Echalote*.

CIVES.

More strong; either that whose root is divided into Cloves: or that of an entire root, and in some esteem for the flower.

11. GARLICK.

MOLY.

Broad; having the root either

Oblong and small; either that which is lower with an Umbell of large flowers: or that which is taller, having a round head.

Of Herbs considered according to their Flowers.

Herbs considered according to their flower, having no seed-vessel besides the Cup which covers the flower, may be distinguished into §. IV.
STAMINEOUS; whose flower doth consist of threddy Filaments or Stamina, having no leaves besides the *Perianthium*: or those herbaceous leaves encompassing these Stamina, which do not wither or fall away before the seed is ripe. I.

Foliaceous; which besides the Stamina have leaves, being either of
Compound flowers; consisting of many leaves: or a circle of Leaves, and a Thrumm of short Stamina, close set together; whether
NOT PAPPUS. II.

PAPPUS, whose seeds do either ly in down: or have some downy parts. III.

Simple flowers; which besides a circle or border of leaves, have only some fewer longer Stamina more sparsedly set together, like threds or strings, to be distinguished by the manner of the growing of the

Flower; into

Umbelliferous; such as grow in the fashion of an Umbel on several little stalks, proceeding from the top of a bigger stalk, which all together represent the figure of an inverted Cone, the flowers being the Basis, which have generally two seeds growing together, and a compound leaf; whether of

BROADER LEAVES; under which are comprehended all such whose leaves are about the same breadth, or broader then Parsly. IV.

FINER LEAVES; under which are comprehended all such, whose leaves are divided into narrower segments then those of Parsly. V.

Verticillate; by which those kinds of Plants are meant, whose flowers grow in rundles or whirles about the stalk, being of the shape of a Hood or Helmet; as likewise those whose flowers are of the like shape, namely Galeated, having the like open seed-vessel, but their leaves growing by pairs, whether

FRUTICOSE; having stalks of a hard woody consistence. VI.

NOT FRUTICOSE. VII.

SPICATE. VIII.

SEED; growing **MANY TOGETHER IN A Cluster** or **BUTTON**. IX.

I. HERBS OF STAMINEOUS FLOWERS.

I. HERBS OF STAMINEOUS FLOWERS, and not of grassy leaves, may be distributed into such whose seeds are

Triangular; the plants to which they belong being either *Perennial*;

Bigger; having a *great leaf* not jagged about the edges; || either that whose *leaf is more large*, and the *root used for purging*: or that whose *leaf is more oblong*.

Rhabarbarum.
Lapathum.

- 1. { RUBARB.
- { DOCK.

Lesser; having a *grateful acidity* in the taste of the leaf; || either that whose *leaf is oblong*: or *roundish*.

Acetosa.
Acetosa Romana.

- 2. { SORREL.
- { FRENCH SORREL.

Annual; having leaves.

Triangular; and *black seed*; || either that which is *Erect*, whose seed is *Esculent*: or that which is *Climbing*.

Tragopyrum.
Convolvulus niger.

- 3. { BUCK-WHEAT, Brank.
- { BLACK BINDWEED.

Not Angular; being short and slender, upon *weak procumbent stalks*, full of *joynts*.

Polygonum.

- 4. KNOT-GRASS.

Round;

Distinguishable by Sex; of *male and female*; because from the same seed some plants are produced, which bear flowers and no seeds, and others which bear seeds and no flowers.

The *bigger*; having a *divided leaf*; || either that which hath a *large hollow stalk*, and a *compound or fingered leaf*, of the *rine* of which *Linnen is made*: or that which is a *climbing Plant* twisting about such things as are next to it, from the right hand towards the left, contrary to the manner of other twining Plants, of a *rough roundish leaf*, divided into many segments, with a *head of scaly tufts* growing in a cluster or bunch, commonly used to preserve drink from sowing.

Cannabis.
Lupulus.

 } SOAK OF CAPPADOCIA. Ambrosia.
- Unpleasant; having a *serrate* leaf with *stinging* prickles.
14. NETTLE. Urtica arvens.
- Seed-vessel; bearing *chaffy* tufts, || either that which hath a *roundish* leaf: or that whose leaf is more *oblong* and pointed.
14. } BLITE. Blitum.
 } PRINCES FEATHER, *Amaranthus*. Amaranthus.
- Place of Growth; being usually upon walls, having red stalks, and a rough seed.
16. PELLITORY OF THE WALL. Parietaria.
- Littleness; being the least of this kind; || either that which hath weak stalks, leaning on the ground, with leaves like those of *Time* but smaller, bearing the seeds in clusters about the joynts: or that which is of a *woody* stalk, bearing the flowers and seeds at the top of the branches.
17. } RUPTUREWORT. Herniaria.
 } STINKING GROUND-PINE. Camphorata.

II. HERBS OF A COMPOUND FLOWER NOT PAPPOUS.

II. HERBS having a COMPOUND FLOWER NOT PAPPOUS, may be distinguished into such whose flowers are compounded either of

Short hollow *stamina* thick set together in a thrumm, with a circle of leaves: or without such a circle, commonly called *Corimbiferous*, being either of

Undivided leaves; having a

Radiate flower; whose limb is

Yellow; either the

Greater; and tallest, || either that which is the *biggest of flowers*: or that which hath a *tubercous esculent root*.

1. } SUN-FLOWER.
} HIERUSALEM-HARTICHOKE.

Lesser; having a *crooked seed*.

2. MARIGOLD.

White; either the greater and taller, having a *ramous leavy stalk*: or the lesser and lower, having a *naked stalk*.

3. } GREAT DAISY.

} DAISY.

Naked Flower; considerable for having

A strong pleasant smell; either that which is the *bigger plant*, of a broad leaf: or that which is the *lesser plant*, of more narrow leaves more deeply indented, whose flowers grow in an Umbell.

4. } SALECOST, *Costmary*.
} MAUDLIN TANSY.

Long hoary leaves; either that which is *Odorate*, having a *yellowish flower*, of a dry *strawy consistence*, preserving the colour for several years after its being gathered: or that which bears a *white flower*, the more common sort of which is not *Odorate*.

5. } GOLDEN STÆCHAS.

} CUDWEED, *Cottonweed*.

Divided leaves; having a

Radiate flower; whose limb is

Yellow; considerable for the leaves, being

More finely divided; either that which grows usually amongst *Corn*: or that which doth commonly grow in *mountainous places*, having leaves like those of *Fennel*.

6. } CORN MARIGOLD.

} OX-EY.

Winged leaves; like those of *Tansy*.

7. AFRICAN MARIGOLD.

White; whose leaves are

More finely divided; either that of a *pleasant*: or that of an *unpleasant sent*.

8. } CAMOMIL.

} STINKING MAYWEED.

Less finely divided; being of a *strong sent*.

Bellis major.
Bellis minor.

Cosmos hortorum.
Ageratum.

Stæchas citrina.
Gnaphalium.

Chrysanthemum segetum.
Buphtalum verum.

Flos Africanus.

Chamamelum.
Centaurea fistulosa.

Matricaria.

Undivided;

Undivided; being long and narrow; || either that whose leaves are indented about the edges: or that whose leaves are smooth, being of a hot tast.

10. } SNEEZEWORT.
 } TARRAGON.

Parmica.
Draco herba.

Naked flower; whose stalks are

More woody; either that whose leaves are more green: or that whose leaves are generally hoary and white.

11. } SOUTHERNWOOD.
 } LAVENDER COTTON.

Abrotanum.
maf.
Abrotanum
femina.

Less woody; either that of a bitter tast, and more pleasant smell: or that whose sent is not so pleasant, whose leaves are green above and hoary underneath.

12. } WORMWOOD.
 } MUGWORT.

Abfusthium.
Ariem fia.

Bearing their flowers in the fashion of an Umbell, having winged leaves, || either that which is of a strong and not unpleasant sent: or that which is less odorate.

13. } STANSY.
 } MILFOIL.

Tanacetum.
Millefolium.

Oblong tubulous leaves; the

Greater; bearing many flowers upon a stalk, || either that whose leaves upon breaking have several little hairy strings, the flower made up of tubulous leaves lasciniated at the top: or that of a more globular flower, the root seeming to have a piece bitten off.

14. } SCABIOUS
 } DIVELS BIT.

Scabiosa.
Morsus Dia-
boli.

Lesser; bearing but one flower upon a stalk, like that of Scabious, || either that of a round blew flower, having a leaf like that of the lesser daisy: or that of grassy leaves and a naked stalk.

15. } BLEW DAISY.
 } THRIFT, *Sea Gilly-flower.*

Globularia.
Caryophyllus
marinus.

Oblong flat leaves; without any thrum in the middle, bearing blew flowers, || either that which is smaller and annual: or that which is larger and perennial.

16. } SENDIVE.
 } SUCCORY.

Endivia.
Cichoreum.

III. PAPPUS

cannabinum
mas.
V. rga aurea.

8. { DUTCH AGRIMONY.
GOLDEN ROD.

< *Colour*; either that which bears *flowers of different colours*, the *leaves* whereof somewhat resemble the *rays of a Starr*: or that whose *flowers* are generally *yellow*, the *leaves* of the *plant* being *Odorate*.

Aster.
Coniza.

9. { STARWORT.
FLEABANE.

Marine;

Marine; having long thick leaves; || either that the border of whose flower is Purple and the middle of it Yellow: or that of a Yellow flower and hard stalks, the leaves being narrow and cut in at the ends.

SEA-STARWORT.

Tripolium.
Cribmum
chrysanthemum.

IC. GOLDEN FLOWER'D SAMPHIRE.

Double; the plants having a milky juice, distinguishable by their Heads; being smaller; either that of a more rugged leaf used for Sallads: or that of a smoother leaf, said to sweat out a gumm at the joints.

LETTICE.

Lactuca.
Chondrilla.

II. GUMM SUCCORY.

Leaves; whether

Jagged; either that of a solid stalk: or that of a hollow smooth stalk, the seed of which being ripe, doth with the down upon it, spread it self into a Sphærical figure.

12. HAWKWEED.

Hieracium.
Dent. Leonis.

DANDELION.

Undivided; || either that whose leaves are long and grassy, the flower of which being closed, doth represent a goats beard, whose root is esculent: or that whose leaves are round pointed, and hairy.

GOATS-BEARD.

Tragopogon.
Pilosella.

13. MOUSE-EAR.

Resembling thistles; but not prickly; either that which bears larger: or that which bears lesser flowers.

SOWTHISTLE.

Sonchus.
Lampson.

14. NIPPLEWORT.

IV. UMBELLIFEROUS HERBS OF BROADER LEAVES.

IV. UMBELLIFEROUS HERBS whose LEAVES are MORE BROAD and less finely cut, may be distinguished into such as are,

Taxus.

Agrifolium.

Whitish berries; having *small round leaves of an ill sent*, a hard close

7. BOX. (wood of a yellowish colour.)

Gumms; || either that which hath *winged leaves, without an od leaf at the end*: or that which hath *long narrow leaves, like those of Iris*, producing a red Gum called *Sanguis draconis*.

Buxus.

8. MASTIC TREE.
 DRAGON TREE.

Lentiscus.

Draco arbor.

Exotic;

Deciduous; || either that whose fruit is *Aromatic*, being the bottom of the flower; which when ripe, grows *turgid in the middle* where the seeds are contained: or that of *winged leaves, serrate, of a deep green*, bearing *white berries in clusters*.

9. SCLOVE TREE.
 BEDE TREE.

Caryophyllus aromaticus.
Azedarach.

IV. NUCI.

IV. NUCIFEROUS TREES.

IV. NUCIFEROUS TREES, may be distinguished into such as are,

European; containing in one common husk

One Nut; having a covering that is either

Thick and pulpy; having oily kernels; || either that which is the larger tree of winged leaves, odorate, having a rugged kernel, divided into several lobes: or that which is a lesser tree, having long narrow serrate leaves, and a smooth kernel.

Juglans.
Amygdalus.

- 1. } SWALNUT.
- } ALMOND.

Thin husks; either such as are

Wholly encompassed; and covered by their husks; whether that of winged leaves, having a white thin shell, upon which there is another rugged covering: or that whose leaf is like that of a Quince, green above and white underneath, the fruit covered with a downy husk, the kernel of a bad taste.

Pisacea.
Syrax.

- 2. } PISTACIE, *Fistic-nut.*
- } STORAX.

Open at one end; being smaller Trees, of broad indented leaves, bearing Catkins; || either that of a larger kernel and thinner shell, whose husk is longer: or that of a lesser kernel and thicker shell, whose husk is shorter.

Avellana.
Corylus sylvestris.

- 3. } FILBERT.
- } SMALL NUT.

Several Nuts; whose outward husk is

Echinate and prickly; || either that which hath long, smooth, deeply indented leaves, the husk containing three or four Nuts: or that which bears a short, roundish, shining leaf, having a smooth bark, and Nuts of a triangular figure.

Castanea.
Fagus.

- 4. } CHESNUT.
- } BEECH.

Smooth; and thin, in the form of a Bladder; being a small tree of

Staphylo-dendron.

- 5. BLADDER NUT.

(winged leaves.

Exotic; containing in one common husk

One Nut; || either that which is a large tree, bearing the largest Nut of all that are known, covered with a thick rine upon the shell: or that which hath a hard Aromatic kernel, covered immediately with a yellowish Aromatic husk, called Mace, upon which there is a thin shell,

Nux moschata.

- 6. } COCO.
- } NUTMEG.

(and upon that a pulpy coat.

Several Nuts; having a covering

More thin; whose kernels are used for the making of drinks, being but small trees; || either that which grows in shady moist places, having many kernels together in a husk: or that which is less properly called a Nut, bearing a double kernel in a husk, each of them being flat on one side, and gibbous on the other.

Cacao.
Buna arbor.

- 7. } CHOCOLATE.
- } COFFI.

Covered with a woolly substance: or that which besides the outward tegument hath likewise an inward pulp, wherein the fruit lies, of the shape of a Heart, and the bigness of a Bean, used in Physick.

Gossypium.
Anacardium.

- 8. } COTTON TREE.
- } ANACARDIUM.

V. GLAN-

V. GLANDIFEROUS, and CONIFEROUS TREES, may be distinguished into such as are

Glandiferous.

Deciduous ; || either that which is a *large tree*, of a *hard lasting wood*, a *rugged bark*, the *leaves waved at the edges* : or that whose *leaves are more deeply divided*, bearing a *larger fruit*, standing in great thick rugged cups, used for tanning.

1. } OAK.
 } BITTER OAK.

Quercus.
Cerrus.

Evergreen ; || either that whose *leaves resemble those of Holly*, being of a dark green above, and white underneath : or that which is very like to this, having a very, *thick, light, porous, deciduous bark*.

2. } HOLM OAK.
 } CORK TREE.

Ilex.
Suber.

Coniferous ;

Deciduous ; bearing small *Cones* ; || either that which grows in *watery places*, having *leaves of a dark green*, shaped like those of the *Nut-tree* : or that whose leaves are very slender, growing in *tufts*, more thin at *distances*, of a paler colour.

3. } ALDER.
 } LARICH TREE.

Alnus.
Larix.

Evergreen ; whose *Cones are*

Bigger ; || either that which is a *large tall tree*, bearing *great roundish Cones of smooth scales, standing upwards*, the leaves being small, narrow, and thick set together : or that which bears *long slender leaves, two growing out together from one socket*, the *Cones* consisting of *hard woody scales*.

4. } CEDAR.
 } PINE.

Cedrus.
Pinus.

Lesser ; having

Long leaves ; || either that whose *leaves encompass and cover the branches*, bearing *long Cones hanging downwards* : or that whose *leaves grow from each side of the stalk*, being more flat, like those of *Yew*, green on the upper side, and whitish underneath, *furcated at the end*, bearing *Cones shorter and thicker*, growing *erect*.

5. } MALE FIRR TREE, *Pitch-tree*.
 } FEMALE FIRR TREE.

Abies mas.
Abies femina.

Short leaves ; || either that which grows in a *conical figure*, bearing *small roundish Cones* : or that which hath *compressed branches* of a strong resinous sent, bearing *small Cones encompassed with six scales*.

Thus.
Gummi Elemi.

3. } FRANKINCENSE, Olibanum.
} GUM ELEMI.

Bigger grains; proceeding from an American tree, the latter of which is more clear and transparent.

Gummi Animæ.
Copal.

4. } GUMMI ANIMÆ.
} COPAL.

Perfumes; || either that which is of a more hard consistence, and more tenacious: or that which is more easily dissolved.

Ceyanna.
Benzoin.

5. } CARANNA.
} BENJAMIN.

Less pleasant sent; either that which is

More volatile; white and transparent from several trees.

Camphora.

6. CAMPHIRE.

Less volatile; || either that which is unctuous and bitterish, easily growing soft, proceeding from an exotic thorny tree: or that which proceeds from a tall tree like Poplar.

Bdellium.
Taca mahaca.

7. } BDELLIUM.

} TACA MAHACA.

Not odorate; of a red tincture, used in painting and varnishing.

Lacca.

8 LAKE.

Liquid; being of a sweet sent; || either that which is of a more strong smell: or that which is of a reddish colour, used for stopping defluxions.

Liquidambra.
Balsamum
Peruvianum.

9. } LIQUIDAMBRA.

} BALSAMUM PERUVIANUM.

CHAP. V.

- I. Concerning Animals, the general distribution of them. II. Of exanguious Animals. III. Of Fish. IV. Of Birds. V. Of Beasts. VI. A Digression concerning Noah's Ark.

Sensitive creatures may be distinguished into such as are counted more ϕ. I.

Imperfect; which have something analogous to blood, but are destitute of that red juice commonly so called, being therefore stiled EXANGUIOUS, having either no legs, or more legs than four,

Perfect; whether

FISHES, which have no legs, but fins answerable to them, being covered with a naked skin, or with scales, whose proper motion is *swimming*.

BIRDS, which have two legs and two wings, whose bodies are covered with feathers, being oviparous, whose proper motion is *flying*.

BEASTS, which are for the most part, four-footed, hairy, and viviparous, excepting only some few which are without feet or hair, and are oviparous.

It may be observed to be amongst these (as it is amongst the other ranks of *Beings*,) that the more perfect kinds are the least numerous. Upon which account, *Insects* being the most minute and imperfect, and some of them (perhaps) of a spontaneous generation, are of the greatest variety, tho' by reason of their littleness, the several *Species* of them, have not hitherto been sufficiently enumerated or described, by those Authors who have particularly applied themselves to this study.

There are sundry of these, as likewise of other Animals, which have no *Latin* names, as being unknown to the *Romans*, & there are sundry which have no *English* names, as being strangers to us. And amongst those that have *English* names, some are here described by their usual Appellations in *Latin*, because I knew not at present how to render them properly in *English*: And some there are peculiar to some coasts and rivers, and not commonly known elsewhere, which are hard to be enumerated.

As for *fictitious Animals*, as *Syren*, or *Mermaid*, *Phoenix*, *Griffin*, *Harpy*, *Ruck*, *Centaur*, *Satyr*, &c. there is no provision made for them in these tables, because they may be infinite; and besides, being but bare names, and no more, they may be expressed as *Individuals* are.

Of Exanguious Animals.

ϕ. II. **T**Hose kinds of more imperfect Animals, which are destitute of that red juice, commonly called blood, are stiled *Exanguious*; to which may be annexed that general name given to the least kinds of these, viz. *Insect*, from that incisure or resemblance of cutting what is common to most of them in some part of their bodies.

These EXANGUIOUS ANIMALS may be distinguished into

Lesser; usually called *Insects*; whether such whose generation is *Analogous to that of other Animals*; which breed young like themselves, growing from a lesser to a greater magnitude, not being transmutable into any other *Insect*; whether such as have.

NO FEET OR BUT SIX feet, being WITHOUT WINGS. I.
 SIX FEET and WINGS, or MORE feet THEN SIX. II.

Anomalous; whether such as

SARE DESIGNED TO A FURTHER TRASMUTATION. III.
 Have in their production undergone severall mutations; being first Eggs, then Maggots or Caterpillars, then Aurelia, and then flying *Insects*, which after their first production do not increase in magnitude; whether such as have

SNAKED WINGS. IV.
 SHEATHED WINGS. V.

Greater; whether

Hard; whose bones are on their outside; being either

CRUSTACEOUS; namely such as are wholly covered with a tough flexile substance, having generally eight legs, besides a pair of claws, and two or more annulated horns or feelers. VI.
 TESTACEOUS; of a more hard and brittle substance

TURBINATED; consisting of a cone-like cavity, rouled up in a spiral, which beginning at the Aperture or mouth of them, doth generally proceed from the left hand to the right. VII.
 NOT TURBINATED. VIII.
 SOFT. IX.

I. INSECTS

I. INSECTS of an Analogous generation, having *no feet*, or *but six feet*, being *without wings*, may be distributed into those that are *Apoda*; without feet.

More oblong and round;

Larger;

More slender; of a reddish colour, with very little distinction of parts; || either that which breeds in the earth: or that which breeds in the bodies of children.

- 1. SEARCH WORM.
- 2. BELLY WORM.

More thick; || either that which breeds in watery places, being used for the drawing of blood: or that which is covered with a slimy moisture, having four little horns like prominencies, or feelers.

- 3. SLEECH.
- 4. SNAIL.

Lesser; breeding in Animals; || either the more minute, being small white Worms, breeding in the lower guts of Men: or the bigger, sticking their heads in the inward membranes of Horses stomachs or guts.

- 5. ASCARIDES.
- 6. BOTTS.

More short and flat; || either that whose shape doth somewhat resemble a Flounder, found both in waters, and in the branches of the *Porus bicaris*, and the liver of several of the Ruminant kind: or that of a Square body, with a little trunk standing out betwixt two Antennae, and six stringy substances behind, living in the Sea.

- 7. SFLUKE.
- 8. ASILUS.

Hexapoda; having six feet.

Terrestrial;

Greater;

More slender; || either that whose body is somewhat compressed, sending out a light from her tail: or that which is of a whitish colour, more oblong, breeding in Meal.

- 9. GLOW WORM.
- 10. MEAL-WORM, Gentle.

Less slender; || either of a

Darker colour; being like a Beetle without wings, but seeming to have some little rudiments of wings, noted for being apt upon a touch to send out a yellowish oily substance from his joints.

- 11. PROSCARAB.

Lighter colour; whether that which resembles a Locust without wings: or that which is of a Chestnut colour, flat, broad, soft, avoiding light places.

- 12. FIELD CRICKET.
- 13. COCK ROCHES.

Lesser; troublesome to other Animals; || whether that of a paler colour: or that of a dark red, being salient.

- 14. LOUSE.
- 15. FLEA.

Aquatic; having a compressed body, with an oblique declivity upon the back, and a long tail.

VII. TESTACEOUS TURBINATED ANIMALS.

More properly so called; whether such whose spiral convolutions

Do appear on the outside; being either

Not produced; but equal on both sides; || either the Greater, having several Diaphragms perforated, the Animal within somewhat resembling a Polypus: or the Less, being of a dark red colour, and found in fresh water.

- 1. } SNAUTILUS.
- } WATER-SNAIL.

Produced; whether

More short in the spiral production, considerable for having a purple juice; heretofore used in Dying, the shells being either knobbed or thorny; || either that whose shell is very large and thick, being the strongest and heaviest of this kind, having a long aperture: or that which hath a roundish aperture, with a neb or beak at one side of it.

- 2. } SMUREX.
- } PURPURA.

Long aperture; || either that whose turbinated part is almost plain, and the part not turbinated, much produced, somewhat like a Cylinder: or that which is of a great bigness, having seven strong furrowed prominencies from one side of the aperture.

- 3. } SCYLINDROIDES.
- } APORRHAI.

Roundish aperture; || either that which is more prominent, having more revolutions: or that which is more compressed, having fewer revolutions, many of them having a knob by the aperture.

- 4. } SEA SNAIL.
- } SNERITES.

Cochlea.

More oblong; always ending in a sharp point, having either a more prominent base; || either the Greater: or the Lesser.

- 5. } BUCCINUM.
- } TURBO.

Flat base; broad and round, being nearer to the figure of a Cone; the greater: or the lesser, whose base is less flat.

- 6. } STROCHUS.
- } PERIWINKLE, Welke.

Do not appear on the outside; but are within the shell, having long apertures; || either that whose aperture is more narrow, being furrowed on either side: or that whose aperture is somewhat wider, not furrowed on the sides of it.

- 7. } VENUS SHELL.
- } PERSIAN SHELL.

Concha Venus.
Concha Persica.

Less properly so called; being of near affinity to the Univalvus, the inside having a pearl-like shining colour, with several holes on one side, being at one end on the outside somewhat turbinated.

- 8. SEA EAR.

Autis marina.

VIII. TESTACEOUS ANIMALS NOT TURBINATED.

VIII. EXANGUIOUS TESTACEOUS ANIMALS NOT TURBINATED, may be distributed into such as are

Univalvus; having but one shell; whether being

Unmoved; sticking fast to Rocks or other things; || whether that whose convexity doth somewhat resemble a short obtuse angled cone, having no hole at the top: or that which is of an oblong figure, somewhat Cylindrical, fixed at the bottom to the place where first it was bred, with
(an aperture at the top.

Patella.

Balanus.

1. SLIMPET.
2. CENTER FISH.

Moveable; || either that of a Spherical figure somewhat compressed, full of prickles, having one large round aperture at the bottom, and another small aperture opposite to it: or that which is of a more oblong figure, a tender shell, having two apertures on the same side.

Echinus.

Echinus spargus.

2. BUTTON-FISH.
3. MERMAIDS HEAD.

Bivalvus; having two shells; whether more

Roundish; such whose outsides are

Smooth; || whether that of a larger thicker shell, of a pearl-like shining, whose inward part towards the joynt, doth end in a narrow sinus or cavity: or that which is whitish on the outside.

Concha margaritifera.
Galades.

3. MOTHER OF PEARL.
4. GALADES.

Rough; || either that whose joynt is more narrow, having no prominences in the inside of it: or that whose joynt is more broad, with two prominencies and two correspondent cavities in each shell.

Ostrea.

Spondylus.

4. SOYSTER.
5. SPONDYL.

Furrowed; || either the bigger; having one or two ear-like prominencies on the outside towards the joynt: or the less, having no such prominencies.

Pecten.

Pectencaulus.

5. SCOLLOP.
6. COCKLE.

Oblong; considerable for being

Less long; and nearest to the round kind, being smooth, and having thin shells; || either the greater, of a flattish and compressed figure: or the lesser, being somewhat of a triangular figure, having the edges
(of the shell indented.

Chama.

Tellina.

6. CHAMA.
7. TELLINA.

More long; whether such as are

Of a dark blackish colour on the outside; || either the greater, which from a joynt at one end more acute and slender, doth grow out to a great length, becoming broad at the other end, having a silk-like substance within the shell: or the less, of which one kind hath the joynt at the end, and is commonly eaten, the other hath the
(joynt on the side.

Pinna.

Musculus.

7. PINNA.
8. MUSCLE.

Not closed exactly in all parts of their shells; || either that which lyes in holes in a kind of marle at the bottom of the Sea, having an aperture near the joynt, and a little hook in the inside: or that which is open at both ends, being the longest of all the rest, in proportion to
(its bigness.

Pholas.

Solen.

8. PHOLAS.
9. SHEATH-FISH, Razor-fish

Growing by a neck to other things; whose shell consists of five parts, commonly (though falsely) said to produce a Bird, being of a trian-

More Perfect ; having *mouths* like the *beaks of Birds*, with *eight stringy substances* about them serving instead of *legs*, their *bodies* containing a *black liquor like Ink*; whether those whose *bodies* are more

Obround; having

No Antenna; or *feelers*, and being *without any bone*; || either the *greatest*, growing to a *vast magnitude*: or the *less*, whose *legs* are longer in proportion, being of a *sweet sent*.

- 1. } SPOURCONTREL, *Preke, Polypus.*
- } SWEET POLYPUS.

Polypus.
Bolitana.

Antenna; || either the *greater*, with a *great, thick, soft, not pellucid bone* in the *body*: or the *lesser*, which is *without such a bone*, having *small roundish flaps* on either side of the *body*.

- 2. } CUTTLE FISH.
- } LESSER CUTTLE.

Sepia.
Sepiola Kondeletii.

Oblong; || either that of *longer Antenna* with *triangular flaps*, having a *long pellucid bone resembling a sword*: or that of *shorter Antenna*, having the *triangular flaps* nearer the *tail*, being of a *reddish colour*.

- 3. } SLEVE.
- } REDDISH SLEVE.

Loligo.
Loligo rubra.

Less perfect; counted *Zoophytes*, as being betwixt *Plants* and *Animals*; whether such as have

More distinction of parts; || either that which hath some *resemblance to a Hare*: or that which hath some *resemblance to a naked black snail*, without *horns*.

- 4. } SEA HARE.
- } HOLOTHURIUS.

Lepus.
Holothurius.

Less distinction of parts;

Pellucid; being a kind of *Gelly*, roundish at the top, marked with *reddish lines* in the form of a *Starr*, or *Rose*, having several kinds of *rays like legs*, proceeding from the middle of it.

- 5. BLUBBER.

Pulmo marinus.

Not pellucid; usually sticking to other things; || either that which is of *various figures*, being covered with a *hard callous skin*, containing an *esculent pulpy substance*: or that which is of a *fleshy consistence*, having *no hard skin*, being of *various shapes* and *bignesses*, some of them stinging the *hand* upon the touch.

6. } GREATER DOG-FISH.

6. } LESSER DOG-FISH.

Catulus major.
Catulus minor.

A head like the head of a Crutch, with the eyes at the ends of the transverse, growing to a vast bigness: or having a very long slender tail.

7. } ZYGÆNA.

7. } FOX.

Zygæna.
Valpœula.

Common to salt and fresh water; having gills, but no teeth, their mouths being placed under their noses; || either that whose body is pentagonal, having five rows of bonny lamins, not properly scales, four strings hanging before the mouth: or that which is more round.

8. } STURGEON.

8. } HUSO.

Acipenser.
Huso.

II. VIVIPAROUS CARTILAGINEOUS FISH, whose bodies are not long and round, may be distributed into such as are

II. VIVIPAROUS FISH NOT LONG AND ROUND.

Flat and broad; distinguishable by some peculiarity in their parts, as to

Length; of the

Tail; being either

Spinous; having a sharp serrated thorn on the tail counted venomous; || either that whose snout is less or more prominent.

1. } SPASTINACA.

1. } AQUILA.

Pastinaca.
Aquila.

Not spinous; || either that whose back is smooth; or thorny.

2. } FLARE.

2. } THORNBAC.

Rais Lavis.
Rais clavata.

Snout; being sharp; || either that whose body is shorter in proportion to the breadth: or that whose body is longer.

3. } RAIA OXYZYNGHOS, Maid.

3. } SQUATINO-RAIA.

Breadth of the head; having a thick short tail in the fashion of a Battledore; || either that which hath five purple spots on the back: or that which hath one round aperture for each gill, a vast mouth, with stringy substances on his head and back.

4. } CRAMP-FISH.

4. } SEA-DIVEL.

Torpeda.
Rana piscivora.

Situation of the mouth; which opens at the end of the snout, and not underneath, as the rest of this tribe, having a more oblong body, and a very rough skin, with funny substances, standing out from each side like wings.

5. SCATE, Angel-fish.

Squatina.

Thick and short; || either that which hath no tail, but resembles the head of a Fish cut off, with one tooth in each jaw, and one hole for each gill: or that which is of a reddish colour and spinous.

6. } MOLE.

6. } LUMP.

Mola.

III. OVI-

III. OVIPAROUS FISH OF FLEXILE FINNS.

III. OVIPAROUS FISH, whose back FINNS are wholly soft and *flexile*, may be distinguished into such as have

Three such soft finns on their backs; namely the *Cod-kind*, which use to be preserved for humane food by salting; either the

shorter and thicker; whether

{ Larger; || either that which hath a kind of beard: or that of a black coloured back.

1. { SCOD-FISH, Keeling.
 { COLE-FISH.

{ Lesser; || either that which hath a black spot on either side: or that which is of a softer body, having very small scales, being the least of this kind.

2. { SHADDOCK.
 { WHITING.

Longer and more slender; || either that whose flesh when salted, looks yellow, and is more brittle: or that other of near resemblance to this, whose hinder finn seems to be two, by reason of its rising up higher in the further part, tho it be properly but one.

3. { SLING.
 { SHAAK, Poor John.

Two soft flexile finns; either the

Bigger; whether the

Tunny kind; having very small scales, scarce discernable, with several pinnulae both above and below, besides their finns, being of a shining blew on the back, and a silver colour on the belly and sides; the

{ Larger; || either that which hath no streaks on the sides: or that which hath oblique transverse streaks from head to tail.

4. { STUNNY.
 { PELAMIS.

{ Lesser; having oblique transverse streaks more undulated.

5. MACKEREL.

Flying fish; having large spotted finns like wings, with two long strong thorns behind the head: to which may be adjoined for its affinity in flying, that other Fish, which hath but one soft finn on the back, with large scales near his tail.

6. { SKITE-FISH.
 { SWALLOW-FISH.

Least kind; distinguishable by their having

The lower pair of finns connected; || latter having a shorter head, and more tumid jaws.

7. { SEA GUDGEON.
 { PAGANELLUS.

The rays of the former finn on the back, rising up much higher then the membrane which connects them; || either that whose former pair of finns are connected: or that which hath a hole instead of gills, whose eyes stand more close together.

8. { JOTO.
 { DRACUNCULUS.

Larger;

More common; being gregarious, swimming together in great multitudes; || the greater: or the lesser.

10. } HERRING, Sprat.

Harengus major.
Harengus minor.

Less common; being somewhat bigger and flatter than a Herring, with several black spots on the sides, coming up into Rivers.

11. SHAD.

Clupea.

Lesser; || either that which is more proper to salt water, being long and roundish, having the upper mandible much more produced than the other: or that which lives in Lakes, being of a broader figure than the former.

12. } ANCHOVY.

Encrasicholus.

} CHALCIS, sarda.

Being of the Horn-fish kind; having a longer slender body and a long snout; || either that which is more known and common in Europe, having one fin from the anus to the tail, and another opposite on the back, the vertebra or back-bone being of a green colour: or that which is here less common, belonging to the West-Indies, having no fin upon his tail.

} NEEDLE-FISH.

Acus.

13. } TOBACCO-PIPE-FISH.

Petimbuba.

Having between the eyes two fin-like substances; and but two or three rays in the lower pair of fins, with a row of small teeth, and afang at each end; || either that which hath upon his back-fin a beautiful spot variegated with rundles; or that whose fin is of an unequal altitude.

} BLENNUS.

14. } SCORPIOIDES.

Wanting the lower pair of fins; || of a deep figure, somewhat resembling that of a Turbut: or being of a red colour, with large scales, a great flat head, steep from the eyes to the snout.

} STROMATEUS, Calliethys.

15. } NOVACULA.

Having some sharp teeth; and several other round broad teeth in the palate, the tops of which are commonly sold for Toad-stones.

16. LUPUS MARINUS SCHONFELDII.

Breadth or depth downwards; || either that which hath two long rays extending beyond the tail, one from the back, the other from the belly: or that which hath but one long ray, like a Bodkin, proceeding from the fin on the back. Both exotic Fishes, described by Margravius.

} GUAPERUA.

IV. OVIPAROUS FISH having one fin **SPI-NOUS**, and the other **FLEXILE**.

IV. OVIPAROUS FISH having two *finns* on the *back*, whereof the former is *spinous* and *stiffe*, and the other *soft* and *flexile*, may be distinguished into the

Bigger kind; whose figure is

{ *Shorter*; distinguishable by their

{ *Having small scales*; being *square* towards the *tail*, which is *forked*: or else being of a more *deep figure*, with the *rays* of the *fore-finn* very low, the former of them pointing towards the head.

- 1. { **SAMIA**, *Leccia Salviani*.
- { **GLAUCUS**.

{ *Having the finns almost joyned*; || either that with a little *short beard* under the *chin*, being *undulated obliquely* from the *back* to the *belly* with *blewish* and *yellow streaks*: or that other of a near resemblance to this, only without a *beard*, and of a more *black colour*.

- 2. { **SCORACINUS**.
- { **ZUMBRA**.

{ *Longer*; having a *large mouth*, with *sharp teeth*; || either that which is *spotted* when young, being very *voracious*: or that other of some resemblance to the former, having *large scales*, an *obtyse angled mouth*, with *streaks* of *black* and *white* from *head* to *tail*.

- 3. { **LUPUS**.
- { **ENGLISH MULLET**.

Lesser kind; whether such as are considerable for

{ *Having two or three long prominences like fingers* before their lower *finns*; great *bonny heads*, large broad *finns*, called the *Gournet-kind*, to be further distinguished by their

{ *Colour*; *Red*, or *Grey*.

- 4. { **RED GOURNET**, *Rochet*.
- { **GREY GOURNET**.

{ *Forked snouts*; by reason of two *flat prominencies* resembling *horns*; || either that of *shorter*: or that of *longer horns*, the latter of which is covered with large *bonny scales*, with *eight rows* of *thorns*, the *body* *octangular*, having but *two fingers*.

- 5. { **STUR-FISH**, *Piper*.
- { **LYRA ALTERA RONDELETII**.

{ *Being of a reddish colour*; with two long *prominencies* from the lower *jaw*, esteemed delicate food; || either the *bigger*, whose *scales* are larger and stick faster to the *skin*: or the *lesser*, whose *scales* are less, and apt to come off upon a touch.

- 6. { **STRUE MULLET**.
- { **LESSER MULLET**.

The length of their bodies; whether

{ *Having the lower mandible longer* than the other, the *finns* on the *back* being at a *greater distance*: or having the *second finn* on the *back* very *small*, with a *wide mouth* like that of a *Serpent*.

V. OVIPAROUS FISH of ONE FINN, partly STIFF, and partly SOFT.

V. OVIPAROUS FISH having *one finn* on the *back*, the *rays* of which are *partly stiffe* and *spinous*, and *partly soft* and *flexile*, may be distinguished into such whose figure is more

Broad; or deep; whether

European;

Bigger; distinguishable by their

COLOURS; whether

Gold colour between the eyes, having round sharp teeth, and for the most part a purple spot near the gills: or that which is of a like figure to the former, but only without this gold colour, being black about the tail.

1. } GILT-HEAD, Sea-bream.

 } SPARUS.

Streaked with yellow from head to tail; || either that whose streaks are more obscure, being of a shorter body: or that whose streaks are more conspicuous, being of a longer body.

2. } SCANTHARUS.

 } SALPA.

Streaked with a dark colour, transverse the back; || either that whose streaks are more obscure, being of a shorter broader figure, and having broad flat teeth: or that whose streaks are more conspicuous, being of a longer body.

3. } SARGUS.

 } MORMYLUS.

Reddish; on the back and sides; || either the greater, having a dark spot on each side near the head: or the lesser, being without such a spot.

4. } PAGRUS.

 } RUBELLIO.

Being somewhat more produced in their bodies than the others of this deep kind; || either that which is black about the tail, having great eyes: or that of a reddish colour, with four remarkable teeth in either jaw.

5. } MELANURUS.

 } DENTEX.

Having the finn on the back so low in the middle, that it seems two, with great heads full of prickles, counted venemous; || either the greater, of a reddish colour: or the lesser.

6. } GREATER SCORPION-FISH.

 } LESSER SCORPION-FISH.

Least of these deep fishes, of a dark colour, with large scales, and long streaks from head to tail.

7. CHROMIS.

Indian; described by Margravinus; || either that of a forked tail, having two prickles on the cover of each gill: or that which hath broad spots on either side.

8. } JAGURACA.

 } ACARA.

Aurata.

Sparus.

Long; distinguishable by

Variety and beauty of colours; || either the *Greater*, of which there are several kinds, the most beautiful of which, is called *Pavo*, the more dark, *Merula*: or the *Lesser*.

9. } SEA-THRUSH.
 } JULIS.

Turdus.

Dark broad streaks; crossing the back; considerable for having

Heads variegated with red and blew; || either the *Greater*: or the *Lesser*, having a black spot in the middle of the fins on his back.

10. } SEA PERCH.
 } SACHETTUS.

Perca marina.

The lower jaw longer then the upper; || either that which is without prickles: or that which hath two prickles on the cover of the gills.

11. } SPHYCIS.
 } CHAUNA.

A broad black spot on either side; or very great eyes in proportion to the body.

12. } SMENAS.
 } BOOPS.

VI. EEL-FIGURED FISH.

VI. OVIPAROUS FISH OF AN OBLONG FIGURE, being generally without scales, having slimy skins, apt to bend and twist with their bodies more then other Fish, may be distributed into such as are

European; being either

Proper to Sea-water;

Longer;

Round; whether

More thick; || either that which hath but one pair of swimming fins, and two little horns: or that which hath no swimming fins, with four little horns, and a sharp snout, the skin variegated with yellow.

Congrus.

- 1. } CONGER.
- } MURÆNA.

More slender; || either that which grows to a very great length, having a wider and longer mouth then an Eel, the fin not reaching the tail, which is round and not flat: or that which hath one continued fin as Eeles, with four stringy prominencies from the lower mandible, less round and long then the former.

Serpens marinus.

- 2. } SEA SERPENT.
- } OPHIDION PLINII.

Flat; like a Ribbon or Fillet; || either the bigger of a reddish colour, having two pair of fins: or the lesser, whose flesh is transparent, and the fin on the belly thrice as deep as that on the back, having but one pair of fins.

- 3. } STÆNIA MAJOR.
- } STÆNIA MINOR.

Shorter; || either that with two fins on the back, with a kind of beard, and instead of the lower pair of fins, having two long stringy substances cleft at the ends: or that which is of a smaller magnitude, having one pair of swimming fins, with a forked tail, to which the back fin is extended.

- 4. } TINCA MARINA.
- } SAND-EELS.

Common to salt and fresh water; having a round aperture for the mouth, with which they suck their nourishment, and seven holes on each side instead of gills, being Cartilagineous, without swimming fins; || either the Greater: or the Lesser.

Lampetra major.
Lampetra minor.

- 5. } LAMPREY.
- } LAMPERN.

Proper to fresh water; considerable for having.

Two pair of fins; || either that which is the biggest of this tribe, having two very long strings from the upper jaw, and four shorter from the lower jaw, onely one small fin upon the back, and a long one under the belly: or that which is shorter and thicker then an Eel, with a short beard from his lower mandible, having two fins on the back, the hinder fin on the back and that under the belly, not being contiguous to the tail, variegated in the colour.

¶ VI.

HAVING now dispatched the enumeration and description of the several species of *Animals*; I shall here take leave for a short digression, wherein I would recommend this, as a thing worthy to be observed, namely, that great difference which there is betwixt those opinions and apprehensions which are occasioned by a more general and confused view of things, and those which proceed from a more distinct consideration of them as they are reduced into order.

He that looks upon the *Stars*, as they are confusedly scattered up and down in the *Firmament*, will think them to be (as they are sometimes stiled) innumerable, of so vast a multitude, as not to be determined to any set number: but when all these *Stars* are distinctly reduced into particular constellations, and described by their several places, magnitudes and names; it appears, that of those that are visible to the naked eye, there are but few more than a thousand in the whole *Firmament*, and but a little more than half so many to be seen at once in any *Hemisphere*; taking in the minuter kinds of them, even to six degrees of magnitude. It is so likewise in other things: He that should put the Question, how many sorts of beasts, or birds, &c. there are in the world, would be answered, even by such as are otherwise knowing and learned men, that there are so many hundreds of them, as could not be enumerated; whereas upon a distinct inquiry into all such as are yet known, and have been described by credible Authors, it will appear that they are much fewer than is commonly imagined, not a hundred sorts of Beasts, nor two hundred of Birds.

From this prejudice it is, that some hereticks of old, and some Atheistical scoffers in these later times, having taken the advantage of raising objections, (such as they think unanswerable) against the truth and authority of Scripture, particularly as to the description which is given by *Moses*, concerning *Noah's Ark*, *Gen. 6. 15.* where the dimensions of it are set down to be three hundred cubits in length, fifty in breadth, and thirty in height, which being compared with the things it was to contain, it seemed to them upon a general view, (and they confidently affirmed accordingly) that it was utterly impossible for this Ark to hold so vast a multitude of *Animals*, with a whole years provision of food for each of them.

This

This objection seemed so considerable, both to some of the ancient Fathers, and of our later Divines, who were otherwise learned and judicious men, but less versed in Philosophy and Mathematicks, that they have been put to miserable shifts for the solving of it. *Origen*, and *Saint Austin*, and several other considerable Authors, do for the avoiding of this difficulty affirm, that *Moses* being skilled in all the learning of the *Egyptians*, doth by the measure of cubits, here applyed to the Ark, understand the *Egyptian Geometrical cubit*, each of which (say they) did contain six of the *vulgar cubits*, namely, nine foot. But this doth upon several accounts seem very unreasonable, because it doth not appear, that there was any such measure amongst the *Egyptians* or *Jews*, styled the *Geometrical cubit*: And if there were, yet there is no particular reason, why this sense should be applyed to the word cubit here, rather than in other places. It is said of *Goliath*, that his height was six cubits and a span, which being understood of the *Geometrical cubit*, will make him fifty four foot high, and consequently his head must be about nine foot in the height or diameter of it, which must needs be too heavy for *David* to carry. 1 Sam. 17. 4.

Others not satisfied with this solution, think they have found a better answer, by asserting that the stature of mankind being considerably larger in the first ages of the world, therefore the measure of the cubit must be larger likewise, and perhaps double to now what it is, which will much enlarge the capacity of the *Ark*. But neither will this afford any reasonable satisfaction. For if they will suppose men to be of a much bigger stature then, 'tis but reasonable that the like should be supposed of other animals also; in which case this answer amounts to nothing.

Others will have the sacred cubit to be here intended, which is said to be a hands breadth longer then the civil cubit, *Ezech. 43. 13*. But there is not any reason or necessity for this. And 'tis generally believed, that the sacred cubit was used only in the measure of sacred Structures, as the *Tabernacle* and *Temple*.

This seeming difficulty is much better solved by *Joh. Buteo* in the *Traict de Arca Noe*, wherein supposing the cubit to be the same with what we now call a foot and a half, he proves Mathematically that there was a sufficient capacity in the *Ark*, for the containing all those things it was designed for. But because there are some things liable to exception in the Philosophical part of that discourse, particularly in his enumeration of the species of Animals, several of which are fabulous, some not distinct species, others that are true species being left out; therefore I conceive it may not be improper in this place to offer another account of those things.

It is plain in the description which *Moses* gives of the *Ark*, that it was divided into three stories, each of them of ten cubits or fifteen foot high, besides one cubit allowed for the declivity of the roof in the upper story. And 'tis agreed upon as most probable, that the lower story was assigned to contain all the species of beasts, the middle story for their food, and the upper story, in one part of it, for the birds and their food, and the other part for *Noah*, his family and utensils.

Now it may clearly be made out, that each of these stories was of a sufficient capacity for the containing all those things to which they are assigned.

For the more distinct clearing up of this, I shall first lay down several tables of the divers species of beasts that were to be received into the Ark, according to the different kinds of food, wherewith they are usually nourished, containing both the number appointed for each of them, namely, the clean by sevens, and the unclean by pairs, together with a conjecture (for the greater facility of the calculation) what proportion each of them may bear, either to a Beef, or a Sheep, or a Wolf; and then what kind of room may be allotted to the making of sufficient Stalls for their reception.

| | | 92 | 514 | | | | | | 27 | 72 |

In this enumeration I do not mention the Mule, because 'tis a mungrel production, and not to be reckoned as a distinct species. And tho it be most probable, that the several varieties of Bees, namely that which is stiled *Urus*, *Bifons*, *Bonafus* and *Buffalo*, and those other varieties reckon-

ed under *Sheep* and *Goats*, be not distinct species from *Bull*, *Sheep*, and *Goat*; There being much less difference betwixt these, then there is betwixt several *Dogs*: And it being known by experience, what various changes are frequently occasioned in the same species by several countries, dieters, and other accidents: Yet I have *ex abundantia* to prevent all cavilling, allowed them to be distinct species, and each of them to be clean Beasts, and consequently such as were to be received in by sevens. As for the *Morse*, *Seale*, *Turtle*, or *Sea-Tortoise*, *Crocodile*, *Senembi*, These are usually described to be such kind of *Animals* as can abide in the water, and therefore I have not taken them into the *Ark*, tho if that were necessary, there would be room enough for them, as will shortly appear. The *Serpentine-kind*, *Snake*, *Viper*, *Slow-worm*, *Lizard*, *Frog*, *Toad*, might have sufficient space for their reception, and for their nourishment, in the Drein or Sink of the *Ark*, which was probably three or four foot under the floor for the standings of the Beasts. As for those lesser Beasts, *Rat*, *Mouse*, *Mole*, as likewise for the several species of *Insects*, there can be no reason to question, but that these may find sufficient room in several parts of the *Ark*, without having any particular Stalls appointed for them.

Tho it seem most probable, that before the *Flood*, both Men, Beasts and Birds did feed only upon Vegetables, as may appear from that place, *Gen. 1. 29, 30. And God said, Behold I have given you every herb bearing seed which is upon the face of all the earth, and every tree in which is the fruit of a tree yielding seed, to you it shall be for meat. And to every beast of the earth, and to every fowl of the air, and to every thing that creepeth upon the earth, wherein there is life, I have given every green herb for meat*, compared with *chap. 9. 3.* Where after the *Flood*, when the productions of the Earth were become of less efficacy and vigor, and consequently less fit for nourishment, God saith to *Noah*, *Every moving thing that liveth, shall be meat for you, even as the green herb have I given you all things.* Yet because this proof is not so very cogent to convince a captious Adversary, but that he may still be apt to question, whether the Rapacious kinds of Beasts and Birds, who in the natural frame of their parts are peculiarly fitted for the catching and devouring of their prey, did ever feed upon herbs and fruits; Therefore to prevent such Cavils, I shall be content to suppose that those *Animals* which are now *Prædatory* were so from the beginning: upon which, it will be necessary to enquire, what kind of food might be proper and sufficient for them, during their abode in the *Ark*. Now 'tis commonly known, that the *ruminant kind* are most usually the prey for the *rapacious kind* of beasts.

It appears by the foregoing tables, that the beasts of the *rapacious carnivorous kinds*, to be brought into the *Ark* by pairs, were but forty in all; or twenty pairs, which upon a fair calculation are supposed equivalent, as to the bulk of their bodies and their food, unto twenty seven *Wolves*; but for greater certainty, let them be supposed equall to thirty *Wolves*: and let it be further supposed, that six *Wolves* will every day devour a whole *Sheep*, which all Men will readily grant to be more then sufficient for their necessary sustenance: According to this computation; five *Sheep* must be allotted to be devoured for food each day of the year, which amounts in the whole to 1825.

Upon these suppositions there must be convenient room in the lower story

story of the *Ark* to contain the forementioned sorts of beasts which were to be preserved for the propagating of their kinds, besides 1825 *Sheep*, which were to be taken in as food for the *rapacious Beasts*.

And tho there might seem no just ground of exception, if these beasts should be stow'd close together, as is now usual in Ships, when they are to be transported for any long voyage; yet I shall not take any such advantage, but afford them such fair Stalls or Cabins as may be abundantly sufficient for them in any kind of posture, either standing, or lying, or turning themselves, as likewise to receive all the dung that should proceed from them for a whole year.

And that the *Ark* was of a sufficient capacity for these purposes, will appear from the following *Diagram*. In which there is a partition at each end of the *Ark*, marked A A, of fifteen foot wide, and the breadth of the *Ark* being seventy five foot; these partitions must contain in them five *Areas* of fifteen foot square, and an *Area* of five foot square, being sufficient to contain four *Sheep*, therefore one of fifteen foot square must be capable of thirty six *Sheep*; Allowing one of these *Areas* at each end for stairs, there will eight of them remain, (*viz.* four at each end) to be reckoned upon for the containing of *Sheep*; which eight will be capable of receiving 288 *Sheep*.

Besides these partitions, at the end there are five several passages marked B B, of seven foot wide for the more convenient access to the several Stalls; the four *Areas* on the side marked C C, designed for Stalls, are each of them eighteen foot wide, and about two hundred foot long. And the two middle *Areas* marked D D, are each of them twenty five foot wide, and about two hundred foot long.

Supposing the two middle *Areas* to be designed for *Sheep*; an *Area* of twenty five foot square must be capable of a hundred, and there being sixteen of these, they must be capable of 1600 *Sheep*, which being added to the former number of 288 will make 1888. somewhat more then 1825 the number assigned for those that were to be taken in for food.

The four side *Areas* marked C C, being each of them eighteen foot wide, and two hundred foot long, will be more then sufficient to contain the several beasts which were to be preserved for the propagating of their kind; for which in the foregoing Tables there is allotted to the length of their Stalls only six hundred and six foot, besides the largeness of the Stalls allotted to each of them. So that there will be near upon two hundred foot overplus, for the reception of any other beasts, not yet enumerated or discovered.

As for that fashion of the *Keel* of Ships now in use, whereby they are fitted for passage through the Waters, and to endure the motion of the Waves; This would not have been convenient for the business here designed; The *Ark* being intended only for a kind of *Float* to swim above water, the flatness of its bottom, did render it much more capacious for the reception of those many living Creatures, which were to be contained in it. And tho towards the end of the Flood when it began to abate, God is said to *Make a wind to pass over the Earth, whereby the waters were asswaged*, Gen. 8. 1. Yet 'tis not likely that in the time of the deluge, when the whole Earth was overflowed, that there should be any such rough and boisterous winds as might endanger a Vessel of this Figure; such winds usually proceeding from dry Land.

From

From hence it may be evident, that there is sufficient room in the

of the *ARK*, rather than to find sufficient room for those several species of *Animals* already known. But because it may be reasonably presumed, that there are several other species of beasts and birds, especially in the undiscovered parts of the world, besides those here enumerated, therefore 'tis but reasonable to suppose the *Ark* to be of a bigger capacity, than what

~~is said to contain the forementioned sorts of beafts which~~

God is said to *Make a wind to pass over the Earth, whereby the waters were asswaged*, Gen. 8. 1. Yet 'tis not likely that in the time of the deluge, when the whole Earth was overflowed, that there should be any such rough and boisterous winds as might endanger a Vessel of this Figure; such winds usually proceeding from dry Land.

From

From hence it may be evident, that there was sufficient room in the lower story for the convenient reception of all the sorts of beasts that are yet known, and probably for those other kinds that are yet unknown to these parts of the World,

The next thing to be cleared up, is the capacity of the second story for containing a years provision of food. In order to which 'tis to be observed, that the several beasts feeding on hay, were before upon a fair calculation supposed equal to ninety two *Beeves*: but to prevent all kind of Cavils which may be made at the proportioning of them, let them be as a hundred, besides the 1825. *sheep* taken in for food. But now because these are to be devoured by five *per diem*, therefore the years provision to be made for them, is to be reckoned but as for half that number, *viz.* 912. These being divided by seven to bring them unto a proportion with the *Beeves*, will amount to 180, which added to the former hundred make 280, suppose three hundred. So then according to this supposition, there must be sufficient provision of hay in the second story to sustain three hundred *Beeves* for a whole year.

Now 'tis observed (saith *Butco*) by *Columella*, who was very well versed in the experiments of Husbandry, that thirty or forty pound of hay is ordinarily sufficient for an *Ox* for one day, reckoning twelve ounces in the pound. But we will suppose forty of our pounds. And 'tis asserted by *Butco* upon his own tryal and experience, that a solid cubit of dried hay, compressed, as it uses to be, when it hath lain any considerable time in Mows or Reeks, doth weigh about forty pound; so that for three hundred *Beeves* for a whole year there must be 109500. such cubits of hay, (*i. e.*) 365. multiplied by 300. Now the second story being ten cubits high, three hundred long, and fifty broad, must contain 150000. solid cubits, which is more by 40500. then what is necessary for so much compressed hay; and will allow space enough both for any kind of beams and pillars necessary for the fabric, as likewise for other repositories, for such fruits, roots, grain or seed, as may be proper for the nourishment of any of the other *Animals*. And likewise for such convenient passages and apertures in the floor as might be necessary for the putting down of the hay to the Stalls in the lower story. From which it is manifest that the second story was sufficiently capacious of all those things designed for it.

And then as for the third story; there can be no colour of doubt, but that one half of it will be abundantly sufficient for all the species of birds, tho they should be twice as many as are enumerated in the foregoing tables, together with food sufficient for their sustenance, because they are generally but of small bulk, and may easily be kept in several partitions or Cages over one another. Nor is there any reason to question, but that the other half would afford space enough both for *Noah's* family and utensils.

Upon the whole matter, it doth of the two, appear more difficult to assign a sufficient number and bulk of necessary things, to answer the capacity of the *Ark*, rather than to find sufficient room for those several species of *Animals* already known. But because it may be reasonably presumed, that there are several other species of beasts and birds, especially in the undiscovered parts of the world, besides those here enumerated, therefore 'tis but reasonable to suppose the *Ark* to be of a bigger capacity, than what

what may be sufficient for the things already known, and upon this account it may be asserted, that if such persons who are most expert in Philosophy or Mathematicks, were now to assign the proportions of a Vessel that might be suitable to the ends here proposed, they could not (all things considered) find out any more accommodate to these purposes, than those here mentioned.

From what hath been said it may appear, that the measure and capacity of the *Ark*, which some Atheistical irreligious men make use of, as an argument against the Scripture, ought rather to be esteemed a most rational confirmation of the truth and divine authority of it. Especially if it be well considered, that in those first and ruder ages of the World, when men were less versed in Arts and Philosophy, and therefore probably more obnoxious to vulgar prejudices than now they are, yet the capacity and proportions of the *Ark* are so well adjusted to the things it was to contain; whereas if it had been a meer humane invention, 'tis most probable, that it would have been contrived according to those wild apprehensions, which (as I said before) do naturally arise from a more confused and general view of things, as much *too big*, as now such men are apt to think it too little, for those ends and purposes to which it was designed.

And because the chief of these is styled WOOD, therefore may that be here adjoined by way of affinity. 3. { HUSK, Hull, Shell, Skin, Chaff, Boled.
BEARD.

Aggregate of Fruit or Seed ; of a Figure || more gross and confused : or more narrow, oblong, and taper.

4. { CLUSTER, Bunch, Pannicle.
EAR, Spike, Spire, Bent.

Less principal ; to be further distinguished by the Figure, in respect of

Thickness or Thinness ; either such as are more thick, namely the first little swellings in the growth of a Plant, or of the parts of it : or such as are more thin, namely those laminated parts, belonging either to Plants themselves, or to their flowers.

5. { SPROUT, Bud, shoot, burgeon, pullulate, repullulate, germinate,
put forth, spring forth.
LEAF, Foliage, Blade.

Length ; whether such as are

Proper to the Flower ; the greater, standing up singly in the middle of the flower : or the lesser, being small threddy filaments within the flower, whereof there are usually many together.

6. { STILE.
STAMEN, tuft.

Common to other parts of the plant ; || either those small stems, upon which flowers and leaves do grow : or those kinds of threddy shoots, by which climbing Plants do take hold of and twist about the things that stand next to them

Fruits may be distinguished into such as are

Receptacles of Seed.

Eaten commonly by men; whose eatable part is covered with a

Soft Skin.

Without Stones; being generally a larger fruit.

1. APPLE, *Pomiferous*.

With Stones; || either the *greater* kind, containing one single stone encompassed with an esculent pulp: or the *less*, growing either in Clusters, or dispersedly on Trees, Shrubs and Herbs, containing generally several small seeds or stones in the pulp or husk of it.

2. *SPLUM*, *Pruin*, *Pruniferous*.

BERRY, *Bacciferous*.

Hard Shell; namely that kind of fruit, whose only esculent part is inclosed in a hard covering.

3. NUT, *Nuciferous*.

Not eaten commonly by men, but by beasts.

Consisting of one only Seed, in a Seed-vessel; || *roundish*: or *flat-figured*.

4. *MAST*, *Acorn*, *Pannage*.

KEY.

Containing several Seeds; being || *more solid*: or *hollow*.

5. *SCONE*, *Apple*.

COD, *Husk*, *Pod*, *Shell*, *shale*, *siliquous*.

Seed; || being the *most minute* kind of Fruit, whereby Plants propagate their Kinds; or the *Inmost parts* of Seeds.

OF GENERAL PARTS.

§. II.

BY GENERAL PARTS of Animals are meant such as are more common to the whole kind, or at least the more perfect kinds, as Beasts and Men; there being several parts enumerated under this head, as Milk, Marrow, Bone, Gristle, Tooth, Dug, Rib, Navel, all under the fifth Difference, and some under the sixth, which are not common to all sorts of Insects, Fishes, and Birds. These are distinguishable into

Concerning the Predicament of Quantity, viz. I. Magnitude.
II. Space; and III. Measure.

The chief notions belonging to the Predicament of Quantity are reducible to these general Heads; } MAGNITUDE.
SPACE.
MEASURE.

OF MAGNITUDE.

The word MAGNITUDE is intended to signify all the notions of continued Quantity: to which may be adjoined by way of affinity the word EXTENSION, by which is meant that kind of Quantity whereby a thing is said to have *partem extrapartem*, one part out of another, being the same thing with the former under another Consideration. ϕ. I.

Magnitudes are distinguishable according to their

As for *Oration*, which is enumerated in the usual Systems as one of the Species of Quantity; that is now by common consent acknowledged to be very *improperly styled Quantity*; and therefore it is left out here, and referred to another place.

I. That kind of Quantity whereby the Magnitude of Bodies is to be measured, is called DIMENSION. To which may be adjoined upon account of Affinity, That notion of Quantity, whereby a thing is capable of being separated into several parts, DIVISION, distribute, part. I. DIMENSION.

Dimensions are of a four-fold difference.

The least of Magnitudes, so styled by those who write *de Indivisibilibus*, as being in their account infinitely little.

1. POINT, Prick, Tittle, Punctilio, Ace, Jot, Whit.

The second kind, described by the flux of a point, or composed of infinite such points, is styled.

2. LINE, delineate, rule.

The third, described by the draught of a line, or composed of infinite such lines.

3. SUPERFICIES, Plain, Surface. To which may be annexed, that more particular notion of Superficies, called AREA, Plot, Bed, Page.

The fourth, described by the lifting up a Superficies, or composed of infinite Superficies.

4. SOLID, Body, Bulk.

By these may be expres'd those Algebraical notions of Absolute, Lineary, Quadratic, Cubic; and so, continuing this Table, Quadrato-Quadratic, Quadrato-Cubic, Cubo-Cubic, Quadrato-Cubo-Cubic, &c. as far as one pleases.

MEASURE.

Those several relations of Quantity, whereby men use to judge of the Multitude or Greatness of things, are styled by the name of MEASURE, Dimension, mete, survey, Rule; to which the relative term of PROPORTION, Portion, Rate, Tax, Size, Scantling, Pittance, Share, Dose, Mess, Symetry, Ayalogy, commensurate, dispense, allot, adapt, is of some Affinity, signifying an equality or similitude of the respects that several things or quantities have to one another. They are distinguishable into such as respect either

I. MULTI-
TUDE.

I. To the Measure whereby we judge of the MULTITUDE of things may be annexed NUMBER, *enumerate, reckon, compute, muster, count, re-count, Tale, tell, Arithmetic, Cyphering.* If the way of Numeration were now to be stated, it would seem more convenient to determine the first Period or Stand at the number Eight, and not at Ten; because the way of Dichotomy or Bipartition being the most natural and easie kind of Division, that Number is capable of this down to an Unite, and according to this should be the several denominations of all other kinds of Measures, whether of Capacity, Gravity, Valor, Duration. So eight Farthings would make a Penny, eight Pence a Shilling, eight Shillings an Angel, eight Angels a Pound. So eight Grains should make a Scruple, eight Scruples a Dram, eight Drams an Ounce, eight Ounces a Pound, &c. But because general custom hath already agreed upon the decimal way, therefore I shall not insist upon the change of it.

The different degrees of Number generally received, are these.

II. Measures

II. Measures of *Magnitude* do comprehend both those of Length, and of Superficies or Area, together with those of Solidity; both comprehended in that which is adjoynd, *viz.* the word CAPACITY, *bold, contain.* The several Nations of the World do not more differ in their Languages, then in the various kinds and proportions of these Measures. And it is not without great difficulty, that the Measures observed by all those different Nations who traffick together, are reduced to that which is commonly known and received by any one of them; which labour would be much abbreviated, if they were all of them fixed to any one certain Standard. To which purpose, it were most desirable to find out some *natural Standard*, or *universal Measure*, which hath been esteemed by Learned men as one of the *desiderata* in Philosophy. If this could be done in *Longitude*, the other Measures might be easily fixed from thence.

II. MAGNITUDE.

This was heretofore aimed at and endeavoured after in all those various Measures, derived from natural things, though none of them do sufficiently answer this end. As for that of a *Barly corn*, which is made the common ground and original of the rest, the *magnitude* and *weight* of it may be so various in several times and places, as will render it incapable of serving for this purpose; which is true likewise of those other Measures, an *Inch*, *Palm*, *Span*, *Cubit*, *Fathom*, a *Foot*, *Pace*; &c. none of which can be determined to any sufficient certainty.

Some have conceived that this might be better done by subdividing a *Degree upon the Earth*: But there would be so much difficulty and uncertainty in this way as would render it unpracticable. Others have thought, it might be derived from the *Quick-silver experiment*: But the unequal gravity and thickness of the *Atmosphere*, together with the various tempers of Air in several places and seasons, would expose that also to much uncertainty.

The most probable way for the effecting of this, is that which was first suggested by Doctor *Christopher Wren*, namely, by *Vibration of a Pendulum*: Time it self being a natural Measure, depending upon a revolution of the *Heaven* or the *Earth*, which is supposed to be every-where equal and uniform. If any way could be found out to make *Longitude* commensurable to Time, this might be the foundation of a *natural Standard*. In order to which,

Let there be a solid Ball exactly round, of some of the heaviest metals: Let there be a String to hang it upon, the smallest, limberest, and least subject to stretch: Let this Ball be suspended by this String, being extended to such a length, that the space of every Vibration may be equal to a second Minute of time, the String being, by frequent trials, either lengthned or shortned, till it attain to this equality: These Vibrations should be the smallest, that can last a sufficient space of time, to afford a considerable number of them, either 6, or 500 at least; for which end, its passing an arch of five or six degrees at the first, may be sufficient. The *Pendulum* being so ordered as to have every one of its Vibrations equal to a second minute of time, which is to be adjusted with much care and exactness; then measure the length of this String, from its place of suspension to the Centre of the Ball; which Measure must be taken as it hangs free in its perpendicular posture, and not otherwise, because of stretching: which being done, there are given these two Lengths, *viz.* of the *String*, and of the *Radius* of the Ball, to which a third Proportional must be found out; which

which must be, as the length of the String from the point of Suspension to the Centre of the Ball is to the Radius of the Ball, so must the said Radius be to this third: which being so found, let two fifths of this third Proportional be set off from the Centre downwards, and that will give the Measure desired. And this (according to the discovery and observation of those two excellent persons, the Lord Viscount *Brouncker*, President of the Royal Society, and *Mon. Huygens*, a worthy Member of it) will prove to be 38 *Rhinland* Inches, or (which is all one) 39 Inches and a quarter, according to our *London* Standard.

Let this Length therefore be called the *Standard*; let one Tenth of it be called a *Foot*; one Tenth of a Foot, an *Inch*; one Tenth of an Inch, a *Line*. And so upward, Ten Standards should be a *Pearch*; Ten Pearches, a *Furlong*; Ten Furlongs, a *Mile*; Ten Miles, a *League*, &c.

And so for Measures of *Capacity*: The cubical content of this Standard may be called the *Bushel*: the Tenth part of the Bushel, the *Peck*; the Tenth part of a Peck, a *Quart*; and the Tenth of that, a *Pint*, &c. And so for as many other Measures upwards as shall be thought expedient for use.

As for Measures of *Weight*; Let this cubical content of distilled Rain-water be the *Hundred*; the Tenth part of that, a *Stone*; the Tenth part of a Stone, a *Pound*; the Tenth of a Pound, an *Ounce*; the Tenth of an Ounce, a *Dram*; the Tenth of a Dram, a *Scruple*; the Tenth of a Scruple, a *Grain*, &c. And so upwards; Ten of these cubical Measures may be called a *Thousand*, and Ten of these Thousand may be called a *Tun*, &c.

As for the Measures of *Mony*, 'tis requisite that they should be determined by the different Quantities of those two natural Metals which are the most usual materials of it, viz. *Gold* and *Silver*, considered in their Purity without any *alloy*. A Cube of this Standard of either of these Metals may be styled a *Thousand* or a *Talent* of each; the Tenth part of this weight, a *Hundred*; the Tenth of a Hundred, a *Pound*; the Tenth of a Pound, an *Angel*; the Tenth of an Angel, a *Shilling*; the Tenth of a Shilling, a *Peny*; the Tenth of a Peny, a *Farthing*.

I mention these particulars, not out of any hope or expectation that the World will ever make use of them, but only to shew the possibility of reducing all Measures to one determined certainty.

These measures of **MAGNITUDE** (to which may be annexed the Notion of **CONTENT**) may be reduced to these Heads.

CHAP. VIII.

Concerning the Predicament of Quality; the several Genus's belonging to it, namely, I. Natural Power. II. Habit. III. Manners. IV. Sensible quality. V. Disease; with the various Differences and Species under each of these.

Whether many of those things now called *Quality*, be not reducible to Motion and Figure, and the Situation of the parts of Bodies, is a question which I shall not at present consider. 'Tis sufficient that the particulars here specified are most commonly known and apprehended under that notion as they are here represented, and are still like to be called by the same names, whatever new Theory may be found out of the causes of them.

The several Genus's under this Predicament are such kinds of Qualities as are either

{ Internal; whether

{ Innate; NATURAL POWER.

{ Superinduced; considered more

{ Generally; styled by the common name of HABIT.

{ Specially; with respect to the customary Actions of men considered

{ External; denoting either

(as voluntary MANNERS.

{ Those more general affections of bodies which are the objects of SENSIBLE QUALITY. (sense.

{ Those special impotencies of living bodies, whereby they are disabled SICKNESS. (for their natural functions.

As

As for *Figure*, which by the common Theory is reduced under this Predicament, that, being a Qualification or *Modification of Quantity*, may more properly be referred thither.

OF NATURAL POWER.

Those kinds of *Natural innate Qualities*, whereby things are rendered able or unable to act or resist, according to their peculiar natures, are styled

- { NATURAL POWERS, *Faculty, Capacity, Endowment, Talent, Gift, Ability, Strength, Energy, Force, Virtue, may, can.*
- { IMPOTENCIES, *Disability, Incapacity, invalid, unable, weak, infirm, lame, dead.*

These Natural Powers may be distributed into such as are

- { More particular; viz. the Faculties that are
 - { RATIONAL. I.
 - { Sensitive.
 - { INWARD. II.
 - { OUTWARD. III.
- { More general; being either
 - { SPIRITUAL. IV.
 - { Corporal; relating to the good of the
 - { INDIVIDUUM. V.
 - { SPECIES. VI.

I. Those *Faculties* whereby we are enabled to apprehend and compare the general natures of things as to Truth and Falshood, Good and Evil, and to demean our selves accordingly towards them, are styled

I. RATIONAL FACULTIES.

- { RATIONAL, *Reasonable, Ratiocination.*
- { IRRATIONAL, *Unreasonable, brutish.*

These may be distinguished into

- { Apprehensive; whereby we are rendered able or unable to
 - { Know and apprehend knowable things, Generals as well as Particulars, respecting in them Truth and Falshood.
 - 1. { UNDERSTANDING, *Intellect, Mind, mental, apprehend, comprehend, perceive, conceive, reach, resent, Sentiment.*
 - { IDIOTICALNESS, being as a *natural Fool, Changeling, Innocent*
 - { Compound and compare Notions together, so as to make a right estimate of things and consequences.
 - 2. { JUDGMENT, *Judicious.*
 - { INJUDICIOUSNESS, *Simple, Silly.*
 - { Apply general Principles to particular cases, being a kind of practical Judgment or Memory relating to matters of Duty.
 - 3. { CONSCIENCE.
 - { UNCONSCIONABLENESS, *Searedness, Profligateness, moral, Insensibility.*
- { Motive; whereby we do rationally follow any thing as good, or fly it as evil: or being without any such motion.
 - 4. { WILL, *Desire, List, Option, Vote, Wish, Mind, Pleasure, covet, voluntary.*
 - { LISTLESNESS, *no mind to.*

II. INTERNAL SENSES.

II. INTERNAL SENSES are so styled, because they belong to the *interiour parts*, and are conversant about internal and *absent* as well as *present* things. Whether there be any such real Faculties in the Soul as are mentioned under this and the preceding Head, is not here to be debated. 'Tis sufficient that common experience doth acquaint us with such various operations of the Mind, and that general custom hath agreed upon such names for the expressing of them.

These are likewise distinguishable into

Apprehensive; whereby we are rendred *able* or *unable* for the *Receiving of impressions from the outward Senses.*

1. { COMMON SENSE, *perceive, discern, apprehend, Sentiment, resent, conceive, discover, find.*

STUPOR, *Numness, amaze, astonish, narcotic, amuze, asleep, set on edge.*

Compounding and comparing what is communicated from the outward Senses.

2. { SPHANSIE, *Imagination, Conceit, fantastical, capricious, Phantasm.*
DOTAGE, *Delirium, Dizzard, Sot, besot.*

Retaining such impressions.

3. { MEMORY, *recollect, re-call, commemorate, remember, call or come to mind, put in mind, suggest, record, recount, con over, getting by heart, by rote, without book, at ones fingers ends, memorable, memorial, memorandum, mindful.*

FORGETFULNESS, *Oblivion, Unmindfulness, overslip.*

Motive; whereby, in order to our own Conservation, *we follow or fly* what is by the judgment of the Senses represented as *good or evil.*

4. { APPETITE, *Desire, Inclination, Concupiscence, Stomach, Longing, Lust, having a mind to.*

LOATHING, *fulsome, nauseate, glut, cloy, go against, quease, squeamish, wambling, qualm, detest.*

III. EXTERNAL SENSES.

III. EXTERNAL SENSES are so styled, because they reside in the *exteriour parts* of the body, and do apprehend only external present things; which common opinion hath determined to the number of Five:

Commodious

(amongst which some are said to be

For Discipline; whereby we discern

Light and Colour.

1. { SIGHT, *Vision, View, ken, Optic, descry, discern, espie, spie, peep, prie, see, perceive, look upon, behold, Glimpse, Spectacle, Spectator, Inspection, Revise, Prospect, first blush, visible, conspicuous.*

BLINDNESS, *Dimness, dark, poreblind, put out ones eyes.*

Sounds.

2. { SHEARING, *attend, hearken, listen, give ear, audible.*

DEAFNESS, *surd.*

For the trial of our Food at a distance.

3. SMELL, *Odor, Savour, Sent, Pomander, Perfume.*

Necessary for the

Immediate trial of our Food.

4. TAST, *Gust, Savour, Relish, Smack, Smatch, Tang, toothsome.*

Perception of tangible things.

5. { TOUCH, *feel, contact, tactile, palpable, grope.*

NUMNESS, *Stupor, dead, torpid, asleep.*

Though common Language have not affixed particular names to the *impotencies* of some of these, yet they ought to be provided for as well as the rest.

IV. Those

Of

OF MANNERS.

p. III.

The Customary and habitual Actions of men considered as voluntary, and as they are capable of Good or Evil, Reward or Punishment, are styled by the name of MANNERS, *Ethic, Moral-ity.*

To which may be adjoyned the general name of such *customary Actions* as are *mutual betwixt man and man*, styled CONVERSATION, Carriage, Demeanour, Comportment, homiletical, Communication, lead, life, living, sociable, behave.

The Vertues belonging to these do comprehend all those Habits which concern the regulating both of our *Wills* and *Affections*, and of our *Conversations*. They are distinguishable by the Faculties which they moderate, and the Objects they are conversant about, into such as do more immediately concern the regulating of our

Wills and Affections, and that Rectitude of mind which we are obliged unto with reference to our selves, *considered more separately*, according to those principal parts of which we consist, *viz.* Soul and Body, Reason and sense, together with the things we possess, being either

of

OF SENSIBLE QUALITY.

§. IV. BY SENSIBLE QUALITY is meant such kind of Quality as falls under our outward Senses, or the Affections of Bodies considered as they are the Objects of Sense: To which may be opposed the Notion of OCCULT QUALITY. These do relate either to the

{ Eye and things visible.

{ Primary, LIGHT. I.

{ Secondary, COLOUR. II.

{ Ear, SOUND. III.

{ TAST and SMELL. IV.

{ Touch; viz. such Qualities as are more

{ ACTIVE. V.

{ PASSIVE. VI.

In this distribution of Sensible Qualities, those that are *Visible* and *Tangible* are, both because of their Number and Variety, each of them reduced under double Differences. Whereas those that belong to the Senses of *Tast* and *Smell* are, for the contrary reason, contracted under one. The gradual Differences belonging to every one of these are so very numerous, that no Language doth, or indeed can, provide for them; but we are fain to denominate each of them from that subject in which it is most commonly found and known. And, for the farther help of the common defect of Languages as to such things, I have in the following Tables (where it could conveniently be done) reduced things to double Opposites, which, with the addition of the transcendental points of *Augmentative* and *Diminutive*, will much facilitate the expression of the several degrees of these things.

I. LIGHT. I. That is styled PRIMARY VISIBLE, by the help of which we are enabled to see other things; being inherent chiefly either in

{ The Air; according to the more

{ General Nature of it; denoting the *intermediate* or *extremes*, the latter of which is properly a total Privation.

1. { STWILIGHT, *Dawning*.

{ LIGHT, *Lux, lightsome, illuminate, enlighten, glimmer, glimpse, flash.*

{ DARKNESS, *gloomy, close, dim, duskie, Eclipse, obscure, sad, swart, brown.*

{ Particular Kind or Degree; the Opposite to which doth suppose some secondary Light.

2. { SLIGHT, *Lumen, lucid, Luminary, irradiate, Sunshine.*

{ SHADOW, *Shade, Umbrage, adumbrate, Screen, Canopy, Curtain.*

{ The Superficies of solid Bodies; from which a strong or weak reflexion is styled.

3. { BRIGHTNESS, *Lustre, splendor, refulgence, glister, glitter, dazzling, shine, coruscation, clear, fair, orient, polite, gloss, resplendent, illustrious, surbish, polish, burnish, irradiate.*

{ DIMNESS, *gloomy, cloudy, blink.*

The

The Bulk and Solidity of Bodies; according to their || capacity, or incapacity of conveying Light.

4. { TRANSPARENCY, *Perspicuity, pellucid, diaphanous, clear, thin;*
 { OPACITY, *Thick.*

Both the Superficies and Bulk of Bodies; signifying || a freedom from: or liability unto, any single or interspersed impediment.

5. { CLEARNESS, *fair, immaculate, unspotted, clarified.*
 { SPOTTEDNESS, *Blemish, Blot, Blur, Mote, Mole, Freckle, Speck, Stain, Soil.*

II. Secondary Visible Qualities, are by a general name styled COLOURS, Tincture, Hue, Complexion, Stain, Tinge; by which are meant those various Appearances in the Superficies of Bodies which do more immediately affect the Eye.

They are distinguishable into those that are more

Simple; and counted either

{ Primary; whether || the intermediate, or the two extremes:

1. { GRAYNESS, *Freez, grissy, hoary, russet.*
 { WHITENESS, *blank, blanch, bleach.*
 { BLACKNESS, *sable, sad, swart, brown, Negro.*

{ Secondary; most considerable according to their order in the Rainbow: the usual Colour of

{ Bloud: or of Gold.

2. { REDNESS, *Crimson, Vermilion, Scarlet, Stammel, ruddy, Murrey, Gules.*

{ YELLOWNESS, *Sallow, Tawny.*

{ Vegetables: or the appearing Colour of the Heavens.

3. { GREENNESS, *Verdure.*

{ BLEWNESS, *Azure, Watchet.*

{ Juice of the Fish *Murex.*

4. PURPLE.

Mixed; according to the more

{ General names.

5. { VARIEGATEDNESS, *motty, pyed, particoloured, divers colours, embroider, inlay.*
 { CHANGEABLENESS.

{ Particular kinds; being made either by

{ Points: or Lines:

6. { SPECKLEDNESS, *Freckled.*
 { STRIATEDNESS, *brindled, streaked, striped.*

{ Roundles, or Squares,

{ DAPPLEDNESS.

7. { CHECQUEREDNESS.

III. Sensible

III. SOUND. III. Sensible Quality perceptible by the Ear, together with the Privation of it, is styled by the name of

SOUND, *Noise, resound, Report, Coil, Rout, Racket, blow, loud, din, quetch, Echo, Euphony.* To which may be adjoyned those natural words (*fictitia à sono*) *bounce, buz, chatter, chink, clack, clap, clash, clatter, click, clink, crash, crush, crack, hum, hiss, jar, jingle, jerk, knock, rattle, ruffle, rumble, ruffle, clutter, lash, pipe, ring, scream, shriek, snap, squeak, squall, roar, thump, toot, twang, thwack, tinkle, tobeez, whimper, whip, whine, whistle, yell.*

SILENCE, *Stilness, kush, hold ones peace, mum, tacit, quash, quiet, whist, 'st.*

The several Notions belonging to this Head, to which different names are assigned, do concern either the

Causes of it; considered

Formally; according to which several Sounds are made; either by an intermediate, or a stronger and quicker: or weaker and slower percussion of the Air.

1. **SMEAN**, *Tenor, Counter tenor.*

2. **SACUTE**, *shrill, Treble, Canto.*

3. **SRAVE**, *low, Base, deep*

Materially; when it is made by things

(Metalline, or other solid brittle bodies; either || clear: or interrupted by some discontinuity of the parts.

1. **SRINGING**, *jingle, tinkle, Bell, tole, chime, Peal, Knell.*

2. **SJARRING**, *Clattering.*

Animal; being either.

(More general to the more perfect Animals: or to Man.

1. **SVOICE**, *vocal, call, cry, invoke, Tone.*

2. **SARTICULATE**, *Voice, speak, eloquution, pronounce,*

More special, and peculiar to some brute Creatures; which may likewise be imitated with artificial Instruments, by the forcible compression of Air through a rimule: or through an equable concavity.

3. **SHISSING**, *Whizzing.*

4. **SWHISTLING**.

Relations; as a

(Single perfect Sound: or near half more or less then such a Sound.

1. **SNOTE**, *Tone, Key.*

2. **Ssharp**.

3. **Sflat**.

(Perfect series of Notes: or aggregate of such Series.

1. **SUNE**, *Lesson, Chime, Ayre, Strain.*

2. **Sconsort**.

Affections; either of

(Single Notes; being either || full and perfect: or impedit and imperfect.

1. **Sclearness**, *shrill.*

2. **Shoarsness**, *Harshness.*

(Notes together; in respect of their || agreement: or disagreement.

1. **Sconcord**, *Symphony.*

2. **Sdiscord**, *Dissonance, untunable*

(Tunes together; in respect of their || agreement: or disagreement.

1. **S Harmony**, *Melody, Music.*

2. **Sjangling**, *Tintamar.*

IV. The

IV. The *Sensible Qualities* belonging to the TAST and SMELL, are of so near affinity, that several Languages do assign to them the same names.

IV. TAST and SMELL.

They are distinguishable into the

1. More general and extreme, as to the || agreeableness: or disagreeableness of them to the Palate or Nose.

1. { SWEETNESS, Pleasant, luscious, toothsom, fragrant, odoriferous, Perfume.

1. { UNSAVOURINESS, Stink, Stench, fetid, noisom, fulsom, rank.

2. More special and middle; from

Thin and warm matter, like that of Oil or Butter: or that of Pepper.

2. { FATTINESS; Oily, unctuous, gross, greasie.

2. { ACRIMONIOUSNESS, biting, keen, cutting.

Cooling and constringing matter, like that in Green fruit: or in Galls.

3. { AUSTERENESS, Harshness, sour, tart.

3. { ACERBITY, Astringency, styptic.

Penetrating vellicating matter, like that of Vinegar and Limons: or that of Aloes and Wormwood.

4. { ACIDITY, sharpness, eager, hard.

4. { BITTERNESS.

Matter of a moderate consistency: apt to corrode by its ficcidity.

5. { SALTISHNESS, saline, brackish, briny, seasoned.

5. { FRESHNESS, unsalted, fleshy.

The vividness: or decay of the Spirits in any thing.

6. { FRESHNESS, smartness, brisk, quick, lively, spirituous.

6. { DEADNESS, vapid, decayed, insipid, wearish, fleshy.

The beginning: or farther degree of Putrefaction.

7. { MUSTINESS, Moldiness, vinewed, fusty.

7. { ROTTENNESS, addle, putrid.

V. ACTIVE
TACTILE
QUALITIES.

V. *Tactile Qualities* more ACTIVE are commonly distinguished by their being

Primary, from whence the others proceed; being either || the *intermediate*: or the *extremes* of that Quality, whereby

{ *Homogeneous* or *Heterogeneous* things are congregated, or separated.

1. { TEMPERATENESS, Warmness, Tepidness, lukewarm.

{ HEAT, hot, sultry, ardent, torrid, fervent, swelter, inflame, scald, parch, scorch.

{ COLDNESS, bleak, piercing, biting, chill, cool, frigid, refrigerate.

A Body is easily || bounded by it self: or conformed to any other Body, wherein it may be contained.

2. { MOISTNESS, dank, damp.

{ WETNESS, Humidity, liquid, mash, slubber, daggie.

{ DRINESS, Siccity, exsiccate, arid, fear, parch.

Secondary, such as are derived from the first; referring either to

The Texture of parts, as to || nearer: or farther distance.

3. { CLOSENESS, shrink, Constipation, consolidate, compact.

{ DENSITY, Crassitude, Thickness, Condensation, thronged, pressed.

{ RARITY, Thinness, attenuate, rare-ise.

Inclination to Motion || downwards: or upwards.

4. { WEIGHTINESS, massie.

{ GRAVITY, Ponderousness, Heaviness, lumpish, weighing, pressing down.

{ LEVITY, Lightness.

Aptitude or Ineptitude to Motion.

{ Common to Liquids and Solids.

5. { CONSISTENCY, congeal, stand.

{ HARDNESS, indurate, callous, brawny.

{ FLUIDITY, liquid, flow, dissolve.

{ Proper to Solids.

6. { FLEXIBILITY, Pliableness, pliant, bend, bow, stoop.

{ LIMBERNESS, supple, lank, lith, ling, gentle, pliant, pliable, slack, flagging.

{ STIFFNESS, stark, tite, rigid, harsh, inflexible.

VI. *Tactile Qualities* more PASSIVE, are distinguishable by their denoting either the

Giving way to: or resisting of the Touch.

1. { YIELDINGNESS, give place.

{ SOFTNESS, Tenderness, mollifie, relent, give.

{ HARDNESS, obdurate, indurate, callous.

Fabric of Bodies, as to their

Superficies; being || more: or less plain.

2. { EVENNESS, plain, level.

{ SMOOTHNESS, sleekness, glibbery, slippery, terse, polite, polish, burnish, Calender.

{ ROUGHNESS, Asperity, Ruggedness; uneven, harsh, ruffle, rumple, puckered, cragged.

Bulk,

- Bulk*, being in its self, or in its parts, of || an *indifferent* : or of a greater or smaller magnitude.
3. } ORDINARINESS, of the most usual and common size.
 } COARSNESS, *gross, thick*.
 } FINENESS, *Tenuity, Subtilty, thin, attenuate*.
- Adhesion of parts, in
- Fluids.
4. } SLIMINESS, *mucilaginous, roping*.
 } CLAMMINESS, *viscons, adbering, stick to, cling, cleaving, glutinous, Bird-lime*.
 } UNCTUOUSNESS, *Slipperiness, Lubricity, glib*.
- Solids.
5. } FIRMNESS, *Fastness*.
 } TOUGHNESS, *ductile, malleable*.
 } BRITTLNESS, *Friableness, crisp, short, frail, fragil*.
- Ineptitude or aptitude to Local motion, chiefly in Solids.
6. } STEDDINESS, *establish, Stability*.
 } FASTNESS, *Fixedness, Firmness, steadfast, wistly, set, settle, clenching, Rivet, stick in*.
 } LOOSENESS, *sease, slackness, unfastned, unfixcd, unsteddy, unsteadfast, unsettled, Luxation*.

OF SICKNESS.

Those kind of *Impotencies* of the Body, as to its natural Functions, which are usually accompanied with Pain, are styled by the common name of SICKNESS, *Disease, ill, Malady, Relapse, unhealthy, unwholsom, crazy, Distemper, indisposition, ail, Fit, mortality, taken with, Spittle*.

e. V.

To which is opposed HEALTH, *Sanity, Soundness, heal, incurable, wholsom, recover, safe and sound, well, clear, how do you*.

The principal Notions referring to this Head may be distinguished into such as signifie either

LOWER BELLY or Bowels. VI.

Besides the Diseases enumerated in the following Tables, there are divers others not here provided for, because they may be otherwise sufficiently expressed : As for instance, those that belong to the *Appetite*, may be expressed by the notes of *Excess, Defect, Depravation*.

And thus likewise may it be with those other Functions of *Concoction*, *Sanguification*, *Nutrition*, *Augmentation*, &c.

Those that belong to the Organical parts, in respect of any Imperfection as to their just Number, Magnitude, Conformation, Site, Connexion, &c. may also be otherwise sufficiently expressed.

I. GENERAL CAUSES OF DISEASE.

I. The GENERAL CAUSES OF DISEASE, may be distinguished into such as are either

- Extrinfecal*, and without the body; whether from
- Other bodies of a malignant dangerous quality, || either spreading their efficacy by insensible *Effluvia*: or such as being taken in a small quantity, prove destructive to life.
 - 1. $\left\{ \begin{array}{l} \text{CONTAGION, } \textit{Infection, taint, catching, run, spread, diffuse.} \\ \text{POISON, } \textit{Venom, erruenum, virulent.} \end{array} \right.$
 - Violent motion*; causing either || a *dissolution of continuity*: or too great a pressure upon the parts, when the skin is not cut.
 - 2. $\left\{ \begin{array}{l} \text{WOUND, } \textit{Hurt, Sore, vulnerary, cut, break ones head, Scarr.} \\ \text{BRUISE, } \textit{Contusion, crush, batter, shatter.} \end{array} \right.$
- Intrinfecal*; with relation to the
- Humors*; whether || as to the error of *Excess*: or *bad disposition*.
 - 3. $\left\{ \begin{array}{l} \text{SPLETHORA, } \textit{Fulness.} \\ \text{CACOCHYMIA, } \textit{Ill humors.} \end{array} \right.$
 - Qualities*; || according to the general name, denoting *Excess* or *Defect*: or that particular *Indisposition* which is most frequent, namely, too much Heat.
 - 4. $\left\{ \begin{array}{l} \text{DISTEMPER.} \\ \text{INFLAMMATION.} \end{array} \right.$
 - Parts and Vessels*; with respect to the
 - Stopping*, or *blowing* of them up.
 - 5. $\left\{ \begin{array}{l} \text{OBSTRUCTION, } \textit{Oppilation.} \\ \text{INFLATION, } \textit{puffed up, flatulent, windy.} \end{array} \right.$
 - Putrefying*, of them; considered according to the usual
 - Antecedent*, or *Cause*; || a *Collection of putrid matter*.
 - 6. $\left\{ \begin{array}{l} \text{ABSCESSUS, } \textit{Aposteme.} \\ \text{Consequent, or Effect; in relation to the} \end{array} \right.$
 - Aperture* or *Cavity* made by the *Corrosion* of this putrid matter; being either || *roundish*, or *oblong*.
 - 7. $\left\{ \begin{array}{l} \text{SULCER, } \textit{Sore, Botch, Canker.} \\ \text{FISTULA.} \end{array} \right.$
 - Defect of animal spirits*, whereby *Sense* and *Motion* is to be communicated, so as a part becomes *cadaverous* and *mortified*, according to a || *lesser*: or *greater* degree.
 - $\left\{ \begin{array}{l} \text{GANGRENE.} \\ \text{SPHACELUS.} \end{array} \right.$

II. Diseases belonging to the whole Body, or the various parts of it, in respect of DISTEMPER, are distinguishable into such as do arise either From some putrid matter, causing a preternatural heat; being either

II. DISTEMPERS of Body.

Not infectious; seated in the

Humors; whether || continuing: or intermitting, according to certain seasons.

1. { FEVER, Calenture.
- { AGUE, quotidian, tertian, quartan.

Habit of the Body, which is usually accompanied by a wasting away of the parts.

2. { HECTIC.
- { CONSUMPTION, tabid.

Infectious; by

Effluvia; being usually accompanied with

Spots in the skin, || according to a lesser: or greater degree of danger.

3. { MALIGNANT FEVER, Spotted fever, Purples.
- { PLAGUE, Pestilence, Pest, pestiferous, pestilential, the Sickness; Murrain.

breakings out in the skin.

More dangerous; according to degrees greater: or lesser.

4. { SPOX.
- { MEASLES.

Less dangerous; accompanied with pain of itching and burning, from bilious matter; || either that which doth usually overspread the whole body: or that which is commonly only in some parts, being apt to diffuse it self gradually, being accompanied with redness and scurfiness.

5. { SITCH, Mange.
- { TETTER, Ring-worm, Shingles.

Roughness in the skin.

6. { LEPROSIE, Lazer, Lepar.
- { SCURF, Morpew, Scald.

Contact in Venery.

7. LUES VENEREA, French-pox.

[From some humor not in it self corrupted, but by its superfluity distending the inward membranes of the Bones, the Muscles or Nerves: or discolouring by Redness, and heating the outward skin; being a thin light matter that may be easily discussed.

8. { GOUT, Arthritis.
- { ERYSIPELAS, St. Anthony's fire.

III. Those

III. TUMORS.

III. Those Diseases by which the parts are swelled and distended beyond their due proportion, are styled TUMORS, *Rising, swell, turgid, node.*

These may be distinguished into such Tumors as are either in the *Cuticle*, or upper skin, *with little or no pain*; being || *small collections* of watery matter hindered from transpiring: to which may be adjoined that which is *subsequent upon the drying of this* and such other putrid matter, causing a roughness upon the skin with little exulceration.

I. { SPUSTULE, *Wheal, Wheel, Pimple, Pussh, Sty.*
 { SCAB.

Skin it self and Flesh.

With purulent matter.

{ *Not poisonous*: either || *of a bigger magnitude*, and apt to pass from one part to another, of more difficult cure: or of *a lesser magnitude*, more frequent, and less dangerous.

2. { SKING'S EVIL, *Scrophula, Struma.*

{ BOIL, *Blain, Sore, Whitlow, Ancome.*

{ *Poisonous* and corroding; being either || *hard and unequal*, discolouring the skin by paleness or blackness, with Veins about it resembling the Leg of a Crab, and exceeding difficult in the Cure: or else a *collection of thick putrid blood* violently hot, with fretting and malignity.

3. { SCANCER, *Wolf.*

{ CARBUNCLE, *Sore, Plague-sore.*

Without purulent matter.

{ *Not discolouring the skin*; whether of a *Bigger magnitude*; either || *soft*: or *hard*.

4. { SWEN.

{ SCIRRHUS.

{ *Lesser magnitude*; being kinds of Plants rooted || *in the skin*: or *below it*.

5. { SWART

{ CORN.

Discolouring the skin with redness, and occasioned by Cold.

6. CHILDBLANE. *Kibe.*

Veins or Arteries immoderately distended.

7. { VARIX.

{ ANEURISMA.

Tendons.

8. GANGLION, *Spavin.*

IV. THE

IV. The DISEASES belonging to the HEAD, or NERVES, or arising thence, may be distinguished into such as relate more

IV. DISEASES of the HEAD and NERVES.

Immediately to the Brain it self, the seat and organ of the principal Faculties; either in regard of its

Substance; when it is indisposed for the

More principal and noble Faculties; either by || some *hot Vapour* or Humour diffused: or from some *particular Hurt* or Inflammation, causing a depravation of the Intellectuals, Fancy and Memory; either || *with a Fever*, or *without*.

1. } FRENZY, *Delirium, frantic, light-headed, phrenetic.*
 } MADNESS, *out of ones wits, raving, distraction, besides ones self, wood, brain-sick, crack-brained, crazed, lunatic.*

Less principal Faculties; by the

Superfluity of cold pituitous matter, causing || *excessive drowsiness*: or by crass crude vapours rising from the stomach, working a kind of *suffocation in sleeping* by a sense of weight upon the Breast.

2. } VETERNUS, *Sopor.*
 } EPHALTES, *Night-mare, Incubus.*

Corruption of some crass phlegmatic humor, either || *in the Brain*, causing much *drowsiness* and *deliration*: or *in the Arteries* which should convey the spirits to the Brain, causing first a *giddiness*, and then an *abolition of Sense and Motion*.

3. } LETHARGY.
 } APOPLEXY.

Defluxion of Humours (which are sometimes salt or sharp) either || *on the Lungs*: or *other parts of the Body, Limms, or Joynts*.

4. } CATARRH, *Distillation, Rheum, Defluxion.*
 } RHEUMATISM.

Ventricles; || *when any hot Vapour* doth agitate and disturb the motion of the spirits, so as objects seem to turn round: or *when any cold phlegmatic humour* doth obstruct their motion, causing a privation of Sense, with *convulsive motions* in several parts.

5. } VERTIGO, *Giddiness, Swimming in the head, Dizziness, Scotomy.*
 } EPILEPSY, *Falling-sickness.*

Mediately to the

Nerves; which may be either

Obstructed; whether || the *greater Nerves*, and for a longer continuance: or the *lesser Branches*, for a shorter space, whereby Sense and Motion is hindered.

6. } PALSIE, *paralytic.*
 } NUMNESS, *Stupor, asleep.*

Contracted more generally: or *distended in some particular part*.

7. } CONVULSION.
 } CRAMP, *Stitch.*

Oppressed with superfluous moisture, causing an unequal growth of the parts, specially the Head and Joynts.

8. RICKETS, *Rachitis.*

Throat; by such an inward Swelling and Inflammation as doth hinder Swallowing and Respiration.

9. SQUINANCY, *Quinsie.*

V. The

V. DISEASES of the MIDDLE REGION.

V. *The Diseases* belonging to the MIDDLE REGION and its parts, may refer either to the

Lungs; in their being

Obstructed by some crass phlegmatic matter adhering to the sides of the Pipes, from whence follows

Too frequent Respiration.

1. SHORTNESS OF BREATH, *Anhelatio, Panting, Purffness, Difficulty of Breathing*, according to || a lesser, or greater degree: by the latter of which men cannot fetch their breath, unless in an upright

2. *ASTHMA, Tiffick, broken-winded, wheeze.* (posture).
3. *ORTHOPNOEA.*

Ulcerate, and by degrees putrefying; from whence sometimes doth proceed much purulent matter to fill up the cavity of the *Thorax*:

3. *CONSUMPTION, Phibiffs.*
4. *EMPHYEMA.*

Heart; by some noxious vapours or humours, which do either

Provoke to too frequent and vehement motion for the freeing it self

4. *PALPITATION.*

(from them,

Hinder the motion of it; according to || a lesser: or greater degree.

5. *FAINTING, Failing, languish, Qualm.*

6. *SWOUNING, Swound, Leipothymia.*

Side; from some Inflammation within the Membranes covering the inside of the Ribs, causing difficulty of breathing, and provocation to coughing, upon which great pain follows, accompanied with a Fever.

6. *PLEURISIE.*

VI. DISEASES of the BOWELS.

VI. *Diseases* belonging to the LOWER BELLY or Bowels, may be distinguished into such as do concern the

Stomach; by sharp humors corroding the mouth of it, causing sometimes Fainting and cold Sweats.

1. *CARDIALGIA, Heart-burning.*

Liver and Gall; being caused by some impotence in them for the doing of their Functions, in not digesting & distributing the humors belonging to them; causing either || *Paleness of colour, Faintness, Indisposition to stir*: or *Tellowness and Swarthiness of colour, accompanied with faintness and nauseousness.*

2. *GREEN-SICKNESS, Cachexie.*

3. *JAUNDISE, Tellow-jaundise, Black-jaundise.*

Stomach and Liver, and other Bowels jointly; which, being defective in the works of Concoction and Distribution, do occasion a *superfluity of serous matter distending the skin of the belly and other parts of the body, accompanied with some wind*: and sometimes a *windy vapour, accompanied with some watery humors, stretching the belly.*

4. *DROPSY, hydropical.*

5. *TYMPANY.*

Spleen; by its dispersing *sour and feculent humors*: or *noxious vapors*, into other parts of the body; the former of which is usually accompanied with faintness, weariness, looseness of teeth, spots on the body, and specially on the legs.

6. *SCURVY, Scorbute.*

7. *HYPOCHONDRIACAL VAPOURS, Splenetis.*

Guts;

Guts; || from some sharp humor that corrodes, or vapor that distends the Colon: or from some hardened excrement, or some other like matter, stopping the Iliac or smaller Guts.

- 5. } SCOLIC, Belly-ach.
- } ILIAC PASSION.

Faculties of excretion; whether by

{ Stool; either as to the excess of this: or the voiding of blood.

- 6. } DIARRHÆA, Lax, Looseness, Flux.
- } DISENTERY, Bloody flux.

{ Urine; either by some stony concretion in the Kidneys or Bladder: or a continual involuntary urining by drops.

- 7. } STONE.
- } STRANGURY.

Lower part of the belly or Scrotum; || by a breach of the internal Membranes, or too much distention of it, or by superfluity of waterish or windy matter: or in the Veins about the Fundament.

- 8. } RUPTURE, Hernia, Burst, Broken-belly.
- } HÆMORROIDS, Piles.

Mother or Womb; by || causing convulsive motions: or stopping of the Breath.

- 9. } HYSTERICAL PASSION, Mother.
- } SUFFOCATION.

I. By

I. ACTIONS
OF GOD.

I. By ACTIONS OF GOD in this place, are meant only his *transient* Actions, which are terminated in the Creatures. As for his *immanent* Actions, because we can frame no other conceptions of these but such as are suitable to the acts of our own minds, therefore *may they be sufficiently expressed by those that follow* in the next Differences: These *transient* Acts here enumerated, do *primarily belong to the Divine Nature*; though some of them may *in a secondary manner*, and by way of allusion and participation, be sometimes ascribed to *other things*: To which may be annexed upon the account of Affinity the general name of those Actions which do exceed all Natural power, MIRACLE, Wonder, supernatural.

These are distinguishable into such as do concern either the Putting of things into their first being: or reducing them to nothing.

1. CREATION, Making, Creator, Creature,
ANNIHILATION, Annul, disannul, abolish, extinguish, bring to nought,
Government or disposal of things; (call-in, cancel, put out.

More general; whereby he doth most freely and wisely take care of, and provide for all things: To which may be opposed by some Analogy such a necessary Concatenation and unalterable order amongst things as doth not admit of any liberty: or such a blind contingency of things as excludes all wisdom, expressed usually by the words,

2. PROVIDENCE, Fore-sight, Fore-cast.

FATE, Destiny.

FORTUNE, Chance, Accident, Venture, Adventure, casual, Happ, Luck, Hazard, fortuitous, a Hit, peradventure, perhaps.

More special; belonging either to

Animate Creatures; by

Contributing to their || well: or ill being.

3. BLESSING, Beatitude, Benediction.

CURSING, accurse, ban, Malediction, Exccration.

Continuing them in their particular kinds of Being: or depriving them of it.

4. PRESERVATION, Conservation, Protection, Keeping, maintain, save, Saviour, shelter, guard, keep, cherish.

DESTRUCTION, Perdition, Confusion, Bane, Devastation, Loss, pernicious, subvert, undoe, ruine, confound, extirpate, abolish, bring to naught, stroy, destroy, cast away, perish, cut off, wast, consume, dissolve, exterminate, extinguish, fall, gone.

Keeping or taking them from any evil felt or feared: or leaving them to it.

5. DELIVERANCE, Rescue, Save-iour, Salvation, free, quit, rid, clear, exempt.

DERELICTION, destitute, forlorn, deserting, give up, relinquish, cast off, deliver up, forsake, leave, forgo.

Rational Creatures; as to their

Minds; by discovering to them; or impressing upon them, in an extraordinary way, such Truths or Inclinations as humane industry could not of it self attain to.

6. REVELATION, open, disclose, discover, Vision, Enthusiasm, Fa-

INSPIRATION, infuse. (natic, Oracle.

States; by delivering them from a condition of servitude & misery.

7. REDEMPTION, deliver, save, ransom, rescue.

II. ACTI-

II. ACTIONS of the UNDERSTANDING and Judgment SPECULATIVE, *Contemplation, Theory*, are such as do concern the various exercise of our Understandings about the Truth and Falshood of things, with respect either to Understanding; being either (the

Preparative; in the first Objectization of a thing: or the reflexive Thought about it, together with what else one knows of that kind.

- 1. { THINKING, *Cogitation, bethink, deem, imagin, esteem, Conceit, Notion, Thought-ful, pensive, mind it, suggest, put in ones head,*
- { MEDITATING, *Study, considering, cast about in ones mind, muse, contemplate, Elucubration, think, fore think, premeditate, ponder, extempore.*

Operative; in || the comparing of things to find out what is Truth: or the Thought resulting from such comparison.

- 2. { INQUISITION, *Examination, Search, Scrutiny, exploration, investigate, Disquisition, seek, discuss, hunt, cavvase, cast water, Quest, Inquest.*
- { DISCOVERY, *detect, find, perceive, sift out, pick out, Invention, excogitate, Author, Inventor, tell, inkling, 'tis out.*

Judgment; Primary; in judging such discovery || agreeable to Truth: or disagreeable.

- More general.
- 3. { ASSENT, *Consent, accord, agree, concurr, allow, acknowledge, yield, suffice, frage, Voice, Vote, of the same mind, think good.*
- { DISSENT, *differ, disagree, of another. mind, Discord.*

More special; according to its arguments; as

- Proceeding from Causes
- { Extrinsic; *Testimony* || sufficient: or insufficient.
- 4. { BELIEVING, *Credit, credible, Faith, Trust.*
- { DISBELIEVING, *Discredit, incredible, Distrust.*
- { Intrinsic in the thing it self; that it is || conclusive: or not so conclusive but that it may be otherwise.
- 5. { KNOWING, *Cognition, conscious, wist, witting, aware, privy, Intelligence, learn, inform, acquaint, cognizance, notice, inkling, prescience, omniscient.*
- { DOUBTING, *misdoubt, mistrust, distrust, suspence, hanging staggering, hesitate, pendulous, dubious, ambiguous, at a stand, stick at, Quandary, Scruple, Sceptic, uncertain, Apocryphal, 'tis a question.*

Productive of these Effects in || higher, or lower degrees.

- 6. { CERTAINTY, *Affurance, sure, evince, convince, demonstrate, evidence, undoubted, out of doubt, without doubt, doubtless, infallible.*
- { OPINION, *Conceit, Judgment, Sentiment, Mind, Tenet, think, suppose, surmise, ween, overween, unanimous, likely, probable, prejudice, apprehend, fancy, repute, deem, Verdict, Sentence, shoot ones bolt.*

Secondary; judging of Truth found, as to the Consequence of it, in respect of other things to be concluded from it, or to follow upon it; in *Thesi*: or in *Hypothesi*.

- 7. { REASONING, *Discussing, Arguing, Ratiocination, Logic.*
- { CONJECTURING, *Guessing, surmise, divine, mind gives, conceit, Pre-Importance: or frivolousness of it. (sumption, probable.*
- 8. { ESTEEMING, *accounting, prizing, valuing, rating, regard, respect, repnte, count of, care for, think well of, set by, stand upon, credit, prefer.*
- { CONTEMNING, *despising, slighting, undervaluing, disregarding, set at nought, scorn, disclaim, abjectness, despicable, vilisfe, disesteem, neglect, set light by, make nothing of, I pass not for it, Nickname, pish.*

III. PRACTICAL ACTIONS of the Understanding.

III. ACTIONS of the UNDERSTANDING and Judgment PRACTICAL, do concern the enquiry after and taking notice of the Nature of things, with reference to their Goodness or Fitness to any purpose. They are distinguishable, as the former, by their respect to the

Understanding; being either

Preparative, in the first Objectization of a business: or the reflexive Thought about it, together with what else one knows of that kind.

1. *DELIBERATING*, ponder, weigh, forecast.

2. *OBSERVING*, advert, animadvert, give ear, attend to, heed, regard, give ones mind to, look to, mark, note, mind, pry, peep, watch, take notice, notable, remarkable, oversee, overlook.

Operative, in the comparing of means to find which is expedient: or the Thought resulting from such comparison.

2. *CONSIDERATION*, revolve, scan, advise, forecast, recognize, premeditate ponder, peruse, study, recount, reflect, review, revise, weigh, bethink, consult, cast in ones mind, retrospection, ruminare.

INVENTION, devising, excogitate, find out, make, Author.

Judgment;

Primary; in judging the thing found to be agreeable to its end: or disagree-

More general.

3. *APPROVING*, liking, allowing, think good, take well, fancy him, find a Bill, currant.

DISAPPROVING, disliking, disallowing, disavow, mislike, condemn, explode, reprobate.

More special; according to its motives; as

Proceeding from Causes

Extrinsical; Warranty || sufficient: or insufficient.

4. *TRUST*, Confidence, betrust, entrust, rely, repose, enfeoff, recommend, credit, charge, rest upon,

DISTRUST, Mistrust, Diffidence, Suspicion, Surmize, Jealousie, Umbrage, call in question, misgive.

Intrinsical in the means it self; || conclusive that it is so: or not so conclusive but that it may be otherwise.

5. *SATISFACTION*, Content, acquiesce, resolve.

SCRUPLE, Doubt, dissatisfie.

Productive of these Effects; in higher: or lower degrees.

6. *ASSURANCE*, Confidence, sure, certain, resolved, secure, confirm.

PERSWASION, think, believe.

Secondary; in judging of expedients found, || as to the use of them, how they are to be ordered and managed: or what is like to be the event of them.

7. *CONTRIVING*, projecting frame, machinate, plot, forecast, cast about, or in ones mind, find a way, devise, Conveyance.

EXPECTING, look for, wait, gaping after, mind gives me, make account, stay for, watch for.

IV. ACTIONS OF THE WILL.

IV. ACTIONS OF THE WILL. Under this Head are to be considered the

Kinds of such Actions; belonging either to the

End as future; comprehending Acts more

Simple;

Imperfect and diminute; || for: or against one thing rather than another.

1. *INCLINATION*, Propensity, Proclivity, Proneness, Forwardness, banking, having a mind to, Prejudice for, bent, addicted.

AVERSION, Prejudice against, unwillingness, coyness, stand off.

Impedite

Impedite and conditional; || for: or against a thing, if left to it self.

V. SIMPLE
PASSIONS,

V. *Acts* of the Sensitive part, namely of the *Fancy*, and chiefly of the *Appetite*, whereby the mind is moved and disturbed with the apprehensions of things, are styled **PASSIONS**, *Affection, Perturbation, pathetic.*

Those amongst these are called *more* SIMPLE which consist onely of one single Act. They are distinguishable into such as concern things under the notion of

New unexpected surprizing: or else things *over-common* and too much repeated; without respect to the good or evil of them, being chiefly a disturbance of the *Fancy*; styled

1. **SADMIRATION**, *marvel, wonder, amaze, astonish.*

1. **TÆDIUM**, *glut, loathing, cloy, dawl, nauseate.*

Good or Evil which we

Wish to happen to them.

2. **FAVOUR**, *Benevolence, Benignity, Grace, Good will, kind propiti-
ous, ingratiate, Favorite, Dissing, Well-wisher, make much of.*

MALIGNITT, *Malice, Spite, Pique, Grudge, Prejudice, Despite, Discourtesie, Disfavour, sinister, virulent, malevolent, ill will, ill minded.*

Apprehend to be in them; whether

Absolute; flowing from || our general apprehensions of the *Worth* of things, and our need of them: or the *Evil*, and our being hurt by them.

3. **LOVE**, *Affection, inamour, dote on, smitten, amiable, besotted, amorous, dear, endear, Darling, Minion, Paramour, well-beloved, Likings, Fancy, Philtre.*

HATRED, *Malice, Rancour, Spite, Virulence, odious, abhor, abominate, detest, cannot endure, Grudge, Pique, Heart-burning, cankered, exulcerate.*

Relative to different notions concerning

Both Good and Evil; considered as

Present.

4. **MIRTH**, *Glee, Solace, Chearfulness, Sport, blithe, blissom, buxom, frolick, jolly, jocund, jovial, merry, exhilarate, glad, crank, debondair, comical, pleasant, sanguin, Jubile.*

II. MIXED MECHANICAL OPERATIONS.

II. Those are styled MIXED MECHANICAL OPERATIONS, which are not appropriate to any one kind of Art, but are general and common to many. These do concern the.

Uniting or separating of several bodies; considered more

Simply.

1. { BINDING, gird, Band, Bond, Bundle, Packet, Fardle, sheafe, faggot, tack, lace, swaddle, swathing, trussing, girt, surcingle.

{ LOOSENING, unbind, undoe, solve, lax, slack, relaxation.

Relatively to the affections of binding; viz. fastning of the bond || by a knot, or confused kinds of knots.

2. { TYING, Knot, Node, bracing, buckling, coupling fastning, knit, furling.

{ TANGLING, entangle, hamper, ravel, perplex, snarled, felter, intricate, involved, Intrigues, extricate, complicate, insnare, Labyrinth.

Concealing, or manifesting; either more

Common.

3. { COVERING, heal, Veil, shroud, hide, whelm, stop, Canopy, Hood, Lid, palliate, cloake, overlay, overrun, overshadow.

{ UNCOVERING, open, expose, discover, shew, reveal, naked, unmask, unveil.

Special; relating to Containing bodies.

4. { SHUTTING, stop, close, inclosing, immure, exclude, seclude, reclude, obstruct, Wink, fold up, pinn up, some up, seal up, corke up, lute up, lock up, put to the door.

{ OPENING, breaking up, disclose, display, Expansion, gap, Slade, Aperture, unstop, expose, lay or set open.

Putting of things || nearer together, or farther asunder; either

More general.

5. { GATHERING, Collect-ion, assemble, convene, compile, levy, raise men or money, Receiver, rake or scrape together, rally, glean, pick up.

{ SCATTERING, discuss, disperse, dissipate, sprinkle, strew, insperision.

More particular; with reference to the

Capacity of

Consistent bodies, and such as are not supposed to be contained.

6. { HEAPING, accumulate, amass, lay up, stow, pile, Stack, Mow, Cock, Rick, Shock, Drift, Dunghill, mixen.

{ SPREADING, diffuse, Expansion, display, Suffusion, strew, run, plash, lay cloth.

Fluid Bodies, and such as are supposed to be contained in something.

7. { FILLING, replenish, Repletion, full, plenary, sated, stow, cram, stuff, sarse, recruit.

{ EMPTYING, evacuate, vacant, Vacuity, rid, void, exhaust, Chasm, clear, lanke, lave, draw dry.

Motion of bodies, chiefly fluids; according to || the more general name: or that which is involuntary, and besides intention.

8. { SPOURING, Effusion, Infusion, gush, gurgling, jewer, Tunnel.

{ SPILLING, shedding, run out, seeth over.

III OPERA-

III. OPERATIONS belonging to AGRICULTURE, do concern either III. AGRICULTURE.
The Ground, or Land; in respect of

Loosning it; either || by single persons: or by the help of drawing Beasts.

1. { DIGGING, delve, break up, spit, spade.
{ PLOWING, tilling, breaking up, coulter, share.

Breaking the clods, and smoothing the surface.

2. { SHARROWING.
{ ROLLING.

Helping or directing the Fertility of the ground, by || adding some new matter, or removing the impediments of noxious Plants.

3. { MANURING, cultivate, dunging, marling, soiling, Tilth, culture.
{ WEEDING.

The Grane or Seed, chiefly of Herbs; in respect of

Putting it into the ground, or taking it off from the ground upon its maturity.

4. { SOWING, seminate.
{ REAPING, mowing, Crop, Harvest, Sithe, Sickle, stubble, swarth.

Separating of it from || the straw, or lesser husks:

5. { THRESHING, Flail.
{ WINNOWING, Fan, Ventilation.

The Propagation of Trees or Shrubs chiefly, by

Putting the Root of the Plant in the ground; to which may be adjoyned the putting of Grain segregately into the ground, which is sometimes used for Pulse.

6. { PLANTING, implant.
{ SETTING.

Joyning a part of one Plant to another; either || to the top of the body, or some branch being cut, or to the sides of the body.

7. { GRAFTING, ingraft, Imp.
{ INOCULATING.

Cutting off superfluous Branches; to which may be adjoyned the cutting down of the whole.

8. { PRUNING, dressing, cutting, coping.
{ FELLING, grubb, wood-fall.

IV. By

IV. FABRILE OPERATIONS.

IV. By FABRILE OPERATIONS, (*Smith, Carpenter, Mason, &c.*) are meant all such kind of works as do primarily concern our Houses or Utenfils, whether for necessity, or ornament: to which may be adjoynd those Operations which concern the making of Earthen ware, styled FIGULATORY, *Potter*. These are distinguishable into such as denote

Dissolution of Continuity; either by

Seperating of some thin parts from the surface of a body by rubbing with an edge: or breaking the body it self into minnte parts by percussio[n] with some obtuse body.

1. { SHAVING, *scraping, raze, razour.*

{ CONTUSION, *bruising, pounding, stamping, braying, mortar, pestle,*

Dividing from a body some small parts; either || by affric[ti]o[n] upon a stone, or with an iron instrument.

2. { GRINDING, *attrition, Grist, Querne, Mill.*

{ FILING, *Raspe.*

Dividing the parts of a body, by cutting it, either || in roundish cavities, or in oblong scissures.

3. { BORING, *perforate, foraminate, pierce, Bodkin, Dril, Awle, Gimlet, Wimble, Trepann, Awgre.*

{ SAWING, *Saw, whipsaw, &c.*

Uniting either of metalline or other bodies by some third body adhering.

4. { SODERING, *Cement, luting.*

{ GLUING, *cementing, glutinous, conglutinate.*

Shaping of bodies into particular figures; either by

Hammering, or melting.

{ FORGING.

5. { CASTING, *melt, founding, fusile, molde.*

Cutting, either || a solid and bulky, or a flat figure.

6. { CARVING, *Sculpture.*

{ GRAVING, *ingrave, etching.*

Compressing of a soft body; or circumagitating either a soft: or hard body.

7. { KNEADING, *moulding, plastic.*

{ TURNING, *Lath.*

Adorning the surface of the body; either by || variety of colours: or adding an external lustre to it.

8. { PAINTING, *limn, draw, enamel, fucus, pensil.*

{ VARNISHING, *size.*

*Preparation of stuffs; by**Making several vegetable or animal substances into Thred.*

1. { TWISTING, *tortion, wath, writhing, twine, winding.*
 { SPINNING, *Spinster, Rock, Distaff.*

Joyning such Threds together into Cloth.

2. { WEAVING, *Texture, Contexture, Loom, Web, braid, woven, Hurdle, Shuttle, Wicker, Matt.*
 { KNITTING.

Thickning and colouring such Cloth.

3. { FULLING, *milling, Fuller.*
 { DYING, *stain, Tincture, tinge, in grain.*

*Making of Stuffs into Vests; either by**Uniting necessary, and cutting off unnecessary parts.*

4. { SOWING, *Stitch, Seam-ster, Suture, Welt, Needle, dearn, quilt, draw cloth, rip.*
 { CLIPPING, *Scissors, shear, shorn, cut.*

Placing together the parts in || greater, or lesser plicatures.

5. { FOLDING, *wrap, lap, pleit, clinching, clutching, doubling, envelop.*
 { CURLING, *crisping, frizzling, furling.*

*Preserving of such Stuffs or Vests clean; common likewise to other things.**By the help of Water or liquor; either when**Things are put into, and agitated in the water; to which may be opposed the putting upon them other bodies of a more gross consistence; styled*

VI. CHYMICAL OPERATIONS.

VI. By CHYMICAL OPERATIONS are meant such kind of works as tend to the *changing* of bodies, with respect to the *Position and Figure* of their *minuter parts*. By this, amongst other ends, Medicaments are usually prepared; for which reason, those kind of Operations styled PHARMACEUTICAL, belonging to the Apothecary, may be hereunto annexed.

The Operations belonging to this Head, do concern the changing and preparing of Bodies; either by

Instruments, for the reduction of them into minute parts; || by *compression and affrication* betwixt two hard bodies: or by *separating the parts so reduced, through a porous Plain*.

§ GRINDING.

1. § SIFTING, *bolting, Sieve, sicing, ranging.*

Liquors; either

Changing the Consistence of bodies; by *reducing them into* || a more *liquid*: or a more *dry consistence*.

2. § DISSOLUTION, *melt, liquefie, dissolve, thaw, fusil, flux, run about.*

§ COAGULATION, *congealing, Clod, Curd, Gelly, Clot-teted, Gore, Concretion, grumous.*

Dividing hard bodies into minute parts; || by an *acid liquor*, through which such parts are dispersed: or the *sinking down of such parts to the bottom*, by the mixture of some other liquor.

3. § CORROSION, *eating, fretting, gnawing, caustic.*

§ PRECIPITATION, *settling.*

Separating of these parts from the liquor; by *passing them through a porous body*; either || *downward*: or *both upward and downward*.

4. § STRAINING, *Percolation, squeeze, Colender.*

§ FILTRATION, *filtre.*

Heat; applicable chiefly either to

Liquid bodies; which being kept for some considerable time in a gentle heat, upon this usually follows; either the

{ EUCHARIST, *Communion, the Lord's Supper, The Sacrament, Host, Mass, Missal.*

CHAP.

CHAP. XII.

I. A general Explication of the design of the foregoing Tables. II. Particular Instances in the six principal heads of it. III. Some things to be noted concerning Opposites and Synonyma. IV. An enumeration of what kinds of things are not to be particularly provided for in such tables.

The principal design aimed at in these Tables, is to give a sufficient enumeration of all such things and notions, as are to have names assigned to them, and withall so to contrive these as to their order, that the place of every thing may contribute to a description of the nature of it. Denoting both the *General* and the *Particular head* under which it is placed; and the *Common difference* whereby it is distinguished from other things of the same kind.

ϕ. I:

It would indeed be much more convenient and advantageous, if these Tables could be so contrived, that every *difference* amongst the *Predicaments* might have a transcendental denomination, and not depend at all upon a numerical institution. But I much doubt, whether that Theory of things already received, will admit of it; nor doth Language afford convenient terms, by which to express several differences.

It were likewise desirable to a perfect definition of each species, that the *immediate form* which gives the particular essence to every thing might be expressed; but this form being a thing which men do not know, it cannot be expected that it should be described. And therefore in the stead of it, there is reason why men should be content with such a description by *properties* and *circumstances*, as may be sufficient to determine the primary sense of the thing defined.

Of these descriptions I shall here give an instance under each of the six *Principal Heads*.

ϕ. II:

The word *Goodness* is a transcendental, one of the General differences of things, or affections of entity, implying a respect to something without it self, namely, to the Will, by agreement to which things are rendered lovely and desirable, as by their disagreement they are rendered hateful and avoidable, which is the opposite notion of *Evil*.

TRANS-
CENDEN-
TAL.

The word *Diamond* doth by its place in the Tables appear to be a Substance, a Stone, a pretious Stone, transparent, colourless, most hard and bright.

SUB-
STANCE.

The word *Flower* or blossom is one of the peculiar parts, belonging to Plants, an annual part, more principal, antecedent to the seed, considerable for its beauty and colour.

The words *Newness* and *Oldness* do signifie notions belonging to *Quantity*, to space, to time, and more particularly to time past, according to the degrees of less or greater, as the next pair, *soönnness* and *lateness*, doth relate to time future, according to the same degrees of Less or Greater.

QUANTITY.

The word *Moderation* is a Quality, a Habit, an Affection of intellectual

QUALITY.

P p

Actual virtue, whereby we are concerned for any truth, according to a due measure, not more or less than the evidence and importance of it doth require, to which the notion of *fierceness* or *fanaticness* is opposed as the deficient extreme.

ACTION. The word *Pitty*, doth by its place denote an Action, spiritual, of the soul in respect of the Appetite, whose actions are commonly stiled Affections or Passions: 'Tis a mixed Passion, consisting of Grief and Love, occasioned by some evil, which (as we think) doth unworthily befall others. As *Envy* doth of Grief and Hate upon account of some good befalling others (as we think) unworthily.

RELATION. The word *Parent* by the place of it in the Tables, doth denote the thing thereby signified, to be a Relation, Oeconomical, of Consanguinity, direct ascending; as *Child* is direct descending.

And thus is it with all those other particulars, which are placed either directly or *collaterally*, either by way of *Opposition* or of *Affinity*.

Only 'tis here to be noted.

§. III.

1. That some of those which are placed as *Opposites*, do not always fall out to be under the same Predicament or Genus with those things to which they are adjoined; as it must be in such things as are *privatively* opposed, as *Blindness*, *Deafness*, *Darkness*, &c. And so likewise for some of those species which are put in for their *affinity*, as *Point*, *Center*, *Pole*, and such other things as are not *directly*, but *reductively* only under any predicament.

2. That some Radixes, besides the *redundant* and *deficient* extremes, have likewise an *Opposite common*; so to the word *Justice*, there is opposed an *Opposite common*, *Injustice*, besides the excess *Rigor*, and the defect *Remission*. So to *Veracity*, the *Opposite common* is *Lying*; which may be either by way of Excess, *over-saying*, boasting, flattering: or of Defect, *under-saying*, *detractiō*. So to *Equality*, the *Opposite common* is *Inequality*, imparity, disparity; the excess of which is *Superiority*, and the defect *Inferiority*. This is natural to all Radixes that have double Opposites, though instituted Languages have not provided words to express it.

3. Many of the Synonymous words put to the Radixes, are referred to more heads than one, upon account of their various equivocal acceptations. And besides such words or phrases as are more plainly Synonymous, there is likewise an addition of such other, as are either more *immediate* derivations, whether Adjectives, Verbs, Adverbs: or more *mediate*, being by composition to be made off from those Radixes to which they are adjoined: Of which I shall give an instance or two, under each of the six general Heads.

TRAN-
SCENDEN-
TALS.

In the Table of *Transcendentals*, T. III. 2. the Radical is GOODNES^s, to which these other words are adjoined, *Weal*, *welfare*, *right*, *regular*, *well*, *rectise*, *better*, *best*. Amongst which, the words *Weal*, *welfare*, are mentioned as *Synonomia*, denoting such a state of being as is desirable, and are supposed to be Substantives Neuter. *Well-doing* or Good action, is the Substan. Act. The words *Good*, *right*, *regular*, are the *Positive* adjectives from the root, *Better*, *best*, are the *Comparative* and *Superlative* adjectives. *Well*, *right*, &c. are the Adverbs. *Rectise* is good make, and to be expressed by composition with the Transcendental particle of *Cause*.

So for the Opposite to this, EVILNESS to which these words are adjoined,

joyned, *Ill, bad, naught, wrong, amifs, shrewd, scurvy, lewd, horrid, horrible, corrupt, pravity, deprave, fin, fault, trespass, transgression, Peccadillo, worse.* Amongst which, the words *Badness, pravity,* are Synonymous to the Radicals; and supposed to be Substantives neuter. The words *Sin, fault, trespass, transgression,* will be Substan. Act., which being compounded with the Transcendental Particle, *Diminutive* or *Augmentative,* will denote a *Peccadillo* or small fault; or an *Enormity* or heinous crime. The words *Evil, ill, bad, naught, wrong, corrupt,* are Adjectives of this root, and being compounded with the Transcendental Particle of Augmentative, will be of the same importance with those other words, *shrewd, scurvy, lewd, horrid, horrible, &c.* The words *Ill, amifs, wrong, badly, naughtily,* are the Adverbs. The words denoting to *fin, trespass, transgress,* are the Verb. Act. which being compounded with the Transcendental Particle of Cause, will signifie *Corrupt, deprave.*

So in the Tables of *Substance,* Be. II. 1. the Radical is KINE, signifying the *Bovinum genus*; the other words reduced to it are, *Bull, Cow, Ox, Calf, Heifer, Bullock, Steer, Beef, Veal, Runt, Bellow, Low, Heard, Cowheard,* Some of which are to be made off from this root by compositions with the Transcendental Particles.

The rest are to be made off by other Compositions: So *Ox* is untesticled or gelt Bull; *Beef, Veal,* is the flesh of Kine or Calf.

Be. II. 2 The Radical is SHEEP; to which are adjoyned the words, *Ram, Yew, Lamb, Weather, Mutton, Bleat, Fold, Flock, Shepherd.* Each of which words are to be made off from this radical, by some kind of compositions.

Gelt Ram is *Weather,* Flesh of Sheep is *Mutton.*

Mag. III. A. the Radical is FIGURE, to which these other words **QUANTITY.** are annexed, viz. *Shape, Feature, Fashion, Form, Frame, Scheme, Lineament, the make, well set or proportioned, transform, transfigure, deface, disfigure.* Amongst which the former words, *Shape, Feature, Fashion, Form, Frame, Scheme, Lineament, the make,* are, according to one of those senses wherein each of them is commonly used, the more mediate *Synonyma,* the rest are to be made off by composition, either with
 { Transcendental particles of the { Perfective, *well-set* or *proportioned.*
 { word *change, transform, transfigure,* { Corruptive, *defaced, disfigured.*

Sp. I. 1. The Radical is PRESENT, to which is adjoyned, *at this time, now, immediately, instantly, current, ready.* The more immediate *synony-*

ma are, *This time* or *instant*. The words *Current*, *ready*, are Adjectives. *Now*, *immediately*, *instantly*, are the Adverbs of this root.

One of the Opposites to this Radical, is PAST, or *time past*; to which these other words are put, *Expired*, *former*, *foregone*, *ago*, *already*, *even now*, *heretofore gone*, *over*, *out*, *a-late*, *erewhile*, *long since*, which are thus to be made off. The words *Expired*, *former*, *foregone*, *over*, *out*, are the Adjectives of this root. The words *already*, *heretofore*, *out*, are the Adverbs, which being compounded with the Transcendental Particle.

{ Augment. } will sig- { *A great while ago*, *long since*.

{ Dimin. } nifie. { *Even now*, *a-late*, *erewhile*, *a little while ago*.

The other Opposite is FUTURE, to which these words are adjoyned, *Time to come*, *after time*, *hereafter*, *presently*, *anon*, *by and by*, *shortly*, *straitway*, *ere long*, *henceforth*, *process of time*, *after a long while*. Amongst which these words or phrases, *Time to come*, *after time*, *process of time*, are Synonymous substantives. *Hereafter*, *henceforth*, are Adverbs, which being compounded with the Transcendental Particle of

{ Augment. } will sig- { *After a long while*.

{ Diminut. } nifie { *Presently*, *by and by*, *anon*, *shortly*, *straitway*, *ere long*.

Sp. II. 3. is the Radical NEARNESS, to which these other words are added, *Vicinity*, *Propinquity*, *Proximity*, *nigh*, *next*, *close*, *adjacent*, *adjoyn*, *neighbouring*, *imminent*, *impending*, *immediate*, *ready at hand*, *acost*, *draw on*, *approach*, *at*, *by*, *hard by*, *beside*, *hithermost*. Amongst which, the words *Vicinity*, *Propinquity*, *Proximity*, are Synonymous substantives. *Nigh*, *close*, *adjacent*, *adjoyning*, *neighbouring*, *imminent*, *impending*, *immediate*, *next*, *hithermost*, are Adjectives. *By*, *hard by*, *at*, *at hand*, *besides*, are Adverbs. *Approach*, *acost*, *draw near* or *on*, are Verbs.

So for the Opposite to this, REMOTENESS, to which are adjoyned the words, *farr*, *farther*, *aloof*, *wide of*, *distant*, *utmost*, *ultimate*, *great way off*. Amongst which the words, *far*, *farther*, *distant*, *utmost*, *ultimate*, are Adjectives. *Aloof*, *wide of*, *a great way off*, are Adverbs.

QUALITY.

NP. II. 3. the radical word is MEMORY, to which these other words are adjoyned, *Recolle^t*, *recal*, *commemorate*, *remember*, *call* or *come to mind*, *put in mind*, *suggest*, *record*, *recount*, *con over*, *getting by heart*, *by rote*, *without book*, *at ones fingers ends*, *memorable*, *Memorial*, *Memorandum*, *mindful*. Amongst which the words, *Remember*, *commemorate*, *record*, *recount*, are Verbs, which being compounded with the Transc. Particle

{ Cause, will signifie *suggest*, *put in mind*, or *cause to remember*.

{ Endea- } will sig- { For the present, *Recal*, *recolle^t*, *call to mind*.

{ your. } nifie. { For the future, *Con over*, *get by heart*, *by rote*, &c.

Mindful is an Adject. Neut. *Memorable* is an Adj. Pals. Abstr. *Memorandum*, *Memorial*, is to be compounded with the Transcend. Part. Sign, denoting a Sign for remembrance.

NP. V. 9. the Radical is SWIFTNESS, to which these other words are adjoyned, *Fleetness*, *Celerity*, *Speed*, *fast*, *apace*, *quick*, *sudden*, *rapid*, *hurry*, *accelerate*, *hasten*, *cursor*, *hye*, *expedite*, *run*, *scud*, *whisk*, *post*. Amongst which the words, *Fleetness*, *Celerity*, *Speed*, are Synonymous subst. *Quick*, *sudden*, *fast*, *rapid*, *expedite*, *cursor*, are Adj. *Apace*, *quickly* -er, are Adverbs. *Hye*, *hasten*, *run*, *post*, *hurry*, *scud*, *whisk*, are Verbs. *Accelerate*, *expedite*, as also *hasten*, *hurry*, when they denote a Transitive efficiency, are to be expressed by composition with the Transc. Particle of Cause or make.

So for the Opposite to this, SLOWNESS; to which are adjoyned the

the words, *Heaviness, slackness, dull, sluggish, tardy, leasurably, softly, dilatory, retard, fore-slow, delay, Lob, Lubber, Lurdan, torpid, unweildy, gingerly.* The words, *Slackness, heaviness,* are Synonymous substantives. *Dull, sluggish, tardy, lumpish, torpid, unweildy, dilatory,* are the Adjectives of this root; which being compounded with the Transc. partic. of Person, will be of the same signification with those other words, *Slugg, Lob, Lubber, Lurdan.*

The words, *Slowly, leasurably, softly, gingerly,* are the Adverbs of this Radical. *Retard, fore-slow, delay,* are the Verbs.

So Man. I. O. the Radical word is VICE; to which these other words are reduced, *Sin, Crime, Dishonesty, Improbability, Trespass, Transgression, Fault, Failing, Infirmitie, oversight, turpitude, unrighteous, unjust, vile, base, loose, evil, ill, bad, naught, corrupt, venial, wicked, heinous, debauch, lewd, lawless, licentious, fowl, flagitious, enormous, Profligate, Miscreant, Ruffian, Caitiff, Villain, Rakehell, Libertine, defile, pollute,* which are thus to be made off from this root.

The words

Sin, Dishonesty, Improbability, are Subst. N.

Trespass, Transgression, are Substant. Ad. which Substantives being compounded with the Transcendental Particle.

Augment will sig- *Crime, Enormity, Turpitude.*
 Dim will sig- *Fault, Infirmitie, Failing, Oversight.*

Evil, ill, bad, naught, corrupt, vicious, unrighteous, unjust, are the Adject. Neut. which being compounded with the Transcend. Particle, Augment. will be of the same importance with those other words, *Base, Foul, Lewd, Filthy, debauched, flagitious, Enormous, profligate, heinous, mortall.* If it be compounded with the Transcendental Particle Dim. it will signify *Venial.* If with the Transc. Partic. for Person, it signifies, *Ruffian, Villain, Rakehell, Libertine, Miscreant, Caitiff.* *Corrupt, defile, pollute, debauch,* are the Verb compounded with the Transcendental Particle of Cause, or Make.

In the Tables of Action. AS. V. 4. O. The Radical is GRIEF; to ACTION; which are adjoynd the words, *Sadness, Sorrow, Melancholy, Heaviness, dolefull, deplorable, disconsolate, bitter, pensive, dejected, tragical, rufull, amort, moan, bemoan, wail, bewail, lament, dump, cast down, vex, trouble, Cutt, take on, whimper, pale, woe, agony, anguish, mourn, cry, take heavily.* Which are thus to be made off from the Root.

Sadness, Sorrow, Heaviness, Melancholy, Trouble, are Synonymous Subst: which being compounded with the Transc. Particle Augmentative, will expresse those other words, *Anguish, woe, Agony.*

Pensive, sad, Heavy, Melancholy, sorrowfull, dejected, disconsolate, cast down, are Adjectives: which being compounded as the former, will be of the same importance with those other words, *Dolefull, rufull, bitter, tragical:*

Deplorable, dolefull, may be the Adject. P. Abst.

Moan, bemoan, wail, bewail, lament, mourn, cry, plain, are the Verb of this Root, which in some Acceptions is to be compounded with the Transcendental Particle of Sign.

Take on, take heavily, Verbs to be compounded with Augment.
whimper, pale, whine, the Transcendental Particle Dimin.

Vex, Cut, cast down, are Verbs Active.

Dump, all amort, to be compounded with the Transc. Partic. Impetus.

AC. I.

The Words.

AC. I. 7. O. The Radical is DYING ; to which these other words are adjoined, *Death, deadly, mortall, fatall, dye, decease, depart, expire, give up the ghost, defunct, kill, slay, mortifie, dispatch, slaughter, mortality, Capital*; which are thus to be made off.

Death is Subst. N. *Mortality* is Subst. N. Abst. *slaughter* is the Subst. compounded with the Particle Cause.

Dead, defunct, is Adj N. *Deadly, fatall, mortall, capital*, is Adj A. Abst. *Dye, decease, depart, expire, give up the Ghost*, is the Verb ; which being compounded with the Transcendental Particle Cause or make, will signifie to *Kill, slay, dispatch, mortifie*.

AC. III. 1. The Radical is SPEAKING ; to which these words are adjoined, *Talke, utter - ance, mention, Elocution, pronounce, express, deliver, Pro-lation, Spokesman, effable, voluble, fluent say, tell, mutter, mumble, jabber, jargon, Vein, Grammar, Rhetoric, Oratory, Eloquence, Prolocutor, nuncupative, by word of mouth*.

Talking, Telling, Saying, Expressing, Delivering, Mentioning, are Substant. Synonymous to the Radical ; which being compounded with the Transc. Particle of *Manner*, will denote the sense of those other words which denote a respect to the mode of speaking, viz. *Elocution, Pronunciation, Utterance, Vien* : And being compounded with the Particle Officer, it signifies, *Proloquutor*. If with the Particle Art, it may denote the several Acts of speaking. So the Art of speaking congruently is *Grammar* ; ornately is *Rhetoric, Eloquence* ; Perswadingly is *Oratory, Eloquence*. If with the Particle Corruptive, it may signifie, *Muttering, Mumbling, Jabber, Jargon*. The words *Fluency, Volubility*, are the Subst. Abst. Act. with the Particle Perfective. *Nuncupative - ly, by word of mouth*, are the Adj. and Adv. of this root. *Talk, tell, say, utter*, are the Verbs. *Spokesman*, is the pro, or instead, speaking person.

AC. III. 7. The Radical is WRITING ; to which these other words are annexed, *Penning, Drawing, Engrossing, Hand, Manuscript, subscribe, superscribe, inscribe, transcribe, postscript, interline, indorse, scrawle, scribe, Penman, Scribe, Scrivener, Secretary, Clerk, Note, Ticket, Docket, Shorthand, Tachygraphy, Brachygraphy, Cryptography, set ones hand, set down, take or put in writing, enter into book*.

Which words are thus to be made off from this root. The words *Penning, drawing*, and the Phrases, *set ones hand, take or put in writing, enter into book*, are the more immediate *Synonyma* of the Radical. *Hand, Manuscript, draught*, are the Substantive Passive.

In the Tables of Relation. RO. I. 2. The Radical is PARENT; to RELATION: which are adjoyned the words *Sire, Father, Mother, Damm, paternal, maternal, Grandfire, &c. Orphan*, which are thus to be expressed,

Sire, Father } are Parent } Male
Mother, Damm } Female

Paternal, Maternal, are the Adjectives of Father, Mother; *Grandfire* is Fathers Father, or second Father; *Orphan* is un-parented.

So for the Opposite Radical CHILD; to which these other words are adjoyned, *Issue, Son, Daughter, Brood, Litter, filial, adopt, posthume*, which are thus to be expressed.

{ *Issue, Brood, Litter* } Kind
 { *Son* } By composition with the } Male
 { *Daughter* } Transcendental Partic. } Female
 { *Adopt* } Cause

Filial is the Adj. *Posthume* is a Child born after the Parents Death.

RC. I. 2. The Radical is KING; to which these words are adjoyned, *Sovereign, Emperor, Imperial, Monarch, Queen, regall, royal-ty, Majesty, Reign, Kingdom, Lord, Dynasty, Sultan, Cham, Liege Lord, Regent, Realm, Diadem, Crown, Coronation, Scepter, Throne, inthroned, Viceroy*.

Which are thus to be made off. The Radical being a Substantive of the Person, these other words must be Synonymous to it, viz. *Sovereign, Monarch, Emperor, Lord, Liege-Lord, Sultan, Cham, Regent*. The word *Emperor* being sometimes used for such a one as hath other Kings under his Dominion, may according to this notion of it, be expressed by composition, with the Transc. Particle of Augmentative. *Queen* by the Particle *Fœm*. *Majesty, Royalty*, are Subst. Abst. *Regal, royal, Sovereign, Imperial*, are the Adject. N. *Realm, Kingdom*, are the Adj. Pass. with the Particle, Thing. The *Reign* is the Subst. Act. To *Reign* is the Verb. *Viceroy, Regent*, is Adj. Act. with Transc. Part. Person and the Preposition *Pro*, or *instead*. *Crown, Diadem*, is Head-Sign of Majesty. *Scepter* is Staff-Sign of Majesty. *Throne* is Royal Seat. *Coronation, inthroning*, is solemnity of King-making, or King-declaring.

By these Instances, it may appear, what course is to be taken, with that great variety of Words, adjoyned to other Radicals.

The things and notions provided for in these Tables, are such only as are of a more *simple* nature; others that are of a more *mixed* and complicated signification, are to be expressed periphrastically, as may be seen in the Dictionary. Such words only, are absolutely necessary for such a design, as are *purely* simple; which if they could be accurately distinguished, would be much fewer then those here enumerated; But for the preventing of frequent and large periphrases, it may be convenient to take in some others that are not purely simple. p. IV.

There are some kinds of things that are not capable of being provided for in a Character and Language, proposed for Universal use, as namely all such as are appropriated to particular *Places* or *Times*.

I. Such as are peculiar to some particular *place* or Nation, As

1. *Titles of Honour*, Duke, Marquess, Earl, Viscount, Baron, Baronet, Knight, Esquire, &c. Which are to be expressed by the several degrees which they belong to in the *Nobilitas Major*, or *Minor*.

2. *Titles of Office* and Place, as Sheriff, Maior, Bayliff, &c. Master, Warden,

Warden, President, Provost, Principal, Rector, &c. which are all to be expressed by the common notion of *Præfecture*.

3. *Degrees in Professions*, Doctor, Master, Bachelour, Serjeant at Law, Barrister, &c.

4. *Law Terms of Tenures, Writ, &c.* Copyhold, Freehold, Knights-service, &c. *Habeas corpus, nisi prius, Defeasance, Certiorari, Replevin, superſedeas, Subpæna, &c.*

5. To which may be added the several *terms of Heraldry*, as Fefs, Chevron, &c. which are not common to all Nations.

II. Such as are continually altering, according to several ages and times, As

1. *Vests and Garments*, to which there are every day new names assigned, according as several fashions do arise.

2. *Kinds of Stuffs*, as Baize, Flannel, Serge, Kersey, Grograin, Tammy, Tabby, Sattin, Plush, Velvet, Tiffany, Lawn, Doulefs, Canvas, Buckrom, &c. Diaper, Damask, &c. which are to be periphrastically expressed by their matter and figure.

3. *Games and Plays*, of which the old ones do continually grow into disuse, and every age produceth new kinds.

4. *Drinks*, The Wines of several Countries, and Grapes, as Malmſey Muskadell, &c. And so for other made Drink, as Tei, Coffi, Chocolate, Rambuze, Syllabub, &c.

5. *Meats*, as several prepared Dishes, Cullace, Bisk, Oglia, &c. The variety of Breads, Bisket, Cracknel, Bunn, Simnel, &c. Several confections, as Marmalade, Codigny, &c. Confections in Physick, as Diaſcordium, Mithridate, &c.

6. *Tunes for Musick, or Dauncing*, as Coranto, Galliard, Sarabrand, Jig, Pavan, Almain, &c. And so for the various kinds of Musical Instruments, Sackbut, Hauboy, Cornet, Lute, Theorbo, Viol, Cittern, &c.

7. The names of several *Tools* belonging to Trades, which are not the same in all Nations, and are every day multiplied.

8. To which may be added the names of divers sects, whether Philosophical, Political, or Religious; which are various according to several places and Times, many of them being derived from the names of *Persons*, and therefore not to be provided for in such a Theory of things as is proposed for Universal use. But as any of these may be periphrastically expressed in the *Latin*, or in the Language of any other Nation, which has no one word for them; so may they likewise, with the same facility be described in a Philosophical Character or Language.

PART. III.

Concerning Natural Grammar.

CHAP. I.

1. Concerning the several kinds and Parts of Grammar. 2. Of Etymology, the general Scheme of Integralls and Particles. 3. Of Nouns in general. 4. Of Substantives Common, denoting either Things, Actions, or Persons. 5. Rules concerning Nouns of Action. 6. Of Substantive abstracts. 7. Of Adjectives according to the true Philosophical notion of them. 8. The true notion of a Verb. 9. Of derived Adverbs. 10. A general Scheme of the fore-mentioned Derivations.

HAVING now dispatched the second thing proposed to be treated of, namely, the *Scientifical* part, containing a regular enumeration and description of such things and notions, as are to be known, and to which names are to be assigned, which may be stiled *Universal Philosophy*; I proceed in the next place to the *Organcial* part, or an enquiry after such kind of necessary helps, whereby as by instruments we must be assisted in the forming these more simple notions into complex Propositions and Discourses, which may be stiled *Grammar*, containing the Art of Words or Discourse.

Grammar may be distinguisht into two kinds; 1. *Natural*, and *General*; 2. *Instituted* and *Particular*.

1. *Natural* Grammar, (which may likewise be stiled *Philosophical*, *Rational*, and *Universal*) should contain all such Grounds and Rules, as do naturally and necessarily belong to the Philosophy of letters and speech in the *General*.

2. *Instituted* and *Particular* Grammar, doth deliver the rules which are proper and peculiar to any one Language in Particular; as about the Inflexion of words, and the Government of cases, &c. In the *Latin*, *Greek*, &c. and is defined by *Scaliger* to be *scientia loquendi ex usu*. De Causis L.
L. Cap. 76.

The first of these only is upon this occasion to be considered. It hath been treated of but by few, which makes our Learned *Verulam* put it among his *Desiderata*; I do not know any more that have purposely written of it, but *Scotus* in his *Grammatica speculativa*, and *Caramuel* in his *Grammatica Audax*; and *Campanella* in his *Grammatica Philosophica*. (As for *Schioppius* his Grammar, of this title, that doth wholly concern the Latin tongue;) Besides which, something hath been occasionally spoken of it, by *Scaliger* in his book *de causis lingue latine*; and by *Vossius* in his *Aristarchus*. But to me it seems, that all these Authors in some measure (though some more then others) were so far prejudiced by the common Theory of the languages they were acquainted with, that they did not sufficiently abstract their rules

Qq

according

according to Nature. In which I do not hope, that this which is now to be delivered can be faultless; it being very hard, (if not impossible) wholly to escape such prejudices: yet I am apt to think it less erroneous in this respect than the rest.

The parts of Grammar are principally these three.

1. Concerning the *kinds of words*, or those several modes and respects; according to which the names of things may be varied in their Acceptations; being made either derivative *Nouns*, or *Adverbs*; together with their several *inflexions* and *compositions*; which may be stiled *Etymology*.

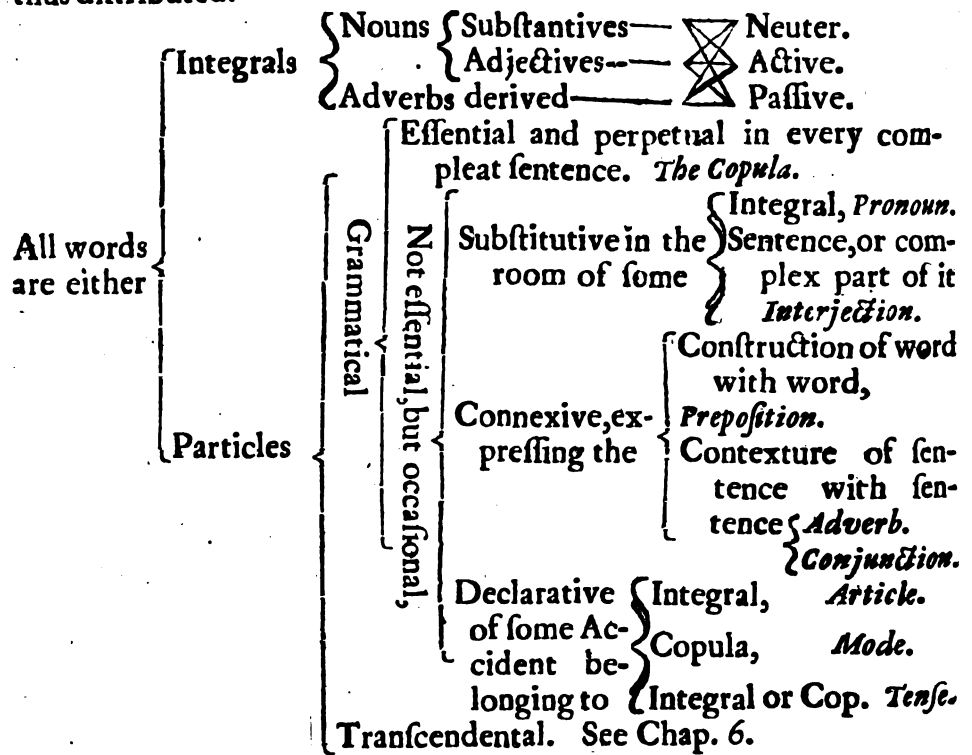

2. Concerning the *proper union* or right construction of these into *Propositions* or sentences; which is called *Syntax*.

3. Concerning the most convenient *marks* or *sounds* for the expression of such names or words; whether by *writing*, *Orthography*; or by *speech*, *Orthoepy*.

§ II.

The first of these concerning the *Doctrine of Words*, may refer either, 1. To the *formal differences* or kinds of them; or, 2. To the *Accidental changes* of them, in respect of *Inflection*, *Derivation*, *Composition*.

Words, according to their *formal differences* and kinds, may be thus distributed.

By *Integrals* or Principal words, I mean such as signify some entire thing or notion: whether the *Ess* or Thing it self, or the *Essence* of a thing, as *Nouns Neuters*, whether concrete or abstract; or the *Doing* or *Suffering* of a thing as *Nouns Active* or *Passive*; or the *manner* and *affection* of it, as *Derived Adverbs*.

§ III.

Those instituted words which men do agree upon for the names and appellations of things, are stiled *Nouns*. Every

Every Noun which in conjunction with a Verb makes a compleat sentence, and signifies simply, and *per modum subsistentis per se*, is called a *Substantive*. That which signifies *per modum Adjuncti*, or *adjacentis alteri*, is called an *Adjective*.

Substantives belong either to one, called *Proper*: or to many, and are therefore styled *Common*.

The former of these are not to be brought under the rules of any science, because Individuals are Infinite; and therefore such *proper names* as pertain each to one only, should be esteemed as so many Articulate voices, to be expressed by such particular vowels and consonants as will make such respective sounds.

Noun *Substantives Common* are such names as are assigned to the several kinds or species of things or notions; which, though they are very numerous, yet are they capable of being stated and fixed according to a Philosophical method, as is endeavoured in the fore-going Tables. Concerning which these rules are to be observed. § IV.

1. Every Radical word in the Tables is supposed to be a Substantive; though they could not all of them be so expressed, because of the defect of proper words for them in the present Languages; upon which account there is a necessity of expressing some of them by *Adjectives*, and some by an Aggregate of words: but they are all of them to be understood as being simple Substantives.

2. These Radical Substantives may be of various kinds, either 1. Of the *Thing*. 2. Of the *Action* or *Passion*. Or, 3. Of the *Person*, Besides those other kind of Substantives which proceed from these; whether *Abstracts Neuter*, as *Deity*, *Regality*, &c. or such other Abstracts, whether *Active* or *Passive*, as denote a proclivity or capacity, as *Amorosity*, *Amiability*, &c. which are provided for by the Transcendental Particles.

3. When the Radical is a Noun Substantive of the *Thing*, the most immediate derivations from it, are the Substantives *Active* and *Passive*, to be expressed by the mark of Active or Passive upon the Radical. And the Substantive of the *person*, whether *Agent* or *Patient*, by the Adjective, Active or Passive in the Aorist Tense, with the Transcendental mark of *Person*; So *Dux* and *Calor*, *Light* and *Heat*, are Substantives of the *Thing*; *Illuminatio* and *Calefactio*, Enlightning, Heating, are the Substantives Active, or of the *Action*; *in illuminari*, *calefieri*, the being Enlightned and Heated are Substantives Passive: or of the *Passion*; *Illuminator*, *Calefactor*, or *illuminans & calefaciens persona*, the Enlightner and Heater, are Substantives of the *Person* agent; *Illuminatus* and *Calefactus*, the Illuminated or Heated, are Substantives of the *Person* Patient.

4. When the Radical is a Substantive of the *Action*, then the Substantive of the *Person*, is to be expressed as in the former rule; so *Ligatio*, *Pastio*, *Salivatio*; Binding, Feeding, Spitting, are Substantives of the *Action*; *Ligator*, *Pastor*, *Salivator*; Binder, Feeder, Spitter, are Substantives of the Agent; and *Ligatus*, *Pastus*, *Salivatus*; Bound, Fed, Bepit, are the Substantives of the Patient. And the Substantive of the *Thing* whether Active or Passive, is in this case to be expressed, by the Adjective, Active or Passive in the Aorist Tense, with the Trans-

scendental mark of *Thing*. So *Ligans res*, a binding thing, is *Ligamentum*, a Bond or String; and *nutriens* or *pascens res*, a nourishing or feeding thing, is *nutrimentum*, food or nourishment; so *ligata res*, a bound thing, is *Ligatum*, a Bundle or Fardle; so *excreta* or *salivata res*, is *Excrementum*, or *Saliva*, Excrement or Spittle.

5. When the Radical is a Substantive of the *Person*, then the Substantive of the Action or Passion (as was said before) are the most immediate derivations from it, and to be expressed by the Mark of Active or Passive upon the Radical; So *Magistratus*, *Rex*, *Judex*, &c. *Magistrate*, *King*, *Judge*, &c. are Radicals of the Person; The Substantives of Action belonging to each of these, are *Gubernatio*, *Regnatio*, *Judicatio*, *Governing*, *Reigning*, *Judging*; And the Substantive of the *Thing* whether *Active* or *Passive*, is to be expressed by the Adjective Active or Passive in the Aorist Tense, with the Transcendental note of *Thing*; So *Gubernans res* a governing thing; *regens res* a reigning thing; and *judicans res* a judging thing, *viz.* A Canon or Rule by which we judge of streight and crooked, right and wrong; So *Gubernata res*, the governed thing, is *Ditio*, Territory, Dominion, Jurisdiction; *Regnata res*, is *Regnum* the Kingdom; *Judicata res*, is *Judicium*, Judgment.

As those names which are assigned to signify things themselves, and do not denote either Action or Passion, are stiled *Nouns neuter*: so those names which are assigned to signify the Doing or Suffering of things are stiled *Active* or *Passive*. The same notion which in the *Greek* and *Latin* is expressed by the *Infinitive Mode* Active or Passive, is that which I here intend by the Substantive Active or Passive; and that it may properly be so stiled, I shall endeavour to prove afterwards.

Though every Noun Substantive have not an Active or Passive belonging to it either in the *Greek*, *Latin*, *English*, &c. yet according to the Nature and Philosophy of things, whatsoever hath an *Essence*, must likewise have an *Act*; either of *Being* or *becoming*: or of *Doing* or *being done*: or of *making* or *being made*: to *be*, or *do*. And consequently every Radical Substantive which is capable of Action, should have an Active or Passive formed from it, which is commonly called a *Verb*.

As for such things which have not of their own any proper Act of *Doing*, they are not capable of the derivation of Active and Passive, *ob defectum materiae*; as in the words *Stone*, *Mettle*, &c. But the Verbs belonging to such Radicals can be only *Neuter*, denoting the Act of Being or becoming; unless when they are compounded with the Transcendental mark of *Causatio*, which will adde to them a Transitive sense, as *Petrific*, *Metallific*, &c.

§ V.

As for such other Radicals as are capable of Action or Passion, these Rules are to be observed concerning them.

1. More *Generally* these two.

1. Things which according to common acception have belonging to them any one *proper Act of Doing*; their Verbs Active will denote this Act: For instance, the Verb or Substantive Active of the words *Fire*, *Water*, &c. is to burn, wet; and so for those Acts of the several parts, *Tongue*, *Tooth*, *Mouth*, *Throat*, *Foot*, *Heel*, whose active by this Rule

Rule will be to *lick, bite, devour, swallow, trample, kick*, and the Active of *Bow, Gun*, is to *shoot* as with a Bow, Gun.

2. Things which have not, according to common acception, any one kind of peculiar Act of Doing appropriate to them; the Actives belonging to such things, will signifie in the General to Act or do according to the nature of such things.

2. More Particularly these four.

1. The Actives belonging to such Radicals as are *Substances*, whether Absolute or Relative, do signifie to Act according to the nature of such Substances; so in *absolute* Substances, the Active of *God, Spirit, Man*, will signifie to Act as God, Spirit, Man; and so in *Relative* Substances, the Active of *Father, Judge, Magistrate*, is to Act as a Father, Judge, Magistrate.

2. The Actives of *Quality*, whether Predicamental or Transcendental, do denote the Acts of those *species*, with particular reference to the *differences* under which they are placed; So the Active of *East, West, Obliquity*, &c. being under the difference of *Situation*, must signifie to situate a thing *Easterly, Westerly, Obliquely*. The words of *Line, Surface, Body*, being under the difference of *Dimension*; the Active belonging to them must signifie to Dimensionate as either of these.

The words under the differences of *Figure*, must in their Actives signifie to Figure according to such particular shapes.

Those under the difference of *Time*, the Actives of *Present, Simultaneous, Newness, Oldness, Soonest*, &c. must signifie to Act with such respects of Time.

The Actives of the Differences and Species under *Measure*, should regularly signifie to Measure by *Number, Magnitude, Gravity, Valour, Duration*. The Active of *Inch, Foot, Pace, Fathom*, is to Measure by Inch, Foot, &c. and so for those other Species of *Grane, Drachm, &c. Farthing, Penny, &c.*

The Active of *Minute, Hour, Day, Night, &c.* will signifie to continue for such portions or measures of time, according to the sense of the Difference, *Duration*, under which these species are placed.

The Active of *Infancy, Childhood, Adolescence, &c.* may signifie to pass the time of one's Infancy, Childhood, Adolescence, &c.

3. The Active of such Radicals as are *Qualities*, whether Predicamental or Transcendental, signifie to do or deal according to the signification of the said qualities; So the Active of *Fidelity, Severity, &c.* will signifie to deal or Act, *Faithfully, Severely, &c.* The Active of *Goodness, Evilness, &c.* will signifie to Act or Do well or ill, &c.

4. The Active of such Radicals as denote *Actions*, need no other explication but this, that some of them are Active *Absolute*, which in the usual Grammars are stiled *Neuter*; as *Sto, sedeo, Curro*; others *Transitive*, denoting a transient efficiency; into which latter kind, the former of these may be changed (as was said before) by composition with the Transcendental mark of *Causation*.

There are several English Verbs, which, without admitting any change by Composition or Inflexion, have both a Neuter and a Transitive signification; as *Corrupt, Feed, Starve, Famish, Move, Rest, Hang, Extend, Shrink, Stagger, Stay, &c.* whose sense is to be distinguished by the construction.

There

There are some Verbs of the same Natural Philosophical Radix, which are yet expressed by different words, as *Laugh, Deride, Weep, Bemoan, must, need, Necessitate, &c.* And the different notion of these and such like Verbs, is not capable of being expressed by the Transcendental point of *causation*: but by placing after them such a Noun Substantive, or Pronoun Substantive, as may denote the object of those several acts. So the word *Laugh*, being put without any Substantive following, doth signify in the *Neuter* sense the bare act of Laughing; but if the word *me* or *him, &c.* doth immediately follow the Verb, then it is to be rendered *deride* or *laugh at, me, him, &c.*

§ VI.

Besides those *Concrete* Substantives, which signify the *Eus* or thing it self, there are other Substantives which denote the *Essence* of things, stiled *Abstracts*. And these may likewise be distinguished into, *Neuter, Active, Passive.*

That is stiled *Neuter* which denotes the naked *Essence* of a thing, without any inclination to *Action* or *Passion*, as *Deity, Regality.*

That is stiled an *Abstract Active*, which implies a proclivity to *Action*, as *Regnativity, Amativeness, or Amorousness.*

That is called *Passive*, which denotes a capacity or fitness for receiving or suffering of *Action*, as *Regibility, Amiability.*

Such Radicals as are *Concretes*, are capable (according to the nature of the things denoted by them) to have all these three kinds of *Abstracts* formed from them. Whereas such Radicals, as are themselves *Abstracts Neuter*, (as namely several of those under the *Genus's* and *Differences of Quality and Action*) are capable only of the two latter kinds to be formed from them.

§ VII.

As *Noun Substantives* are the names which are given to things, considered simply, and as *subsisting by themselves*: So *Noun Adjectives* are the names which are given to the *Adjunct natures* of things, the notion of them consisting in this, that they signify, the subject or thing to which they are ascribed, to have in it something belonging to the nature or quality of those *Adjectives*, which are predicated of it, or limited by it.

And besides this common notion, they do sometimes likewise in the instituted Languages refer to other notions; as, 1. To *abundance*, so the words *populous, pretious, sumptuous, &c.* so in *Latin, fluvius piscosus, aquosa regio.* 2. To *likeness*, so the word *dogged, currish, waspish, Seraphicus, Angelicus, &c.* 3. To *Possession*, so *Domus regia*, a royal house. 4. To the *matter* of which any thing doth consist; so *scutum abeneum*, A brazen shield. But each of these notions may be otherwise more distinctly provided for. The two first by the Transcendental marks of *Augmentative* and *Like*; and the two next by the prepositions of *Possessor* and *Material cause*. And so the true genuine sense of a *Noun Adjective* will be fixed to consist in this, that it imports this general notion of *Pertaining to, or being Affected with.*

Those *Adjectives* are stiled *Neuters* which do not denote either *Action* or *Passion*; as *Calidus, Lucidus, Hot, Light.*

Those are stiled *Active* or *Passive*, which denote the *Action* or *Passion* of the *Adjunct* thing or *Essence*. And because these according to the

the common Theory do Participate both of Noun and Verb ; therefore are they by Grammarians stiled *Participles* ; Active, as *Calefaciens, Illuminans, Heating, Enlightning* : or Passive, *Calefactus, Illuminatus, Heated, Illuminated*.

And as Abstract Substantives, may be formed from the Concrete ; so likewise may Adjectives, which are also distinguishable into Neuters Active, Passive.

That part of speech, which by our Common Grammarians is stiled a *Verb*, (whether Neuter, Active or Passive) ought to have no distinct place amongst Integrals in a Philosophical Grammar ; because it is really no other then an *Adjective*, and the *Copula sum* affixed to it or contained in it : So *Caleo, Calefacio, Calefactus, Calidus, Calefaciens, Calefactus*, is the same with *sum* } Concerning which *Copula, Calefaciens, Calefactus*. shall be said hereafter. § VIII.

That kind of word, which is commonly adjoynd to a Verb, to signifie the quality and affection of the Action or Passion, is stiled an *Adverb* ; which may be distinguished into *Derived* and *Underived*. The former of these is here particularly intended, and doth generally belong to Languages. The latter is afterwards treated of amongst the Particles. § IX.

As every Radical is supposed naturally to have its *Adjective*, so likewise its *Adverb* ; and though no Language in use doth admit of so general a derivation of Adverbs, yet the true reason of this is from their imperfection and deficiency ; for the Signs ought always to be adequate unto the things or notions to be signified by them.

As *Adjectives* were before distinguished into *Neuter, Active, Passive*, so likewise ought *Adverbs* to be. And as every Adverb is immediately derived from some Adjective, so every kind of Adjective hath some kind of Adverb derived from it.

For the more easie understanding of these things, I shall here adjoyne a general Scheme of the fore-mentioned derivations ; wherein I shall be necessitated to form several new words according to common analogy.

All Integrals are either.

C H A P. II.

1. Of Particles in general. 2. Of the Copula. 3. Of Pronouns more generally. 4. More Particularly. 5. Of Interjections more generally. 6. More Particularly.

§ I.

HAVING thus explained what is meant by *Integral* words, which signify entire things and notions, with the several kinds of them. I proceed in the next place to treat, concerning *Particles*, or less principal words, which may be said to consignify, serving to circumstantiate and modify those *Integral* words, with which they are joyned, being stiled by the Hebrew Grammarians *Dictiones*.

The words of this kind are exceeding numerous and equivocal in all Languages, and add much to the difficulty of learning them. It being a very hard matter to establish the just number, of such as in all kinds are necessary, and to fix to them their proper significations, which yet ought to be done in a Philosophical Grammar. I shall in this Essay, select out of Instituted Languages, such of the several sorts, as I conceive sufficient for this purpose.

These were before distinguished, into such as refer, either to *Grammatical*, or *Transcendental* notion.

Those are stiled *Grammatical*, which supposing words to retain their primary sense, do serve for the circumstantiating of them, either by union, abbreviation, inflexion, or some other way for the qualifying of their significations or constructions.

§ II.

The most necessary amongst all the rest, which is essential and perpetual in every compleat sentence, is stiled the *Copula*; which serves for the uniting of the Subject and Predicate in every Proposition. The word *Subject* I use, as the Logicians do; for all that which goes before the *Copula*; which if it consist of only one word, then it is the same which Grammarians call the *Nominative case*. By the word *Predicate*, I mean likewise all that which follows the *Copula* in the same sentence, whereof the *Adjective* (if any such there be) immediately next after the *Copula*, is commonly incorporated with it in instituted Languages, and both together make up that which Grammarians call a *Verb*.

Amongst

Amongst those Particles which are not essential and perpetual, but used according to occasion, some are stiled *Substitutive*; because they supply the room either, 1. Of some *Integral* word, as *Pronouns*, or 2. Of some *Sentence* or complex part of it, as *Interjections*.

As Nouns are notes or signs of *things*, so Pronouns are of Nouns; and are therefore called *Pronomina, quasi vice Nominum*, as being placed commonly instead of Nouns. They represent things either

§ III.
Jul. Scalig. de
caus. L. L.
Cap. 127.

1. *Immediately* and in kind, without respect to the names of those things. So when its said, I exhort thee or him: The Pronoun I represent to our thoughts the person speaking, suppose *John*; and the words thee, him, the person spoken to or of, suppose *William* or *Thomas*.

2. *Mediately* by their names, which are either

1. *Expressed with the Pronoun*, as commonly it happens upon the first intimation or mention of the thing; as *this* or *that* man or book, and in these cases the Pronouns are commonly called *Demonstrative*.

2. *Supplied by the Pronouns*, as is usual for Brevities sake, at the repeating of the mention of a thing lately before spoken of; as *he, it, &c.* and then the Pronoun is called *Relative*. Examples of both sorts are to be had in the Grammars of Instituted Languages.

More commodiously for our purpose, the Pronouns are to be considered either according to their, 1. *Number*. 2. *Modifications*.

1. As to their *Number*; there are twelve which may be stiled *simple* Pronouns, and three other that are *Compound*.

The Simple Pronouns, for the better convenience of and compliance with the Characters, are reduced into these three combinations; whereof the first and last combinations are single, the other double.

| | | |
|-----------|---------------------------------|----------------|
| { I. } | { This. That. } | { Any one. } |
| { Thou. } | { Same. Another. } | { Every one. } |
| { He. } | { Certain one. Some one. } | { All. } |

Of all which it is to be observed, that they are in some kind or other, *Quantitatives*; that is to say, every one of these Pronouns makes the whole Proposition, or at least that part of the Proposition, which is affected with it, according to its own nature, to be either Singular, Indefinite, Particular or Universal.

2. The *Modifications* of Pronouns, whereby they are varied into different significations, are of two kinds.

1. *Possessive*, denoting a relation of Propriety or Possession unto the person or thing spoken of, which is applicable to all Pronouns, as I, Mine; Who, Whose, &c.

2. *Reduplicative*, denoting a particular Emphasis, whereby a word is raised and intended in its signification; as I my self, Thou thy self, &c.

Moreover it is to be observ'd, that the Personal Pronouns, and any of the rest being us'd Substantively, are capable of Number and Case; and that all other Pronouns beside the Personal, are capable of Composition with the Transcendentals of Person and Thing, of Place, Time and Manner.

All these Pronouns I have thought fit to represent more largely under four combinations in these following Tables.

R r

The

§IV. The first Combination of Pronouns denoting the three Persons are *Substantives*, and for their Quantity *singular*, and cannot properly represent any other then *Individual* beings. I have here adjoynd to them their plurals, for the sake of their Possessives ; *ours, yours, theirs*, which without them cannot be so conveniently expressed.

The second Combination of Pronouns as likewise the rest that follow, are properly *Adjectives*, though by reason of *Ellipsis* they are sometimes used *Substantively*. The three first of them, *this, that, the same*, are for their Quantities *singulars*, and do denote several relations of *Identity* ; The three last, *viz. Another, A certain one, Some one*, are for their Quantities, *singulars* or *Particulars indeterminate*. The first of them implies the Relation of *Diversity*.

The fourth and last Combination is of the *mixed* or compound Pronouns ; so styled, because they are made up of some of the other Pronouns, compounded with the three first and most simple of the *Conjunctions*. The first of them *Quis? WHO?* is the Pronoun *All*, taken in pieces, with an interrogation ; For he that enquires who did this, means, doubting of all, did such a one? or such a one? &c. of all them that were capable to do it : but he that doubts only of one, enquires, did he do this? where *Quis* is plainly resolved into a Pronoun incorporated with a *Conjunction Interrogative*. And as for the second of these, *Qui* it is commonly translated *And he*. And the third *Whosoever* is the same as *If any one*. They may be distinguished into,

And

And thus much may serve for stating the number, nature, signification and use of this second kind of Grammatical Particle stiled *Pronoun*.

§ V. Those Substitutive Particles, which serve to supply the room of some sentence or complex part of it, are stiled *Interjections*. These are by some denied to be words, or any part of distinct speech, but only natural signs of our mental notions, or passions, expressed by such rude incondite sounds, several of which are common with us to Brute Creatures. And as all Nations of men do agree in these kind of natural passions, so likewise do they very much agree in the signs or indications of their *wirth, sorrow, love, hatred, &c.*

Scalig. L. L. Cap. 13. These kind of Particles are generally expressed by aspirated sounds, *affectum enim notant, & ideo confertus editur spiritus*, because of that affection and vehemence, which is commonly denoted by them.

The kinds of these may be very numerous, according to the various motions and passions of the mind; but those that are of the most frequent and general use, may be reduced under these three combinations, whereof the first only is single, the other two double.

§ VI. The two first Combinations may be stiled *Solitary* and *Passive*, being used by us when we are alone, or not so directly tending to discourse with others, in which the Party speaks as suffering some mutation in himself. They are the result, either of a *surprized*.

 2. { *Hate*, and anger, vauh, hau.
 Future;
 3. { *Desire*, O, o that.
 3. { *Aversion*, Phy.

The last Combination may be stiled *Social* and *Active*, being never used by us when we are alone, but immediately tending to discourse with others, in which the party speaks with design to procure some mutation in his Hearers. These may be distinguished into such as are

CHAP. III.

§ I. Of Prepositions in General. § II. The particular kinds of them. § III. Explication of the four last Combinations of them, relating to Place, or Time.

Those are stiled *Connexive* Particles, whose proper use is to express, either 1. The *Construction of word with word* called *Preposition*; or 2. The *Contexture of sentence with sentence*, called *Adverb and Conjunction*. § I.

Prepositions are such Particles, whose proper office it is to joyn *Integral* with *Integral* on the same side of the *Copula*; signifying some respect of *Cause, Place, Time*, or other circumstance either *Positively* or *Privatively*. These having [such a subserviency to *Nouns*, in respect of which, they are by some stiled *Adnomia*, or *Adnomina* and *Prenomina*, as *Adverbs* have to *Verbs*. They are therefore here treated of before *Adverbs*, whose office is chiefly to wait upon *Verbs*.

There are thirty six *Prepositions* or eighteen paires of them, or six *Combinations*, which may, with much less equivocallness then is found in instituted *Languages*, suffice to express those various respects, which are to be signified by the kind of *Particle*.

The two first *Combinations* of *Prepositions*, do comprehend such as are used to express *Causality*, and may be stiled *Causal*. § II.

The first *Combination* of *Causal* *Prepositions* are either,

I. { More *General*, denoting either *the Author, Subject, or Possessor* of any thing; expressed in the *Latin* by the *Genitive* case: or the *Formal, or Instrumental cause, or Manner of doing*, expressed in the *Latin* by the *Ablative* case: Neither of them having any *Particle* in that *Language* appointed for them.

The second *Combination* of *Causal* *Prepositions* doth contain such as do relate either to the notion of

Ideal and *exemplary, or Substitutive*

AGAINST, opposite unto.

The rest of the Prepositions do primarily refer to *Place* and *Situation*; Secondly to *time*; And some of them, by way of Analogy, to *Comparison*. Some of these are *Absolutely determined*, either to *Motion*, or to *Rest*, or the *Terminus of motion*. Others are *relatively applicable to both*; Concerning which this rule is to be observed. That those which belong to motion, cannot signify rest: But those which belong to rest, may likewise signify motion in the *Terminus*.

The third Combination doth consist of such as respect *space in general* being either

The sixth Combination doth comprehend such Prepositions as are applicable both to Motion and Rest, relating to the situation of some

some *third thing* spoken of, which the Speaker considers as being Higher or Lower than that third thing, denoting a contiguity or nearness to it

For the clearer explication of these *Local Prepositions*, I shall refer to this following Diagram. In which by the *Oval Figures* are represented the *Prepositions determined to Motion*, wherein the Acuter part doth point out the tendency of that motion. The *Squares* are intended to signify *rest* or the *Term of Motion*. And by the *round figures* are represented such *relative Prepositions*, as may indifferently refer either to *Motion* or *Rest*. § III.

pag. 311.

Some

Some of these Prepositions, *viz.* *About, Below, Before, After,* are by common Analogy applicable to signify *comparison*, which use being generally received, and the words having in them a natural suitability to this purpose, there is no danger of any ambiguity.

Several of the Prepositions are sometimes used Adverbially, as *Ante, Post, Præter, Contra, Inter, Infra,* &c. which use when it happens, the sense will easily distinguish. The difference between these two parts of speech, *Prepositions* and *Adverbs*, being so nice, that 'tis hard in some cases to distinguish them; upon which 'tis questioned, whether every Preposition as it compounds a Verb, do not put on the nature of an Adverb; and it seems to be so, because it Modifies the Act after the same manner as Adverbs do, as in the words *Præficio, Benefacio,* &c.

CHAP. IV.

I. Of Adverbs in General. II. The Particular kinds of them. III. Of Conjunctions.

§ I.
Chap. 1.
Sect. 8.

Those two kinds of Connexive Particles which serve for the texture of sentence with sentence, are called *Adverbs* and *Conjunctions*. The first of these are commonly described to be such kind of words as are for the most part adjoined to Verbs to signify some kind of Mode or Circumstance, belonging either intrinsically or extrinsically to them.

^a As. So. From.
This. That.
^b Yea. Nay.
Perhaps.
Truly.
^c Rather.
Than.

Of *Adverbs derived* from Integrals, enough hath been said in the Chapter of Integrals. The rest of those words which are commonly called *Adverbs*, according to their true Original, are either derived from ^a *Pronouns*, or else they are ^b *Modes of Verbs*, or else they are ^c *Conjunctions*; And some of them may be periphrastically expressed by Radicals. So that according to the true Philosophy of speech, I cannot conceive this kind of words to be properly a distinct part of speech, as they are commonly called. But until they can be distributed into their proper places, I have so far complied with the Grammars of instituted Languages, as to place them here together, and to branch them under the five following Combinations.

 is used simply for it, but only in *Composition*, both in
Latin and *English*: the latter we sometimes express in
English by *Back*:

§ III.

Conjunctions are such Particles as serve for the *joyning* together of words, or rather of sentences. Of these there may be reckoned these four Combinations, or twelve paire; though all of them be not alike simple and of equal necessity, yet there is none of them without its particular convenience.

The first Combination doth consist of such as are either

The

The three last of these are not properly Particles or single words, but rather the Contractions of several words, they are here added to the rest for greater convenience, partly for compleating the number and filling up the vacancies ; and partly in Compliance with the use of most vulgar Languages, when they write contractedly.

I. Of Articles. II. Of Modes. III. Of Tenses. IV. The most distinct way of expressing the differences of Time.

BESIDES these fore-mentioned Particles which may be called more **§ I.** *Absolute*; there are others more *servile* and auxiliary, serving for the fuller expression of some Accident belonging to a word. These were before distinguished into such as do belong either, 1. To an *Integral alone*, as *Articles*. 2. To the *Copula alone*, as the *Modes*. or 3. *Both to Integral and Copula* as the *Tenses*. Each of which are in some Languages taken in, or involved in the inflexion of words: But in others, they are provided for by distinct words to express them.

Articles are usually prefixed before Substantives for the more full and distinct expression of them, they may be distinguished into

Enuntiative, which may be used indifferently before any Substantive, not already possess'd with the Demonstrative. *A. An.*

Demonstrative, which gives a peculiar Emphasis to its Substantive, and is applyed only to such a Person or Thing, as the hearer knows, or hath reason to know, because of its eminence or some precedent mention of it. *The*

Though these be not absolutely *necessary* to a Language, because the *Latin* is without them; yet are they so *convenient* for the greater distinctness of speech, that upon this account, both the *Hebrew*, *Greek*, *Slavonick*, and most other Languages have them.

To shew in what manner the subject is to be joyned with his Predicate, the *Copula* between them is affected with a Particle, which from **§ II.** the use of it, is called *Modus*, the Manner or *Mode*.

Now the Subject and Predicate may be joyned together either *Simply*, or with some kind of *Limitation*, and accordingly these Modes are either *Primary* or *Secondary*.

The *Primary Modes* are called by *Grammarians* *Indicative*, and *Imperative*.

When the Matter is declared to be so, or at least when it seems in the speakers power to have it be so, as the bare union of Subject and Predicate would import; then the *Copula* is nakedly expressed without any variation: And this manner of expressing it, is called the *Indicative Mode*.

When it is neither declared to be so, nor seems to be immediatly in the speakers power to have it so; then he can do no more in words but make out the expression of his will to him that hath the thing in

his power, namely to his $\left. \begin{array}{l} \text{Superiour} \\ \text{Equal} \\ \text{Inferiour} \end{array} \right\}$ by $\left. \begin{array}{l} \text{Petition} \\ \text{Perswasion} \\ \text{Command} \end{array} \right\}$ And the man-

ner of these affecting the *Copula* (Be it so, or *sine esse*, let it be so) is called the *Imperative Mode*; of which there are these three varieties, very fit to be distinctly provided for. As for that other use of the *Imperative Mode*, when it signifies *Permission*; this may be sufficiently expressed by the *Secondary Mode of Liberty*. You may do it.

The *Secondary Modes* are such, as when the *Copula* is affected with any of them, make the sentence to be (as Logicians call it) a *Modal Proposition*.

This happens when the Matter in discourse, namely, the being or doing or suffering of a thing, is considered not *simply by it self*, but *gradually in its causes* from which it proceeds either *Contingently* or *Necessarily*.

Then a thing seems to be left as *Contingent*, when the speaker expresses only the *Possibility* of it, or his own *Liberty* to it.

1. The *Possibility* of a thing depends upon the power of its cause, and may be expressed when $\left. \begin{array}{l} \text{Absolute} \\ \text{Conditional} \end{array} \right\}$ by the Particle $\left. \begin{array}{l} \text{CAN} \\ \text{COULD} \end{array} \right\}$.

2. The *Liberty* of a thing, depends upon a freedom from all Obstacles either within or without, and is usually expressed in our Language, when $\left. \begin{array}{l} \text{Absolute} \\ \text{Conditional} \end{array} \right\}$ by the Particle $\left. \begin{array}{l} \text{MAY} \\ \text{MIGHT} \end{array} \right\}$.

Then a thing seems to be of *Necessity*, when the speaker expresseth the resolution of his own will, or some other obligation upon him from without.

3. The *Inclination of the will* is expressed, if $\left. \begin{array}{l} \text{Absolute} \\ \text{Conditional} \end{array} \right\}$ by the Particles $\left. \begin{array}{l} \text{WILL} \\ \text{WOULD} \end{array} \right\}$.

4. The *Necessity* of a thing, from some *external obligation*, whether *Natural* or *Moral* which we call duty, is expressed, if $\left. \begin{array}{l} \text{Absolute} \\ \text{Conditional} \end{array} \right\}$ by the Particle $\left. \begin{array}{l} \text{MUST, ought, shall,} \\ \text{MUST, ought, should.} \end{array} \right\}$.

§ III.

That kind of servile Particle which doth belong both to the Integral and the *Copula*, is stiled *Tense*.

The *Tenses* in instituted Languages are appropriated only to *Verbs*, yet 'tis very plain that according to the true Philosophy of speech, they should likewise be ascribed to *Substantives*; And that this would in many respects be a great advantage to Language. As there is *Amatitio*, so there should be *Amavitio* and *Amaturitio*, &c.

These kind of Auxiliary Particles, stiled *Modes* and *Tenses*, are in the Modern Languages expressed by such servile words, as do not signify any compleat Act, but rather some respects and circumstances belonging to other Acts; and by that means have in them a natural fitness to be subservient to the inflexion of other Integral words. So the *Conditional Modes* are supplied by the words *Possum* or *Possible*, *Licet*,

Licet, Libet, Volo, Neceffe, Oportet, Debeo. And fo are the *Tenfes*, by thofe fervile words of *Facio, Habeo*, befides the *Copula, fum*.

The *Tenfes* are ufually diftinguifhed into

| | | |
|------------|--------------------------------|------------------------------------------------|
| Present | { | Active. Do, doft, doth, |
| | | Passive. Am, art, is, are. |
| Past | Imperfect | Active. Did, didft, |
| | | Passive. Was, wert, were. |
| | Perfect | Active. Have, haft, hath, |
| | | Passive. Have been, haft been, hath been. |
| Pluperfect | Active. Had, hadft, | |
| | Passive. Had been, hadft been. | |
| Future | { | Active. Shall, will, fhalt, wilt, |
| | | Passive. Shall be, will be, fhalt be, wilt be. |

But the moft diftinct and explicit way of expreffing any Propofition, is by affixing thefe *Tenfes*, both to the *Copula*, and the *Predicate*; the latter of which will fhew the time of the Action, &c. whether past, present, or future: and the former, the ftate of the Perfon or Subject, who doth this Action, whether he {
Has been,
Is now,
Shall be hereafter.} either {
Past that Action,
Acting in it,
Yet to do it.

§ IV.

And a Propofition thus expreffed, is in the very expreffing of it, refolved into its parts of *Subject, Copula*, and *Predicate*, according to thefe following examples.

| | | | |
|---|----------------------------------|-----------------------|------------------------------------------------------------------------------------|
| I | { Have been Am Shall be | } Hot | { Calui Caleo Calebo |
| I | { Have been Am Shall be | } having been Hot | { Calebam Calueram Caluero |
| I | { Have been Am Shall be | } to be hot hereafter | { Fui caliturus Sum caliturus Ero caliturus |
| I | { Have been Am Shall be | } Heating | { Calefeci Calefacio, or sum calefaciens Calefaciam |
| I | { Have been Am Shall be | } Having heated | { Calefeceram Calefaciebam, sum qui calefecit Calefecero |
| I | { Have been Am Shall be | } to Heat hereafter | { Fui calefacturus Sum Calefacturus Ero calefacturus |
| I | { Have been Am Shall be | } Heated | { Fui Calefactus Calefio, vel sum calefactus Calefiam, vel ero calefactus |

I

| | | | | | | |
|---|---|-----------------------------|--------------------------|---|--------------------------------------------------------------------------|-------------------------|
| I | { | Have been Am Shall be | } having been Heated | { | <i>Fueram calefactus</i> <i>Calefiebam</i> <i>Fuero calefactus</i> | } |
| I | { | Have been Am Shall be | } to be Heated hereafter | { | <i>Fui</i> <i>Sum</i> <i>Ero</i> | } <i>Calefaciendus.</i> |

But if any should conceive this way needless or too laborious, as being too much distant from the manner of Instituted Languages; he may by putting the *Copula* in the place of the Tense, as well express his mind in this, as in any other Instituted Language.

CHAP. VI.

- I. Of Transcendental Particles, The end and use of them.
 II. The usual ways for enlarging the sense of words in Instituted Languages. III. The General Heads of Transcendental Particles.

Those Particles are here stiled *Transcendental*, which do circumstance words in respect of some Metaphysical notion; either by enlarging the acception of them to some more general signification, then doth belong to the restrained sense of their places: or denoting a relation to some other Predicament or Genus, under which they are not originally placed.

Whereas in a Philosophical Language, every word ought in strictness to have but one proper sense and acception, to prevent equivocality; which sense is to be restrained according to that place and relation, which the words have in the Tables: And yet on the other side, it would much promote copiousness and elegance, if there might be any way so to change and vary the sense of any word, as may with all, leave it free from ambiguity. For this purpose, as likewise for the Abbreviating of Language are these Transcendental notes suggested.

There are two ways used in Instituted Languages, specially in *Latin* for varying the sense of words; either by *Tropes*: or by such a kind of *Composition* as doth alter the terminations of them.

1. The sense of a word is varied by Trope; either in respect of some

| | |
|---|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| { | Agreement and convenience, which it hath with the word for which it is used; whether more |
| { | <i>General</i> ; as in <i>Metaphore</i> |
| { | <i>Special</i> ; when the |
| { | <i>Whole</i> , whether Universal, Essential, Integral, is put for any of the respective parts, or contrary wise, <i>Synecdoche</i> . |
| { | <i>Subiect</i> , <i>Object</i> , <i>Cause</i> , &c. is put for the <i>Adjunct</i> , <i>Adject</i> , <i>Effect</i> , &c. or contrary wise, <i>Metonymy</i> . |
| { | <i>Opposition</i> ; when one Opposite is put for the other, <i>Irony</i> . |

Of

Of all which there are store of examples in the common books of Rhetorick; And there will be occasion to cite several of them in the following Chapter, amongst the instances that are given of the Transcendental Particles.

Words are varied by changing their Terminations many ways; of which these that follow are some of the Principal in the Latin.

1. *Preparatives* or *Meditatives*; are expressed by the Termination (*urio*) *Scripturio, Esurio, Parturio, Misurio.*
2. *Inceptives*; by the termination (*scō*) *Lucesco, Caleſco, Senesco.*
3. *Frequentatives*; by the termination (*ito*) *Clamito, Agito.*
4. *Augmentatives*; by the termination (*osus*) *Aquosus, Fluviosus, Piscosus.*
5. *Diminutives*; by the terminations (*ulo, lus, la, lum, aster*) *Cantillo, Scribillo, Libellus, Lapillus, Homunculus, Mercatulus, Vesicula Corpusculum, Corculum, Crepusculum, Surdaster, Medicaster, Grammaticaster.*
6. The Notion of *Segregate*; by the termination (*tim*) *Virtim, Verbatim, Gradatim.*
7. *Power and Propensity Active*; by (*ivus, ivitas*) *Activus, Activitas.*
8. *Power and Propensity Passive*; by (*ilis, ilitas*) *Possibilis, Possibilitas.*
9. *Cause*; by composition with *Facio, Mortifico, Magnifico, Prolificum, &c.*
10. *Kind*; by (*plex and farius and genus*) *Simplex, Duplex, Multiplex, Bifarius, Multifarius, Omnigenus, Multigenus.*
11. The notions of *Officer*, and *Tradesman*; whether *Merchant* or *Mechanick* promiscuously, are commonly expressed by the termination (*arius*) which doth originally and properly signifie the notion of *belonging to*, but is thus limited by reason of the words, *Officiarius, Mercator, Faber*, understood.
Apiarius, Armentarius, Caprarius, Equarius, Accipitarius, Librarius, &c.
Lanarius, Linarius, Piscarius, Aviarus, Pomarius, Lactarius, &c.
Arcuarius, Armamentarius, Aurarius, Doliarius, &c.
12. *Instrument* or *Jugament*; by the termination (*trum*) *Haustrum, Aratrum, Plaustrum, Rastrum, &c.*
13. *Vessel*; by (*bulum*) *Tiburibulum, Infundibulum.*
14. *House*; by (*ile, ale, arium*) *Equile, Ovile, Bubile, Caseale, Aviarium, Columbarium, Gallinarium.*
15. *Chamber* or *Room*; by (*ina, arium, terium*) *Officina, Textrina, Tonstrina, Sutrina, Popina, Vestiarium, Carnarium, Apodyterium, Conisterium, Spheristerium.*
16. *Place in General*; by (*arium, etum*) *Vivarium, Aquarium, Pomarium, Colluviarium, Frutetum, Dumetum, Arundinetum, Ericetum, &c.*
17. *Person* or *Agent*; by the termination (*or*) *Pastor, Fossor, Fron-dator, Vindemiator, Arator, Messor, &c.*

Now if all other respects and circumstances, which are capable and proper to be expressed by these kind of Particles, were in some such way provided for; this would exceedingly abbreviate the number of

of words, prevent much circumlocution, contribute to perspicuity and distinctness, and very much promote the elegance and significancy of speech.

What may be the most convenient number of such Transcendental Particles, is not easie to determine; But those mentioned in the eight following Combinations, (though not all of the same extent and comprehensiveness) have each of them some peculiar pretence of being listed under this number.

These may be distributed into such as are more

- { *General.*
 - } Essential. I.
 - } Circumstantial. II.
- { *Special, whether belonging to*
 - { *Substance.* III.
 - { *Quantity.* IV.
 - { *Quality.* V.
 - { *Action.* VI.
 - { *Relation, with respect to*
 - { *Quality and Action.* VII.
 - { *Affections of Animals.* VIII.

The first Combination doth comprehend such *General Essential* respects, as are either

- I. { *Comparative; denoting similitude and resemblance; whether that which consists chiefly || in words or in things*
 - 1. { METAPHOR
 - { LIKE
- { *Positive; denoting the nature or essence of the subject spoken of, as to those common notions of*
 - { *General beings, either || the common essence, or common circumstances*
 - 2. { KIND
 - { MANNER
 - { *Individual beings, whether || irrational or rational*
 - 3. { THING
 - { PERSON

The second Combination doth contain such *General Circumstantial* respects as are, either more

- II. { *Absolute; signifying, Position or Duration*
 - 1. { PLACE
 - { TIME
- { *Relative; as to*
 - { *Effecting or Representing*
 - 2. { CAUSE
 - { SIGN
 - { *Being in conjunction with others, or separate from others*
 - 3. { AGGREGATE
 - { SEGREGATE.

The

The third Combination doth contain such kind of *Special* respects, belonging to *Substance*, as result from their Application to other Substances, and the uses for which they are designed; namely, for *Enclosure* and service, whether of

- III. { Places, or Things
 I. { SEPIMENT
 { ARMAMENT
 Men; either such coverings as are
 { Contiguous and fitted to their bodies, serving for defence,
 || against Weather or Enemies
 2. { VEST
 { ARMOUR
 More remote, according to || the more *General*, or *Special*
 kind or part
 3. { HOUSE
 { ROOM

The fourth Combination doth comprehend some of those *Special* respects belonging to Corporeal things, which do chiefly concern the *Figure* of them, whether

- IV. { Shape alone; Broad and Flat, or Slender and Long
 I. { LAMIN
 { PIN
 Shape and Use
 { More Simple; designed, either for Operation or Containing
 { INSTRUMENT
 2. { VESSEL
 { Less simple; whether || such as are not necessarily designed
 for motion, being of a less complicate figure; or such as are
 designed for motion, whose figure is more complicate
 3. { JUGAMENT
 { MACHIN

The fifth Combination doth contain such kind of Notions as relate to the *Quality* of Things or Persons, whether considered more

- V. { Abstractly; either the more *General* Quality, whereby the
 natural Powers are perfected, or more *special* relating to
 Practical matters
 I. { HABIT
 { ART
 Concretely; denoting personal Qualifications, whether
 { Degrees and Business; or Faculty and Skill
 2. { OFFICER
 { ARTIST
 { Professions of Manufacture or Exchange
 3. { MECHANIC
 { MERCHANT

The sixth Combination doth contain such imperfect servile notions, as belong to *Action* or *Passion*, with respect to the

- VI. { Ability, or *Disposition* of a thing
 1. { POWER
 { APTITUDE
 Beginning or *Repeating* of an Action
 2. { INCEPTIVE
 { FREQUENTATIVE
 Application of the Power; whether || in a *common* and *ordinary*, or in some *sudden* and *vehement* degree
 3. { ENDEAVOUR
 { IMPETUS

The seventh Combination doth contain such kind of servile *Relative* notions, as are *common* both to *Quality* and *Action*; denoting either the

- VII. { Measures and degrees of things
 { Great or Little
 1. { AUGMENTATIVE
 { DIMINUTIVE
 Too much, or too little
 2. { EXCESSIVE
 { DEFECTIVE
 Manner of a Thing or Action, whether || as it *should be*, or as it *should not be*
 3. { PERFECTIVE
 { CORRUPTIVE

The eighth and last Combination doth relate to some Affections of Animals, either

- VIII. { Sounds made by them, whether || *inarticulate*, or *articulate*
 1. { VOICE
 { LANGUAGE
 Sexes of them
 2. { MALE
 { FEMALE
 The *first* most impotent and *imperfect* Age; to which may be adjoyned, that more general name belonging to any *whole*, which is likewise applicable to *inanimate* beings.
 3. { YOUNG
 { PART.

CHAP. VII.

Instances of the great usefulness of these Transcendental Particles, with directions how they are to be applied.

FOR the better explaining of what great use and advantage these Particles may be to Language, I shall give some examples severally to each pair of them, according to the order premised: Beginning with the first.

I.

1. METAPHORICAL
LIKE

These two are paired together because of their affinity, each of them denoting an enlargement of the sense of the word; the first more general; the other with reference to *similitude*, properly so called.

The note of *Metaphorical* affixed to any Character, will signify the *Metaphor* enlarging the sense of that word, from that strict restrained acception which it had in the Tables, to a more universal comprehensive signification: By this, common Metaphors may be legitimated, retaining their elegancy, and being freed from their ambiguity. So

| | | | | | | | | | |
|-----------------------------|---------------------|-------------|---------------------------|-----------------------------|---|--------------|--------------|---|-----------------|
| These words, with this note | { | Element | Rudiment, Principle | These words, with this note | { | Shining | will signify | { | Illustrious |
| | | Root | Original | | | Hypocritical | | | Counterfeit |
| | | Way | Means | | | Banish | | | Expel |
| | | { Thick | { Gross | | | Companying | | | Being together |
| | | { Thin | { Subtle | | | Strengthen | | | Fortifie, fence |
| | | { Streight | { Upright | | | Wrigle in | | | Insinuate |
| | | { Crooked | { Perverse | | | Prophecie | | | Prediction |
| | | { Obtuse | { Dull | | | Consecrate | | | Dedicate |
| | | { Acute | { Quick | | | Suiter | | | Candidate |
| | | { Ripe | { Perfect | | | Woo | | | Canvase |
| | | { Immature | { Imperfect | | | Rival | | | Competitor |
| | | { Fertile | { Fruitful as to inventi- | | | Raise | | | Prefer, Advance |
| | | { Barren | { Unfruitful (on, &c. | | | | | | |
| | | { Beautiful | { Decent, Comely | | | | | | |
| | | { Deformed | { Absurd, Indecent | | | | | | |
| | | { Ornate | { Elegant, Quaint | | | | | | |
| | | { Homely | { Rude | | | | | | |
| | | { Light | { Evident, Plain | | | | | | |
| { Dark | { Mystical, Obscure | | | | | | | | |

So in the Tables of *Action*; those Acts which are primarily ascribed unto God, as *Preserving, Destroying, Delivering, Forsaking, Blessing, Cursing, &c.* because they may by analogy be applied to other things, therefore this mark will enlarge their acception. So for those other Acts belonging to the *rational soul*; as, *Thinking, Believing, Knowing, Observing, Expecting, Consenting, Dissenting, Esteeming, Contemning,*

Willing, Nilling, Fruition, Delectation, Election, Rejection, &c. though they are primarily acts of the Rational Soul; yet because there is somewhat analogous to them in other Creatures; therefore such words with this mark may without ambiguity be used in such a general sense.

So in *Judicial Relation*; *Accuse, Complain, Excuse, Witness, Register, Citation, &c.* So likewise in *Military Relation*; *Offend, Defend, Provoke, Resist, Besiege, Assault, Skirmish, Fight, Stratagem, Overcome, Yield, Fly, Pursue, Escape, &c.* Each of these and many other words may by this note (when there is just occasion to apply it) be made more copious, and yet preserved distinct in their significations.

Like.

The other Particle, *Like*, being affixed to any word, doth denote a varying of the sense of that word, upon the Account of some similitude, whether in respect of *Quality* and disposition, *Resemblance, effect*, and manner of *doing*, or *outward shape and situation*.

1. This similitude may sometimes refer to the *Quality* and disposition of a thing; in which sense 'tis frequently expressed in our English Tongue by Adjectives, with the Termination (*ish*) *Devilish, Brutish, Curriish, Waspiish, Apish*: and sometimes without it; as *Angelical, Dogged, Cynical, Viperous, Serpentine, &c.* which do not always signify according to the strict derivation of such Adjectives, but do many times denote only a similitude.

2. After the same manner are the several varieties of *Colours* to be expressed, namely, by their resemblance to other things commonly known. So Ashes-like, or *Cineritious*, is *Ash-colour*. So Flesh-like is *Carnation*; Blood-like is *Crimson*; Lyon-like is *Tawny*. So for those other resemblances to the Sky, to Gold, Grass, Straw. So *Piceus*, or Pitch-like, is a *deep black*; *Coracinus*, or Crow-like, is a *shining black*. So for Milky, Snowy, Ivory, kinds of White, &c. And thus likewise is it for the variety of *Tastes* and *Smells*; the differences of which are not provided for with distinct words in any Language, but may this way be sufficiently expressed; namely, by their likeness to such other things as are commonly known.

3. Sometimes it may refer to some kind of *Resemblance* in respect of *effect*, according to which sense these words are frequently used; *Inflame, Sparkle, Cloud, Exhalation, Fumes, Vapour*.

4. Sometimes to the *manner of doing*; so to speak Infant-like, is to *Jabber*; to graft-like Feathers is to *Impe*; to dart-like water, is to *Spirt, Squirt*; to tremble-like with the voice, is to *Warble, Thrill*; Dog-like crying, is *Whining*; Stealing-like, is *Surreptitious, &c.*

5. This

5. This Particle is likewise applicable in respect of shape and situation. So

| | | | | |
|----------------------------|---|--------|-----------------|--------------------------------|
| These words with this note | { | Downe | } will signifie | Thistle Downe |
| | | Fibre | | Lint of Linnen |
| | | Apple | | Hoariness of Mold |
| | | Bullet | | Grain of Wood |
| | | Arme | | Pomander, Pommel |
| | | Trunc | | Pellet |
| | | Beake | | Arme of Tree, Sea |
| | | Foot | | Hulk of a Ship |
| | | Bridge | | Stemm of a Ship |
| | | Money | | Pedestal |
| | | | | Bridge of a Musical instrument |
| | | | | Medal, Counter. |

I.

2. { KIND
MANNER

The first of these may be compounded with words of *Number*, to ^{kind.} make them signifie under the notion of *Multiplicative*, which the Latins express by the Termination (*plex*) *Simplex, Duplex, Multiplex, &c.* And the English by the Termination (*fold*) *Twofold, Threefold, Manifold.*

In its composition with other Characters, it will serve to express those words which are used to signifie the general or special *kinds of things*; and being affixed to any of the differences, will make them signifie as a *Genus* or *Species*. It is applicable both to Substantives and Adjectives.

Some of our English words of this sense, are expressed by the Termination (*age*) as *Herbage, Pasnage, Foliage, Vintage, Cordage, Stodge, &c.* that is the kind of Herbs, Pasture, &c.

| | | | | | | | | | |
|----------------------------|----------|---------------|-----------------|-------------------------|---|----------------------|-----------------|---------------|-------------|
| These words with this note | { | People | } will signifie | These words thus marked | { | Bisulc | } will signifie | Cattle | |
| | | Parent | | | | Populacy, Folk, | | Stag | Red Deer |
| | | Child | | | | Commonalty, | | Buck | Fallow Deer |
| | | Foot Souldier | | | | Parentage | | Hog | Swine |
| | | Horse Sould. | | | | Off-spring, Progeny | | Domestic bird | Poultry |
| | | | | | | Issue, Brood, Litter | | Guns | Artillery |
| | Infantry | | | | | | | | |
| | Cavalry | | | | | | | | |

There are several Adjectives likewise expressible this way; as *Multifarious, Homogeneous, or Similar, Heterogeneous, or Dissimilar, &c.*

2. The use of the second Particle is by its composition with *Relative* and *Quantitative Pronouns*, to express such words as these; *Quomodo*, how or after what manner; *Hujusmodi* after this manner; *Ejusmodi* after that manner, &c. It is applicable likewise unto *Adverbia moris, Meatum, Tuatim, suatim* (i) *Meo, Tuo, suo More*. The Antients were wont to say, *Canatim, suatim, Bovatim*, that is, after the manner of Dogs, of Swine, &c. And it is still in use to say *Humanitus*, after the manner of men.

The

The Composition with this Particle may likewise be useful in expressing those words which do in their proper notion contain a reference to the *Mode* of things. So

| | | | | | | | | | | | |
|-------------------------|-------|------------|-----------------------|---|---------------|-------------------------|---|---------|---------------|---|----------------------|

I.

3. THING
PERSON

Each of these may be compounded with the *Relative* or *Quantitative* Pronouns, serving to distinguish such as refer to *Things*, from those that belong to *Persons*. *This, That, The same, Another, A certain, Some. Thing* or *Person*.

Thing.

The former of these being affixed to any word in the Tables belonging to the Predicament of Quality, Action, Relation, or to any other word which doth primarily denote a person, will determine the sense of that word to a *Substantive of the Thing*; as it hath been already declared in the Doctrine of Substantives.

This note may be affixed

1. To *Adjectives Nenter*. So

| | | | | | |
|-----------|---|---------------|------------------------------|---|-----------|
| The words | } | Obscure | with this mark will signifie | } | Mystery |
| | | Seeming | | | Semblance |
| | | Prestigiatory | | | Trick |
| | | Fivolous | | | Trifle. |

2. To *Adjectives Active*, commonly called *Participles Active*. So

| | | | | | |
|-----------|---|------------|------------------------------|---|---------------------|
| The words | } | Nutrient | with this mark will signifie | } | Nutrimnt or Alimnt |
| | | Medicating | | | Medicament or Medi- |
| | | Purging | | | Purge (cine |
| | | Binding | | | Bond or String |
| | | Buying | | | Price |

3. To *Adjectives* or *Participles Passive*, in the *Aorist Tense*. So

| | | | | | | | | | |
|-----------|---|------------|---------------|---|----------------|---------------|---|---------------------|-------------------|
| The words | } | Created | will signifie | } | Inherited | will signifie | } | Inheritance, Patri- | |

II.

1. PLACE
TIME

This first pair in the second Combination of Transcendental Particles, are of more than ordinary extent and usefulness, because they may be serviceable to compound other words besides Integrals.

The first of them may be Compounded with *Pronouns*, as was shewed before in the doctrine concerning Pronouns; and so serve to express *Adverbs of place*, as in this, that, every, &c. here, there, every where.

Besides which, the Composition with this Particle may be proper to express other names of Places, which are commonly derived, either from,

1. The

1. The things contained in them.
2. The *uses* to which they are designed.
3. The *Relations* by which they are bounded.

Of the first kind are such as these.

| | | | | | | | | |
|-----------|---|-------------|---|-------------|---|--------------|---|----------------------|
| The words | } | Metal | } | Mine | } | Hops | } | Hopyard |

Time.

The second of these Particles, namely, *Time*, may be Compounded

1. With *Numbers*, to make them signifie as *Adverbs Cardinals*; as *Semel, bis, ter, &c. Decies, vicies, centies, millies, multoties, &c.* Once, twice, thrice, ten times, twenty times, a hundred times, a thousand times, many times, &c.

2. With *Pronouns*, to express *Adverbs of time*; as in *this, that, all, Now, Then, Always, &c.*

3. With

3. With *Integrals*; as in such examples.

II.

2. } CAUSE, or make
} SIGN.

When words are in their significations to be more peculiarly determined to their Transitive efficiency, then is this first note to be affixed. Cause. It is frequently in Latin expressed by a Composition with *facio* subjoyned, and sometimes in English by a Composition with (*be*) prefixed; as in the words, *Befool*, *Besot*, &c.

The instances of this kind do frequently occur, and are very numerous. So

| | | | | | | | | | | | |
|-------------|-------------------------|-----------|-------------------|---|-----------------------|-------------|---|---------|--------------|---|-----------------|
| These words | } | Know | will signify | } | Acquaint, Advertise | These words | } | Sit | will signify | } | Set |

| | Flush, spring, unkennel | Sparkle | Strike fire | | | | | | | | |
| Fall | Fell, throw down | Lose | Endamage | | | | | | | | |

This mark is applicable both to Substantives and Adjectives, as in *Adoption*, *Adopting*, *Adopted*, *Sudorification*, *Sudorific*, &c.

Sign.

The other Transcendental note of *Sign* is adjoined to the former, by reason of some kind of affinity (though somewhat remote) which there is betwixt them. As the former Particle doth import the notion of *efficiency* or making; so doth this of *Representing* or signifying. It is applicable both to Substantives and Adjectives. So

II.

3. { AGGREGATE
SEGREGATE

Aggregate.

The first of these doth denote a multitude in Society, unto which common speech doth needlessly assign several distinct names; whereas the Natural notion is the same in all of them; and therefore such various names may justly be reckoned amongst the redundancies of Language. So

| | | | | | | | |
|-------------|----------------------|--------------|----------------|-------------|-------------|--------------|-------------|
| These words | Affessors | will signify | Bench | These words | Young Dogs | will signify | Litter |
| | Souldiers | | Party | | Foxes | | Airy |

| | Waiters | | Train, retinue | | Hawks | | Brood |
| | Ships | | Navy, Fleet | | Ducks | | Scour, Fry |
| | Military Ships | | Armado | | Chickens | | Scull |
| | Sheep | | Flock | | Fish | | Wood, Grove |
| | Geese | | Heard | | Trees | | Coppice |
| | Cows | | Drove | | Small trees | | Thicket |
| | Deer | | Teame | | Shrubs | | Brake |
| | Hoggs | | Pack | | Ferne | | Reek, Stack |
| | Drawing horses | | Covey | | Hay | | Cock |
| | Hunting dogs | | Swarm | | Straw | | Pile |
| | Partridge | | | | Fewel wood | | Bavin |
| | Bees | | | | Twigs | | |

And so likewise may it be for those others words

| | |
|------------------|----------------|
| Jewels | Carcanet |
| Feathers | Plume |
| Berries | Cluster, Bunch |
| Counters | Set |
| Cards | Pack |
| Dice | Bale |
| Silk, Cloth, &c. | |

So.

So the words Selling, or Hiring, with this mark, will signifie to sell by *whole sale*, and to hire by *the Great*.

The second of these being opposite to the former, will signifie *Segregate*. things under the notion of *distribution*; and being segregated, which we commonly express by the words *Each* and *Every*; it is applicable to the *Numbers* to make them *distributives*: *Singuli, Bini, Trini, &c.* Each one, every two, every three, or one by one, by twos, by threes, &c. And so for all other things capable of the like notion. The Latins express it by the Termination (*tim*) as was said before. So

| | | | | | |
|---|-------------------|--------------|---|-------------------|----------------------|
| } | <i>Sigillatim</i> | One by one | } | <i>Paulatim</i> | By little and little |
| | <i>Viritim</i> | Man by man | | <i>Pedetentim</i> | Foot by Foot |
| | <i>Ostiatim</i> | Door by door | | <i>Gradatim</i> | By degrees |
| | <i>Verbatim</i> | Word by word | | <i>Seriatim</i> | By ranks or classes. |

The English, besides the above-mentioned peculiar way of Phraeology, doth sometimes express this notion by compounding with the Termination (*ly*) as *Hourly, Daily, Weekly, Monthly, Annually, &c.* It is applicable likewise to Nouns of Action, or Verbs. So

| | | | | | |
|-------------|---|-----------|---------------|---|--------------------------|
| These words | } | Giving | will signifie | } | Distributing, Dispensing |
| | | Gathering | | | Picking up |
| | | Selling | | | Retailing |
| | | Hiring | | | Hiring by the day |

III.

I. { LAMIN
PIN

The first pair in the third Combination do properly refer to the *Figure* of things; and the note of these, added to the name of the *matter* of which they consist, will be useful to supply the words for several things.

The former of these doth denote a broad and flat Figure.

| | | | | | | | | | | |
|-------------|---|------------------|---------------|---|--------------|-------------|---|---------------|---------------|---------------------|
| These words | } | Wood | will signifie | } | Board, Plank | These words | } | Fire | will signifie | Leam |
| | | Glas | | | Pane | | | Ice, Snow | | Flake |

| | | Mettal | | | Plate | | | Bread | | Sippet, Toft, Wafer |
| | | Lead | | | Sheet | | | Staffe | | Lath |
| | | Iron supertinn'd | | | Latin | | | | | |

The second denotes a round and long Figure, and being affixed to the word signifying the matter of it, or the thing about which it is used, it may serve for the expression of several names. So

| | | | |
|---|------------|---|-------|
| } | Iron | } | Nayle |
| | Wood | | Peg |
| | Vest | | Pin |
| | String | | Tag |
| | Cuspidated | | Tine |

III.

2. INSTRUMENT
VESSEL

This pair is intended to signify the General Names belonging to each of the two principal kinds of *Utenfils*.

Instrument. By *Instrument*, is meant such a kind of *Utenfil*, as is of a more *simple figure*, and properly designed for *Operation*. This mark is to be affixed to the Character of that particular *Action* or *Operation*, in which such instruments are used; and whereas there may be several kinds of instruments, that may be useful for the same kind of operation; they are to be farther distinguished by their *Matter*, *Figure*, *Bigness*, or some other circumstance. So

| | | | | | | | |

| Gathering | Rake | Signifer | Colours, Auntient, Cornet, Banner | | | | |
| Scattering | Fork | | | | | | |
| Cribrating | Sive | | | | | | |

Vessel.

Under this second Particle (*Vessel*) are comprehended such kind of simple *Utenfils*, whose proper use is to *contain*; they are distinguishable either

1. By the *things* which *they* are designed to hold and *contain*.
2. By the *operations* and *actions* for which they are *used*.
3. By the *matter* of which they consist, together with their several *figures* and *quantities*.

Of

Of the first kind are such instances as these. So

| | | | | | | | | |
|-----------|---|---------|---|-------------------|---|------------|---|--------------|
| The words | } | Water | } | Cistern | } | Wooden | } | Bowle |

306A

III.

3. JUGAMENT
MACHIN

This next pair is put to signifie such kind of Utensils as are of a *less simple figure* then the former.

Jugament.

The word *Jugament* doth comprehend such kind of forms as are *diffensoria longa*; consisting of several distinct parts united by Art, being *more* complex then instrument, and *less* then Machin. The mark of it is to be affixed, either to the name of the *Action* or the *Thing* about which they are used: as in these examples.

| | | | | | | | |
|-----------------|-------------------------------|---------------|-----------------|-----------|---------------|---------------|----------|

| | Little | | | | | | |

IV.

I. SEPIMENT
ARMAMENT

Sepiment.

The first of these may serve to express and describe those several kinds of things and names which are used for *Enclosure*. So

| | | | | | | | |
|-----------|------------|---------------|-------|-----------|---------------------|---------------|--------------------|
| The words | Wood Lamin | will signifie | Pale | The words | Water | will signifie | Mote |

| | Shrub | | Bank | | of basket | | Gabion |
| | Earth | | | | Transverse shutting | | Barricado |

The

The second mark for *ARMAMENT* or Tackle, will serve to describe sufficiently several things of that nature, without affording distinct names for them, to be applied unto the Character of the Action or Part to which it belongs.

| | | | | | | | | |
|-------------|----------------|-------------------|-------------|----------------|---------------|----------------|----------------|-------------------|

IV.

2. { VEST
ARMOUR

The first of these will help to describe those various names that are given to several sorts of *Garments*, according to the *Parts*, *Things*, or other circumstances most considerable in their use. So

| | | | | | | | | |
|---------------|----------------|---------------------|--------------|----------------|------------------|----------------|--------------|-----------------|
| These words | } will signify | Head | These words | } will signify | Breast | } will signify | Stomacher | |

| Table Woollen | Hagging | shadowing | Curtain | | | | | |
| Linnen | Carpet | Concealing | Mattre, Veil | | | | | |
| | Table cloth | | | | | | | |

The second Particle is designed only for *defensive Armour*, which bears some Analogy to *Vests*. The note of it may be affixed to the several Parts. So

| | | | | | | | |
|-------------|----------------|--------------------|-------------|----------------|-----------------|----------------|-------------------|
| These words | } will signify | Head | These words | } will signify | Hand | } will signify | Gauntlet |
| | | Neck | | | Leg | | Greaves, Jambeaux |

HOUSE

IV.

3. HOUSE
ROOM

House.

The first of these will by its composition serve to express those various names which are given to Houses, in reference to the several things or uses they are designed for. So

| | | | | | | | |
|-------------|----------------|--------------|----------------|-------------|---------------------|--------------|-------------------|
| These words | Corn threshed | will signify | Granary | These words | Publick hospitating | will signify | Inn |

| Water | Magazine | | Stews, Brothel | | | | |
| | Charnel | | Bordel | | | | |
| | Conduit | | | | | | |

Room.

As the former Particle may be useful for the expression of the names of several Houses; so will this second for particular Rooms or Chambers. So

| | | | | | | | |
|-------------|-----------------|--------------|-------------|-------------|---------------|--------------|---------------|
| These words | Conventus | will signify | Hall | These words | Cloths | will signify | Wardrobe |

HABIT

V.

Habit.

I. { HABIT
ART

Each of these are applicable to Nouns. The use of the first Particle, is to denote the *Habitualness* of any such thing whose Radix is not primarily under that Genus of *Habit*. So these words *Rejoycing, Worshipping, Obedient, Disobediencce, &c.* with this mark, will be determined to the *Habit* of *Chearfulness, Devotion, Obediencce, Contumacy, &c.*

There are many Radical words under other Predicaments, as that of *Action, Love, Zeal, Compassion, Envy, &c. Singing, Writing, &c.* That of *Relation, as Governing, Bargaining, Thieving, Whordom, Deceiving, &c.* which when they are to be used under the notion of *Habits*, must be marked with this affix.

The chief use of the second Particle, is to supply the place of those several names which are commonly given to *Arts and Sciences*. So

2. { OFFICER
ARTIST

Though this second pair be not of any great affinity, yet are they here united, upon account, that they both denote personal respects.

Officer.

The first of them affixed to any single Character, will signify the notion of *Prefecture* in any kind of place, imployment, relation; whether *Honourable*, or mean and *Servile*, as the Integral shall denote: But if the Integral be compounded with the Preposition *Pro*, or *Vice*, or instead of, which signifies the notion of *substitution*, it will then express the *Deputy* or substituted officer; if with the Preposition *Sub* or *Under*, it will then denote the *Inferiour* or subordinate officer of that kind. VI.

I. { POWER or Ability
APTITUDE or Proneneſs.

Betwixt theſe two there is an evident affinity, both of them being common ſervile notions, and of very general extent; they are applicable to an *Integral* both *Subſtantive* and *Adjective*, and capable both of an *Active* and *Paſſive* ſenſe: Being expreſſed in Latin by the Termination (*tivus* and *bilis*) and in *English* by the Termination (*tive* and *ble*) And when the words to which they are affixed are compounded with any Adverb of a Negative or Privative ſenſe, they are by that Adverb made to ſignifie, *Impotence* or *Ineptitude*, either *Active* or *Paſſive*.

Though the derivations of *Abſtraſts* before-mentioned may ſerve well enough for ſeveral of the following inſtances, yet to prevent the ambiguity that may otherwiſe happen in ſome of theſe derivations, it will be proper to make uſe of theſe Particles. We have not actually indeed ſuch variety of words as may be ſuted to theſe notions; but this is from the defect of Language, for the things themſelves are naturally capable of this kind of inflexion. •

Power.

The firſt of theſe may ſignifie either

Affirmatively

{ Subſtantive, denoting *Ability*

{ Active, to do, *Senſitivenesſs*, *Viſtvenesſs*

{ Paſſive, to be done, *Senſiblenesſs*, *Viſiblenesſs*

{ Adjective, or *Able*

{ Active, to do, *Senſitive*, *Viſive*

{ Paſſive, to be done, *Senſible*, *Viſible*

Negatively

{ Subſtantive, denoting *Inability*

{ Active, to do, *Inſenſtivenesſs*, *Inviſtvenesſs*

{ Paſſive, to be done, *Inſenſiblenesſs*, *Inviſibility*

{ Adjective, or *Unable*

{ Active, to do, *Inſenſitive*, *Inviſive*

{ Paſſive, to be done, *Inſenſible*, *Inviſible*

By

By this Particle are all these common words to be exprest, *Capable, Effable, Audible, Accessible, Comprehensible, Evitable, Fallible, &c.* which being compounded with the Negative Particle (*in*) will signifie the opposite, as, *Incapable, &c.*

In this sense, to render a man *Unresponsive*, is to *Confound, Poze, Puzzle, Non-plus*. A person *insolutive*, or (as we commonly say) insolvent, is a *Bankrupt*; *Unwalkative*, is a *Cripple*; *Non-surrective*, is *Bedrid*; *Unfatable*, is *Flue, &c.*

The second of these may likewise signifie, either

Aptitude.

There are great variety of Integrals, to which these notes are applicable. So

There are some words in our English Tongue which are used promiscuously, both Actively and Passively; as *Changeable, Mutable, Alterable, Pitiful, Fearful, Mortal, &c.* whereby they are liable to mistake, which may be prevented by these Particles, being duely apply'd either to a *Substantive* or *Adjective, Active* or *Passive*, as the sense shall require.

INCEP.

VI.

2. { INCEPTIVE
FREQUENTATIVE

Inceptive.

The first signifies the *beginning* of Actions or Things; which being a kind of *Mode* or imperfect notion, is therefore fit to be joyned as a *servile* and *auxiliary*. 'Tis commonly expressed in English, by the word *Wax* or *Grow*; And in *Latin* (as was observed before) by the Termination *sco*, *senesco*, *lucesco*, *calesco*; *Wax old*, *Wax light*, *Wax hot*, &c. There are in our Language some peculiar words and phrases, which do only import this notion, and by this mark will be rendred needless and redundant. So

| Itinerate | Set forth | Effluviat | Tap, Broach | | | | | | | | |
| Proceed | Set forward | | | | | | | | | | |

So the word *Morning*, with this note will signify, *Dawning*, *Day-spring*, *Aurora*, *Diluculum*; And the word *day* or *night*, with this mark will signify, *Crepusculum*, *Twilight*.

Frequentative.

The second of these doth signify the repetition or *wontedness* of Actions, which is such a kind of *servile* notion as the former, and therefore fit to be this way provided for. It is of a very large extent in the use of it, being (as the other notion of inceptive likewise is) applicable to most Verbs; And there are some words in our English which will by this note be rendred needless. So

It may be worthy consideration to enquire, whether the opposite to each of these, *viz. Desnative* and *Raritive* or seldom, ought not to be particularly provided for in this kind.

3. { PERFECTIVE
 { CORRUPTIVE

This pair may be of very general use for all kind of *Actions* and *Things*.

Besides those general notions referring to the measure and *degrees* of *things* in the two former pairs, it may be requisite to provide the like way for expressing the *manner of them*, as to *Well* or *Ill*; *Right* or *Wrong*; as it should be, as it should not be. The first of these is in many *Greek* words expressed by the composition with *eu* and *εὖ*, and in *English* by *Well* and *Right*. So Perfective:

The second particular is paired with the former for its affinity to Language: it. The proper use of it is by its composition with the names or characters of several Countries or Nations, to express the notion of the Languages spoken by them. So the Character or word of *English, Spanish, French, Italian, German, &c.* with this affix, will determine these words to the signification of those Tongues or Languages: And the same note affixed to the name of any *Tribe*, may signify the *Dialect* of it. There seems to be least necessity of this Particle; and it might well be spared, if any more proper could be thought of, to supply the place of it.

2. } MALE

The second pair in this last Combination is for the distinction of such things as have *Sex*. And all those names of *Animals* or *Relations*, which are distinguishable only by their *Sex*, ought not to have any other distinction in their appellations but that of their *Sex*: So that whereas we say, *Ram, Yew, Boar, Sow, &c. Father, Mother, Son, Daughter, &c.* It would be more agreeable to the Philosophy of Speech, if these things were to be expressed a *male sheep, a female sheep, a male or female swine; a male or female Parent or Child, &c.*

These marks are applicable

1. To kinds of *Animals*; of which there are such instances as these.

By the first of these is meant the young ones or *brodd* of any sorts of Animals, for which we have no proper word in *English*. So

By the second of these may be expressed such kind of names as do comprehend in them the notion of *Part*, under the several relations of 1. *Situation*. 2. *Proportion*. 3. *Figure* or *Colour*. 4. *Use*.

1. Of the first kind there are such examples as these. So

It may happen sometimes that two of these Transcendental Particles should concur to the composition of some words : In which case it will be worth consideration, whether it may not be more distinct to express one of them by an *Integral*, and the other by an *Affix*.

It may likewise deserve some farther inquiry, whether some of these Particles here nominated, may not be spared to make room for others more useful ; as particularly those servile general notions of

- { Continuing
- { Discontinuing
- { Permitting
- { Hindering
- { Facility
- { Difficulty ; as likewise, Flower, Fruits, Disease, &c.

I have been somewhat the longer in treating concerning these Transcendental Particles ; because being for the most part *new*, and not all of them used in any one Language, they do thereupon stand in greater need of being more particularly and fully explained and discussed.

I have now done with the first part of *Etymology* ; namely, concerning the *formal differences* or kinds of words, whether

CHAP. VIII.

Of the Accidental Difference of words. I. Inflexion. II. Derivation. III. Composition.

THE next thing to be treated of, is concerning the *Accidental Differences* of words; and amongst these

§. I.

1. Concerning the *Inflexion* of them, which doth consist in the several ways of varying the same word to sundry modes of signification. This is not *arbitrary*, as it is used in several Languages; much less should the rules to this purpose, which belong to the Latin, be applied to Vulgar Tongues, to which they are not suited (as many Grammarians use to do) but it ought to be founded upon the Philosophy of speech and such *Natural* grounds, as do necessarily belong to Language.

Integral words are all capable of Inflexion.

1. Noun *Substantives* are inflected in a threefold respect.

1. By *Number*, *Singular* and *Plural*, which being more *Intrinsic* to them, ought to be provided for in the Character or word it self, and not by an *Affix*.

2. By *Gender*, in things that are capable of *Sex*, which are naturally but two, *Masculine* and *Feminine*: These being less *Intrinsic* to the primary notion of the word, may be more properly expressed by *affixes*; and then the kind or species of every Animal (abstractedly from the respective *Sexes* of it) may be signified by the Radical word it self, without any sign of *Sex*, which will prevent much *equivocalness*.

3. By *Cases*, which is not so essential and natural to *Substantives*, as to be provided for in the word it self, by varying the *Terminations* of it; For though this course hath been used in the *Greek* and *Latin*: yet neither do the *Oriental* Tongues, *Hebrew*, *Chaldee*, *Arabic*, &c. nor those *Occidental* of *French*, *Italian*, *Spanish*; nor I think doth any *Modern* Tongue in the world this way express them.

The true notion of the *Nominative* Case, is that which precedes the *Verb*, and the *Accusative*, that which follows the *Verb*; of which in speech that is suited to natural Structure and Syntax, there ought to be no other sign or note then the very order. As for the *Genitive* Case, the proper notion of that, is its following another *Substantive in regimine*: But because the following *Substantive* is not always governed by that which precedes; as *Urbs Roma*, *Rhenus Fluvius*, *Taxus arbor*, &c. therefore 'tis proper to have a *Particle* or *Preposition* for it, as our *English* (*Of*) and (*De*) in the *French*, *Italian*, *Spanish*, which was treated of before. The *Dative* Case is expressed by the *Preposition* (*To*) the *Vocative* by the *Interjection* of bespeaking (*O*) and the *Ablative* Case by such a *Preposition* as denotes *Formal* or *Instrumental* cause, or manner of Doing. So that the true notion of the *Genitive*, *Dative*, *Ablative* Case, is nothing else but that *obliquity* in the sense of a *Substantive*, which is caused and signified by some *Preposition* annexed to it, as the *Vocative* is by an *Interjection*.

And

And besides these three ways of Inflexion, I have shewed before how Substantives are capable likewise of *Active* and *Passive* voice, and of *Tenses*.

Noun *Adjectives* need not have any note to express *Number*, *Gender*, *Case*, because in all these they agree with their Substantives; unless such Adjectives as are used Substantively; by reason of their composition with the Transcendental marks of *Person*, *Thing*, *Time*, *Place*, &c. In which case they have the same kinds of Inflexion with Substantives. But there is belonging to them,

1. A transverse Inflexion by *degrees of Comparison*, which may be best denoted by the extrinsical affixes of *more*, *most*; *less*, *least*.

2. An Inflexion by Voice *Active* and *Passive*, which makes them of the same nature with those words which we call Participles.

3. An Inflexion by *Tenses*. And though usually in the *Latin* there are but two Tenses, viz. *Present* and *Future*, in each voice of the Participle, *Amans*, *Legens*: *Amaturus*, *Lecturus*: *Amatus*, *Lectus*: *Amandus*, *Legendus*: excepting in some few words, *Sequens*; *Sequitus*, *Sequiturus*; *Gaudens*, *Gavisus*, *Gavisurus*: and of *Cœnatum*, which is used promiscuously both *Actively* and *Passively*; yet this is a defect in the *Latin* Tongue: For the natural notion doth render Participles as well capable of the *Preter Tense*; and accordingly the *Greeks* have *τύπων*, *τυπούς*, *τύπων*, & *τυπήσων*, *τυπούμενος*, *τυπόμενος*: He that beats, he that hath beaten, he that will beat; he that is beaten, he that hath been beaten, he that will be beaten. The like would have been in *Latin*, if the Philosophy of Speech had been as well observed in the Institution of that Language.

Derived Adverbs are capable of Inflexion by *degrees of Comparison*.

Amongst the Particles, there are only two that are capable of Inflexion; viz. the *Copula*, and *Pronouns*.

The *Copula* is inflected by *Mode* and by *Tense*; which I have sufficiently explained before: Only 'tis here to be noted, that besides those *definite* notions of time past, present, and to come, there is likewise *Tempus Aoristicum*, or *indefinite* time; and that whenever the *Copula* is used in *materia necessaria*, it ought to be understood as being indeterminate to any of those differences of time. So for such sayings, *Homo est animal*, *Deus vivit*, &c. there is no kind of time, whether past, present, or future, wherein these sayings are not equally true; so that the sense of such sayings is *est*, *fuit*, *erit*; *vivit*, *vixit*, *vivet*. And therefore it would be convenient to make some distinction for expressing this indefinite time.

Pronoun Substantives are inflected by *Number* and *Gender*, and by *Case*, as *Noun Substantives* are; besides that kind of improper Inflexion, whereby they are made *Possessives*; which is rather a kind of *Derivation*, and *reduplicative*, which consists only in the doubling of them for the greater *Emphasis*.

The other Particles are not capable of Inflexion, because they do not denote any *Essence* or *Act*, which is capable of several modes or respects, as *Integrals*, and two of the Particles do: but only the *Circumstances* or *Modifications* of other words; and therefore may be stiled *indeclinable* or *invariable*.

§ II. As to *Derivation*, there ought naturally to be but one kind of Root, from which the several differences of Integrals should be derived; and this should be a Noun *Substantive* which signifies the *Thing*, or the *Essence*. If it be a Noun *Substantive Neuter*; then the first branches of it are *Substantives Active* and *Passive*; after which succeed the *Adjectives* belonging to each of them, and then the *Adverbs*, which denote the *Quality* or *Manner* of being or doing. All which belong to one branch. Another branch is the *Substantives Abstract*, which have the same kind of derivations from them, as the former; as is more distinctly explained before.

Chap. I.
§ XI.

§ III. As to the last accidental difference of words, viz. *Composition*. 'Tis to be noted, that the words of a Philosophical Language should be so fitted unto natural notions, that there should be little need of other compositions, besides those by *Prepositions*, *Adverbs*, and *Transcendental Particles*. But if this were desired for greater elegance and copiousness of Speech, it should be capable of any composition whatsoever, which may be signified in writing by some *Hyphen* or mark of *Union*, to joyn the words compounded; and in Speech by pronouncing them together as one word, without changing the nature of either. So the word *Idolatry* is *Idol-worship*, &c.

CHAP. IX.

Of the second part of Grammar called Syntax.

AS the first part of Grammar doth treat concerning the nature and differences of particular words: So the second part of Grammar stiled *Syntax*, doth concern the proper way of *Union* or right *Construction* of words, into *Propositions*, or continued *Speech*. And this may be distinguished into two kinds. 1. That which is *Customary* and figurative: or 2. That which is *Natural* and regular.

1. That structure may be stiled *Customary* and figurative, which is used in the *Phraseologies* or forms of *Speech*, peculiar to several *Languages*, wherein words are put together according to a *Metaphorical* and *tralatitious* sense of them; as in those *Latin Phrases*, *Redigere in ordinem*, which signifies, *Privare magistratu*; *E medio tollere*, for *Occidere*. And so for those *English Phrases* of *Breaking a jest*, *Hedging in a Debt*, *Taking ones heels and flying away*, *Being brought to bed*, *Lying in*, *Being in Labour or Travail*, &c. All which ought to be rendered according to the natural sense and meaning intended by those *Phrases*; which is observed in the regular *Translation* of any *Language*. And he that would go about to render such forms of *Speech*, according to the strict and natural sense of the words, could not reasonably expect to be understood in any other *Language*.

But besides these kind of *Metaphors* which are peculiar to some *Tongues*, there are others of a more general use, which may be well enough retained in a *Philosophical Language*.

2. That

2. That structure may be called *Regular*, which is according to the natural sense and order of the words.

The General Rule for this order amongst *Integrals* is, That which governs should precede; The Nominative Case before the Verb, and the Accusative after; The Substantive before the Adjective: Only Adjective Pronouns being Particles and affixed, may without inconvenience be put indifferently either before or after. *Derived Adverbs* should follow that which is called the *Verb*, as denoting the quality or manner of the Act.

As for the *Grammatical Particles*, those which serve for the Inflection or Composition of words should naturally precede; and so likewise should other Adverbs, and Prepositions.

Transcendental Particles are to be joyned in composition at the ends of words, to vary their termination.

Besides the *order* required in Syntax, something ought to be subjoyned concerning the *Quantity* of Vowels or Syllables, together with the several distinctions or *interpunctions* to be observed betwixt words and sentences.

As for that part usually treated of in instituted Grammars, stiled *Prosodia*, concerning the quantity of Vowels, there needs not any thing to be said unto that here; because in a Philosophical Language every Vowel is supposed to be in the writing sufficiently distinguished in this respect; every long Vowel having a note or mark to signify its prolation.

The expressing of any one syllable in a word, with a little *higher tune*, and *longer time* than others, is to be express'd by an accent; as in the words, Consent, Contrive, Compose, Having, Wisdom, Fortune, Profit, Parentage, Privilege, Consider, Determine, &c.

The distinctions to be observed betwixt words and sentences, may refer either to 1. The *time*; or 2. The *manner of pronouncing*.

1. The first concerns those Pauses or *intervals of rest* to be observed in Pronouncing, which were anciently distinguished into three kinds; namely, *Comma*, *Colon*, *Period*. The first of these being marked with a point by the middle of the Letter; The second at the top; The last at the bottom. Unto these, later times have added two others; namely, a mark to signify something intermediate betwixt *Comma* and *Colon*, stiled *Semicolon*; and something more than a *full point*, which is usually express'd by a greater distance betwixt the words, or by a Breach in the line.

The use of these Points is to direct what kind of pause is to be observed, and how the tenor or tone of the voice is either to be continued or to fall.

2. The *manner of pronouncing* words doth sometimes give them a different sense and meaning, and Writing being the Picture or Image of Speech, ought to be adapted unto all the material circumstances of it, and consequently must have some marks to denote these various manners of Pronunciation; which may be sufficiently done by these seven kinds of marks or Interpunctions.

Z z 2

1. *Parenthesis*.

1. *Parenthesis*.
2. *Parathesis*, or Exposition.
3. *Erotesis*, or Interrogation.
4. *Ecphonesis*, Exclamation or wonder.
5. *Emphasis*.
6. *Irony*.
7. *Hyphen*.

1. *Parenthesis* serves for the distinction of such an additional part of a sentence as is not necessary to perfect the sense of it, and is usually expressed in our Western Languages by the inclosing of such words betwixt two curve lines ()

2. *Parathesis*, or Exposition, is used for distinction of such words as are added by way of explication of something preceding, and is usually expressed by inclosing such words between two angular lines; as []

3. *Erotesis*, or Interrogation, is a kind of Period for the distinction of such sentences as are proposed by way of Question, and is usually thus marked ?

4. *Ecphonesis*, or Wonder and Exclamation, is a note of direction for raising the tone, upon occasion of such words as denote some vehement passion, and is noted thus !

5. *Emphasis* is used for the distinction of such word or words, wherein the force of the sense doth more peculiarly consist, and is usually expressed by putting such words into another kind of Character, as suppose the Italic.

6. *Irony* is for the distinction of the meaning and intention of any words, when they are to be understood by way of Sarcasm or scoff, or in a contrary sense to that which they naturally signify: And though there be not (for ought I know) any note designed for this in any of the Instituted Languages, yet that is from their deficiency and imperfection: For if the chief force of Ironies do consist in Pronunciation, it will plainly follow, that there ought to be some mark for direction, when things are to be so pronounced.

7. *Hyphen* is a note that signifies the uniting of two syllables or words into one, and may properly be used when two words are to be compounded together: It is usually expressed by two little strokes, thus (·)

Of Orthography. I. Concerning the doctrine of Letters: the Authors who have treated of this Subject. II. A brief Table of such simple sounds as can be framed by men. III. A further explication of this Table, as to the Organs of Speech, and as to the letters framed by these Organs.

Orthography is that part of Grammar, which concerns the doctrine § I. of Letters, which being the most simple Elements of speech, it ought therefore to be so stated, that there may be a sufficient number of them to express all Articulate sounds, and not more than are necessary to this end. Much consideration is requisite to the right establishment of these; upon which account this subject hath been largely debated, by several Authors of great names and reputation for Learning: Besides those Famous Emperours, *Cajus Caesar*, and *Octavius Augustus*, who both writ upon this subject: *Varro* likewise, and *Appion*, and *Quintilian*, and *Priscian*, did bestow much pains upon the same enquiry, concerning the just number of Letters. And in later times, it hath been treated of with great variety of Opinions, by *Erasmus*, both the *Scaligers*, *Lipsius*, *Salmasius*, *Vossius*, *Jacobus Mathias*, *Adolphus Metkerchus*, *Bernardus Malincho*, &c. Beside several of our own Country-men, *Sir Thomas Smith*, *Bullock*, *Alexander Gill*, and *Doctor Wallis*; the last of whom, amongst all that I have seen published, seems to me, with greatest Accurateness and subtlety to have considered the Philosophy of Articulate sounds. But besides such (whose considerations upon this subject are made publick) I must not forget to acknowledge the favour and good hap I have had, to peruse from their private papers, the distinct Theories of some other Learned and Ingenious persons, who have with great judgment applied their thoughts to this enquiry; in each of whose Papers, there are several suggestions that are new, out of the common rode, and very considerable.

The Essence of Letters doth consist in their Power or proper sound, which may be naturally fixed and stated, from the manner of forming them by the instruments of speech; and either is, or should be the same in all Languages.

What variety there is of these, may appear from the Distribution of them into their several kinds, according to the following Table; wherein it is endeavoured and aimed at, to give a rational account of all the simple sounds that are, or can be framed by the mouths of men.

Letters

§ II.

For the better explication of this Table, there are these two § III. things to be considered : 1. The *Causes* of these Letters. 2. The *Letters* themselves.

The *Organs* by which they are formed, either more

These I conceive to be all the kinds of *Actions* and *Configurations* which the organs are capable of, in order to *Speech*.

What kind of *Letters* are framed by these, will appear in the next *Table*.

All simple letters may be distinguished into such as are; either

{ *Less concave* or plain, and brought nearer the palate (a)

{ Somewhat *convex* towards the palate (e)

Lesser; being either

Sonorous; of which it may be said, that they do somewhat approach to the nature of Consonants; and are *medie potestatis*; because when they are joyned with any Vowel to compose that which we call a Diphthong, they put on the nature of *Consonants*; and when they are not so joyned, but used singly, they retain the nature of *Vowels*, which is the reason why it hath been so much disputed amongst some Learned Men, whether they are to be reckoned amongst *Vowels* or *Consonants*.

These may be distinguished into

{ *Labial*; by an emission of the breath through the Lips, more *Contracted* (y)

These I conceive (so far as I can judge at present) to be all the simple sounds that can be framed by the Organs of Speech.

CHAP.

CH A P. XI.

Of Vowels.

Those Letters are called *Vocales*, Vowels, in pronouncing of which by the Instruments of Speech, the breath is freely emitted; and they are therefore stiled *Apert* or open Letters. These may be distinguished either, 1. *Formally*, by their several Apertions, and the manner of configuration in the instruments of Speech required to the framing of them, which constitutes the distinct species of Vowels; or 2. *Accidentally*, by the quantity of time required to their prolation, by which the same Vowel is made either *long* or *short*.

There are (I conceive) eight simple different species of Vowels, easily distinguishable, whose powers are commonly used. I cannot deny, but that some other intermediate sounds might be found; but they would, by reason of their proximity to those others, prove of so difficult distinction, as would render them useless; these eight seeming to be the principal and most remarkable periods, amongst the degrees of Apert sounds.

As for the third of the *Labials*, the *u Gallicum*, or *whistling u*, though it cannot be denied to be a distinct simple vowel; yet it is of so laborious and difficult pronunciation to all those Nations amongst whom it is not used (as to the English) especially in the distinction of long and short, and framing of Diphthongs, that though I have enumerated it with the rest, and shall make provision for the expression of it, yet shall I make less use of it, than of the others; and for that reason, not proceed to any further explication of it.

It will be difficult to express the several powers of these Vowels by writing; Pronuntiacion being such a thing, *quæ nec scribitur, nec pingitur, nec hauriri eam fas est, nisi vivâ voce.* And therefore the best way for the explaining of them, is by such known words as may be given for the instance of each of them. And as for the figure or writing of those four, which are not commonly esteemed to be distinct species of Vowels, I shall make choice to represent them by such Characters, as may seem least strange. What kind of power or sound that is, which is peculiar to each of these seven Vowels, may be easily understood by these following Instances:

Lipsim de rest. Pronuntiacione L. Lat. cap. 3.

| | | | | | | | |
|---|-------|---------|---------|---------|---------|-------|---------|
| a | Short | Bõt-tom | Fol-ly | Fot | Mot | Pol | Rod |
| a | Long | Bought | Fall | Fought | | Paule | Rawd |
| a | Short | Batt | Val-ley | Fatt | Mat | Pal | Rad-nor |
| a | Long | Bate | Vale | Fate | Mate | Pale | TRade |
| e | Short | Bett | Fell | Fet | Met | Pell | Red |
| e | Long | Beate | Veale | Feate | Meate | Peale | Reade |
| i | Short | Bitt | Fill | Fitt | Mit-ten | Pill | Rid |

| y | Short | But | Full | Futt | Mutt-on | Pull | Rudd-er |
| y | Long | | | A a a 2 | | | Amongst |

Amongst these, the Vowels not commonly owned by us in writing, are these four, α . i. ε . γ . But that they are distinct species of Vowels, and have peculiar powers of their own, not expressible by any other Letters, (supposing every Letter (as it ought) to be determined to one particular sound) may sufficiently appear from the above mentioned, and several other Instances. And that those two which are commonly used with us for distinct Vowels; namely, the third and the fifth, ε , and υ ; as in the words *Light*, *Lute*, are not simple Vowels, but *Diphthongs*, I shall shew afterwards.

Though the Vowel (o) do not admit of any instance in our Language, wherein it is used *short*, nor the Vowel (γ) wherein it is used *Long*; yet there are naturally such differences of these Vowels, as well as of the rest. Suppose a long Vowel to be divided into two parts; as *Bo-ote*, pronounce it then with half the time, and it must make the short Vowel *Bote*. And thus on the contrary, doubling the time of a short Vowel, as *By-yt*, will render it *Long*: which may serve to explain how these Vowels naturally are capable of being made both long and short; Though by reason of general disuse amongst us, such differences would at first seem somewhat difficult, and not easily distinguishable.

The Vowel (α) is placed first; partly partly in conformity with other Alphabets, and because 'tis the most Apert amongst the *Lingua-palatal* Vowels. 'Tis expressed by this Character, because being one of the *Greek* Letters, 'tis more commonly known. 'Tis framed by an emission of the Breath, betwixt the Tongue and the Palate; the tongue being put into a more concave posture, and removed further off from the palate.

The Vowel (a) is framed by an emission of the Breath, betwixt the tongue and the concave of the palate; the upper superficies of the tongue being rendered less concave, and at a less distance from the palate.

The Vowel (e) is framed by an emission of the Breath, betwixt the tongue and the concave of the palate, the upper superficies of the tongue being brought to some small degree of convexity.

The Vowel (i) is expressed by this Character, because 'tis the most simple figure; and therefore doth best suit with the most acute Letter; as likewise, because this Letter, amongst many other Nations is already used and pronounced according to the sound which is here intended. 'Tis framed by an emission of the Breath betwixt the tongue and the concave of the palate, the upper superficies of the tongue being put into a more convex posture, and thrust up near the palate.

The Vowel (o) is the first, and most apert of the *Labials*; being framed by an emission of the Breath, betwixt the Lips, a little drawn together and contracted.

The Vowel (ε) is the second of the *Labials*, requiring a greater contraction of the Lips. 'Tis expressed by this Character, which is used in Greek for ε Diphthong; because commonly that Diphthong, as also the French *ou* is pronounced in the sound of this simple Vowel.

The Vowel (γ) is wholly *Guttural*, being an emission of the breath from the throat, without any particular motion of the tongue or lips. 'Tis expressed by this Character which is already appropriated by the Welsh for the picture of this sound. The

The *difference* betwixt long and short Vowels, should alwaies be *written* as well as pronounced, that is, there should be some Note or Mark to exprefs when a Vowel is to be used *long*.

These eight Letters before enumerated, I conceive to be so many distinct species of Vowels, *formally different* in respect of their Powers; and though I cannot at present think of any other besides, yet having formerly, upon new considerations, and suggestions, so often changed my thoughts upon this enquiry, I dare not be dogmatical about it, or assert confidently, that there neither are, nor can be any more: For who knows how many other minute differences of Apertion may be now used, or hereafter found out, by others, which practise and custom may make as easie and distinguishable to them, as these are to us? Besides that the measure of *Apertion* (as is well observed) must be like continued quantity, *divisibilis in infinitum*. Only this (I think) may be safely affirmed, that the establishment of Vowels here mentioned, will serve much better to exprefs all articulate sounds, than can be done by any of the ordinary Alphabets now in use.

I cannot but animadvert here on the by, upon that Argument which *Capellus*, and others do much insist upon, against the Antiquity of the *Hebrew* Points, or Vowels; Because (say they) the making of so many, is an injudicious, and irrational invention, for which there is no real ground; there being in nature, and amongst other Languages, but five distinct Vowels, and not fourteen: And therefore they conclude the Invention of them to be new, and not of any great Antiquity.

*De Antiquitate
Punctorum, l. 1.*

To speak freely in this case (without interposing as to the main state of the Question) This Reason doth not seem to be of any force. Though the Conclusion they infer should be true, yet this Argument urged for it, is *false*, both as to the *Consequence*, and *Antecedent*. The *Imperfections* and Defects of any Invention, do rather argue the *Antiquity*, than the *Novelty* of it; there being much time and experience required to the perfecting any invention: And it would rather follow, that because they are *imperfect*, therefore are they more like to be *Ancient*. But besides, the Hebrew Vowels will upon consideration, be found to be a contrivance full of more than ordinary Accuracy, founded upon the Philosophy of Articulate sounds, and may without any force be applied to the number here established: Excepting the French (u).

| | | | | | | | |
|---|-----------------------------------|---|-----------------------------------|---|-----------------------------------|---|-----------------------------------|
| α | { Long \aleph Short \aleph | a | { Long \aleph Short \aleph | e | { Long \aleph Short \aleph | i | { Long \aleph Short \aleph |
| o | { Long \aleph Short \aleph | æ | { Long \aleph Short \aleph | γ | { Long \aleph Short \aleph | | |

And though there be no distinct Character for æ short, and γ long, perhaps that Language as well as the English seldom using such distinction in those sounds; yet is (γ) sometimes in that Language used in stead of a short Vowel, and (α) for a long Vowel.

The use of Scheva in the Hebrew, is to direct the joyning of such Consonants together, as would otherwise be of very difficult pronunciation, and not easily unite, as in the words *למור* and *מלוד*, which should

should be pronounced *lmodh* and *mloch*, but because *LM* and *ML*, will not of themselves coalesce, therefore is *Schevah* interposed, which being rapidly pronounced (and that probably as our short *y*) does not seem to make any distinct Syllable.

So that it seems much more colourable to infer the *Novelty* of the Hebrew Points, from the *Accurateness*, than from the injudiciousness of their contrivance.

CHAP. XII.

Of Consonants.

THose Letters are stiled *Consonants*, in the pronouncing of which the Breath is intercepted, by some Collision or Closure, amongst the Instruments of Speech: And for this reason are they stiled *Clause Literæ*, as the *Vowels* are *Apertæ*.

The common distinction of these into *Semi-vowels* and *Mutes*, will not upon a strict enquiry be adequate. And therefore I do rather chuse to distribute them into these three kinds;

1. πνευματώδη, Spiritous, or Breathed.
2. ημιπνευα, (if I may use that word) Semi-spiritous, or half Breathed.
3. ἀπνευματά, Non-spiritous, or Breathless.

1. By *Spiritous*, or Breathed, are meant such Consonants, as require to the framing of them a more strong emission of the Breath, either through the Nose.
the Mouth.

1. The Consonants which are to be breathed only through the Nose, may be again distinguished into 1. Sonorous, as M. N. Ng.
2. Mute, as hm. hn. hng.

Both these kinds, as likewise those that follow through the Mouth, have some imperfect sound of their own, without the joyning of any Vowel with them; though the sonorous only be *Vocal*; and the mute sort are only a kind of Whisper.

By *Sonorous*, are meant, such as require some voice or vocal sound, to the framing of them.

By the *Mutes* of these, are meant other Letters of the same configuration, pronounced with a strong emission of the Breath, without any *Vocal* sound.

(*m*) is *mugitus*, the natural sound of *Lowing*, when the Lips are shut, and the sound proceeds out of the Nose. 'Tis counted of difficult pronunciation in the end of words: For which reason, the Latin Poets cut it off in Verse, when it comes before a Vowel in the next words: And the Greeks do not terminate any word with it.

(*N*) is *Tinnitus*, when the breath is sent out, the Limbus of the Tongue being fixed towards the Gums, or bottom of the upper Foreteeth. In the pronouncing of this, the breath is emitted only out of the Nose, which makes it differ from (*L*). 'Tis counted a pleasant and
easie

ease Letter, which may perhaps be the reason why this Letter N, and L, and R, are for the most part, both in Greek and Latin immutable, both in Declensions and Conjugations.

(Ng) is framed by an appulse of the Root of the Tongue towards the inner part of the Palat. The sound of it may be continued simple, as well as any other; which makes it evident to be a single letter, and not a compound of n, and g, as we usually write it: Thus the word *Anguis*, in the true spelling of it, should be writ A, ng, G, s, i, s. The Hebrew y is supposed by divers Authors, but I think groundlessly, to be of this power. I know several things may be said, to render it probable, that the power here intended, may be sufficiently expressed, by a more soft and slight manner of pronouncing the letters N & G compounded together: But I rather incline to reckon it a simple and distinct Letter.

To the Sonorous letters of this kind, there are three *Mutes* of affinity, *hw*, *hn*, *hng*; which are formed when the breath is emitted through the Instruments of Speech, in the same position respectively as in the former, but without any Vocal Sound. The two first of these are in use amongst the *Wells* and *Iris*: And the last of them, in the opinion of *Bellarmino*, and some other Grammarians, is rather the true sound of the Hebrew y.

2. The Spiritous Consonants to be breathed through the *Mouth*, are likewise of 3 Sonorous, V. Dh. L. R. Z. Zh.

two kinds, } Mute, F. Th. hL. hR. S. Sh.

(V) is the same with that which we call V Consonant: 'Tis of the same power which is commonly ascribed to B *asperated*, or rather *incrassated*. So the Western Jews pronounce their Letter (ב) when not *Dageshated*. And 'tis observed that in Ancient Monuments amongst the Latins, these two Letters have been often put for one another: And that in some words, where the sense hath been very much varied by this change; so *Acerbus* for *Aceruus*: *Veneficium* for *Beneficium*. The power of this Letter was first expressed among the Latins by the *Digamma Æolicum*, (Ϝ) (so stiled for its *Figure*, not its *Sound*) which

*Scaliger de
Causis L. L.
cap. 28.*

is now the Character for the Letter (F) but had at first the power of the Consonant (V) and was written in *Clandius* his time invertedly, as ΔΙΔΑΙ, ΑΜΠΛΙΑΙΤ. This Letter is framed by a kind of straining or percolation of the Breath, through a Chink between the lower lip and upper teeth, with some kind of *Murmure*.

*Vossius Gram.
lib. I. cap. 15.*

(F) is the correspondent *Mute* to this: 'Tis framed by the same kind of position of the Lip and Teeth, and percolation of the Breath betwixt them, with this only difference, that as the former was with some kind of Vocal Sound, so this is wholly mute. This seems to be such an *incrassation* of the Letter (P) as (V) is of (B). 'Tis answerable to the Greek (φ). And though several of the Greek words with (φ) are rendred in Latin by Ph, as *Philosophia*, *Sophista*, &c. yet the *Italians* write *Filosofo*, *Sofista*, &c. and some other words are so rendred in *Latin*, as φῶν, *fuga*, φῶν, *fama*. What that dilutenesis, which *Vossius* saith is more proper to F, than to φ, I understand not; nor is it ease to guess at the meaning of that in *Cicero*, concerning *Fundanius*, and *Pfundanius*, unless perhaps it be, as *Lipsius* guesses, of pronouncing it as *Pfundanius*, or else as *P-hundanius*.

(Db)

(*Dh*) and its correspondent Mute (*Th*) are of that power which we commonly ascribe to the Letters D, & T, aspirated or in-crasated. And though these two Powers are commonly used by us without any provision for them by distinct Characters, yet our Ancestors the *Saxons* had several Letters to express them. They represented (*Dh*) by this mark (ð) as in Faðer, Moðer, ðe, ðat, ðen: And (*Th*) by this mark (þ) as þeif, þick, faip. And 'tis most evident that the sounds of them (though we usually confound them, under the same manner of writing) are in themselves very distinguishable, as in these Examples.

| Dh. | Th. |
|----------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Thee, this, there, thence, that, those, though, thou, thy, thine. | } Think, thine, thigh, thing, thistle, thesis, thanks, thought, throng, thrive, thrust. Doth, death, wrath, length, strength, Loveth, Teacheth, &c. |
| Father, Mother, Brother, Lea- ther, Weather, Feather. | |
| Smooth, Seeth, Wreath, Be- queath. | |

These Letters are framed by a percolation of the Breath through a kind of Chink betwixt the tongue and upper teeth, the first with some kind of vocal sound, the other wholly mute.

(*Gh*) and its Correspondent (*Ch*) are both of them framed by a vibration of the root or middle of the tongue against the Palate, the former being *vocal*, and the other *mute*. They are each of them of difficult pronuntiation: The first is now used by the *Irish*, and was perhaps heretofore intended by the spelling of those English words, *Right*, *Light*, *Daughter*, *Enough*, *Thorough*, &c. Though this kind of sound be now by disuse lost amongst us, the latter of them (*Ch*) is now used amongst the *Welsh*, and was perhaps heretofore intended by the Greek Letter (χ.) Neither of them is easily imitable by any mouth not trained up to the practise of them.

(*L*) is *Clangor*. 'Tis formed by an appulse of the Tip of the tongue to the Palate, and then forcing out the Breath. 'Tis esteemed *facillima & liquidissima. Literarum*; in the pronouncing of which, most Nations do agree.

(*Lh*) or (*hL*) the correspondent Mute to this, is much used by the *Welch*: They seem to form it as the other (*L*) only by abstaining the voice, and a more forcible emission of the Breath, as is used in all other mute letters of the Spiritous kind.

(*R*) is *Stridor vel susurrus*: 'Tis called from the snarling of Dogs, *Litera Canina*: 'Tis made by a quick trepidation of the tip of the tongue being vibrated against the palate; for which, they who are disabled, by reason of the natural infirmity of their tongues, which is called *ῥεωλισμός*, *Balbuties*, do commonly pronounce in stead of it, the letter (*L*) which is of a more soft and easie sound. *Demosthenes*, *Alcibiades*, *Aristotle*, *Scaliger*, the Fathers, are said to have laboured under this Infirmitie.

(*Rh*) or (*hR*) the correspondent mute to this, is made by a forcible emission of the breath, through the instruments of Speech in the same position as for the Letter (*R*) but without any vocal sound. 'Tis the same with the Greek (ρ) and much in use amongst the *Welsh*.

(Z)

(Z) is by some stiled (*s*) *molle*. 'Tis properly the *Greek* (Ζ) and the *Hebrew* (ז). 'Tis framed by an appulse of the tongue towards the upper Teeth or Gums, and then forcing out the breath from betwixt the tongue and the upper teeth, with a vocal sound, which makes a more dense kind of *hissing*, mixed with some kind of *murmur*, *apumq; susurro persimilem*: 'Tis of the same affinity with S, as B with P, D with T, and G with C. That double Letter in the *Hebrew* (ז) which is by some accounted equivalent to this, is of a quite different power, as were easie to illustrate by several examples.

(S) the correspondent *mute* (though it be commonly reckoned for a semivowel) is framed as the former, but without any vocal sound. 'Tis stiled *Sibilus*. The power of it is the natural sound of *Hissing*; for which reason 'tis called *Litera Serpentina*. The *Hebrews* have two Characters for this Letter, besides two others for its Allies. Among the *Persians* all words that signifie *Grandeur* and *Magnificence*, are said to be terminated with it: Though others condemn it for a harsh, unpleasing, quarelling Letter. *Messala Corvinus*, a great man, and a famous Orator among the *Romans*, is said to have writ a particular Treatise against this Letter, much esteemed of amongst learned men. And *Pindar* likewise writ an *Ode* against it, *versus asirymus*, wherein there was no word that had any S in it. The disability of pronouncing this Letter, is called *Blestas*, *Lisping*, when 'tis corruptly sounded like (*sb*).

(Zb) the sonorous Consonant, and (*sb*) its correspondent mute, are framed by a percolation of the breath, betwixt the tongue rendered concave, and the teeth both upper and lower: The first being *vocal*, the other *mute*. Though they are not provided for commonly by distinct and simple Characters, yet are they distinct and simple letters; both of them facill and common: The first amongst the *French*, who express it by *I*, as in the word *Iean*, &c. and is easly imitable by us: And though the other did once cost 42000 men Judges 12. 6. their lives, for not being able to pronounce it, yet is it of common use with many Nations.

2. By *Semispiritous* or half breathed Consonants, are meant such as are accompanied with some kind of vocal murmure, as B, D, G, whereas

3. Those are stiled *non-spiritous* or breathless, which are wholly mute; as, P, T, C.

(B and P) are framed when the breath is intercepted by the closure of the Lips; the first of them being more soft, with some kind of murmure, the other more hard and wholly mute.

(D and T) are commonly framed, by an appulse or collision of the top of the tongue against the teeth, or upper gums; the first being more soft and gentle, with some kind of murmure, the other wholly mute.

(G and C) are framed more *inwardly*, by an interception of the breath towards the throat, by the middle or root of the tongue, with such a kind of difference between them, as there is betwixt the two former pairs.

CHAP. XIII.

Of Compound Letters, whether Vowels, Consonants,

Besides these simple Letters before enumerated, there are others commonly used, which may be styled Compound, both Vowels.

The Compound Vowels are called commonly *Diphthongs*, or *Tripthongs*, or *Bisſona* in Latin ; but because the ſignification of thoſe words may as well agree with double Conſonants, therefore others would have them ſtiled *Bivocales*, or *Trivocales*. *Jacobus Matthias* in his Treatiſe *de Literis*, and our learned *Gataker*, in a particular Diſcourſe to this purpoſe, do earneſtly contend that there are no ſuch things as Diphthongs. Their principal Arguments depend upon this Suppoſition, That (i and ſ) (which are neceſſary Ingredients to the framing of all uſual Diphthongs) are Conſonants, the ſame with y and w. Others would have them to be of a middle nature, betwixt Vowels and Conſonants ; according to which Opinion I have already deſcribed them : From whence the Reaſon is clear, why theſe Vowels concur to the making of Diphthongs, becauſe being the moſt *contract* of Vowels (as is alſo the Vowel (y) of which more hereafter) They do therefore approach very near to the nature of *Litera clauiſa*, or Conſonants ; there being no Transition amongſt theſe, either from one another, or to the other intermediate ſounds, without ſuch a kind of motion amongſt the Inſtruments of ſpeech, by reaſon of theſe different *Apertions*, as doth ſomewhat reſemble that kind of Collision required to the framing of Conſonants.

Several Languages uſe ſeveral kinds of theſe Diphthongs, but how many there are in nature, may be eaſily collected by the former diſ-
viſion of Vowels (ſuppoſing that to be according to nature) One of theſe two Vowels i or ſ muſt be an ingredient into all uſual Diphthongs, either as

Prepoſed.
Subjoyned.

1. Theſe Vowels i and ſ may be *prepoſed* in this mixture before each of the other ; in which caſe they will have the ſame power that we commonly aſcribe to y and w, and will frame theſe twelve Diphthongs.

2. They

compression of the breath in framing of them. Though not only the *European* Nations do at this present express them by this mixture of (H,) but it was likewise the opinion of the *Antients*, as may appear; because before those Letters θ, φ, χ, were invented by *Palamedes*, the *Grecians* were wont to express the power of them, by adding the aspiration H, to τ, π, κ. Yet 'tis very plain, that each of these Consonants esteemed to be aspirated, are *simple* Letters; because in the prolation of them, the same sound doth still continue, and therefore they ought not to be reckoned amongst the mixed Letters.

Vossius de Gram. cap. 16.

2. *Double Consonants* are such as are compounded of some of the other Letters, and for the *Compendium* of writing, are in several Languages expressed by *single Characters*, and reckoned in the *Alphabet* as if they were distinct species of *simple Letters*. Such are in the Latin Alphabet Q, X, and the double Letter Z, whose power is the same as DS. or TS. To which *Claudius Caesar* would have added an *Antisigma* in this form (Ϡ) which should have had the power of the Greek ψ, or PS.

Scaliger de de Causis L. L. cap. 21.

Vossius Gram. cap. 27.

Diatrise de varia literarum pronuntiatione.

As for the Letter Q, 'Tis commonly granted to be a Compound of C and U; for which reason, in many ancient Books, the Letter V was not written after Q, as being involved in it; so *qis, qa, qid*. But what kind of V this should be, is much debated. Some would have it to be the *Consonant*, against which *Joseph Scaliger* argues, that then it would not be pronounceable, being of near affinity to F, *qis*, for *quis*. But upon consideration, it will be found to be the Letter *u* coalescing into a Diphthong with the subsequent Vowel, *quam*, being the same with *quam*.

Alex. Gyll, Gram. cap. 1.

D' Wallis Gram.

What the true Original is of (J) Consonant, and that power which we give to (Ch) in the words *Charity, Cheese, Chosen, Chink, &c.* is a question men have much differed about. 'Tis evident that neither of them are single Letters, because in the prolation of them, we do not end with the same sound with which we begin. As for that Conjecture, that I Consonant may be expressed by *dzy, dzyndzyer, Ginger, dzyudzy, Judge* or else that this sound is compounded of the Consonants *dy*, as *dyoy* for *joy*; *dyentle, gentle, lodying* for *lodging*. And so for the power that we ascribe to Ch, that it may be sufficiently expressed by Ty, as *ortyard*, for *Orchard*, *rityes*, for *riches*: These I think need not any particular refutation. It seems to be plain, that J Consonant is a Compound of D, and Zh; and Ch of T, and Sh.

As for the other three Consonants, that are reckoned in the common Alphabet, K, W, Y, enough hath been said to prove them unnecessary. If C be used alwaies in its proper power (as every Letter ought) then K must needs be superfluous; and therefore the *Wells* who use C only for one kind of sound, have no K. And as for the Letters W, Y, their power is the same with that of the Vowels *u*, and *i*, as will evidently appear when they are rapidly pronounced before any other Vowel by way of *Diphthong*, so as to make but one Syllable; *wec* *sarr warr*, *swim swim*, *yes yes*, *yoke yoke*, *youth youth*. The words *young* and *younger* being originally of the Dutch, are by them written *junk junker*.

And as for the Aspirations, *whee, where, when, &c.* our Forefathers the *Saxons*, did antiently prefix the Aspirations before the vowels;

els; as hul, her, hen, which will in pronunciation be of the very same sound and power, wherein these words are now used, and therefore is more natural and proper than the common way of writing.

According to this establishment, the simple Letters will be thirty four, whereof eight are Vowels, and twenty six Consonants, besides twenty four Diphthongs.

The Greek Letters are said to have been at first only 16; namely, *Vossius de A, B, Γ, Δ, E, I, K, Λ, M, N, O, Π, P, Σ, T, Y.* To which *Palamedes Gram. cap. 18.* is said to have added the three Aspirates Θ, ϑ, X. *Epicharmus the Sicilian* the double Letters ζ, ξ, ψ. and *Simonides* the two long Vowels η and ω. Notwithstanding which, that Alphabet is still in several respects defective.

What *Theodorus Bibliander* suggests in his Tract *de ratione communium Linguarum*, that all sounds both articulate, and inarticulate, may sufficiently be expressed by 13 Letters, and an Aspiration, *viz.* the five ordinary Vowels, & B, G, D, L, M, N, R, S, is so very irrational, that I cannot think it needs any particular confutation.

As for those other new Alphabets that are proposed by *Sir Thomas Smith, Bullokar, Alex. Gill*, they do none of them give a just enumeration of the simple Elements of speech, but what by the mixture of long and short Vowels, which do not differ specifically, together with the insertion of double Letters, they do too much increase the number of them. Besides that some other Letters are left out and omitted.

According to this establishment of Letters, if the *Lords Prayer* or *Creed* were to be written according to our present pronunciation of it, they should be each of them thus Lettered.

The Lords Prayer.

Yr fadher heith art in heven, halloed bi dhyi nam, dhyi cingdym cym, dhyi uill bi dyn, in erth az it iz in heven, giv ys dhis dai yr daili bred, and fargiv ys yr trespassez az ui fargiv dhem dhat trespas against ys, and led ys not inte temptation, byt. deliver ys fram ivil, far dhyn iz dhe cingdim, dhe pyer and dhe glari, far ever and ever, Amen.

The Creed.

Thus much may suffice, concerning the *Forms, Essences, or Powers* of the several Letters.

§ I.
Names

1. Of their Names. Letters being of themselves the most simple Elements of Speech, ought therefore to be expressed by the most simple names, and such as do signifie their several Powers: In which respect, the Roman Alphabet used in these Western parts of the world, hath an advantage above other learned Languages, wherein the Vowels are no otherwise named than by their own sounds, as A, not *Aleph* or *Alpha*; much less have they distinct names for long and short Vowels, as *Kamets*, *Kametscatuph*, &c. And those which they reckon as the two kinds of Consonants, *Semi-vowels* and *Mutes*, are likewise distinguished in their very Names. The Vowels being preposed in those which they call *Semi-vowels*, el, em, en, ar, and subjoyned in the Mutes, be, ce, de, ge, pe, te.

As for the other Letters before mentioned, which have a Right to be put in the Alphabet; they may be thus named: The sonorous ones, Eng, EV, Edh, Egh, EZ, EZh. The Mute ones, Hme, Hne, Hnge, Fe, The, Che, HLE, HRE, SE, She.

§ II.
Order.

2. The most proper and natural Order of the Letters, I conceive to be the same in which they have been before treated of. Vowels should be reckoned up by themselves, as being a distinct kind, and first, both for their priority in Nature, Necessity, and Dignity. If the order of these were to be regulated from the Instruments of speech, then u, o, s, should be first, as being *Labial*, and a, a, e, i, next, as *Lingual*, or *Linguo-palatal*, and y last, as being *Guttural*. Scaliger would have A and O to be acknowledged for the first Vowels, as being *Soni amplissimi*. The next E, I, as being of a middle sound, and the last U, as being *Soni obscurissimi*. That which to me seems the most proper Method, is to reckon them up according to their degrees of Apertion: Only in conformity with the common Alphabets, I begin with the Linguals, a, a, e, i, o, s, u, y.

De causis Ling.
Lat. cap. 38.

Amongst the Consonants, the *Sonorous* should precede, as approaching nearest to the nature of Vowels. And amongst them, if those that are breathed through the Nose do precede, M must be the first, as being *Labial*; N next, as being *Dental*; and then NG, as being *Linguo-palatal*. Next, those that are breathed through the Mouth, according to this order, V, Dh, Gh, L, R, Z, Zh. The first being *Labial*, the next *Dental*, the others *Linguo-dental*, or *Linguo-palatal*. Next should

should follow the Spiritous Consonants that are *Mutes*; and first those pronounced through the *Nose*, HM, HN, HNG, then those pronounced through the *Mouth*, F, TH, CH, hl, hr, S, Sh. Then the semi-spiritous Consonants, B, D, G. And lastly, the non-spiritous, or breathless Consonants, P, T, C.

3. The Affinity of Vowels each to other is not difficult to determine, § 3.
Affinity. and a of a middle sound, e and i of a more acute, o and u of a more grave tone. If they were to be opposed to one another, this distribution would be most natural, (ai) (ao) (ex) (vu) and so *vice versa*, (ia) (oa) (xe) (uv.)

The Affinity amongst the Consonants most obvious is this, (M, HM) (N, HN,) (NG, HNG,) (V, F,) (Dh, Th,) (Gh, Ch,) (L, HL,) (R, HR,) (Z, S,) (Zh, Sh,) (BP) (DT) (GC.)

4. Though all Nations do or should agree in the same power and sound of the Letters, yet they differ very much in those *Figures* and *Figure*: § 4. Characters, whereby they represent them in writing according to those divers Alphabets that are received in the world: Amongst which, though some are much more convenient than others, yet none of them seem contrived upon a Philosophical ground. In the framing of such a Literal Character, these Conditions ought to be observed:

1. They should be the most simple and facil, and yet elegant and comely as to the shape of them.

2. They must be sufficiently distinguished from one another.

3. There should be some kind of suitability, or correspondency of the figure to the nature and kind of the Letters which they express.

It is not either necessary or convenient in the framing of a Language; to make use of all the Letters belonging to the Alphabet; but 'tis sufficient that such only be made choice of, as are most easie and pleasant in the pronunciation and sound of them. But though it be not needful to introduce all the Letters into the common use of a Language, yet it is most necessary that some way should be provided for representing the powers of all the simple Letters, because without this, there can be no way to express the *proper names* used in several Languages; whether of Places, or Persons, &c. as *England, London, Oxford, John, Mary*, &c. There being frequent occasion in discourse to mention the names of such *Individuals*: And these being nothing else but such words or sounds as men have agreed upon to signify such particular places or persons, must therefore be expressed by such Letters as make up these sounds. And though this real Character here treated of (as it is made effable) may serve for most of them, yet because there are several others not this way provided for, therefore may it be proper to offer some distinct Alphabet of Letters. Of which, I had provided several Instances and Examples agreeable to the Rules above mentioned. But I shall at present (because I would not too much digress) set down only two; which to me seem considerable in their several kinds. The former being more facil and *simple*, the other more *complicate*; but with this advantage, that it hath in the shape of it some resemblance to that Configuration which there is in the Organs of speech upon the framing of several Letters. Upon which account it may deserve the name of a *Natural Character* of the Letters.

The Letters according to the first design, are represented in the following Table, consisting of 31 Ranks and 15 Columns.

The first Rank doth contain the Characters for the six more *simple* Vowels, both preposed and subjoyned according to a threefold place, at the top, the middle, and the bottom of the Character, the former three being meer *Rounds*, the other *Hooks*. Those of a *middle power*, because they are necessary Ingredients to the making of all the usual Diphthongs, therefore have they a larger Character assigned to them, to which any of the other Vowels may be affixed, when they are to coalesce into Diphthongs. And though the Letter *Y* be properly (as it is reckoned) one of those that are *mediæ potestatis*, and may be compounded into a Diphthong with any of the other Vowels, yet because it is not now (for ought I know) made use of to this purpose, in any of those Languages that are commonly known and used amongst us; therefore is it at present reckoned only amongst the Vowels.

The second Columne (besides the marks for those three Letters *H, æ, i,*) doth contain likewise the Characters for all the Consonants, according to their several affinities; where the *Non spiritous* Consonants are expressed by *straight lines*, the *Spiritous* Consonants of affinity to them being distinguished by a little hook affixed at one end. The other Consonants by *curve lines*, with the like distinction for their correspondent Mutes. The rest of the Ranks and Columnes consisting of mixed Letters, either the mixtures of the Vowels with *H, æ, or I,* or else the incorporating the Character for each of the six Vowels with that of the Consonant, the Vowel being preposed in the 3, 4, 5, 6, 7, 8. Columnes, and subjoyned in the other.

As for the Characters that serve for Interpunction, the *Comma* may be expressed by a small, streight, oblique line (,) The *Semicolon*, *Colon* and *Period*, may continue as they are now used by most of the *Europeans*; there being nothing in their figure, of any such near resemblance to the other Characters, as may make them liable to mistake. And so likewise may those other Notes, which serve to distinguish the various manners of Pronuntiation, whether Explication [] Interrogation ? Wonder ! Irony ; only the two curve Lines for Parenthesis () being here used for the Letters *L,* and *R,* may be supplied by these []

At the bottom of this Table there is an Instance of the Lords Prayer, being lettered sutably to our present pronuntiation of it.

The Letters according to the second design may be thus contrived ;

Unto each of the Letters represented by a Face, there is adjoynd a lesser Figure, consisting only of the chief out-lines representing the Organs of speech.

The *Labials* are represented by two curve Figures for the Lips. The *Linguals* by the Figure of the Tongue, according to its various application; either of the *Top* or *Root*, to the several parts of the *Palate*, or of the *Teeth*.

The *Sonorous* Consonants, of each kind, are distinguished from the *Mutes*, by the addition of (~) to represent the motion of the Epiglottis, by which sound is made.

The *Breathing* or *Spiritous* Consonants are represented by a longer undulated Line, passing through the *Mouth* in some of them, either betwixt the *Lips*, in F, V. or between the *Tongue* and *Palate*, in Dh, Th, Gh, Ch, R, HR. In the two last of which, the top of the Tongue is divided, to represent that Trepidation or Vibration, in the framing of these Letters. Or by the sides of the Tongue in L, HL. Or betwixt the *Top of the Tongue* and the *Teeth*, in Z, S, Zh, Sh. In the two last of which, the undulated Line is doubled, to represent that more dense Percolation of breath, used in the framing of those Letters.

Those that are breathed through the *Nose*, have this undulated line above the *Palate*, as in M, HM, N, HN, NG, HNG.

I propose these only as being natural Pictures of the Letters, without any Design of common use, for which they are less fit, by reason of their being so complicated.

§ 5.
Pronunciation.

5. Though each of the Letters have their distinct powers naturally fixed, yet that difference which there is in the various manner of *Pronunciation*, doth somewhat alter the Sound of them. And there are no two Nations in the world that do exactly agree in the same way of pronouncing any one Language (suppose the *Latin*) Amongst persons of the same Nation, some pronounce more *fully* and *strongly*, others more *slightly*, some more *flatly*, others more *broadly*, others more *mincingly*. And in the hearing of foreign Languages, we are apt to think, that none of the Letters we are acquainted with, can frame such strange sounds as they seem to make: But this doth principally proceed from the several modes of *Pronunciation*; the variety of which may well enough consist with the distinct power of the Letters. 'Tis obvious to any one to observe, what great difference there will be in the same words, when spoken *slowly* and *treatably*, and when tumbled out in a *rapid precipitate* manner. And this is one kind of difference in the pronunciation of several Nations; The *Spaniards* and *Itali-*

Italians pronouncing more *slowly* and *Majestically*, the *French* more *volubly* and *basily*, the *English* in a middle way betwixt both. Another different mode of Pronunciation betwixt several Nations, may be in regard of *strength* and *distinctness* of pronouncing, which will specially appear in those kind of Letters which do most abound in a Language. Some pronounce more deeply *Guttural*, as the *Welsh*, and the Eastern people, the *Hebrews*, and *Arabians*, &c. Others seem to thrust their words more *forwards*, towards the *outward* parts of the mouth, as the *English*; others more *inward* towards the palate, as the *French*; some speak with stronger collisions, and more vehement aspirations, as the *Northern* people generally, by reason of their abundance of spirits and inward heat; others more *lightly* and *softly*, as the *Southern* Nations, their internal spirits being more weak, by reason of the outward heat.

*Prolegomena in
Biblia Polyglot.*

One principal Reason of the various sounds in the pronunciation of several Languages doth depend upon the nature of those Letters, of which they do chiefly consist and are framed. Upon which account, the *Greek*, which abounds in Vowels and Diphthongs, is more smooth. And though the *Latin* have fewer Vowels, yet it is so equally mixed with them, as to be rendred facil and pleasant; whereas the *Hebrew* doth abound in some harsh Consonants, *Aspirations* and *Gutturals*.

I cannot here omit the Censure which an ingenious person gives concerning the difference of many of our *European* Languages, in respect of their pronunciation. The *Italian* (saith he) is in pronunciation, pleasant, but without Sinews, as a still flowing water; the *French* delicate, but inward and nice, like a woman that dares scarce open her mouth, for fear of marring her Countenance. The *Spanish*, Majestical, but withal somewhat terrible and fulsom, by the too much affectation of the Letter O. The *Dutch* manly, but withal harsh and quarrellom. Whereas our *English* (saith he) hath what is comely and Euphonical in each of these, without any of their Inconveniences. 'Tis usual for men to be most favourable towards the Language unto which they have been most accustomed. 'Tis likely that Forreigners may be as apt to complain of several Defects in our Language as we are of theirs.

*R. C. of Antho-
ny in Cambd.
Remains.*

That which doth generally seem most difficult to Strangers in our English Tongue, is the pronouncing of certain Aspirations (as they are stiled) very frequently and familiarly used amongst us, but hardly imitable by others, though these are but few; these five words (as it is said) comprehending all of them. *What think the chosen Judges?* Which a little practise might overcome.

It were desirable in a new invented Language, to make use chiefly of such Letters and Syllables, as are of general practise, and universally facil in Pronunciation: But the custom of several Nations is so exceeding various in this respect, that 'tis very difficult to find out what these are; most of the Letters being disused, and not acknowledged for Letters, in several Countries.

- (o) is not in the Armenian Alphabet, nor do the *Syrians* own it, but use (u) or (aw) instead of it. Some of the Ancient Cities in *Italy*, those of the *Umbri* and *Tusci* did not use this Vowel, but *u* instead of it, (saith *Priscian*.)
- (æ) according to the true power of it, is not owned by us, nor by many other Nations with a distinct Character.
- (y) is scarce acknowledged by any Nation except the *Welsh*.
- (u) is (I think) proper to the *French*, and used by none else.
- (M and N) are so general, that I have not yet met with an Account of any Nation by whom they are not used.
- (NG) is not owned for a Letter by any, except perhaps the *Hebrews*.
- (V) is not pronounced by the *Mexicans*, *Arabians*, *Persians*, *Saxons*.
- (Dh) seems difficult to most Nations, though frequently used by us *Englishmen*.
- (Gh) is not any where, except amongst the *Irish*.
- (L) is not used by the * *Brasileans*, nor the men of † *Japan*. Many of the *Italians*, especially the *Florentines*, do seem to dislike this Letter, though others stile it the sweetest of all the rest, saith || *Sir Thomas Smith*.

- (Z) is not owned for a Letter by the Inhabitants of *CochinChina*.
- (Zh) is not owned for a distinct Letter, either by us *English*, or almost any other,
- (HM, HN, HNG) are not, for ought I know) owned by any, excepting only the *Welsh* and *Irish*, and the last perhaps by the *Jews*.
- (F) is not pronounced by the *Brasileans*.
- (Th) seems difficult to many Nations, and is owned by very few, to be a distinct Letter.
- (Ch) is not used by any (for ought I can find) except the *Grecians* and the *Welsh*.
- (HL) is almost proper to the *Welsh*, and scarce used by others.
- (HR) though frequent amongst the *Grecians*, yet is rarely used by others.
- (S) is not used by the *Mexicans*.
- (Sh) That this was not universal among the *Jews*, may appear by the Scripture Story of *Shiboleth*, nor is it either in the *Greek* or *Latin*.
- (B) is not pronounced by the men of *China* or *Japan*.
- (D) is not used amongst the Inhabitants of *China*.
- (G) is not pronounced by the *Mexicans*.
- (P) is not acknowledged in the *Arabick*, nor was this used amongst the *Jews* before the Invention of Points.
- (T) is not used by the Inhabitants of *Japan*.

(C)

(C) as restrained to the power of K, is for ought I know, of general use.

'Tis not improbable but that there may be a difficulty and difuse of every one of these Letters in several Nations of the world; upon which account it is excusable, if in the framing of a Language, it be proposed to make use of all the Letters, without any particular choice of some, and seclusion of others. Or if any be excluded, they ought in reason to be such, as seem most difficult to those, amongst whom this Language hath its first Rise and Original. And such others should be most frequently used, as are generally esteemed most easie and pleasant.

These 34 Letters before enumerated, will suffice to express all those articulate sounds, which are commonly known and used in these parts of the World. I dare not be over-peremptory in asserting that these are all the *Articulate Sounds*, which either are, or can be in Nature; it being perhaps as impossible to reckon up all such, as to determine the just number of *Colours* or *Tastes*: But I think that these are all the principal Heads of them, and that as much may be done by these (if not more) as by any other Alphabet now known.

PART

PART IV.

Concerning a Real Character, and a Philosophical Language.

CHAP. I.

The Proposal of one kind of Real Character (amongst many others which might be offered) both for the Integrals, whether Genus's, Differences or Species, together with the Derivations and Inflexions belonging to them, as likewise for all the several kinds of Particles.

THe next Enquiry should be, what kind of *Character* of Language may be fixed upon, as most convenient for the expression of all those Particulars above mentioned, belonging to the Philosophy of *Speech*; in order to which it may seem, that the first Enquiry should be concerning *Language*; Because *Writing* is but the figure of *Articulate sound*, and therefore subsequent to it: But though it be true, that men did first *speak* before they did *write*, and consequently *writing* is but the figure of *speech*, and therefore in order of *time* subsequent to it; yet in order of *Nature* there is no priority between these: But *voice* and *sounds* may be as well assigned to Figure, as *Figures* may be to *Sounds*. And I do the rather begin with treating concerning a common *Character* or *Letter*, because this will conduce more to that great end of *Facility*, whereby (as I first proposed) men are to be invited to the Learning of it. To proceed from the *Language* to the *Character*, would require the learning of both; which being of greater difficulty, than to learn one alone, is not therefore so suitable to that intention of engaging men by the *Facility* of it. And because men that do retain their several Tongues, may yet communicate by a *Real Character*, which shall be legible in all Languages; therefore I conceive it most proper to treat of this in the first place, and shall afterwards shew how this Character may be made *effable*, in a distinct Language.

All Characters signify either *Naturally*, or by *Institution*. *Natural Characters* are either the Pictures of things, or some other *Symbolical*

Representations of them, the framing and applying of which, though it were in some degree feasible, as to the general *kinds* of things; yet in most of the *particular species*, it would be very *difficult*, and in some perhaps *impossible*. It were exceeding desirable that the *Names* of things might consist of such *Sounds*, as should bear in them some Analogy to their *Natures*; and the Figure or Character of these Names should bear some proper resemblance to those *sounds*, that men might easily guess at the sense or meaning of any name or word, upon the first *hearing* or *sight* of it. But how this can be done in all the particular species of things, I understand not; and therefore shall take it for granted, that this Character must be by *Institution*. In the framing of which, there are these four properties to be endeavoured after.

1. They should be most simple and easie for the Figure, to be described by one *Dractms* of the pen, or at the most by two.
2. They must be sufficiently distinguishable from one another to prevent mistake.
3. They ought to be comely and graceful for the shape of them to the eye.
4. They should be *Methodical*, Those of the same common nature, having some kind of suitableness and correspondence with one another; All which qualifications would be very advantageous, both for *Understanding*, *Memory* and *Use*.

Those Characters must represent either

| | | | |
|---|-----------|---|-----------------|
| { | Integrals | { | Radicals. |
| | | | Derivations. |
| | | | Inflections. |
| | | } | Grammatical. |
| | Particles | } | Transcendental. |

The first thing to be enquired after, is to find out fitting Marks for the common Genus's or Heads in the former Tables of Integrals, which are there reduced to the number of forty. It were not difficult to offer several Varieties of these Marks or Generical Characters, with their different Advantages and Conveniences; to which purpose I had prepared sundry kinds of them, which I once thought to have inserted here: but upon further consideration, I shall mention only one of them, which I have chosen out of the rest, as seeming to me to be in all respects the most convenient amongst them.

The Differences are to be affixed unto that end which is on the left side of the Character, according to this order;

The Species should be affixed at the other end of the Character according to the like order.

And whereas several of the Species of Vegetables and Animals, do according to this present constitution, amount to more than Nine, in such cases the number of them is to be distributed into two or three Nines, which may be distinguished from one another by doubling the stroke in some one or more parts of the Character; as suppose after this manner, — — —. If the first and most simple Character be made use of, the Species that are affixed to it, will belong to the first combination of Nine; if the other, they will belong according to the order of them, unto the second Combination.

Those Radicals which are paired to others upon account of *Opposition*, may be expressed by a Loop, or (o) at the left end of the Character, after this manner, o—

Those that are paired upon the account of *Affinity*, are to be expressed by the like Mark at the other end of the Character, thus, —o

The double Opposites of *Excess* or *Defect*, are to be described by the Transcendental points, denoting *Excess* or *Defect*, to be placed over the Character, as shall be shewed after.

Adjectives should be expressed by a *Hook* at the right end of the Character in { Genus's or Differences, thus — }
 { Species — } —

Adverbs (being very near of kin to adjectives) may be expressed by a *Loop* in the same { Genus's and Diff. — }
 place. In { Species — } —

Abstracts may be expressed by a *Hook* at the left end of the Character. In { Genus's — }
 { Differences and Species — } —

The *Active* and *Passive* voice may be expressed, one of them by a *Hook*, and the other by a *Loop*, at the left end of the Character, after this manner, in { Genus's { Active — }
 { Passive — } }
 { Differences or Species { Active — } — }
 { Passive — } — }

The *Plural Number* may be expressed by a hook at the right end of the Character, after this manner, in { Genus's and Differences — }
 { Species — } —

The Characters of the *Particles* should each of them be of a less figure, and capable of being varied to a threefold place. The *Grammatical Particles*, being applied to the sides of the Character, and the *Transcendental Particles* to the top of it.

These *Grammatical Particles* are here contrived to such a kind of distinct futableness, so as each of the several kinds of them, hath a several kind of Character assigned to them.

1. The *Copula*, by the mark of (°)

2. *Pronouns*, by Points. (.)

3. *Interjections* by upright Lines streight or hooked; (| | | | |)

4. *Prepositions*, by small curved Figures { u n d c }
 { w n e e }
 { u n s z }

5. *Adverbs*, by a right angled Character { ^ L 7 F }
 { T A + F }
 { + }

6. *Conjunctions* by an acute angled Character { ^ A > < }
 { V A V A }

7. *Articles* by two oblique Lines to be placed { \ / }
 towards the top of the Character { }

8. *Modes*

8. Modes by circular Figures }⁸⁶²
 mixed }⁸⁸
 }⁹²
 }⁹⁹

9. Tenses by a small streight transverse Line (-)

Amongst these Grammatical Particles the first six are more principal and absolute, viz.

1. The Copula, being the Verb *sum*, according to a threefold difference of time.

o Have been, hast been, hath been.
 o Am, art, is, are.
 o Shall be.

2. Pronouns. { I } { We } { This, That }
 { Thou } { Ye } { The same, Another }
 { He } { They } { A certain, Some body }
 { Any } { Who? }
 { Every } { Which. }
 { All } { Whosoever. }

If one of these Pronouns, suppose (.) be placed at the side of the Character before it, — it signifies the first Person (*I*.) If at the middle, . — it signifies the second person (*Thou*.) If at the bottom, — it signifies the third person (*He*.) And if they are thus affixed after a Character that signifies *Action*, they will then denote the Accusative Case, Me, Thee, Him. so $\overset{\cdot}{\circ}$ is, *I love him*.

If any of the Pronouns are to be rendered in their *Possessive* sence, this is to be expressed by a little curve Line under them, as ($\overset{\cdot}{\circ}$) So $\overset{\cdot}{\circ}$ is My, or Mine, ($\overset{\cdot}{\circ}$ —) is Ours, ($\overset{\cdot}{\circ}$ —) is Thy or Thine, ($\overset{\cdot}{\circ}$ —) is His, And ($\overset{\cdot}{\circ}$ —) is Theirs.

The *Reduplicative* Notion of Pronouns may most naturally be expressed by a doubling of their Character with a *Fulcrum* or *Arrecharius* interposed. So | is I me, that is, I my self. |· is Thou thee, Thou thy self. |· He him, He himself. And so for the *Possessives* that are reduplicative | Mine mine, that is, My own, &c.

And whereas several of the Pronouns were before said to be applicable both unto Place, Time, and Manner, this ought to be expressed in writing by the help of an *Arrecharius*, with the *Transcendental* Marks of Pl. T. M. So | is, Which place. Thus | is, What place, or Where? | is, What time, or When? | is, What manner, or How?

Interjections may be thus expressed ;

{ Admiring } { Love, Hatred }
 { Doubting } { Mirth, Sorrow }
 { Despising } { Desire, Averfation }
 { Exclamation, Silence }
 { Bespeaking, Expressing attention }
 { Insinuation, Threatning }

The

The Secondary Moods may have their Marks thus applied to them ;

| | | |
|-----------|---|----------------|
| Power | } | Can 6 |

| Liberty | } | May 3 |
| | | Might 6 |
| Will | } | Will 9 |

| Necessity | } | Must, shall e |
| | | Must, should 3 |

Several of these Secondary Modes, will according to their places, towards the top, middle, and bottom of the Character, comprehend in them the several differences of time; so ? ~ \ is I would have writ.

The Marke for the Tenses, Past, Present, and Future, may be thus applied ; - Have been, haft been, hath been.
Am, art, is.
Shall be.

The Transcendental Marks to be put in three places over the head of the Character, may be thus applied ;

Whereas there is somewhat peculiar in the nature of *Numbers*, distinct from any of the other Heads, by reason of their great multitude, and various kinds ; It may seem therefore necessary to offer some more particular directions for the expression of them, both as to the *Numbers* themselves, and as to the Grammatical Variations of them.

Numbers are usually expressed in Writing either by *words at length*, or by *Figures*.

The Character here proposed under the first difference of Measure, is that which doth answer to the writing of *Numbers* in *words at length*,
And

And because the Species enumerated under that difference, are but nine, for the nine Digits; therefore will it be convenient in the first place, to explain the manner how all other numbers above nine, are to be expressed in this Character; which may be done by affixing some of these four Marks, (𐌹 𐌺 𐌾 𐌿) put after the Character, closer to the Body of it than ordinary, to denote those round Numbers, Ten, Hundred, Thousand, Million.

| | | | | | |
|-------------|---|-------------|---|-------------|---|
| 𐌹 Ten. | } | [𐌹 20 | } | [𐌹 30 | } |
| 𐌹 Hundred. | } | [𐌹 200 | } | [𐌹 300 | } |
| 𐌹 Thousand. | } | [𐌹 2000 | } | [𐌹 3000 | } |
| 𐌹 Million. | } | [𐌹 2000000 | } | [𐌹 3000000 | } |

But because those common Figures now in use, borrowed from the *Arabians*, are so generally known, and a kind of Universal Character already received; therefore it may be most convenient still to retain the use of them, as being much better fitted for all the Arithmetical Operations, of *Addition*, *Subtraction*, *Multiplication* and *Division*, &c. than either that Numerical Character mentioned before, or the way of Numeration by Letters, or any other way that I can think of.

As for those Variations of which Numbers are capable, and according to which Grammarians do commonly distinguish them, they may be thus expressed.

1. Those which are called *Cardinal Numbers*, One, Two, Three, &c. are the Radical Numbers themselves.

2. *Ordinals*, as } First, second, third, &c. are *Adjectives Neuter*.
 } Firstly, secondly, thirdly, &c. are the *Adverbs Neuter*.

3. *Distributives* may be expressed by the *Substantive Neuter*, with the Transcendental Mark of *Segregate*, the Substantive it self being put for one sort of Distributive in the *singular* Number, as sing. 3. (segr. will denote three, one by one; or for another sort of Distributive, being put in the *plural* number, as plural 3. (segr. will signify by threes, or three by three.

4. *Collectives* may be expressed by the *Substantive Neuter*, with the Adverb *together* before it, with the transcendental Mark of *Aggregate* over it, as together-three, or three (Aggr. is a ternary, a leath, &c.

5. *Multiplying* a Number may be expressed by the *Active* of it, as a. three is trebling, and *being multiplied* by the *Passive* of it, as p. three being trebled.

6. *Dividing* a Number into parts, may be expressed by the *Active* with the transcendental Mark (*Part.* as a. three (part) is dividing into 3 parts, or active tripartition. *Being divided* into parts, may be expressed by the *Passive* with the mark of *part*; as p. three. (part) is being divided into 3 parts, or passive tripartition. If this Division be into *equal* parts, one may express it by adding the Adverb *equally*.

7. A

7. A *Fraction* may be express'd ; If it be the Aliquot part of a Number, by the *Adjective Nester*, with the Transcendental Mark of *Part*, as adj. three (part) a third part, and it may be written thus, 3)1 ; If it be not the Aliquot part of a Number, it may be express'd by both the Numbers which are to be considered in it, as three sevenths may be called a seventh part of three, and it may be written thus, 7)3.

8. A *Ration* may be express'd likewise by both the Numbers which are to be considered in it, in speaking thus ; as three to seven, in writing $\frac{3}{7}$.

9. Number of *Species* or *Sorts*, may be express'd by the Number with the Transcendental Mark of (kind) as threefold, 3 (kind).

10. Number of *Times* or *Places* likewise, by the Transcendental Marks of *Time* or *Place* respectively, as once, twice, &c.

in one $\left\{ \begin{array}{l} \text{time} \\ \text{place} \end{array} \right.$ in two $\left\{ \begin{array}{l} \text{times} \\ \text{places} \end{array} \right.$ in three $\left\{ \begin{array}{l} \text{times} \\ \text{places} \end{array} \right.$ &c.

11. *Abstract* Numbers, as Unity, Duality, Trinity, may be express'd by adding the Mark of Abstract upon the Character.

If the Question be how these Grammatical Variations may be contrived in the use of the ordinary Figures for Number, this may be done by affixing such variations upon a Transverse Line over the head

of the Figure, So $\overset{\curvearrowright}{1} \overset{\curvearrowright}{2} \overset{\curvearrowright}{3}$ will be the Adjective, first, second, and

third, &c. So $\overset{\curvearrowright}{1} \overset{\curvearrowright}{2} \overset{\curvearrowright}{3}$ will be the Adverb, Firstly, secondly, third-

ly, So $\overset{1}{2} \overset{1}{3} \overset{1}{4}$ will be twofold, threefold, fourfold, &c

So $\overset{1}{1} \overset{2}{2} \overset{3}{3}$ &c. will be once, twice, thrice, &c.

The Characters that serve for Interpunction, may be thus contrived ;

These

These Marks having not any such near resemblance to the other *Real Characters*, appointed either for Integrals or Particles, need not therefore be changed,

The Note for *Emphasis*, may be expressed either by a reduplication of the Characters, if it consist in one word; or by some variety in the shape of the Characters, if it consist in several words, as is usual in that way of printing Words in an *Italic Letter*

The meaning of these things will appear more plainly by an Example: To which purpose I shall set down the Lords Prayer, and the Creed written in this Character, which I shall afterwards explain and resolve according to the forementioned Rules.

CHAP. II.

Instances of this Real Character in the Lords Prayer and the Creed.

For the better explaining of what hath been before delivered concerning a Real Character, it will be necessary to give some Example and Instance of it, which I shall do in the Lords Prayer and the Creed: First setting each of them down after such a manner as they are ordinarily to be written. Then the Characters at a greater distance from one another, for the more convenient figuring and interlining of them. And lastly, a Particular Explication of each Character out of the Philosophical Tables, with a Verbal Interpretation of them in the Margin.

The Lords Prayer.

Our

1. (◌|) The first Particle being expressed by *Points*, doth denote the thing thereby signified to be a *Pronoun*: And whereas there are two *Points* placed level, towards the upper side of the *Character*, they must therefore (according to the *Directions* premised) signify the first *Person Plural Number*, *viz. We*. And because there is a *curve Line* under these *Points*, that denotes this *Pronoun* to be here used *Possessively*, and consequently to signify *Our*.

Parent

2. (∟) This next *Character* being of a bigger proportion, must therefore represent some *Integral Notion*. The *Genus* of it, *viz. (—)* is appointed to signify *Oeconomical Relation*. And whereas the *Transverse Line* at the end towards the left hand, hath an *affix*, making an acute *Angle*, with the upper side of the *Line*, therefore doth it refer to the first *Difference* of that *Genus*, which according to the *Tables*, is relation of *Consanguinity*: And there being an *Affix* making a right *Angle* at the other end of the same *Line*, therefore doth it signify the second *Species* under this *Difference*, *viz. Direct ascending*, by which the *Notion* of *Parent* is defined. And this being originally a *Noun* of *Person*, doth not the need therefore *Transc. Note* of *Person* to be affixed to it. If it were to be rendered *Father* in the strictest sense, it would be necessary that the *Transcendental Note* of *Male* should be joyned to it, being a little hook on the top, over the middle of the *Character*, after this manner. (∟) The word *Father* in the most *Philosophical* and proper sense of it, denoting a *Male Parent*. And because the word *Parent* is not here used according to the strictest sense, but *Metaphorically*; therefore might the *Transcendental Note* of *Metaphor*, be put over the head of it, after this manner, (∟) But this being such a *Metaphor* as is generally received in other *Languages*, therefore there will be no necessity of using this mark.

Who

3. (◌|) This *Character* consisting of *Points*, must therefore denote a *Pronoun*; and because it consists of three *Points*, therefore must it denote one of the *Compound Pronouns*, and being placed towards the middle of the *Character*, therefore must it signify *Who* personal, or *Which* real.

Art

4. (◌|) This *Particle*, being a small *Round*, doth therefore denote the *Copula*, and being placed towards the middle of the *Character*, it must therefore signify the present tense of it, *Am, art, is, are*, and being joyned with a *Noun* of the second person, is therefore in *English* to be rendered (*Art.*)

In

5. (◌|) This *Particle* being of a curved figure, must therefore refer to *Prepositions*. And by the shape of it, it must belong to one of the *Opposites* in the fourth *Combination* of *Prepositions*, and by the place of it, being towards the upper end of the *Character*, it is determined to the *Preposition* (*In.*)

Heaven.

6. (∟) This *Generical Character* is assigned to signify *World*, the right angled affix on the left side, denoting the second *Difference* under that *Genus*, namely *Heaven*, which is defined to import either

a

a place or state of the greatest perfection and happiness; and because there is no affix at the other end, therefore doth it signify the Difference it self, and not any Species.

7. (٧) This Particle, for the Reason before mentioned (Numb. 1.) Thy is a possessive Pronoun, for its consisting of a single Point, it must be of the singular number; and for its place towards the middle of the Character, it must relate to the second Person, viz. *Thy*, or *Thine*.

8. (٨) The Genus denoted by this Character is *Transcendental Name General*; the affix to the end on the left side, doth signify the first Difference under that Genus, viz. the Kinds of Things and Notions, or those essential Communities wherein the things of different natures do agree. The affix at the other end of the same Line, making an obtuse angle with the lower side of it, doth signify the fourth Species under that Difference, viz. *Name*; which according to its primary sense is described to be the word assigned for the signifying any thing or notion.

9. (٩) This Particle is appointed to signify that which is called the Imperative Mode by way of Petition, or *May it be*, or we pray that it may be.

10. (١٠) This Generical Character doth signify *Ecclesiastical Relation*: The affix making a right angle with the under part of the Genus, doth denote the fifth Difference, which refers to *Discipline*, or the due ordering of the Circumstances of Ecclesiastical or sacred things to the best advantage; under which the first Species denoted by the acute Angle on the other end and side, doth signify the more general notion of separating things from their Commonness, and setting them apart by way of Honour to a more peculiar use, which is called *Consecrating* or *Hallowing*. By the Loop on the affix for the Difference, is signified the *Passive Voice*; and by the Hook on the other affix, the notion of *Adjective*.

11. (١١) as Numb. 7.

Thy

12. (١٢) This Generical Character doth signify *Civil* or *Political Relation*. The affix on the left side, doth signify the first Difference under that Genus which is *Degrees of Persons*. The affix on the Species side, doth refer to the second Species, which is *King*, defined to be the most principal and absolute amongst the kinds of Magistrates. The Hook at the end of the Difference affix doth signify *Action*: So that the proper notion expressed by this Character is *Regnation*, or *regnare*, which is the Substantive of *Action*, as *King* is of *Person*.

Regnation, or
regnare.

13. (١٣) as Numb. 9.

May it be

14. (١٤) The Genus denoted by this Character is *Transcendental Action*; the affix on the Difference side, making an acute Angle with the lower side, doth signify the sixth Difference, which according to the Tables doth refer to *Ition*, going, or passing; the affix on the Species

coming.

cies side, being the first, doth according to the Tables, refer to the word *Coming*, which is described to be motion to a place nearer to us: The Hook on the Difference doth signifie *Active voice*, and the Hook on the other affix, the notion of *Adjective*, viz. *Coming*.

Thy 15. (∩) as *Numb. 7.*

Will 16. (∩) This Generical Character doth signifie the first Genus in Quality, which according to the Tables is *Natural Power*. The affix for the Difference, making an acute Angle, with the upper side of the Genus, must signifie *Rational Faculty*. The affix on the Species side, making an obtuse Angle with the lower side, must signifie the fourth Species, which is that Faculty we call *Will*, whereby we do rationally follow after that which is good, and fly what is evil. The hook on the left side upon the Difference affix, denotes the *Active voice*. So that the proper Signification of this Character is *Volition*, or *to velle*.

May it be 17. (∩) as *Numb. 9.*

Done 18. (∩) The same Generical Character with *Numb. 14.* denoting *Transcendental Action*. The obtuse angle on the left side signifies the third Difference, viz. *General Actions relating to Business*. The acute Angle at the other end, signifies the sixth Species, viz. the doing or effecting what we undertake and design, which we call *performing* or *accomplishing*; the Loop at the end of the Difference doth denote the *Passive voice*, and the Hook upon the other affix, the notion of *Adjective*; so that this Character signifies the *Adjective Passive*, of perform, viz. *performed* or *done*.

So 19. (∩) This Character being a right angled Particle, doth denote some *Adverb*; and by its shape it appears to be one of the Opposites in the first Combination, and by its place towards the lower end of the Character, it is determined to the Particle (*So.*)

In 20. (∩) as *numb. 5.*

Earth 21. (∩) The same Generical Character as *numb. 6.* signifying *World*, the affix making a right Angle, doth denote the second difference under that *Genus*, namely, the *Celestial* parts of it in general, amongst which, this Globe of Sea and Land whereon we live, is reckoned as the seventh Species, denoted by the affix at the other end.

As 22. (∩) This Particle being opposite to that *numb. 19.* signifying *So*, must therefore signifie *As*, the one being the *Redditive* of the other.

In 23. (∩) as *numb. 5.*

Heaven 24. (∩) as *numb. 6.*

Maist thou be 25. (∩) The same as *numb. 9.* but being here joynd with a word Active of the second Person, it must be rendered in English, *Maist thou be*.

26.

26. (𐤒𐤒) The Genus of this Character is the same with *number* Giving. 14, & 18. denoting *Transcendental Action*; The affix on the left hand, making an obtuse Angle with the lower side of the Genus, doth therefore signifie the fourth Difference, which concerns Actions relating to *Commerce*: and the affix at the other end making such an obtuse angle, doth therefore signifie the fourth Species, which according to the Tables, is *Giving*, described to be the parting with something to another, to which we our selves have a right. The Hook at the end of the Difference affix, doth signifie *Active*, and the other, *Adjective*, viz. *Giving*.

27. (𐤕) This Particle, by the figure of it, must signifie a Preposition of the third Combination, and by its place at the upper side of the Character, it is determined to signifie the Preposition (*To*.)

28. (𐤑) This Particle consisting of Points, doth therefore denote *Us*. a *Pronoun*; and because there are two Points placed in a Level towards the top of the Character, therefore must it signifie the first Person plural, as *numb. 1*. And coming after a Verb, it is to be rendered in English as we do the Accusative Case, (*Us*.)

29. (𐤅) as *numb. 5*.

In

30. (𐤓) This Pronoun particle consisting of two points placed obliquely from the bottom towards the top, doth therefore signifie one of the *Relative Pronouns*; and being placed at the top of the Character, it must signifie (*This*.)

31. (𐤒) This Generical Character is appointed to signifie the *Day* Genus of *Measure*. The affix on the left hand, making a right angle with the lower side of the Line, signifies the fifth Difference, which is *Measure of Time*. The affix at the other end, making the like angle, doth denote the fifth Species, viz. *Day Natural*, which is described to be the time of the Sun's motion from any one Meridian to the same again.

32. (𐤑) as *numb. 1*.

Our

33. (𐤒) This Character is appointed to signifie the Genus of *Occasional Provisions*, of which, the first Difference denoted by the affix on the left hand, doth refer to *Sustentation ordinary*, and the first Species at the other end, doth refer to such kind of ordinary food as is of a more solid consistence, made of Grain, or some other Vegetable baked, without any considerable mixture, being of all other kinds of Food most necessary and common, which is *Bread*.

34. (𐤒) The Genus of this Character doth signifie *Transcendental General*, as before, N. 8. The affix on the left hand being the fifth, doth denote the *Differences of things relating to means*; where the seventh Species, denoted by the affix at the other end, doth signifie that kind of usefulness, which may probably promote the end, which we call *Expediency*; and because the Hook at the end of the Species affix doth denote *adjective*; therefore this Character must signifie *expedient*.

Expedient

- And 35. (∨) The Particle represented by an acute angled figure, must therefore refer to *Conjunctions*. By the position of the Angle downwards, and by the situation of it towards the middle of the Character, it must denote the Conjunction, *And*.
- Maist thou be 36. (°|) as *numb.* 9.
- Forgiving 37. (∩) The Genus of this Character doth signifie *Judicial Relation*. The affix on the Difference side, making a right angle with the upper side of the Genus, doth therefore signifie the second Difference, viz. *Judicial Actions*. The affix for the Species being the ninth, doth signifie that kind of *Forinfc Action*, which is *consequent with respect to the Judges*, inflicting the punishment or freeing from it; the first of which is *executing*, to which is opposed (signified in the Character by the Loop on the left hand) *Pardoning*, or forgiving. The Hook upon the affix for the Difference, denoting the *Active voice*, and that upon the other affix, the *Adjective*.

- Our 40. (∪) as *numb.* 1.
- Trespaffes 41. (∩) The same Generical Character as *numb.* 8, & 34. signifying *Transcendental General*. The obtuse angle on the left side doth signifie the third Difference, viz. the more *common and absolute Differences of things*. The affix at the other end, making a right Angle with the upper side, doth signifie the second Species, namely, that Difference of things which doth include a respect to the Will, as to their agreement or disagreement with that Faculty, whereby they are rendered desirable, or avoydable; which we call *Goodness* or *Evilness*. The Loop towards the left hand, at the joyning of the Affix, doth denote the Opposite in the Tables, namely, *Evilness*: The Hook at the other end of the same Affix doth signifie the *Active voice*; and the hook on the other side, the *Plural Number*: So that the true importance of this Character must be *evil actions*, which is the same with that which we stile *Trespaffes*.

59. (س) The Generical Character the same with that, N. 14, 18, 26, 56. The right Angle on the left side denoting the second Difference, viz. General Relations of Actions Compare: The right Angle at the other end and side, signifying the fifth Species, which in the Tables, is *Comparing*; to which is adjoynd by way of Affinity (signified by the Loop) the Notion of *Trying*, or the Examining of things, for the distinguishing of their Truth and Goodness. And because this is in it self of an indifferent nature, and consequently not to be deprecated; therefore the true Notion of it in this place, must be confined to such kind of Temptations or Trials as may be hurtful, which is expressed by the Transcendental Particle of *Corruptive*, set on the top of the Character towards the right hand.

(د) This Generical Character doth signifie *Spiritual Action*, under which the first Difference denoted by the acute Angle on the left side, doth refer to the Actions of God, (*i. e.*) such kind of Actions as do primarily belong to the Divine Nature; though some of them may in a secondary manner, and by way of participation be ascribed to other things. The right Angle made by the other affix, doth denote the fifth Species, which is defined to be the keeping or taking one from any kind of evil; which we call *Delivering*. The Hooks upon each affix (as hath been often said before) must denote *Active*, and *Adjective*.
- Us. 63. (ل) as *Numb.* 24.

The Creed.

Handwritten text in a non-Latin script, likely representing the beginning of the Creed in a specific language.

I believe in God the Father Almighty Maker of Heaven and

of Earth, and in Jesus Christ his Son only our Lord, who was

conceived by the Holy Ghost, born of the Virgin Mary, suffered

under Pontius Pilate, was crucified, dead, and buried, he descended

into hell, he did rise from the dead in the day third, He ascended

into heaven, where he sitteth at the right hand of God the Father,

from whence he shall come to judge the Quick and the dead. I believe

in the Holy Ghost, the Church holy Catholick, the Communion of

Saints, the forgiveness of sins, the resurrection of the body, and the

life everlasting.

1. (') This Particle being a single point, must denote one of the demonstrative Pronouns in the singular Number. And by its place towards the upper end of the Character, and before the Verb, the Nominative Case of the first Person, viz. I.

2. (o) This Particle being a Round, must signifie the Copula, and being placed towards the middle, and joyned with the Nominative case of the first person, it must be rendered (Am.)

3. (⌒) This Generical Character is appointed to signifie the Genus of *Habit*. The affix on the left hand making a right angle with the lower side, doth signifie the fifth Difference under that Genus, which according to the Tables, is *Infused Habit*. The other affix making an obtuse angle, doth signifie the fourth Species, viz. *Faith*, which is defined to consist in a readiness of mind to yield an effectual assent (without any affected captiousness) unto revealed Truths, upon such Grounds as their natures are capable of, and such as are in themselves sufficient to prevail with a prudent teachable man. The Hook upon the Difference denotes the *Active* voice, and the hook upon the Species, the *Adjective*, viz. *Believing*.

The Word *Believe* being of an equivocal sense, may likewise be expressed by the Genus of *Spiritual Action*, the second difference, relating to the Acts of the *Speculative Judgment*, and the affinis of the second Species, which is *Believing*, described to be an assent to any thing as truth upon the credit of others by whom it is related. But I rather chuse the former, as being more proper to this place.

4. (↖) A streight Line being the most simple, is put for the Character of *God*. The acute angle on the left side doth denote the first Person of the Blessed Trinity, namely, *God the Father*; which by following the Verb, is supposed to be in the *Object case*. And this may better express the true notion of *Credo in Deum*, than by using the Preposition *In*, as the sense of that Particle is determined in the foregoing Tables.

5. (∴) This Character doth by the two strokes denoting an *Almighty Hyphen*, appear to be a *Compound*. The two Points denote a Pronoun of the third Combination, and by the place of them at the bottom, they must signifie the *Universal Collective*, viz. *All*. The Integral Character with which this is compounded, is the Genus of *Natural Power*. The Hook at the end signifies the Grammatical notion of *Adjective*. So that this compound Character may be rendered All-powerful, Omnipotent, or *Almighty*.

6. (') This Particle doth signifie the *Demonstrative Article* The.

7. (') This Particle being a small transverse Line placed at the side, Having been must denote one of the *Tenses*, and being placed towards the upper part, it must signifie the *Preter Tense*.

8. (⌒) The Genus of this Character is appointed to signifie *Spiritual* Creating person.

ritual Action, or the Action of a Spirit, or Spiritual Faculty. The affix on the left, and that likewise on the right side, making acute angles with the upper side, must therefore signify the first difference under that Genus which refers to *Actions of God*, and the first Species of that Difference, namely, *Creation*; which is defined to be, the putting of things into their first being. The hook at the end of the Difference affix, doth signify *Active*, and the other *Adjective*. The transcendental mark, of a little flat Line on the top towards the right hand, doth denote *Person*; so that this Character with the precedent affixes, doth properly signify, *the having been Creating Person*.

Of

9. (∩) This Particle doth by its figure appear to be one of the Prepositions of the first Combination, and by its position towards the top of the Character, it is determined to be the first of them, which in *Latin* and *Greek* is expressed by the *Genitive* case, and in *English* by the Particle *Of*.

Heaven.

10. (⊕) The Genus of this Character signifies *World*. The affix on the left side denoting the second Difference, is *Heaven*.

And

11. (∨) This Particle, by the shape of it, appears to be a Conjunction of the first combination, and by the position of it towards the middle of the Character, it must be the second of them, *viz.* the *Conjunction Affirmative*, namely, *And*.

Of

12. (∪) as *Numb. 9*.

Earth

13. (⊖) The same Character as to Genus and difference with *Numb. 10*. The affix for the Species making an acute Angle, and passing below the middle line, doth denote the seventh Species, which according to the Tables, is this Globe of Sea and Land.

And

14. (∇) as *Numb. 11*.

Jesus Christ

15. (⊔) The same Generical Character as *Numb. 4*. The right Angle denoting the second Person in the Blessed Trinity, *viz.* *Jesus Christ*.

His

16. (∩) This Particle being a single point, must denote one of the *Demonstrative Pronouns* in the singular number; and by its place towards the bottom of the Character, it must signify the third Person, or *He*; and being made possessive by the curve line under it, it must be rendered *His*.

Son

17. (⊔) The Genus of this Character doth denote *Oeconomical Relation*. By the acute angle on the left side, is signified the first Difference, which is Relation of *Consanguinity*. By the right angle at the other end, is denoted the second Species, which is described to be *Direct Ascending*, namely, *Parent*; to which is opposed *Direct Descending*, namely, *Child*, which opposition is denoted by the Loop on the left side of the Character.

Only

18. (⊔) The same Genus with the former, the fourth Difference,

rence, denoting Relations of *Equality*; the second Species signifying that particular Relation which is founded upon our *Conversing* with others, namely, *Companion*. To which the opposite (signified by the Loop at the joyning of the difference affix) is being in a state of *Segregation* from others. The hook upon the Species affix, denoting Adjective, *viz.* Alone, or *Only*.

19. (∩) These two Points standing level, must signifie one of the *Demonstrative Pronouns*, in the *Plural number*. By the place of them ^{Our} towards the upper side of the Character, they must denote the first Person, *We*; which being by the curve line rendered *Possessive*, must signifie *Our*.

20. (⌒) The Genus of this Character is assigned to signifie *Civil* ^{Sovereign} *Relation*; of which the first difference doth denote *Degrees of Persons*. The second Species signifying the *supreme* Magistrate, to whom others owe Subjection and Obedience, *viz.* King, Lord, *Sovereign*.

21. (∪) This Particle consisting of three Points, must therefore ^{who} signifie one of the Compound Pronouns. By the position of it towards the middle of the Character, it denotes the second of them, to be rendered *Who*, when we speak of a *Person*: and *Which*, when we speak of a *Thing*.

22. (∩) The Copula, as *Numb. 2.* but being here placed towards ^{was} the top of the Character, it must be rendered in the Preter tense, *viz.* *Hath been,* or *Was*.

23. (∩) The Genus of this Character is assigned to *Corporeal A-* ^{Conceived} *ction*. The acute angle on the left side, denoting the first Difference, namely, such corporeal actions as belong primarily to *Vegetative* and living bodies. The right angle at the other end, signifies the second Species, which in the Tables is *Impregnation*; to which the Word *Conception* is adjoined by way of Affinity, signified by the Loop on the right side. The Loop on the Difference affix, signifying the *Passive* voice; and the Hook upon the Species affix, *Adjective*.

24. (∪) This Particle, by the figure and position of it, must be the second in the first combination of *Prepositions*, relating to the *Effi-* ^{By} *cient Cause*, which we render *By*.

25. (∩) as *Numb. 6.*

The

26. (∩) The same Genus with numb. 4, and 15. The obtuse an- ^{Holy Ghost} gle signifying the third Person of the Blessed Trinity, *viz.* *Holy Ghost*.

27. (∩) The same Genus and Difference as numb. 23. The af- ^{Borne} fix towards the right hand making an obtuse angle with the upper side must signifie the third Species, which is *Parturition*, or bringing forth. The Loop at the end of the difference affix, denoting *Passive* voice, and the Hook on the other side, *Adjective*, *viz.* *Borne*.

28. (∩) This Particle, by the figure and position of it, doth ap- ^{pear}

pear to be the third of the first combination of Prepositions, relating to the *Material Cause, ex qua* (Of)

- The 29. (ʿ) as numb. 6.
- Virgin 30. (ﻻ) The same Genus as numb. 17, & 18. The affix towards the left hand, denoting the second Difference, which is Relation of *Affinity*; the other affix denoting the first Species, *viz.* that preceding state, whereby persons are rendered capable of Marriage, namely, *Celibate*, to which the notion of *Virgin* is joyned as an *affinis* (denoted by the Loop on the right side) described to be one that hath not coupled with any other.
- Mary 31. (ﻢ) The name *Mari* in the Literal Character, as being a proper name.
- Capitally punished 32. (ﻢ) The Genus of this Character doth belong to *Judicial Relation*; the difference affix being the fifth, must denote *Capital punishment*; the Loop upon the Difference affix signifying *Passive*, and the hook upon the other affix, *Adjective*.
- Under 33. (ﻮ) This Particle, by the figure and position of it, must be the first Opposite in the sixth combination of Prepositions, namely, *Under*.
- Pontius Pilate 34. (ﻢ ﻻ ﻟ ﻮ ﻟ ﻮ ﻟ ﻮ) These being proper Names, are to be expressed only by a Literal Character, according to our English pronunciation.
- Was 35. (ﻮ) as numb. 22.
- Crucified 36. (ﻢ) The same Genus and Difference with numb. 32. Under which *Crucifying* is reckoned as the ninth Species. The Loop on the Difference affix doth denote the notion of *Passive voice*; and the Hook at the other end, the notion of *Adjective, Crucified*.
- Dead 37. (ﻮ) The same Genus and Difference with numb. 23, & 27. signifying such corporeal Actions as do primarily belong to *Vegetatives*. The affix on the right side, making an acute angle with the upper part of the transverse, and passing below it, doth signify the seventh Species, which is *Living*; to which *Dying* is opposed. And that the Opposite is here intended, may appear by the Loop at the joyning of the Difference affix; the hook on the Species affix signifying *Adjective*.
- And 38. (ﻮ) as numb. 11.
- Buried 39. (ﻢ) The Genus of this Character is assigned to *Ecclesiastical Relation*; the fourth Difference comprehending the more common Actions belonging to Religion: the affix at the other end, being a thorough stroke, and making an obtuse angle to the upper side, must denote the ninth Species, which is *Burying*, described in the Tables to be one of those Ritual Offices consisting in performance of the Rites due to the dead, by putting their Bodies into the Ground. The Loop

Loop on the Difference affix, doth signifie (as before) *Passive*, and the other Hook *Adjective*.

Was

42. (° = ∩) This appears by the Hyphen, to be a compound Descending Character. The Particle in this composition, doth by the figure and position, denote the Opposite to the first of the fifth Combination of Prepositions, viz. *Downward*. The Genus of the Integral Character, is *Transcendental Action*. The affix on the left side, making an acute angle with the bottom of the Line, doth denote the sixth Difference, which is *Ition*, or the passing of things from one place or state to another; and because there is no affix at the other end, therefore this Character must denote the Difference it self. The Hooks on each side, do signifie *Active* and *Adjective*.

43. (°) This Particle doth by the figure and position of it, appear *Into* to be the first of the fourth Combination of Prepositions, and consequently to signifie *Into*.

44. (°+) This Character is the same for Genus and Difference with numb. 10. which doth there signifie *Heaven*; and whereas here there is a Loop at the joyning of the Difference affix; therefore must it denote that which is opposite to the former; namely, *Hell*. This Clause might perhaps be more properly expressed thus; *He became in the state, or he passed into the Invisible place, of the having died persons*.

Was

47. (∩) The same Genus with numb. 23, 27, & 37. Denoting *Corporeal Action*. The acute angle on the left side, doth denote the sixth Difference, which is *Gesture*; namely, such animal motion whereby the situation of the Whole or Parts is altered. The acute angle at the other end to the upper side, doth denote the first Species, which is motion upwards direct; namely, *Rising*. The Hooks on each affix denote *Active* and *Adjective*.

48. (°) This Particle, by the figure and position of it, must be the second of the third combination of Prepositions, viz. *From*.

- Holy 90. (𐤒𐤍) The same Genus and Difference, as numb. 3. Denoting *Infused Habit*, the second Species being *Holiness*, described to be that habitual frame, whereby one is fitted for virtuous actions; more especially for the duties of Religion: the hook upon the Species affix, denoting the Notion of *Adjective*, viz. *Holy*.
- Universal 91. (𐤒𐤍) The Genus of this Character is assigned to signify *Transcendental Relation mixed*; the obtuse angle at each end, must denote the third difference, and the third species: the third difference under that Genus, containing such transcendental relations as concern *Number*. The third species, being that more distinct relation of *one Indeterminate*, or *All*, viz. *Particularity*, or *Universality*. The Loop at the joining of the difference affix, denoting an *Opposite*, doth determine the Character to the second of these: And the Hook at the end of the species affix, doth make it signify as an *Adjective*, viz. *Universal*, *Catholick*.
- The 92. (𐤒) as numb. 6.
- Communion 93. (𐤒𐤍) The Genus of Ecclesiastical Relation, as numb. 89: The third Difference, concerning *states of Religion*; the second species, *Catholick*, or *Communicant*, which is described to be one that is in a state of Charity with the body of those that agree in the same profession: the *Abstract* of which, denoted by the hook upon the difference affix, is *Communion*.
- Of 94. (𐤒) as numb. 9.
- Saints 95. (𐤒𐤍) The same Genus and difference, as numb. 93. The fifth species denoting such as are *eminently religious*; the hook upon the species affix, signifying the *Plural Number*, viz. *Saints*.
- The 96. (𐤒) as numb. 6.
- Being forgiven 97. (𐤒𐤍) The Genus of *Judicial Relation*, as numb. 77. The second difference denoting *Judicial Actions*. The ninth species signifying that kind of Judicial Action, which concerns the *inflicting of punishment*, or *freeing from it*, *Executing*, or *Pardoning*. The Loop, at the joining of the difference affix, denotes this to be an *Opposite*, viz. *Pardoning* or *Forgiving*. The Loop upon the top of this affix, signifies the passive voice, viz. the *being forgiven*.
- Of 98. (𐤒) as numb. 9.
- Sins 99 (𐤒𐤍) The Genus of *Transcendental General*; the third difference respecting the more common and absolute differences of things; the second species denoting that difference of things, which doth include a respect to the Will, as to the agreement or disagreement of things with that Faculty, stiled *Goodness* or *Evilness*. The Loop towards the left hand, at the joining of the affix, denoting *opposite*, viz. *Evil-*

Evilness ; the hook at the other end of the same affix, doth signifie the *Active* voice ; and the hook upon the other affix, doth denote the *plural number* : So that the meaning of this Character, must be *evil actions*, the same as *Trespases*, or *Sins*.

110. (∞ = ↗) A compound with the Pronoun *All*, as numb. 5. Everlasting The Genus of the Integral being the same with numb. 54, 55. doth denote *Measure* ; the fifth difference of which, doth signifie measure of time, to which the word *Duration* is adjoynd by way of Affinity, signified by the Loop at the right side, where the hook denotes *Adjective* : So that the true sense of this Character, is *All-during*, or *Everlasting*.

Everlasting

I forbear any other Examples out of *Aristotle*, *Euclid*, *Tully*, *Terence*, which I once thought to have subjoynd ; because if what hath been already delivered, be sufficiently understood, it will appear easie enough to render any thing out of those Authors, in this Character.

I shall only add concerning the Character here proposed, that besides the *Facility*, *Comeliness* and *Distinctness* of it, containing a Description of what is to be expressed by it, both as to the nature of the things, and the Grammatical Variation of the words ; 'tis likewise a much *shorter* way of writing, than that by Letters : and by the great Variety which it is capable of, would afford the surest way for *Cryptography* or *secret Writing*.

CHAP.

CHAP. III.

How this Real Character may be made effable in a distinct Language, and what kind of Letters or Syllables may be conveniently assigned to each Character.

BY what hath been already delivered, it may sufficiently appear, how any thing or Notion, which falls under humane Discourse, may be expressed by such a Character as shall be legible to men of all Nations and Languages.

I come now to shew how this Universal *Character* may be made effable in a distinct *Language*: The unfolding of which (supposing what hath been said about the Character and Grammar, to be well understood) will need but little time and pains.

The Qualifications desirable in a *Language*, should have some analogy and proportion to those before mentioned concerning a *Character* or way of *Writing*; Namely,

1. The words of it should be *brief*, not exceeding two or three Syllables; the Particles consisting but of one Syllable.
2. They should be *plain* and *facile* to be taught and learnt.
3. They should be *sufficiently distinguishable* from one another, to prevent mistake and equivocalness; and withal *significant* and *copious*, answerable to the conceits of our mind.
4. They should be *Euphonical*, of a pleasant and graceful sound.
5. They should be *Methodical*; those of an agreeable or opposite sense, having somewhat correspondent in the sounds of them. The order to be observed in the assigning of Letters and Sounds to these Characters, must be after the same manner with the Method before made use of, in treating concerning these Characters: Beginning first with *Integrals*, according to their several Varieties, and then proceeding to the *Particles*.

The *Integrals* may be considered, either as they are *Radicals*, placed in the Tables, either more *direct*, whether *Genus*, *Difference*, or *Species*; or else *Laterally*, either by way of *Affinity* or *Opposition*.

And next to the Words or Sounds appointed for each of these Radicals, it is to be considered, by what kind of Changes or Varieties, the several *Derivations* and *Inflections* may be expressed.

The first thing to be stated in such an Institution, is to assign several Letters and sounds for the 40 *Genus's*. It were not difficult to offer great variety of these; but to pitch upon that which upon all accounts would be the best, will require so much consideration, and practise, and so many Trials as I cannot pretend unto.

That

That which at present seems most convenient to me, is this ;

| | | | | | | | | |
|---------------|--------------------------------------|--------|--------------------|--------------|--------------|----------|-------------|------------|
| Transcend. | { General | Bα | Animals | { Exanguious | Zα | Action | { Spiritual | Cα |

| | World | Da | | { General | Pa | | { Posses. | Cy |
| | Element | De | Quantity | { Magnitude | Pe | | { Provis. | Sα |

The Differences under each of these Genus's, may be expressed by these Consonants B, D, G, P, T, C, Z, S, N. in this order ; 1 2 3 4 5 6 7 8 9.

The Species may be expressed by putting one of the seven Vowels after the Consonant, for the Difference ; to which may be added (to make up the number) two of the Diphthongs, according to this order α, a, e, i, o, ō, y, yi, yō.

For instance, if (De) signifie *Element*, then (Deb) must signifie the first difference ; which (according to the Tables) is *Fire* : and (Debα) will denote the first Species, which is *Flame*. (Det) will be the fifth difference under that Genus, which is, *Appearing Meteor* ; (Detα) the first Species, viz. *Rainbow* ; (Deta) the second, viz. *Halo*.

Thus, if (Ti) signifie the Genus of *Sensible Quality*, then (Tid) must denote the second difference, which comprehends Colours ; and (Tida) must signifie the second Species under that difference, viz. *Redness* : (Tide) the third Species, which is *Greenness*, &c.

Thus likewise, if (Be) be put for the Genus of *Transcendental Relation of Action*, then (Bec) must denote the sixth difference, which is *Ition* ; and (Becō) will signifie the sixth Species, which is *Following*.

As for those Species under Plants and Animals, which do exceed the number of Nine, they may be expressed by adding the Letters L, or R, after the first Consonant, to denote the second or third of such Combinations. Thus, if Gαde be *Tulip*, viz. the third Species in the first Nine, then Glαde must signifie *Ramson*, viz. the third in the second Nine, or the twelfth Species under that Difference. So if Zanabe *Salmon*, viz. the second species in the first Nine, then Zlanabe must signifie *Gudgeon*, viz. the second in the second Nine ; or the eleventh Species under that Difference.

It

It must be granted, that there is one inconvenience in this Contrivance for the supernumerary Species, namely, that according to this way of expressing them, they are scarce capable of the derivation of Adjective: But this is more tolerable, because in such matters, where this will happen, there is no necessary occasion for this derivation.

Those Radicals which are joyned to others by way of *Affinity*, may be expressed; 1. In *Monosyllables*, by repeating the Radical Vowel before the Consonant. For example, if (De) signifies *Element*, then (Ede) must signify that which is joyned to it by way of affinity, *viz.* *Meteor*. If (Di) be *Stone*, then (Idi) will signify *Concretions*, &c. 2. In *Dyssyllables*, by repeating the second Radical Consonant after the last Vowel: Thus, if (Dade) be *Planet*, (Daded) will signify *Comet*. If (Dege) be *Ice*, (Degog) will signify *Snow*, &c.

Those Radicals which are paired together upon the account of *single Opposition*, may be expressed,

1. In *Monosyllables*, by putting the *opposite Vowel* before the first Consonant, according to that order of Opposition before set down;

namely, of $\left. \begin{matrix} \alpha \\ a \\ e \end{matrix} \right\}$ to $\left. \begin{matrix} i \\ o \\ \gamma \end{matrix} \right\}$ or y.

Thus, if (D α) be put to signify *God*, then (id α) must signify that which is opposed, namely, *Idol*. If (Dab) be *Spirit*, (odab) will be *Body*. If (Dad) be *Heaven*, (odad) will signify *Hell*.

2. In *Dyssyllables*, by adding the Letter (S) to the last Vowel: Thus if (Pida) be *Presence*, (Pidas) will be *Absence*. If (Tad γ) be *Power*, then (Tad γ s) will be *Impotence*.

As for those *double Opposites* by way of *Excess* or *Defect*, which sometimes occur, as they are to be represented in writing by the Transcendental Points of *Excess* or *Defect*, on the top of the Character, so are they to be expressed in speaking by those Syllables appointed to these Characters, which must be added to the termination of the word: Thus if (Teba) be *Justice*, (Tebas) will signify the *Opposite Common*; namely, *Injustice*: And (Teba α) the Opposite by way of *Excess*; namely, *Rigor*, and (Teba γ) the Opposite by way of *Defect*, *viz.* *Remission*.

Tep α Veracity.

Tep γ Lying.

Tep $\alpha\alpha$ Over-saying.

Tep $\gamma\gamma$ Under-saying, Detraiding.

Adjectives should be expressed by changing the first radical Consonant, according to this establishment;

$\left\{ \begin{matrix} B, D, G, P, T, C, Z, S; N. \\ V, D\gamma, G\gamma, F, T\gamma, C\gamma, Zh, Sh, Ng. \end{matrix} \right.$

Thus,

Thus, if, $\left\{ \begin{array}{l} D\alpha \\ De \\ Do \end{array} \right.$ do signifie $\left\{ \begin{array}{l} God \\ Element \\ Stone \end{array} \right.$ then $\left\{ \begin{array}{l} D\alpha \\ D\alpha e \\ D\alpha o \end{array} \right.$ must signifie $\left\{ \begin{array}{l} Divine. \\ Elementary \\ Stony. \end{array} \right.$

Adverbs may be expressed by turning the first Radical Vowel into a Diphthong. So $D\alpha i$ is *Divinely*. ($Sy\beta$) is *Religiously*. ($Sy\beta g\alpha s$) is *Schismatically*.

Abstracts may be expressed, 1. In *Monosyllables* of the Genus, by adding the Letter (r) after the first Radical Vowel. So $D\alpha r$ is *Deity* or *Divinity*.

In *Monosyllables* of the *Difference*, and *Dissyllables* of the *Species*, by changing the second Radical Character Consonant thus;

$\left\{ \begin{array}{l} B, D, G, P, T, C, Z, S, N. \\ V, Dh, Dzh, F, Th, Tsh, Zh, Sh, Ng. \end{array} \right.$

The Letters Dzh , and Tsh , being the same power which we Englishmen give to the Letters G , and Ch , in the words *Ginger*, and *Charity*. Thus

($B\alpha d$) is *Cause*; ($B\alpha dh$) is *Causality*.
($Saba$) is *King*, ($Sava$) is *Regality* or *Majesty*.

There are only two things noted in the Character belonging to the *Inflection* of words; namely,

1. The *Active* and *Passive* voice, to be expressed by the Letters L , and N , after the first Vowel : thus ($Salba$) is *Regnation*; and ($Samba$) is *regnari*.

2. The Plural Number in *Substantives*, which is sometimes likewise affixed to *Adjectives*, when they are used substantively, by reason of any transcendental Mark joyned to them. And this may be done by prolonging the first Vowel, which upon all other occasions, is to be pronounced as being short. But because it will be difficult to prolong this Vowel in *Monosyllables* of the Genus, when no Consonant doth follow; therefore in this case it may be proper to add the Vowel α to the Radical Vowel. So if $D\alpha$ be *God*, $D\alpha\alpha$ will be *Gods*.

According to this establishment, every Radical Genus, Difference and Species, may be expressed by such words as are facil and pleasant. Those words that are most harsh and difficult, will happen amongst such of the Derivations as are seldom used; as in some of the *Active* or *Passive* Adverbs, and in some of the Abstracts.

By these Instances it will be easie to understand all the rest.

The Particles may be expressed either by simple Vowels or Diphthongs, or by some of those *Monosyllables*, not used for any of the Genus's or Differences.

Amongst the Grammatical Particles, the more principal are, the *Copula*, *Pronouns*, *Interjections*, *Prepositions*, *Adverbs*, *Conjunctions*.

1. The

1. The *Copula*, or Verb *Sum*, according to its threefold place in the Character, may be expressed by these Diphthong $\left. \begin{array}{l} \circ \\ \circ \\ \circ \end{array} \right| \begin{array}{l} la. \\ la. \\ lc. \end{array}$

2. The *Pronouns*, according to their several kinds, may be expressed by these Vowels and Diphthongs ;

| | | | | | |
|-----|------|------|------|------|------|
| · α | · αl | · l | · o | · αɜ | · ol |
| · a | · al | · ɜ | · y | · aɜ | · ɜɜ |
| · e | · el | · yl | · yɜ | · eɜ | · ll |

Possessive Pro nouns by prefixing (H.) *Reduplicative*, by interposing (L.) So Hcl is *mine*, Hclα is *my own*.

3. The *Interjections*, being Natural sounds themselves, need not have any assigned to the Characters of them, than what are General. So

| $\left. \begin{array}{l} \text{Heigh} \\ \text{Hm, Hu.} \\ \text{Pifh, Shu, Tush} \end{array} \right\}$ | $\left. \begin{array}{l} \text{Ah, alack, alas.} \\ \text{Ha, ha, he.} \\ \text{O, O that.} \end{array} \right\}$ | $\left. \begin{array}{l} \text{Vauh, Hau.} \\ \text{Hoi, ah, oh.} \\ \text{Phy.} \end{array} \right\}$ |
| | | |

4. The *Prepositions* may be expressed by Monosyllables framed of L, and R ; after this manner.

| | | | |
|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|
| $\left. \begin{array}{l} \text{Lα, Li.} \\ \text{La, Lo.} \\ \text{Le, Lɜ.} \end{array} \right\}$ | $\left. \begin{array}{l} \text{Rα, Ri.} \\ \text{Ra, Ro.} \\ \text{Re, Rɜ.} \end{array} \right\}$ | $\left. \begin{array}{l} \text{Lαl, Lil.} \\ \text{Lal, Lol.} \\ \text{Lel, Lɜl.} \end{array} \right\}$ | $\left. \begin{array}{l} \text{Rαl, Ril.} \\ \text{Ral, Rol.} \\ \text{Rel, Rɜl.} \end{array} \right\}$ |
| $\left. \begin{array}{l} \text{Lαr, Lir.} \\ \text{Lar, Lor.} \\ \text{Ler, Lɜr.} \end{array} \right\}$ | $\left. \begin{array}{l} \text{Rαr, Rir.} \\ \text{Rar, Ror.} \\ \text{Rer, Rɜr.} \end{array} \right\}$ | | |

5. *Adverbs* may be expressed by Monosyllables, with the initial Letter M. after this manner ;

| | | | | |
|---------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|
| $\left. \begin{array}{l} \text{Mα, Mi.} \\ \text{Ma, Mo.} \\ \text{Me, Mɜ.} \end{array} \right\}$ | $\left. \begin{array}{l} \text{Mal, Mil.} \\ \text{Mal, Mol.} \\ \text{Mel, Mɜl.} \end{array} \right\}$ | $\left. \begin{array}{l} \text{Mar, Mir.} \\ \text{Mar, Mor.} \\ \text{Mer, Mɜr.} \end{array} \right\}$ | $\left. \begin{array}{l} \text{Mas, Mis.} \\ \text{Mas, Mos.} \\ \text{Mɛs, Mɜs.} \end{array} \right\}$ | $\left. \begin{array}{l} \text{My.} \\ \text{Myl.} \\ \text{Myɜ.} \end{array} \right\}$ |
|---------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|

6. *Conjunctions* may be expressed by Monosyllables, with the Initial Letter N, after this manner ;

| | | | |
|---------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|
| $\left. \begin{array}{l} \text{Nα, Ni.} \\ \text{Na, No.} \\ \text{Ne, Nɜ.} \end{array} \right\}$ | $\left. \begin{array}{l} \text{Nαl, Nil.} \\ \text{Nal, Nol.} \\ \text{Nel, Nɜl.} \end{array} \right\}$ | $\left. \begin{array}{l} \text{Nαr, Nir.} \\ \text{Nar, Nor.} \\ \text{Ner, Nɜr.} \end{array} \right\}$ | $\left. \begin{array}{l} \text{Nαs, Nis.} \\ \text{Nas, Nos.} \\ \text{Nes, Nɜs.} \end{array} \right\}$ |
|---------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|

The

The more servile Particles are of three kinds; *Articles, Modes, Tenses.*

1. The *Articles* being but two, may be thus expressed, $\left. \begin{matrix} \text{el.} \\ \text{al.} \end{matrix} \right\}$

2. The *Imperative Mode*, according to its threefold difference of *Petition, Perswasion, Command*, may be expressed by these Diphthongs, lo, lɔ, ly.

The *Secondary Modes*, by Diphthongs or Triphthongs, according to their differences of *Absolute* or *Conditional*. So the Mode of

| | | | |

|------------------------------------------------------------------------------------------------------------------|---|--------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|

3. The *Tenses, Past, Present, and Future*, may be expressed by these Diphthongs, ɔl, ɔy, ɔyl.

The *Transcendental Particles*, to be added by way of Composition in the termination of words, may be expressed by these Syllables,

| | | | |

|---------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|

In which Constitution, the Marks made use of before, either for *Prepositions, Adverbs, or Conjunctions*, have the same Syllables assigned to them.

It is here to be noted, that as *Numbers* are provided for in *writing*, by distinct Characters from the rest, so should they likewise have some suitable provision in *speaking*. And because there are two waies before suggested for the expression of Numbers by *writing*, namely, either by *words at length*, or by *Figures*, there should therefore be some provision answerable to each of these for *speaking*.

1. The *Words at length* for the nine Digits, are to be made off from the Tables after the same manner as all other Species are; and as for the other Numbers above this, *viz.* Ten, Hundred, Thousand, Million, they may be expressed by adding the Letters L, R, M, N. after the last Vowel; according to these Examples:

CHAP. IV.

An Instance of the Philosophical Language, both in the Lords Prayer and the Creed. A Comparison of the Language here proposed, with fifty others, as to the Facility and Euphonicalness of it.

AS I have before given Instances of the Real Character, so I shall here in the like method, set down the same Instances for the Philosophical Language. I shall be more brief in the particular explication of each Word; because that was sufficiently done before, in treating concerning the Character.

The Lords Prayer.

- Our 1. (Hal) This Dipthong (αl) is assigned to signify the first Person plural amongst the Pronouns, viz. *We*. The Letter *b* prefixed to it, doth denote that Pronoun to be used possessively, viz. *Our*.
- Parent 2. (Coba) Co doth denote the Genus of *Oeconomical Relation*; the Letter (b) signifying the first difference under that Genus, which is Relation of Consanguinity; the Vowel (a) the second Species, which is *Direct ascending*; namely, *Parent*.
- Who 3. (ʒʒ) This Dipthong is appointed to signify the second of the compound Pronouns, *Who*, personal; or *Which*, Real.
- Art 4. (ia) This dipthong is appointed to signify the present tense of the Copula (*est*) and being spoken of the second person, is to be rendered *Art*.
- In (ril) is a *Preposition*, the first Opposite of the fourth combination; and therefore must signify (*in*.)
- Heaven 6. (dad) The Syllable (da) is appointed to signify the Genus of *World*; the addition of the Letter (d) doth denote the second difference under that Genus, which is *Heaven*.
- Thy 7. (ha) The Vowel (a) is assigned to signify a Pronoun of the singular number, and second person. The Letter (h) before it, doth denote it to be understood possessively, and to signify (*Thy*) or (*Thine*.)
- Name 8. (bαbi) The Syllable (bα) doth denote the Genus of *Transcendental General*. The Letter (b) doth denote the first difference, and the Vowel (i) the fourth Species, which is *Name*.
- May it be 9. (lo) This Dipthong is appointed to signify that kind of *Imperative Mode* (as it is commonly styled) which is by way of Petition; the sense of it being, *I pray that it may be*.
- Hallowed 10. (Sʒymtα (Sy) is put for the Genus of *Ecclesiastical Relation*. The Consonant (t) for the fifth difference, and the Vowel (α) for the first Species, which according to the tables, is, *Consecration*, or *Hallowing*. The Addition of the Vowel (ʒ) to (S) doth signify the notion of *Adjective*; and the addition of the Letter (m) at the end of the first

first Syllable, signifies the *Passive* voice, viz. *Hallowed*.

11. (ha.) as numb. 7.

Thy

12. (Salba) (Sa) is *Civil Relation*; (b) denotes the first difference, which is degrees of persons; and (a) is the second species, which, according to the tables, is *King*; the addition of (l) to the first Syllable, doth denote a word of *Action*, viz. *Regnation*.

I am sensible that this Contrivance for the Language is not ordered (as to the facility and pleasantness of the sound) to so good an advantage as it might have been upon further consideration and practise: But as it is, I think it may (even in these respects) come into comparison with any of the Languages now known. For the better trial of which, I shall give several Instances of the Lords Prayer, as it is rendered in fifty several Languages, and written in our common Letter; most of which, I have taken out of *Gesner*, *Mithridates*, and *Megiserus* his *Specimen*, as they have collected and lettered them to my hands. For the rest, I am beholding to other Books, and the assistance of some particular Friends.

It would be convenient, that every one of these Instances should be Philosophically Lettered, according to the true pronunciation used in each Language; but this being a thing of too great difficulty, I do not attempt it. 'Tis probable that the doing of this, would make most strange Languages seem more harsh and uncouth, than now they do; as appears by that Instance of the English, this way written, which I have subjoyned in the last place, for the more accurate comparing it with the Philosophical Language.

In the comparing of these Languages, it may be granted that some few words of each Language may seem preferable to others in this: But take it altogether, and in the whole, and it may at least stand in competition with the best of them, as to its facility and pleasantness. 'Tis most likely, that the generality of Readers will be apt in the comparing of these Instances, to give the precedence to those Languages they are acquainted with. I should desire no more from them, but that they would be content to permit this new Language to come in the next place, which would be a sufficient testimony for it.

But then for the *Philosophy* of this Language, it hath many great advantages above any other. Every *Word* being a description of the thing signified by it; Every *Letter* being significant, either as to the *Nature* of the *Thing*, or the *Grammatical Variations* of the *Word*, which cannot be said of any of the rest; besides the constant Analogy observed in all kind of *Derivations* and *Inflexions*.

Directions for the more easie Learning of this Character and Language, together with a brief Table containing the Radicals, both Integrals and Particles; together with the Character and Language by which each of these is to be exprest.

IF any Man shall think it worth his time and pains to learn this Character; the most facil and natural order to be observed in this, will be, to begin with the 40 common Heads or *Genus's*, which should be learnt out of that General Scheme, Part II. Chap. I. where there is exprest some reason of their order; the understanding of which will much facilitate the fixing of them in the memory.

Next to these, he may proceed to the *Differences* belonging to each *Genus*, which though they are in the Character exprest by that numerical institution of First, Second, and Third, &c. yet are they to be committed to memory from their real significations. So the First, Second, and Third differences under the *Genus* of *Beast*, are to be learned and remembered, not as First, Second, and Third, &c. but as *Whole-footed*, *Cloven-footed*, and *Clawed*, &c. (not *Rapacious*, *Rapacious Dog-kind*, *Rapacious Cat-kind*) and *Oviparous*. Thus when we see any of the differences belonging to *Measure*, we are not to name them by their numerical order of 1, 2, 3, 4, 5, 6, but by the things which they denote, as *Measure of Multitude*, *Magnitude*, *Gravity*, *Valour*, *Duration*, *Age*. And to this end all the differences are to be learned out of the larger Tables, where there is some reason to be seen for the order of most of them.

Next to these, the several *Species* are to be learned, belonging to each *Difference*, at least so many of them as are like most frequently to occur in discourse. As for the various kinds of *Meteors*, *Stones*, *Herbs*, *Shrubs*, *Trees*, *Exanguious Animals*, *Fishes*, *Birds*, *Beasts*, and the kinds of *Diseases*, though they are to be provided for in the Tables, that they may be written when there shall be occasion for the mention of them; yet 'tis not ordinarily necessary to commit them all to memory, because those who are most expert in any Language, may not yet be able to remember all the names of such things. But as for such *Species* as are fit to be remembered, they are to be learned out of the first and larger Tables, where they are each of them described and determined, as to their primary significations, and some reason is attempted of their number and order, the understanding of which will make them more easily remembered.

After these the Particles are to be learned, which should be likewise out of the first Tables, where the meaning of them is described and determined.

But for the better helping of the memory in cases of doubt or

forgetfulness, it may be proper to have recourse to the Synopsis here adjoined, by which it is easie at the first or second view to find out the true place of any *Integral* or *Particle*, together with the *Derivations* and *Inflexions* belonging to the *Radicals*.

'Tis here to be noted concerning this briefer Scheme or Table, that in several of the *Genus's* pertaining to Substance, there are only some few of the first *Species* or *Pairs* of them mentioned under each difference as instances; the rest being to be sought for in the larger Table. Those that are paired by way of opposition, are put in a distinct Character.

The first Part, and the former half of the second, do contain a Philosophical Dictionary for all *Integral*, *Radical* words: The remaining Part doth contain all the *Particles* necessary to Speech, besides a Summary of the whole Grammar, with reference both to the Character and Language; which I conceive to be so plainly set down, as not to need any particular explication.

But now because there is no more general inclination amongst persons of all Ages and Qualities, then that of Gaming, which Men can continue at for a long time with much pleasure, and are least apt to be weary of: Therefore the reducing of the Learning of this Character to a Game, may be a special help and furtherance to it. In order to which it were not difficult to shew, how it might be brought into several Games, like to those either at Dice or Cards. Of the former of which I had once thought to have given an instance, with relation to the *Particles*, by which it would be easie to understand how the like might be done for all the rest: But upon second thoughts I do at present forbear it.

CHAP. VI.

The Appendix, containing a comparison betwixt this Natural Philosophical Grammar, and that of other instituted Languages, particularly the Latin, in respect of the multitude of unnecessary Rules, and of Anomalisms. Concerning the China Character. The several Attempts and Proposals made by others towards a new kind of Character, and Language. The advantage in respect of Facility, which this Philosophical Language hath above the Latin.

HAVING thus briefly laid the Foundations of a *Philosophical Grammar*; I am in the next place to shew the many great advantages both for *significancy, perspicuity, brevity*, and consequently *facility*, which a Character or Language founded upon these Rules, must needs have above any other way of communication, now commonly known or used. And because the *Latin* doth in these parts of the world supply the place of a Common Tongue, therefore I shall chiefly insist upon the comparison with that.

1. As for the first part of Latin Grammar concerning *Orthography*, it will be needless here to speak any thing further to this, having before mentioned the imperfections of that Alphabet; the *redundancy* of it in some respects, and the *deficiency* of it in others; the incongruity of giving several powers to the same Letters, &c. which particulars are further manifested by what hath been delivered concerning natural Orthography.

As to the other parts of the Latin Grammar ^{{ *Etymol.*} I shall endeavour to prove that they do exceedingly abound with unnecessary Rules, besides a vast multitude of *Anomalisms* and exceptions, which must needs render it exceedingly perplexed and difficult to the Learner. _{{ *Syntax.*}

2. In the second part concerning *Etymology*. 1. There is a great imperfection as to the *just number* and *true sense* of Radical words.

1. In some respects *too many*, by reason of the *Synonima's* which do very much abound in it.

2. In other respects *too few*. There is a common word for the notion of *Parent*, abstracted from either Sex, *Father* or *Mother*. And so for *Child, Liber*. But none for the relation of *Brother, Sister, Husband, and Wife, Uncle, Aunt, Nephew, Niece, &c.* And so for the names of several Plants, and Living Creatures of every kind, which no Dictionary doth sufficiently express. And though the *Latin* doth provide for some of those notions expressed by the Transcendental Particles, yet is not their number sufficient, there being several others (not provided for) which may as conveniently be in like manner express'd. And, which is another great incongruity, as to the indistinctness of those which are thus provided for; neither are all words

of the like *notion* expressible by such *terminations*, nor doth the same *termination* always express the same *notion*.

3. The words of it are exceeding *Equivocal*, scarce one amongst them which hath not divers significations, either *absolutely*, or *in phrase*, or *both ways*; from which Homonymy, those Particles which occur most frequently in discourse are not free, *ut, pro, &c.*

2. There are many improper and preternatural Rules concerning *Inflexion*.

1. As to *Noun Substantives*, both in respect of $\left. \begin{array}{l} \text{Genders,} \\ \text{Cases,} \\ \text{Declensions.} \end{array} \right\}$

1. In respect of *Genders*, which are needlessly multiplied, there being but two in nature; nothing properly having *Gender* but what hath *Sex*. That which is called the *Neuter*, doth by its very name signify that it is no *Gender*; and besides these *Genders* are irrationally applied.

1. Things that have *no Sex* are expressed by words,

$\left. \begin{array}{l} \text{Masculine, } \textit{Gladius, Arcus,} \\ \text{Fœminine. } \textit{Vagina. Sagitta.} \end{array} \right\}$

2. Things that have *Sex* are denoted, 1. Sometimes by words of the *Neuter* Gender, *Scortum, Amasum, &c.* 2. Those words whose significations are common to Male and Female, are sometimes rendered only in the *Masculine* Gender, as *Fur, Latro, Homicida, &c.* and sometimes only in the *Fœminine*, as *Proles, Soboles, &c.* and sometimes only in the *Neuter*, as *Animal, Mancipium, &c.* 3. Many words which signify the same thing, and are *Synonymous*, are yet used in several

Genders $\left. \begin{array}{l} \textit{Appetitus,} \\ \textit{Aviditas,} \\ \textit{Desiderium.} \end{array} \right\} \left. \begin{array}{l} \textit{Sermo,} \\ \textit{Oratio.} \end{array} \right\} \left. \begin{array}{l} \textit{Domus,} \\ \textit{Domicilium.} \end{array} \right\} \left. \begin{array}{l} \textit{Crinis,} \\ \textit{Coma.} \end{array} \right\} \left. \begin{array}{l} \textit{Capillus,} \\ \textit{Caesaries,} \end{array} \right\} \textit{&c.}$

He that would see more of this kind, may consult *Nomius Marcellus, de indiscretis generibus*: Where he reckons up abundance of words, which according to Ancient Authors, were used both in the *Masculine, Fœminine, and Neuter* Gender.

2. In respect of *Cases*, which are not so conveniently express'd by varying Nouns with *Terminations*, which is the Latin way as by placing them in the natural order of *Construction* and *Affixing Prepositions* to them (as was said before.)

3. In respect of *Declensions*, of which the Latin hath five, which add no small difficulty and trouble to the learning of that Language: Now if the expression of *Cases* by varying the *Termination* be unnecessary and inconvenient, these are much more so; because they are but several ways of varying such *Cases*.

2. As to *Noun Adjectives*, neither *Number*, nor *Gender*, nor *Case*, nor *Declension* do naturally pertain to them; but they are sufficiently qualified in all those respects by the *Substantives* to which they belong: As for their *Inflexion* by *degrees of comparison*, which is proper to them; 'tis not so natural that these should be expressed in the *Terminations* of the words, as by *Auxiliary Particles*. The *Adverbs* of *more*, and *most*, *less*, and *least*, being upon other accounts necessary, and sufficient to express this notion in *Adjectives*, therefore the other way must needs be superfluous. Which is likewise applicable

cable unto the comparison of *Participles*, and *derived Adverbs*.

3. As to *Verbs*, there are very many unnecessary Rules concerning

their $\left\{ \begin{array}{l} \text{Kinds,} \\ \text{Inflection,} \end{array} \right.$ in respect of $\left\{ \begin{array}{l} \text{Conjugations,} \\ \text{Number,} \\ \text{Persons and Tense in the Termination,} \\ \text{Modes,} \\ \text{Gerunds,} \\ \text{Supines.} \end{array} \right.$

1. For their *Kinds*; 'tis not according to the Philosophy of speech to distinguish *Verbs* into *Active*, *Passive*, *Neuter*, *Deponent*, and *Common*, or into *Personal*, and *Impersonal*.

1. Those sorts of *Verbs* which they call *Active*, *Passive*, *Neuter*, and which are properly to be expressed by the Verb *Sum*, and the Ad-

jective $\left\{ \begin{array}{l} \text{Active,} \\ \text{Passive,} \\ \text{Neuter,} \end{array} \right.$ are all the distinct kinds of *Verbs*.

2. As for those that are stiled *Deponents* and *Common*, they are acknowledged to be but irregularities and kinds of *exceptions* from the common rule of *Verbs*.

3. All *Verbs* are naturally capable of *Persons*, though in some *Verbs* the Latin doth not admit this, 'Tis proper to say, I ought, I am ashamed, &c. as well as *Oportet*, *Pudet*. Scaliger de causis L. L. cap. 124.

2. As to the inflexion of *Verbs*.

1. The several *Conjugations*, of which there are four in Latin, are such a preternatural incumbrance, as *Declensions* are in *Nouns*, being but several ways of varying those *Terminations* or *Cases* of the Verb, which in themselves are needless and troublesome.

2. *Number* doth not naturally belong to *Verbs*, but only *quia Verbum à nomine dependet*, as *Scaliger* speaks; upon which account it might as well have *Gender* too, as it is in the *Hebrew*, *Syriack*, *Chaldee*, *Arabick*, *Æthiopick*, which yet we account very superfluous and improper. Ibid. cap. 127.

3. The expression of the *Persons* and *Tenses* by the *Terminations* of the words, is both unnecessary and improper, because there is in other respects a necessity of using those *Pronouns* by which these *Persons* are expressed. And supposing that a man must therefore learn *Ego*, *Tu*, *Ille*, *Nos*, *Vos*, *Illi*. It would much facilitate and contract *Grammatical Rules*, if the *Verbs* themselves might remain invariable. The same may likewise be said of *Tenses*, which may properly be expressed by auxiliary *Particles*.

3. For *Modes*, (to say nothing of the distribution of them, which is quite irrational) the expression of the *Optative* and *Subjunctive* is most naturally made out by Auxiliary *Particles*. That which is called the *Infinitive Mode*, should according to the true Analogy of that speech be stiled a *Participle Substantiva*.

There hath been formerly much dispute amongst some Learned Men, whether the notion called the *Infinitive Mode*, ought to be reduced according to the Philosophy of speech. Some would have it to be the prime and principal Verb, as signifying more directly the notion of *Action*; and then the other varieties of the Verb, should be but the *Inflections* of this. Others question whether the *Infinitive Mode*

De causis L. L.
Cap. 117.

De Analogia
lib. 3. cap. 8.

Plaut. Capt.

Mode be a Verb or no, because in the Greek it receives Articles as a Noun. *Scaliger* in the stating of this question, concludes it to be a Verb; because it signifies with Time, but will not allow it to be a *Mode*, because it is without *Person* or *Number*. To which *Vossius* adds, that though it be not *Modus actus*, yet it is *Modus in potentia*, because it is resolvable into other Modes. e. g. *Lator me venisse*, (i.) *quod venerim*. And so are other Modes resolvable into this, *Est miserorum ut malevolentes sint & invidiant*, (i.) *malè velle & invidere bonis*.

All which difficulties will be most clearly stated by asserting it to be a *Substantive Participle*. For which this reason is to be given; because it hath all the signs both of a Noun Substantive and a Verb.

The Properties or *Criteria* whereby a Substantive is to be known are these four;

1. That it is capable of the Articles *A*, or *The*, to be prefixed before it, which is ordinary in the Greek for the *Infinitive Mode*, and doth well enough agree to the natural notion of it in other Languages.

2. 'Tis capable of that kind of Obliquity by prefixing Prepositions, which is commonly stiled variation by *Cases*. The *Gerunds* in *di*, *do*, *dum*, being in the true notion of them, but the *Cases* of that which we call the *Infinitive Mode*.

3. It may be joined in construction with *Adjectives* or *Pronouns Possessive*.

4. 'Tis capable of *Number* in the natural notion of it, though it be not so used in Languages; the words *Actiones* and *Lectiones*, being but the Plural number of *Agere*, *Legere*.

The signs or Properties whereby a Verb may be known, are these three;

1. In our English tongue the Particle (*To*) may be prefixed before it.

2. It signifies with time.

3. It hath two voices, *Active* and *Passive*.

And therefore being both a *Substantive*, and a *Verb*, it should according to the Theory of the Latin be stiled a *Participle Substantive*. To which may be added, that it is in the true notion of it, frequently resolvable into a Noun Substantive, as in these Instances. *Virtus est vitium fugere*, (i.) *Fuga vitii est virtus*. *Màgis paratus servire quam imperare*. (i.) *servituti quam imperio*. *Dignus Amari*. (i.) *Amore*.

As for the *Imperative Mode*, that is in this respect defective, because it makes no distinct Provision for those different notions to be expressed by it, viz. *Petition*, *Perswasion*, *Command*.

Vossius de A-
nalog. Lib. 3.
cap. 9. and 11.

5. *Gerunds* and *Supines* are unnecessary inflexions of Verbs, the notion of them being expressible by the *Infinitive Mode*, whose *Cases* they are. *Venio Spectatum* (i.) *Spectare*. *Turpe dictu* (i.) *dici*. *Cæsar venit ad oppugnandum urbem* (i.) *oppugnare*. And sometimes by a Noun that signifies Action. *Defessus ambulando* (i.) *ambulatione*.

De Lingua
Latina, Lib. 5.

I cannot here omit the mentioning of what *Varro* hath observed, that the inflexions of a Verb through its several voices of *Active*, *Passive*, together with *Modes*, *Tenses*, &c. amount to about five hundred several *Cases* of inflexion. Now there being four distinct ways of conjugating Verbs, these variations may upon that account be reckoned to be two thousand, the learning of which (though all

Verbs

Verbs were *regular*) would be no small labour and difficulty. But then consider the vast multitude of *Anomalisms* and exceptions in the inflexions of Verbs, and that will more than double this difficulty and labour.

2. As to the *derivation* of Latin words; whereas the Radix should according to *Philosophy* be only a *Noun Substantive*, 'tis here sometimes a *Verb*, a *Participle*, an *Adverb*, a *Preposition*, which is unnatural and improper. And then besides, there is no certain Analogy amongst these; à *Scribo*, *Scriptor*; but they do not say, à *Bibo*, *Biptor*, but *Bibax*, &c.

3. The Rules of *Composition* are not fixed to any certain Analogy. 'Tis *Ænobarbus*, not *Ænibarbus*, and yet they say, *Magniloquus*, not *Magnoloquus*. The same Prepositions, when in Composition, do sometimes *encrease* and augment the force of the word,

| | | | |
|----|-----|---|--------------------------------------|
| as | in | { | <i>Infractus, Incauus, Incurvus.</i> |
| | per | { | <i>Perfidus, Perfrutor.</i> |
| | de | { | <i>Deamo, Demiror.</i> |
| | ex | { | <i>Exclamo, Exaggero.</i> |
| | dis | { | <i>Discupio.</i> |

Again, the same Prepositions do sometimes in Composition import a denial or privation of the sense of the word.

| | | | |
|--|-----|---|----------------------------|
| | in | { | <i>Indoctus, Improbus.</i> |
| | per | { | <i>Perfidus, Pervicax.</i> |
| | de | { | <i>Demens.</i> |
| | ex | { | <i>Excors, Exanguis.</i> |
| | dis | { | <i>Diffido.</i> |

So the Particle *re* doth in Composition sometimes signifie *repetition*, as *retego*; and sometimes *privation*, as *revelo*, than which nothing can be more irrational and incongruous.

Unnecessary Rules in the Latin Syntax.

That is called *figurative* and irregular *Syntax*, which customary use, and not any natural propriety doth make significative; wherein there are some words always either *redundant*, or *deficient*, or *transposed*, or *changed*, from their proper notion. These *Phraseologies* are to be accounted an imperfection of Language, and one degree added to the curse of the confusion; because they do exceedingly encrease the difficulty of Learning Tongues, and do not adde to the brevity or perspicuity of expression, but rather cumber and darken it with ambiguities.

The regular *Syntax* of the Latin doth consist in { *Concord,*
Regimen.

1. *Concord* is the agreement of several words in some accidents and circumstances; as betwixt, 1. *Substantives* and *Adjectives*. 2. *Two Substantives*. 3. *Substantives* and *Verbs*. 4. *Antecedent* and *Relative*. Concerning which there are so many difficult perplexed Rules, as are enough

enough to tire out and discourage any young Learner, most of them being founded upon such principles as are not natural to the Philosophy of speech.

3. The *Regimen* of words doth concern their government of others in respect of } *Case,*
 } *Mode.*

1. There are a great multitude of Rules that concern *Substantives, Adjectives, Pronouns*, in reference to their governing of the *Genitive, Dative, Accusative, Ablative Case*.

2. So for *Verbs*, that some of them must govern the *Nominative*, others the *Genitive*, others the *Dative*, others the *Accusative*, and others the *Ablative Case*; some promiscuously both { *Genitive,*
 } *Accusative,*

{ *Genitive,* { *Accusative,* Besides the several Rules concerning those
 } *Ablative,* { *Ablative.* divers Cases which may precede the *Infinitive Mode*; some words requiring a *Nominative*, others a *Dative*, others an *Accusative*. To which may be added those various Rules about *Gerunds, Supines, Participles*, in reference to the several Cases, *Genitive, Accusative, Ablative*, governed by them.

3. There are several Rules that concern the *Regimen* of *Adverbs*, both as to { *Cases, Nomin. Gen. Dat. Accus. Ablat.*
 } *Modes, Indicat. Imperat. Optat. Subjunct.*

4. Other Rules refer to the *Regimen* of *Prepositions*, some of which govern the *Accusative*, others the *Ablative Case*, and some both.

5. Other Rules refer to the *Regimen* of *Conjunctions*, both as to *Cases* and *Modes*.

6. Others to *Interjections*, divers of which are said to govern the *Nominative, Dative, Accusative, Vocative Case*.

Beside these for Syntax, there is a great multitude of Rules in the Latin *Prosodia*, about the *Accenting* and *quantity* of words: whereof some are *General*, referring to the nature of Letters and Syllables; others more particular, concerning the first or middle Syllables in any word, amongst which there is no certain and constant Analogy: They say, *Hexrem, & Pratorem*.

It cannot be denied but that all these Rules are necessary to the Latin Tongue; but this argues the imperfection of that Language, that it should stand in need of such and so many Rules as have no foundation in the *Philosophy of speech*. I am not ignorant that our Learned *Verulam*, speaking concerning the inflexions used in the more *Ancient* Languages by Cases, Modes, Tenses, &c. in which the *modern* Languages are very sparing, supplying them by *auxiliary particles*; from thence infers, *ingenia priorum seculorum nostris fuisse multo acutiora & subtiliora*. But with reverence to the judgment of that incomparable Man, though it must be granted, that the Language being so, there was great wit in reducing the inflexions of words to such Rules of Art; yet if these Rules be not *necessary* to Language, and according to *nature*, but that words may signify sufficiently and in some respects better without them, then there is greater judgment shewed in laying them aside, or framing a Language without them.

If all these Rules were *general* and *constant*, yet the multitude and variety

variety of them would adde much difficulty to the *Latin*: But now the exceptions and *Anomalisms* to these Rules are so very numerous, that there is much more pains required for the remembring of them, than of the Rules themselves; insomuch that many eminent Gram-
 marians have written against *Analogy*, both in Greek and Latin.

I shall offer a very brief view of them.

As to the inflexions of Nouns in respect,

1. Of *Number*; there are abundance of *Substantives*, whose sence and signification is naturally capable of both *Numbers*; some of which want a *singular*, others a *plural* number.

Vossius de Anal. Lib. 1. Cap. 39. ad Cap. 44.

2. In respect of *Gender*; the Rules to discover the *Genders* of words by their Terminations, are not without multitude of exceptions. There are divers words that are of one *Gender* in the *singular*, and another in the *plural* number. *Tartarus, Tartara. Locus, Loci, & Loca. Carbasus, Carbasa. Supellex, Supellecilia. Cælum, Cæli. Epulum, Epulæ, &c.*

3. In respect of *Cases*; some words abound in *Cases*. *Avaritia, Avarities. Araneus, Aranea. Antidotus, Antidotum, &c.* Others have no *Cases*, and are stiled *Aclita*, or *Aptota*; as *Sinapi, Pondo, Nequam, Cornu, Quatuor, Quinq; Sex, Septem, Octo, Novem, Decem, Vingtinti, Triginta, &c. Centum, Mille, &c.* Others called *Monoptota*, have but one oblique *Case*, which in some is the *Genitive*, as *Hujusmodi, Ejusmodi*; in others an *Accusative*, as *Inscias*; in others the *Ablative*, *Promptu, Jussu, Injussu, &c.* Other Nouns have but two *Cases*, and are therefore stiled *Diptota*, as *Neceffe, Necessum; Suppetiæ, & Suppetias*. And there are divers others that are *Triptota, Tetraptota, Pentaptota*.

Vossius de Anal. Lib. 1. Cap. 47. 48. Lib. 2. à 1° ad viceffimum caput.

4. In respect of *Declensions*; the Terminations of the *Cases* both in the *singular* and *plural* number in divers *Declensions* are not without many exceptions, as *Musis, Filiabus, &c.* Some words are of several *Declensions*, as *Pascha, Paschæ, Paschatis*.

2. As to the *inflexions* of *Adjectives* by the degrees of comparison; there are many words which signifie quality, and are naturally capable of *increase*, and *decrease*, and consequently of this inflexion, which are yet exempted from it: So *Cicur, Optimus, Claudus, Egenus, Almus, &c.*

Ibid. Lib. 2. Cap. 22.

Some want only a *Positive*, as *Prior Primus, Uterior Ultimus*: Others a *Comparative*, as *Novus Novissimus, Falsus Falsissimus, Pius Piissimus*. Others a *Superlative*, as *Juvenis Junior, Senex, Senior, &c.* Besides that those which are inflected through all degrees, have several irregularities in the manner of it; *Similis Simillimus*, not *Similissimus*. *Bonus, Malus, Magnus, Parvus*.

3. As to the inflexion of *Verbs*; many *Verbs* of the *Active* voice are sometimes used in a *Passive* signification, and several others of the *Passive* voice used *Actively*. The exceptions about the *Conjugations* of *Verbs*, especially those referring to the *præter tense* and *supines*, are so exceeding numerous, that it is not easie to recite them: Some are wholly without them, others have them without any *Analogy*; as *Fleo Flevi, Sero Sevi, Fero Tuli. Ubi à Dissimilibus Similia, à Similibus Dissimilia*.

Ibid. Cap. 3. 5. Ibid. à Cap. 19. ad Cap. 47.

Besides the difficulty and perplexedness of these Characters, there doth not seem to be any kind of Analogy (so far as I am able to judge) betwixt the shape of the Characters, and the things represented by them, as to the Affinity or Opposition betwixt them, nor any tolerable provision for necessary derivations.

Theoph. Spizelius de Re literaria Sinesium, lately Published 1661. Sect. 6. Histor. Chin. Part 2. Cap. 2.

3. To this may be added the great *Equivocalness* of the Language, every word having divers significations, some of them no less than twenty or thirty several senses; upon which account *Alvarez Semedo* affirms it to be more difficult than any other Language in the World.

Lingua Ananimitica, cap. 2.

4. The *difficulty* of pronouncing it, every Syllable (as this of *Ko*) hath no less than ten several ways of pronunciation, as saith our Author; and it hath more than thirty several significations in the *Anamitish* Language, as *Alexander Rhodes* observes in his *Dictionary*. Such various Accents they are necessitated to make use of, as other people cannot imitate. The Syllable *Ba*, according to its various Accents, hath six several senses, of no kind of affinity or nearness to one another. And the most expert Men among themselves are not able so exactly to distinguish in pronunciation, without using several attempts and repetitions to explain what they mean; or sometime by making the Figure of the Character they would express with their Fingers in the Air, or upon a Wall, or Table.

Hist. Part 1. Cap. 6.

5. Though in some particulars they seem to found their Character upon the *Philosophy of things*, yet 'tis not so in others. The Character put for a precious Stone (saith *Semedo*) must be used with additions to it for several kinds of *Gems*, as *Pearls*, &c. So the Character for any kind of *Tree*, must have joined to it, the Character for *Wood*; and the letter that signifies *Metals*, must be annexed to the Character of *Iron*, *Copper*, *Steel*, &c. The meeting with which passage, was no small satisfaction to me, in reference to that way which I had before pitched upon for the most natural expression of things. But this (saith he) is no constant Rule amongst them. It should seem to be observed only in some few *species* of nature which are most obvious, there being reason to doubt whether they had any such general Theory of Philosophy, as might serve for all other things and notions.

Ibid.

In this it is to be acknowledged that they have a great advantage above the Latin, because their words are not declined by Terminations, but by Particles, which makes their Grammar much more easie than that of the Latin.

Mr. Beck of Ipswich.

To this I might adde something concerning the advantage of this Philosophical way, above those attempts towards a Universal Character which have been made by others. That of *Marks* or *Letters* by *Cicero*; that of *numbers* by an Ingenious Country-man of our own, followed since by *Beckerus*, and by *Athanasius Kircher*; together with that other attempt towards an Universal Language, by *Philip Labbé*. All which are in this one respect defective, because they are not Philosophical; upon which account they are much more difficult, and less distinct.

These things being premised concerning the many *needless Rules*, and great variety of *exceptions* in the Latin; it will not be very difficult to make a comparison betwixt that, and the Character and Language here proposed.

For the right estimating of the difficulty which there is in the Learning of any Language, these two things are to be enquired into.

1. The

1. The *multitude of words.* And 2. The *Grammatical Rules* belonging to such a Language.

1. As to the first of these, *Hermannus Hugo* asserts that no Language hath so few as 100000 words; and *Varro* is frequently quoted by divers Learned Men, as if he affirmed that there are in the *Latin* no less than *five hundred thousand*. But upon enquiry into the scope of that place they relate to, it will appear that he doth not there design to give an account of the just number of words in the *Latin*, but only to shew the great variety which is made by the *Inflexion* and *Composition of Verbs*: To which purpose the first thing he lays down is, That there are about one thousand Radical Verbs in the *Latin*. And then Secondly, That every Verb in the Declensions of it, hath about five hundred several varieties or Cases of Inflexion, which make up the number of five hundred thousand. And then Thirdly, He supposeth each of these to be compounded with nine Prepositions, as for instance, the word *Cessit, Reccessit, Accessit, Abscessit, Incessit, Excessit, Successit, Decessit, Concessit, Processit*; this will raise the whole number to *five millions*: in which account he reckons only the Cases and Compositions of Verbs, and takes no notice of the Particles of speech, nor such other words as are not radically Verbs, which are very numerous.

De origine
Scribendi,
Cap. 4.
Bp Walton,
Davies.
Boxhorrius.

Of all other Languages, the *Greek* is looked upon to be one of the most copious; the Radixes of which are esteemed to be about 3244. But then it doth exceedingly abound in *Composition*, in which the *Latin* Tongue being more sparing, must therefore upon that account have more Radicals. What the particular number of these may be, is not easie to determine; because Learned Men do not agree about many of them, whether they are *Radicals*, or *Derivatives*. They may be by moderate computation estimated to be about *ten thousand*, most of which are either *absolutely*, or in *phrase*, or *both ways* equivocal. *Notavi ex Varrone, Nounio & Festo, non extare vocabulum apud Latinos quod plures significaciones non habet*, saith *Campanella*. Many of them have no less than twenty distinct significations, and some more. Now for every several sense, we may justly reckon so many several words, which will much augment the former number. But suppose them only to treble it, and then the *Latin words* are to be reckoned thirty thousand.

Grammat.
Philosoph.
Lib. 1. Cap. 1.

2. Now for the *Latin Grammar*, it doth in the common way of Teaching take up several of our first years, not without great toyl and vexation of the mind, under the hard tyranny of the School, before we arrive to a tolerable skill in it. And this is chiefly occasioned from that great multitude of such Rules as are not necessary to the Philosophy of speech, together with the *Anomalisms* and exceptions that belong to them; the difficulty of which may well be computed equal to the pains of Learning one third part of the words; according to which the labour required to the attaining of the *Latin*, may be estimated equal to the pains of Learning forty thousand words.

Now in the way here proposed, the words necessary for communication are not three thousand, and those so ordered by the help of natural method, that they may be more easily learned and remembered

bred than a thousand words otherwise disposed of; upon which account they may be reckoned but as one thousand. And as for such Rules as are natural to Grammar, they were not charged in the former account, and therefore are not to be allowed for here.

So that by this it appears, that in point of easiness betwixt this and the Latin, there is the proportion of one to forty; that is, a man of an ordinary capacity may more easily learn to express himself this way in one Month, than he can by the Latin in forty Months.

This I take to be a kind of Demonstration *à Priori*; and for an Argument *à Posteriori*, namely, from Experiment. Though I have not as yet had opportunity of making any tryals, yet I doubt not, but that one of a good Capacity and Memory, may in one Months space attain to a good readiness of expressing his mind this way, either in the Character or Language.

The Literal Figures, as I, II, V, &c. denote the order of the Differences under each Genus ; and the other Figures, the order of the the Species under each Difference. So the word *sheep* in the Dictionary is marked Be. II. 2. The meaning of which is, That the thing signified by that word is described in the Philosophical Tables under the Genus of BEAST, the second difference, and the second Species. And *Goat* is Be. H. 2. A. (*i.e.*) 'tis joyned as an Affinis to the same Species.

The Design of the Philosophical Tables is to enumerate and describe all kinds of *Things* and *Notions* : And the Design of this Dictionary, is to reckon up and explain all kinds of *words*, or *names* of things.

And that the Reader may the better understand the usefulness of having all words set down according to their different Acceptions, and by what kind of Analogy they come to be used in such various senses (which is one of the particular advantages of this Dictionary) I shall here select out of it one particular Instance, for each of these several kinds of words, *viz.* a *Substantive*, an *Adjective*, a *Verb*, a *Particle* ; by which it will be easie to understand any of the rest.

So the word *CORRUPTION*, according to that Notion of it which is

Primary and proper, doth denote the *Being*, or *Making* of a *thing*,
evil, or *worse*, whether by
 { *Admixtion* with that which is bad, and then it is of the same
 importance with the word *Defiling*.
 { *Privation*, as to a thing
 { *Being*, so corruption is *destroying*.
 { *Usefulness*, so corruption is *spoiling*.
Secondary, as applied to things
 { *Natural*, so Corruption will denote according to the Degree
 of it, either *Infection*, or *Decay*, or *Putrefaction*.
 { *Moral*, whether more
 { *General*, so it denotes the Evilness of the mind or manners,
 { *Unholiness*, *Viciousness*.
 { *Special*, so 'tis peculiarly applied to *Uncleanness* and *Bribery*.

So

To the Reader.

So the word *CLEAR*, may signifie either

{ *Entire of it self*; so clearly is *wholly*.

{ *Not mingled with others*; so Clear is *Simple*.

Specially not with worse; so Clear is *Pure*.

{ *Being free from impediments*, or not being hindered from

Being, doing, or receiving, which notion of Clear may be often exprest by the Transcendental mark of Perfective. There may be Instances of it given in every Genus; as particularly,

Quality, whether

 { *Natural Power*, so a clear sight or understanding is a good *f. or u.* It is applied to the

 { *Mind*, as a *clear Wit*, or *Spirit*.

 { *Body*, so we say one is clear of sickness or pain, has a clear skin, &c.

 { *Habit*, as a *clear Reputation*, that is a good *R.*

sp. Sagacity and Sincerity are thus called Clearness.

 { *Manners*, as *Clear Dealing*, that is *Candor* or *Frankness*.

 { *Sensible Quality*.

 { *Visible*, as *clear weather*, or *sky* or *water*, &c.

 { *Audible*, as *clear sound*.

 { *Sickness*, as *clear of any disease* (i. e.) not *Infected*, or not *Diseased*.

Relation.

 { *Civil*, as a *Clear Estate*.

 { *Judicial*, as *Clear of any Crime*.

 { *Military*, as *Clear Coast*.

 { *Ecclesiastic*, as *Clear of any Censure*.

 { *Being Done*, so Clear is *Ease*, or not difficult; *Being Known*, so Clear is *Plain* or manifest; *Being come to*, or *Passed through*, so Clear is *Accessible*, or *Passable*, or *Empty*.

So the word *DELIVER*, according to its primary sense, is the motion (Met.) or the passing of a thing, or of the Possession of it, or of the Power over it, from one to another. It is commonly used in relation either to the

{ *subject*, or thing deliver'd, whether

{ *Things*; so Deliver may signifie *Depositing*, *Paying*, *Resigning*.

{ *Words*, as to the

 { *Matter*, whether concerning

 { *Fact*, so Delivering is *Narration*

 { *Doctrine*, so Delivering is *Teaching*

 { *Manner*, whether

 { *Immediately* by

 { *Mouth*, so to deliver, is to *speak*.

 { *Pen*, so to deliver, is to *write*

 { *Mediately*, so Delivering is *Tradition*

Terms of this motion, either from a

 { Actively, whether
 { Involuntary, so Delivering is *yielding*
 { Voluntary, so Delivering is *Betraying*
 Worse condition to a better.

{ Temporal, whether by way of
 { Prevention, so Delivering is *Preserving*, or *Causing to escape*.
 { Remedy, from
 { Captivity, so to deliver, is to *Uncaptivate*.
 { Bondage, so to deliver, is to *Unslave*.
 { Prison, so to deliver, is to *Unimprison*.
 { Danger of Child-birth, so to deliver, is the
 Active of *Parturition*.
 Eternal, so delivering is *Redemption*.

So the Particle *BY*, is sometimes used in the sence of an
 { Integral, signifying the notion of *Digression* or *Accessory*, as on
 the *by*; and is of the same importance with such kind of Ne-
 gatives, as not *principal*, not *pertinent*, not *public*, not *ordi-*
nary; as a *By-way*: And sometimes 'tis used to denote a
 common speech implying something of contempt, as a *By-*
word.

{ Causal,
 { Efficient, *By such an Author*.
 { Instrumental, *Slain by the sword*.
 { Final, or end, *By reason of, &c.*
 { Local or Temporal, being sometimes used in that same
 sence with those other Prepositions.
 { Before, as, *By God, (i.) before God*.
 { At, as, *Come by, (i.) obtain, or come at*.
 { In, as, *by day, (i.) in the day time*.
 { Through, as, *by such a street, (i.) through such a street*.
 { Besides, as, *by the mark, (i.) besides*.

Adverbs denoting the Circumstance of Nearness, whether
 { Local. So *By*, or *hard by*, is near such a *Place*.
 { Temporal. So *By* and *by*, is nearness in *Time*, signifying
 future (dim.)

Besides

To the Reader.

Besides those Phrasologies wherein the Particle is used to signify the *Manner* of things, as, *By the By, By the Great, By Retail, By it self, &c.* Which Phrases are to be expressed by the Adverbs Neuter of *Digression, Aggregate, Segregate, Solitary, &c.* So those Forms of Speech, *By course, By the day, or day by day, By degrees, By turns, House by House, Tear by Tear, &c.* are to be expressed by the Adverbs of *Course, Day, Degree, Turn, House, Tear,* with the Transcendental Note of Segregate.
